References

1. Positive cash balances indicative of minimum compliance - subject to 2
2. Deduct cash and investment applications (defined) from cash balances
3. Indicative of sufficient liquidity to meet average monthly operating payments
4. Indicative of funded operational requirements
5. Indicative of adherence to macro-economic targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)
6. Realistic average cash collection forecasts as % of annual billed revenue
7. Realistic average increase in debt impairment (doubtful debt) provision
8. Indicative of planned capital expenditure level & cash payment timing
9. Indicative of compliance with borrowing 'only' for the capital budget - should not exceed 100% unless refinancing
10. Substantiation of National/Province allocations included in budget
11. Indicative of realistic current arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)
12. Indicative of realistic long term arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)
13. Indicative of a credible allowance for repairs & maintenance of assets - functioning assets revenue protection
14. Indicative of a credible allowance for asset renewal (requires analysis of asset renewal projects as % of total capital projects - detailed capital plan) - functioning assets revenue protection

References

1. All numbers to be expressed as whole numbers except FTEs and Rates in the Rand
2. To give effect to rates policy
3. Full Time Equivalent (FTE) should be expressed to one decimal place and takes into account full time and part time staff
4. Required to implement new system (FTE)
5. Provide relevant information for historical comparisons. Must reconcile to the total of Table SA12
6. Current and budget year must reconcile to Table A4 Budgeted Financial Performance (revenue and expenditure)
7. Included in rate revenue budget
8. In favour of the rate-payer

MUNISIPALITEIT UMASIPALA MUNICIPALITY

- MEMORANDUM -

AAN / TO: Municipal Manager

VAN / FROM: Director: Finance

DATUM / DATE: 16 January 2023

VERW. / REF.: 05/12/1/3

IMPLEMENTATION OF THE DEBT COLLECTION AND CREDIT CONTROL POLICY

Purpose

The purpose of this report is for council to consider the full implementation of the debt collection and credit control policy in an effort to improve on the debt collection percentage.

Legislature framework

In terms of Section 96 of the Municipal Systems Act (act 32 of 2000), Council must collect all money that is due and payable to it. Subject to the provisions the Municipal Systems Act. It also allows the municipality to compile and adopt a policy to give effect to this power to collect. Council adopt a credit Control and Debt Collection Policy on 28 May 2009, item 8.1.2(c). Amendments to this policy were approved at subsequent council meetings.

Section 64 (2) of the Municipal Finance Act (56 of 2003) The accounting officer must take all reasonable steps to ensure—*(a)* that the municipality has effective revenue collection systems consistent with section 95 of the Municipal Systems Act and the municipality's credit control and debt collection policy-

Background

The year to date recovery rate for the year excluding traffic fines is 85%. The annual target for debt collection is 94%.

	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun
2019 2020	37,62%	112,61%	120,86%	131,72%	107,22%	90,17%	86,81%	84,81%	82,14%	84,88%	86,12%	111,24%
2020 2021	37,16%	109,38%	147,78%	100,30%	95,28%	89,97%	95,09%	79,06%	97,73%	89,59%	93,41%	97,60%
2021 2022	44,49%	115,72%	113,79%	128,96%	92,84%	77,27%	94,76%	81,50%	93,70%	85,66%	99,00%	102,20%
2022 2023	47,54%	97,56%	134,08%	106,70%	87,54%	71,36%						

The payment percentages for the different areas are as follows:

	Debits Raised	Payments Received	Total Outstanding	Payment Percentage
Ceres	283	276	45	97.6%
Farms	112	115	11	102.6%
Bella Vista	20	18	21	88.7%
Wolseley	49	44	36	90.2%
Tulbagh	35	33	21	94.3%
PA Hamlet	22	10	63	44.8%
Op die Berg	6	2	18	30.7%
Nduli	19	2	88	9.5%

The following table indicates the outstanding amounts as per service

	Total Outstanding
Rates	40
Electricity	31
Other	4
Refuse	73
Sewerage	65
Water	121

The following table list the payment percentage per customer group for the previous financial year:

	Debits Raised	Payments Received	Total Outstanding	Payment Percentage
Business	311	310	35	100%
Government	36	36	8	103%
Residential	199	152	282	76%
Farms	6	5	3	95%

Financial Implications

If the current downward trend of debt collection continues, the provision for impairment of receivables (bad debt) will have to be increased from R 38 million to R82 million for the current financial year. As a result, the expenditure budget will therefore have to be adjusted downward with ±R 44 million. This will have a negative impact on all operations of the municipality including the repair and maintenance of service delivery infrastructure.

Discussion

The current credit control practices of disconnecting and blocking of electricity supply is ineffective in the Eskom supplied areas of Prince Alfred Hamlet, Op die Berg and most rural areas, as indicated above.

Additional credit control measures as per the approved credit control and debt collection policy must be implemented in these areas as an effort to collect outstanding debt and increasing the overall collection rate.

The purpose of debt collection processes including legal action is to convince a debtor to pay his outstanding account and to cultivate a culture of payment.

Recommendation

That the following additional credit control steps be implemented:

1. Cutting or blocking of electricity–
   1.1. Amount equal to two months' debits are payable before restoring connection- (conventional meters)
   1.2. Portion of electricity purchases to be set off against arrear debt. (Auxiliary - 30%)

2. Indigent households-
   2.1. Portion of electricity purchases to be set off against arrear debt. (Auxiliary - 30%)
   2.2. Indigent households be moved from conventional electricity to pre-paid electricity

3. Legal collection process –
   3.1. Section 129 Notice- (in terms of National Credit Act).
   3.2. 14 Days later after Section 129 Notice, Summons is compiled.
   3.3. Clerk of the Court issues the summons.
   3.4. Sheriff of the Court serve the summons on the defendant.
   If there is moveable property that can be attached:
   3.5. If no payment received on summons - Judgement and Warrant of Execution is issued on movable property.
   3.6. Council resolution on process to be followed;
   3.7. Instruction to sheriff to attach and remove movable property and to sell the attached property.
   3.8. Advertisement in newspaper of intention to sell movable property
   3.9. Sale in execution of attached moveable property by sheriff.
   If there is no moveable property that can be attached:
   3.10. Report with Nulla Bona on fixed property with municipal value for less than R 300 000.00 to Council for write off;
   3.11. Municipal fixed property with value more than R 300 000.00, section 66 application compiled by private external attorney and application to sell immovable property in a sale of execution, brought before court;
   3.12. Council resolution on process to be followed;
   3.13. Advertisement in newspaper by attorney of intention to sell immovable property in local newspaper as well as government gazette;
   3.14. Sale in execution of attached immoveable property by sheriff.

4. Pre-Payment Water Meters
   4.1. Installation of pre-paid water meters if other debt collection measures are not successful;
   4.2. That the water consumption can be limited to a maximum of 200 litres per day (6 kilolitres per month);

Yours faithfully

H J KRITZINGER

Quarterly Budget Statement Report {Section 52(d)} for the Period 1 January 2023 to 31 March 2023

Accumulated Information for the period 1 July 2022 to 31 March 2023

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to

determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

In terms of Section 52 of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003):

52. General Responsibilities. — The mayor of a municipality—

(*a*) must provide general political guidance over the fiscal and financial affairs of the municipality;

(*b*) in providing such general political guidance, may monitor and, to the extent provided in this Act, oversee the exercise of responsibilities assigned in terms of this Act to the accounting officer and the chief financial officer, but may not interfere in the exercise of those responsibilities;

(*c*) must take all reasonable steps to ensure that the municipality performs its constitutional and statutory functions within the limits of the municipality's approved budget;

(*d*) **must, within 30 days of the end of each quarter, submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality; and**

(*e*) must exercise the other powers and perform the other duties assigned to the mayor in terms of this Act or delegated by the council to the mayor.

In terms of section 11 (4) (a), the Accounting Officer must within 30 days after the end of each quarter table in the municipal council a consolidated report of all withdrawals made in terms of subsection (1) (b) to (j) during that quarter. Section 11(1) read as follow:

"11. (1) Only the accounting officer or the chief financial officer of a municipality, or any other senior financial official of the municipality acting on the written authority of the accounting officer, may withdraw money or authorise the withdrawal of money from any of the municipality's bank accounts, and may do so only—

(a) to defray expenditure appropriated in terms of an approved budget;
(b) to defray expenditure authorised in terms of section 26(4);
(c) to defray unforeseeable and unavoidable expenditure authorised in terms of section 29(1);
(d) in the case of a bank account opened in terms of section 12, to make payments from the account in accordance with subsection (4) of that section;
(e) to pay over to a person or organ of state money received by the municipality on behalf of that person or organ of state, including—
(i) money collected by the municipality on behalf of that person or organ of state by agreement; or
(ii) any insurance or other payments received by the municipality for that person or organ of state;
(f) to refund money incorrectly paid into a bank account;
(g) to refund guarantees, sureties and security deposits;
(h) for cash management and investment purposes in accordance with section 13;
(i) to defray increased expenditure in terms of section 31; or
(j) for such other purposes as may be prescribed."

In terms of Section 66 of the MFMA the Accounting Officer must prepare a report on all expenditure incurred with relation to staff benefits.

Section 66 reads as follow:
"66. The accounting officer of a municipality must, in a format and for periods as may be prescribed, report to the council on all expenditure incurred by the municipality on staff salaries, wages, allowances and benefits, and in a manner that discloses such expenditure per type of expenditure, namely—

(a) salaries and wages;
(b) contributions for pensions and medical aid;
(c) travel, motor car, accommodation, subsistence and other allowances;

(d) housing benefits and allowances;
(e) overtime payments;
(f) loans and advances; and
(g) any other type of benefit or allowance related to staff."

The following regulations of the Local Government: Municipal Finance Management Act Municipal Budget and Reporting Regulations are relevant:

Quarterly reports on implementation of budget

31. (1) The mayor's quarterly report on the implementation of the budget and the financial state of affairs of the municipality as required by section 52(d) of the Act must be-
{a) in the format specified in Schedule C and include all the required tables, charts and explanatory information, taking into account any guidelines issued by the Minister in terms of section 168(1) of the Act; and
(b) consistent with the monthly budget statements for September, December, March and June as applicable; and
(c) submitted to the National Treasury and the relevant provincial treasury within five days of tabling of the report in the council.

Publication of quarterly reports on implementation of budget

32. When publishing the quarterly reports on the implementation of the budget in terms of section 75(1)(k) of the Act, the municipal manager must make public any other information that the municipal council considers appropriate to facilitate public awareness of the quarterly report on the implementation of the budget and the financial state of affairs of the municipality, including -
(a) summaries of quarterly report in alternate languages predominant in the community; and
{b) information relevant to each ward in the municipality.

PART 1 - IN-YEAR REPORT

Mayors Report

Speaker
Deputy Executive Mayor
Members of the Mayoral Committee
Aldermen
Councillors

It is my privilege to present to you the quarterly Budget Statement Report for the three months from 1 January 2023 to 31 March 2023.

The year-to-date recovery rate for the year excluding traffic fines is 87.5%. The annual target for debt collection is 94%. Unfortunately, some government departments were also late with their payments. Steps must be implemented against defaulters to improve the collection rate.

The ever-increasing hours of load shedding is a major concern as it has a negative effect on the economy of the Witzenberg municipal area.

The electricity purchases from Eskom for the period under review is R 20 million less than budgeted. The decline in electricity purchases can be attributed to the ongoing load shedding, as well as Eskom's inability to expand the electricity supply to the Witzenberg Area. These factors have a direct negative impact on the growth and expansion of the local economy.

	July	Aug	Sept	Oct	Nov	Dec	Jan	Feb	Mrt	Apr	May	Jun
2020/21 Purchases	28	53	68	83	96	110	127	147	170	191	212	240
2021/22 Purchases	34	63	81	97	113	130	152	176	205	231	254	286
2022/23 Purchases	33	69	87	105	123	138	158	179	204	0	0	0
2022/23 Budget	37	69	89	108	125	144	167	193	224	252	279	314

We must consider other local sources of electricity to enable economic growth and the resulting job creation, as the current Eskom network cannot transport the needed quantities of electricity.

ALDERMAN HJ SMIT
EXECUTIVE MAYOR

Municipal Manager's quality certification

Quality Certificate

I, Mr D Nasson, Municipal Manager of Witzenberg Municipality, hereby certify that the quarterly budget assessment has been prepared in accordance with the Municipal Finance Management Act and the regulations made under the Act.

Print name Mr D NASSON

Municipal Manager of WITZENBERG MUNICIPALITY.

Signature:

Date: 19 April 2023

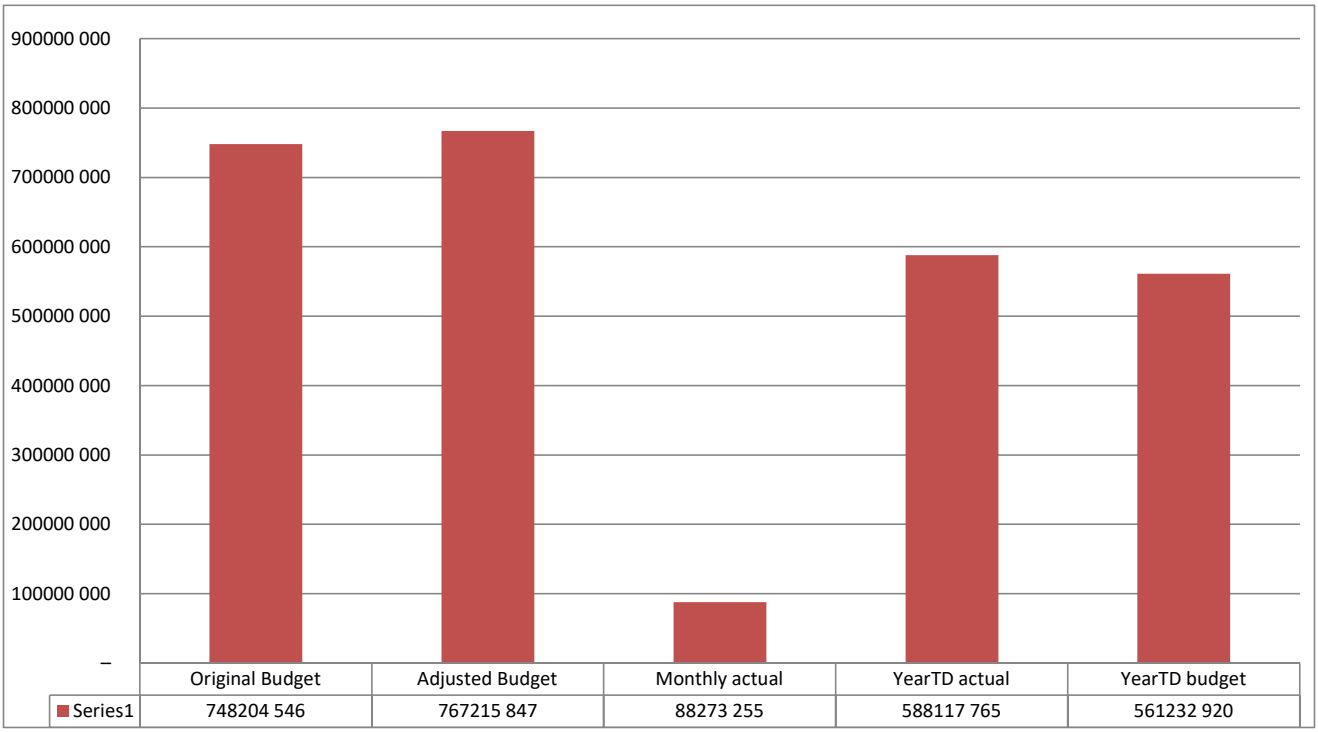
C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

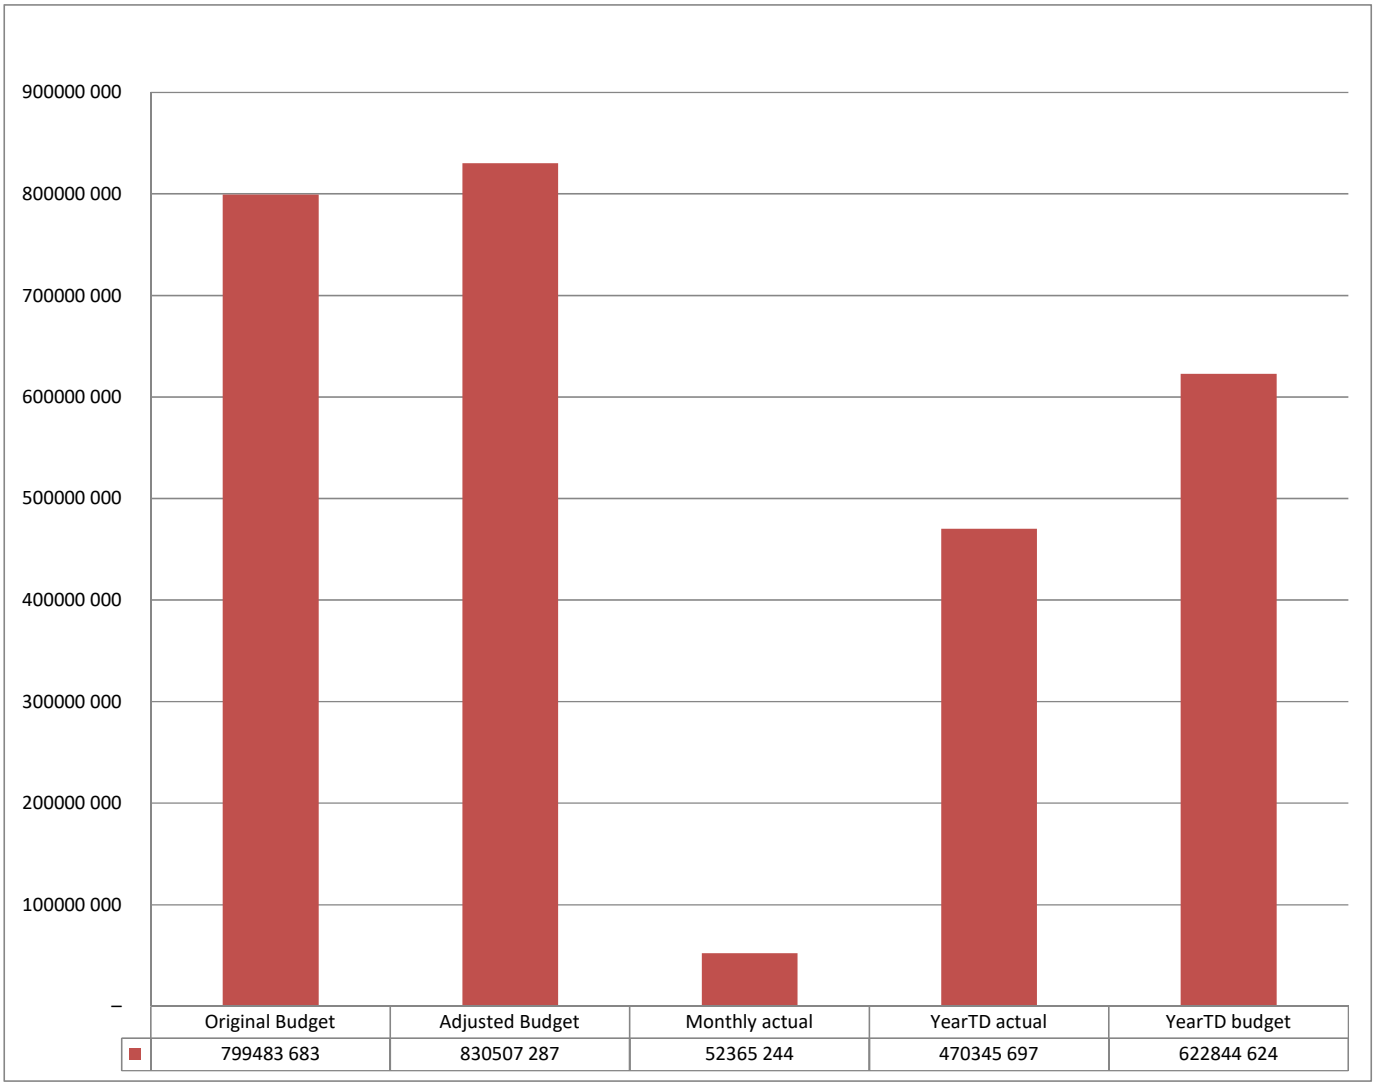
TOTAL OPERATIONAL REVENUE



For the period 1 January 2023 to 31 March 2023, 76.66% of the budgeted operational revenue was raised.

Vir die periode 1 Januarie 2023 to 31 Maart 2023, is 76.66% van die begrote operasionele inkomste gehef.

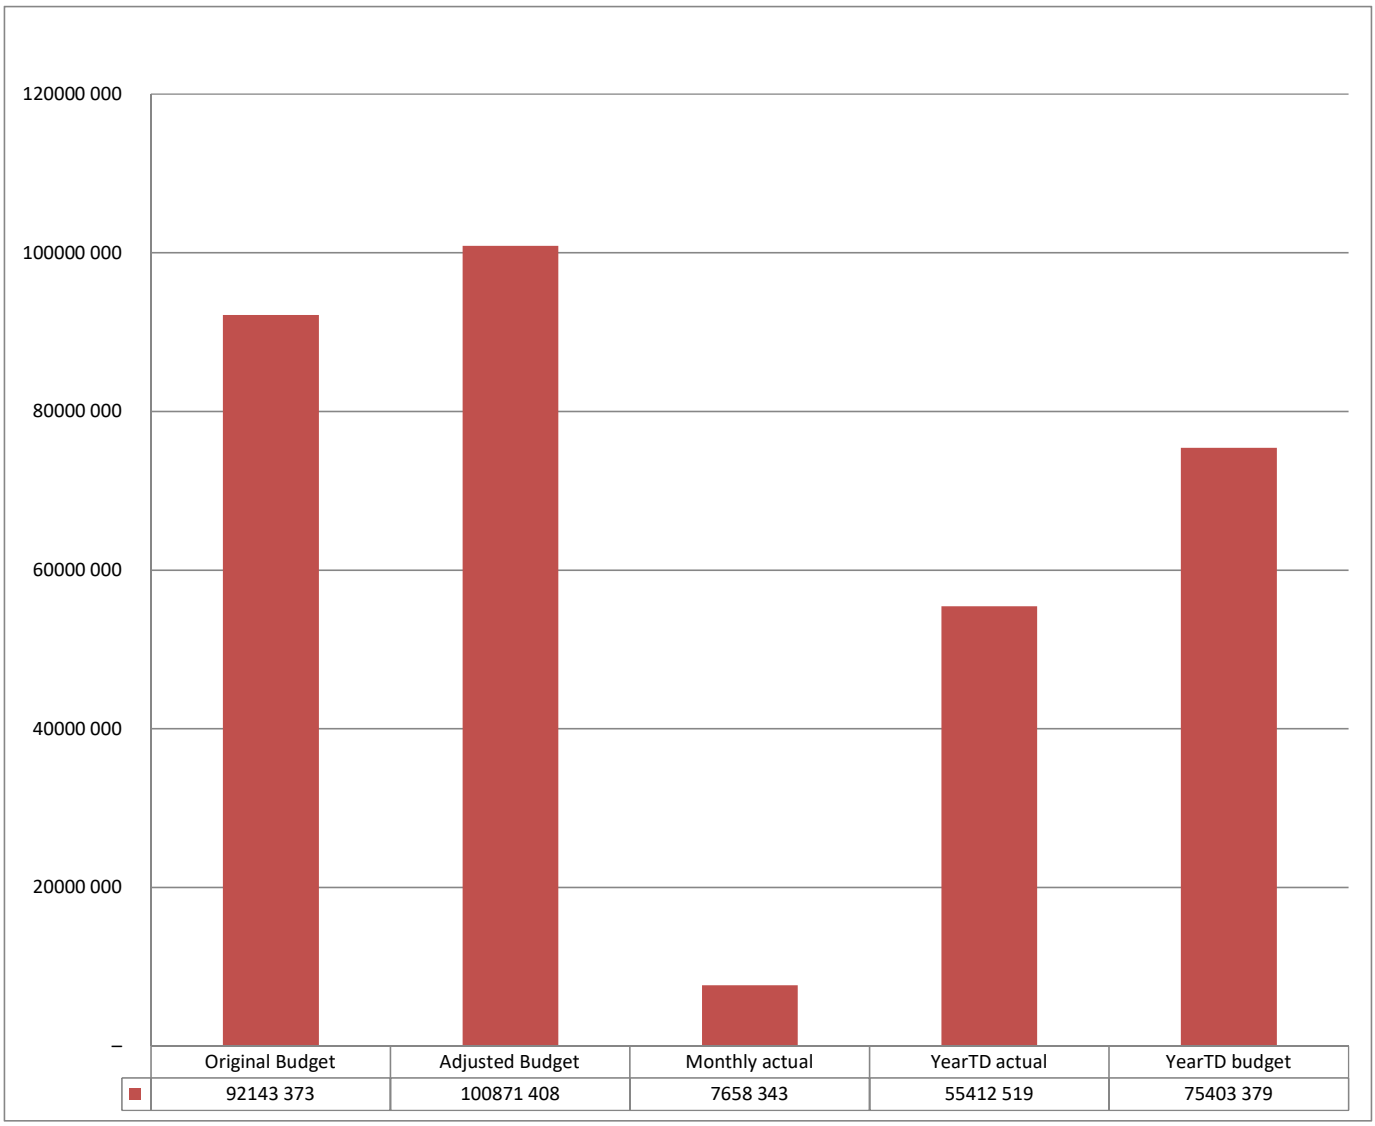
TOTAL OPERATIONAL EXPENDITURE



For the period 1 January 2023 to 31 March 2023, 56.63% of the budgeted operational expenditure was incurred. This figure will increase as some invoices are still outstanding.

Vir die periode 1 Januarie 2023 to 31 Maart 2023, is 56.63% van die begrote operasionele uitgawes aangegaan. Die syfer mag verhoog aangesien daar nog uitstaande fakture is.

CAPITAL EXPENDITURE



For the period 1 January 2023 to 31 March 2023, 54.93% of the budgeted capital expenditure was incurred.

Vir die periode 1 Januarie 2023 to 31 Maart 2023, is 54.93% van die begrote kapitale uitgawes aangegaan.

In-year budget statement tables

Strategic Objective: 3.1 Provide and Maintain Facilities and Environment that make citizens feel at home 16

KEY PERFORMANCE AREA: 4. SOCIO-ECONOMIC SUPPORT SERVICES 17

Strategic Objective: 4.1 Support the poor & vulnerable through programmes & policy 17

Strategic Objective: 4.2 Create an enabling environment to support local economy 17

1. INTRODUCTION AND OVERVIEW

1.1 Purpose of the Service Delivery & Budget Implementation Plan

The Municipal Finance Management Act No. 56 of 2003 (MFMA) and National Treasury MFMA Circular No. 13 requires that municipalities must prepare a service delivery budget implementation plan (SDBIP) indicating how the budget and the strategic objectives of Council will be implemented. The SDBIP is prepared in terms of Section 53(1)(c)(ii) of the Municipal Finance Management (MFMA), National Treasury MFMA Circular No. 13 and the Budgeting and Reporting Regulation.

The SDBIP serves as a "contract" between the administration, council and community expressing the goals and objectives set by the council as quantifiable outcomes that can be implemented by the administration in the applicable financial year. It provides the link between the mayor, the council (executive) and the administration, and facilitates the process for holding management accountable for its performance. It is therefore a management, implementation and monitoring tool that will assist the mayor, councillors, municipal manager, senior managers and community to monitor the municipality's performance on a quarterly basis. The SDBIP will ensure that appropriate information is circulated internally and externally for purposes of monitoring the implementation of the budget, the execution of projects, the performance of senior management and the achievement of the strategic objectives set by council.

1.2 Approval of 2022/23 SDBIP

- Draft 2022/23 Top Layer SDBIP tabled at Council 30 March 2022
- 2022/23 Top Layer SDBIP approved by Mayor 22 June 2022
- 2022/23 Top Layer SDBIP tabled at Council 24 August 2022
- 2022/23 Adjusted Top Layer SDBIP approved by Mayor 17 March 2023

1.3 Quarterly Reporting

The MFMA in terms of Section 52(d) oblige the Mayor to submit quarterly reports on the implementation of the budget and financial state of affairs of the Municipality.

The service delivery indicators and targets in the SDBIP need to be evaluated and reported on to Council. The quarterly report should thus report on the achievement of outcomes against financial and non-financial indicators.

2. STRATEGIC MAP

WITZENBERG MUNICIPALITY: STRATEGIC MAP 2022/23					
Vision	**Mission**	**Municipal KPA**		**Pre-determined Objectives**

Monthly Budget Statement Report Section 71 for June 2022

Financial data is in respect of the period 1 July 2021 to 30 June 2022

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

2.3 Monthly budget statements

In terms of Section 71 of the MFMA the accounting officer must prepare monthly budget statements that comply with this section. This section read as follows:

"71. (1) The accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on—
(i) its share of the local government equitable share; and
(ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of—
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.

(2) The statement must include—

(a) a projection of the relevant municipality's revenue and expenditure for the rest of the financial year, and any revisions from initial projections; and
(b) the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10).

(3) The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.

(4) The statement to the provincial treasury must be in the format of a signed document and in electronic format.

(5) The accounting officer of a municipality which has received an allocation referred to in subsection (1)(e) during any particular month must, by no later than 10 working days after

2.3 Maandelikse begroting state

In terme van Artikel 71 van die MFMA die rekenpligtige beampte moet 'n maandelikse begroting state wat voldoen aan hierdie artikel. Hierdie artikel lees soos volg:

"71. (1) Die rekenpligtige beampte van 'n munisipaliteit moet nie later as 10 werk dae na die einde van elke maand aan die burgemeester van die munisipaliteit en die betrokke Provinsiale Tesourie 1 verklaring in die voorgeskrewe formaat oor die toestand van die munisipaliteit se begroting wat die volgende besonderhede vir die maand en vir die finansiële jaar tot die einde van die maand:

(a) werklike inkomste per bron van inkomste;
(b) werklike lenings;
(c) die werklike uitgawes per stem;
(d) die werklike kapitaalbesteding, per stem;
(e) die bedrag van enige toekennings ontvang;
(f) die werklike uitgawes op daardie toekennings, uitgesluit besteding op
(i) sy deel van die plaaslike regering billike deel;
(ii) toekennings vrygestel is by die jaarlikse Verdeling van Inkomste van die nakoming van hierdie paragraaf, en
(g) wanneer dit nodig is, 'n verduideliking van-
(i) enige wesenlike afwykings van die munisipaliteit se geprojekteerde inkomste deur die bron, en van die munisipaliteit se uitgawe projeksies per stem;
(ii) enige wesenlike afwykings van die dienslewering en begrotings implementeringsplan;
(iii) enige remediërende of korrektiewe stappe geneem is of geneem word om te verseker dat die geprojekteerde inkomste en uitgawes in die munisipaliteit se goedgekeurde begroting bly.

(2) Die staat moet die volgende insluit-

(a) 'n projeksie van die betrokke munisipaliteit se inkomste en uitgawes vir die res van die finansiële jaar, en enige wysigings van die aanvanklike projeksies, en
(b) die voorgeskrewe inligting met betrekking tot die toestand van die begroting van elke munisipale entiteit wat aan die munisipaliteit in terme van artikel 87 (10).

(3) die bedrae wat in die verklaring moet in elke geval in vergelyking met die ooreenstemmende bedrae begroot vir die munisipaliteit se goedgekeurde begroting.

(4) Die verklaring aan die provinsiale tesourie moet in die formaat van 'n getekende dokument en in elektroniese formaat.

(5) Die rekenpligtige beampte van 'n munisipaliteit wat 'n toekenning bedoel in subartikel (1)(e) gedurende 'n bepaalde maand ontvang het, moet nie later nie as 10 werksdae na die

the end of that month, submit that part of the statement reflecting the particulars referred to in subsection (1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation.

(6) The provincial treasury must by no later than 22 working days after the end of each month submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity.

(7) The provincial treasury must, within 30 days after the end of each quarter, make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter."

einde van die maand, moet daardie deel van die verklaring wat die besonderhede bedoel in subartikel (1)(e) en (f) om die nasionale of provinsiale orgaan van die staat of munisipaliteit wat die toekenning oorgedra

(6) Die Provinsiale Tesourie moet nie later nie as 22 werksdae na die einde van elke maand aan die Nasionale Tesourie 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van die munisipaliteite se begrotings, per munisipaliteit en per munisipale entiteit.

(7) Die Provinsiale Tesourie moet, binne 30 dae na die einde van elke kwartaal, openbaar te maak as wat voorgeskryf mag word, 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van munisipaliteite se begrotings per munisipaliteit en per munisipale entiteit. Die LUR vir finansies moet so 'n gekonsolideerde staat nie later nie as 45 dae na die einde van elke kwartaal aan die provinsiale wetgewer dien."

A MAYOR'S REPORT

Credit control for various reasons remains a challenge for the municipality.

The unwillingness / unability of government departments to pay their municipal accounts was a big concern. However department are slowing starting to make payment. The debt is in access of R6.34 million in comparison to the prior month figure of R7.36 million.

The monthly billing was also done as scheduled and during this process 19 550 accounts amounting to
R 37.1 million was printed and distributed to consumers. The prepaid electricity sales amounted to R 5.9 million in comparison to a cost of R5.2 million for the same month during the prior financial year.

The indigent cost to the municipality for the month amounts to R 1.75 million in comparison to the prior month figure of R1.75 millon

The accumulated debtor's collection target for the year is 91%, and the actual accumulated year to date debtor's collection is 91% in comparison to a rate of 90% for the same month in the previous year.

The municipality issued orders to the value of R 18.2 million of which R94 thousand was in terms of deviations.

The municipality currently has R 145 million in its primary bank account and no investments. The bank balance at the end of the previous month was R162 million with no investments.

The calculated cost coverage ratio of the municipality as at the end of June 2022 is 3.4 months.

A BURGEMEESTERS VERSLAG

Kredietbeheer bly 'n uitdaging vir die munisipaliteit as gevolg van verskillende redes.

Die onwilligheid / onvermoë van staats departemente om hulle munisipale rekeninge te betaal was 'n groot bekommernis. Departemente is stadig besig om hul betalings te maak. Die skuld beloop tans R6.34miljoen in vergelyking met die vorige maand syfer van R7.36 miljoen.

Die maandelikse rekeninge is ook gehef soos geskeduleer en tydens hierdie proses is 19 550 rekeninge ten bedrae van R 37.1 miljoen gedruk en aan verbruikers versprei. Die voorafbetaalde elektrisiteit verkope beloop R 5.9 miljoen en was R5.2 miljoen vir dieselfde maand gedurende die vorige finansiele jaar.

Die deernis subsidies vir die maand beloop R 1.75 miljoen in vergelyking met die vorige maand syfer van R1.75 miljoen.

Die opgehoopte debiteure verhaling se teiken vir die jaar is 91%, en die werklike jaar tot op datum invordering is 91% in vergelyking met 90% vir dieselfde maand in die vorige finansiele jaar.

Bestellings ter waarde van R 18.2 miljoen uitgereik, waarvan R94 duisend ten opsigte van afwykings is.

Die munisipaliteit het R 145 miljoen in die primêre bankrekening met geen beleggings. Die bankbalans aan die einde van die vorige maand was R162 miljoen en daar was geen beleggings.

Die berekende koste dekking verhouding van die munisipaliteit soos aan die einde van Junie 2022 is 3.4 maande.

B RECOMMENDATION

It is recommended that council take cognisance of the quarterly budget assessment for the month of June 2022 .

B AANBEVELING

Dit word aanbeveel dat die raad kennis neem van die finansiële maandverslag en ondersteunende dokumente vir Junie 2022 .

C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

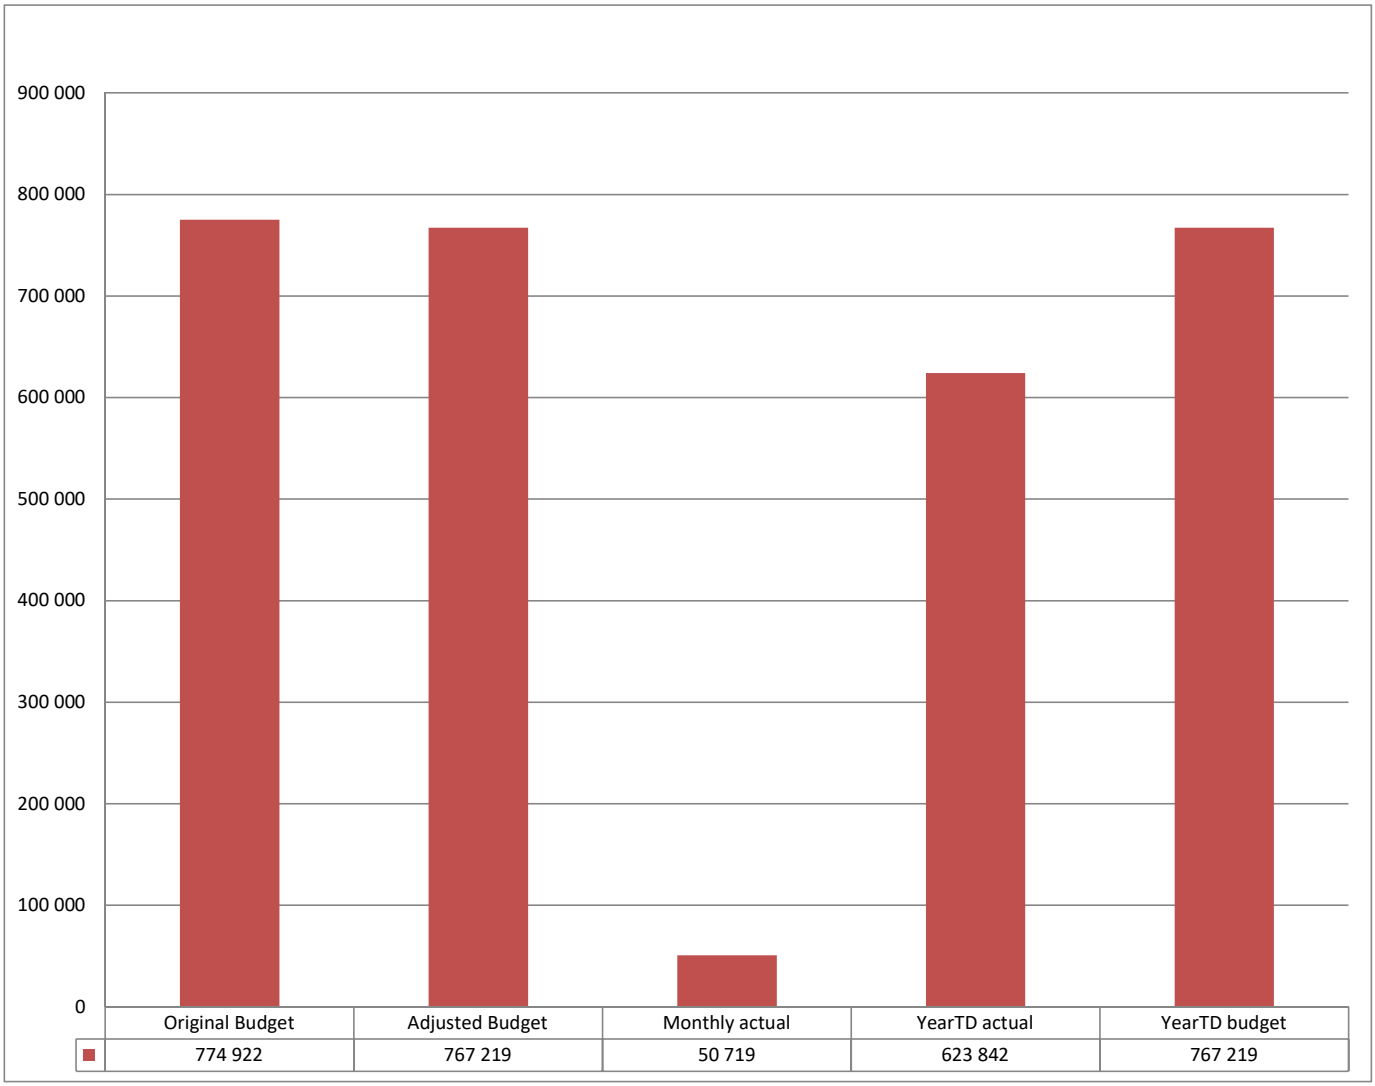
TOTAL OPERATIONAL REVENUE R'000

	Original Budget	Adjusted Budget	Monthly actual	YearTD actual	YearTD budget
Series1	702 723	716 281	41 614	677 833	716 281

For the period 1 July 2021 to 30 June 2022, 94.63% of the budgeted operational revenue was raised.

Vir die periode 1 Julie 2021 tot 30 Junie 2022, is 94.63% van die begrote operasionele inkomste gehef.

TOTAL OPERATIONAL EXPENDITURE R'000



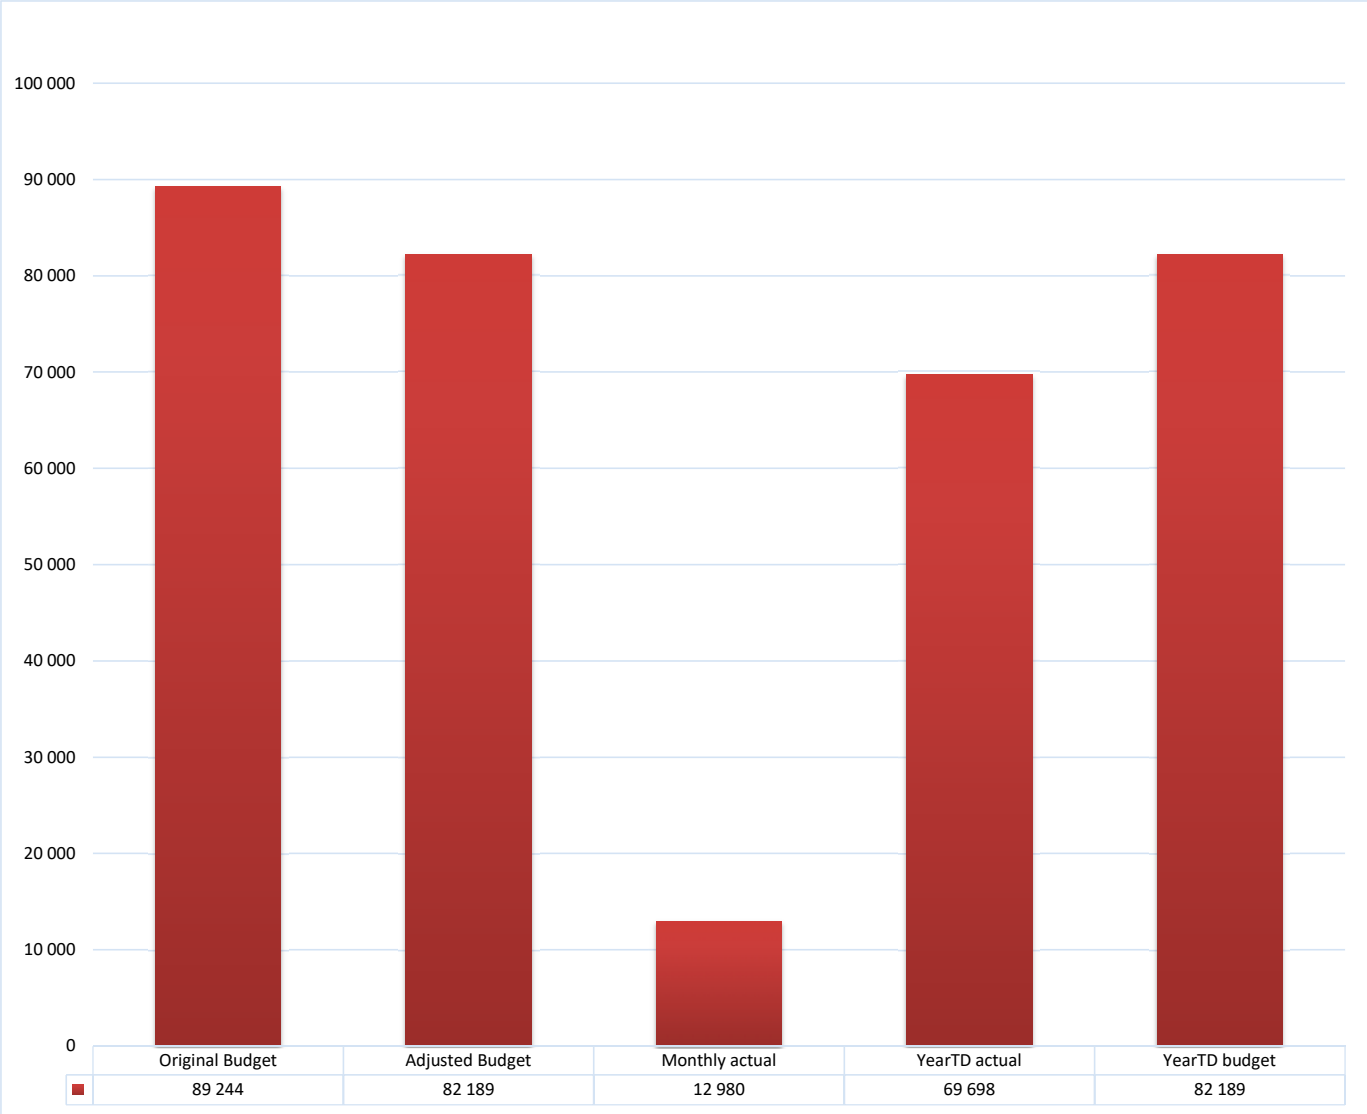
For the period 1 July 2021 to 30 June 2022, 81.31% of the budgeted operational expenditure was incurred.

Vir die periode 1 Julie 2021 tot 30 Junie 2022, is 81.31% van die begrote operasionele uitgawes aangegaan.

Please refer to Supporting Table SC1 for explanations regarding expendiure variances.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

CAPITAL EXPENDITURE R'000



For the period 1 July 2021 to 30 June 2022, 84.8% of the budgeted capital expenditure was incurred.

Please refer to Supporting Table SC1 for explanations regarding expenditure variances.

Vir die periode 1 Julie 2021 tot 30 Junie 2022, is 84.8% van die begrote kapitale uitgawes aangegaan.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

In-year budget statement tables

The following table provides a summary of the financial performance and financial position of the municipality as at 30 June 2022.

WC022 Witzenberg - Table C1 Monthly Budget Statement Summary - M12 June

WC022 Witzenberg - Supporting Table SC1 Material variance explanations - M12 June

Ref	Description R thousands	Variance	Reasons for material deviations
1	Revenue By Source		
	Property rates	5 418	Supplementary Valuation results implemented during April 2022.
	Service charges - electricity revenue	(5 134)	YTD consumption is in line with previous years trends, except for 2020-21 fin year which was an unusual year due to the pandemic.
	Service charges - water revenue	6 271	YTD consumption is sliglhtly higher in comparision with the previous year
	Service charges - sanitation revenue	(656)	Immaterial Variance.
	Service charges - refuse revenue	2 077	Indigent Relief is lower than anticipated
	Service charges - other	–	
	Rental of facilities and equipment	1 634	Increase due to relaxation of Covid 19 Regulations.
	Interest earned - external investments	(1 625)	Lower interest rates resulting in lower interest being earned.
	Interest earned - outstanding debtors	8 574	Increase in oustanding debtors
	Dividends received	–	
	Fines, penalties and forfeits	(11 920)	Information in respect of Provincial Fines still outstanding as well as local fines for June 2022. No service provider appointed.
	Licences and permits	(824)	Immaterial Variance.
	Agency services	280	Immaterial Variance.
	Transfers and subsidies	(40 136)	Delay in expenditure with regards to Housing Top Structures (R19m). Deduction of unspent grants from second equitable share tranch (R10m).
	Other revenue	(2 407)	Recognition of Revenue in terms of Surcharges & Taxes is low due to low capital grant expenditure
	Gains on disposal of PPE	–	
2	Expenditure By Type		
	Employee related costs	(3 534)	Vacancies resulting in a reduction of Employee Related Cost
	Post Employment Provisions	(19 135)	Adjustment to be made in line with actuarial report at year-end.
	Remuneration of councillors	(1 082)	Immaterial Variance.
	Debt impairment	(27 635)	Original Estimate of Debt may be higher than expected. Adjustment relating to provision at year end still outstanding.
	Depreciation & asset impairment	(17 378)	Depreciation on Landfill sites done at year end based on report received.
	Finance charges	(8 512)	Finance charges relating to Landfill Sites recognised on annual basis based on report received.
	Bulk purchases	(34 124)	Payment of Bulk Purchases for 11 Months, 1 month outstanding
	Other materials	(1 555)	Immaterial Variance.
	Contracted services	(4 432)	Reduction in Contracted Services in respect of the following material items: Legal Cost, Business and advisory, Maintenance of Unspecificed Assets, Maintenance of Building and Facilities & Infrastructure & Planning.
	Transfers and subsidies	(21 321)	Delay in expenditure with regards to Housing Top Structures.
	Other expenditure	(4 670)	Low spending on the following material items: External Computer Service,Workmen's Compensation Fund,Professional Bodies, Membership,Uniform and Protective Clothing, Hire Charges
	Loss on disposal of PPE	(0)	
3	Capital Expenditure		
	Total Capital Expenditure	(12 491)	Delays in capital expenditure of which the most prominent are the Wolseley Public Toilets and the Upgrades to the Van Breda Bridge.
		–	
4	Financial Position		
5	Cash Flow		
	Receipts		
	Property rates	4 394	Indigent Relief is lower than anticipated
	Service charges	86 727	YTD consumption is in line with previous years trends, except for 2020-21 fin year which was an unusual year due to the pandemic
	Other revenue	7 407	Immaterial Variance.
	Government - operating	(25 811)	Decrease in operational grant receipts of which Housing is the most prominent (R15m). Deduction of unspent grants from second equitable share tranch (R10m).
	Government - capital	(32 749)	Grants receipts lower than anticipated/expected of which the most prominent is with regards to the Van Breda Bridge and Housing Top Structures.
	Interest	(1 818)	Lower interest rates resulting in lower interest being earned. Collection Rate is currently at 88%.
	Dividends	–	
	Payments		
	Suppliers and employees	34 786	Budget excludes VAT. If VAT is included variance will be in line with the expenditure reasons provided above.
	Finance charges	(432)	Immaterial Variance.
	Transfers and Grants	2 854	Variance due to transfer payments made to support various organisations - requests by organisations cannot be foreseen.
6	Measureable performance		
7	Municipal Entities		

	1	2	3	4	5	6	7	8	9	10	11	12
19/20	38%	113%	121%	138%	101%	90%	87%	86%	82%	85%	86%	97%
20/21	37%	109%	148%	100%	81%	108%	96%	79%	98%	90%	94%	98%
21/22	44%	116%	114%	129%	93%	77%	95%	81%	94%	86%	99%	117%
Target 91%	91%	91%	91%	91%	91%	91%	91%	91%	91%	91%	91%	91%

The purpose of this graph is to illustrate the collection against targets set for the relevant months. The target for the month is 91% while the actual figure for June 2022 amounts to 117% in comparison to the previous year 98%.

Die doel van hierdie grafiek is om die verhaling van debiteure te illustreer teen die teikens gestel vir die onderskeie maande. Die teiken vir die maand is 91%, terwyl die syfer vir Junie 2022 117% beloop in vergelyking met die vorige jaar 98%.

	1	2	3	4	5	6	7	8	9	10	11	12
19/20	38%	63%	77%	87%	89%	89%	89%	89%	88%	87%	87%	88%
20/21	37%	62%	82%	86%	85%	88%	89%	88%	89%	89%	89%	90%
21/22	44%	71%	81%	90%	90%	88%	89%	88%	89%	88%	89%	91%
Target	91%	91%	91%	91%	91%	91%	91%	91%	91%	91%	91%	91%

The purpose of this graph is to illustrate effectiveness of collection of debt against targets set for the year. The target for the year to date is 91% while the actual figure is 91%.

The payment culture of consumers are still the same which has a negative impact on collections.

Die doel van hierdie grafiek is om die doeltreffendheid van die verhaling van skuld te illustreer teen die teikens gestel vir die jaar. Die teiken vir die jaar tot datum is 91%, terwyl die werklike syfer 91% beloop.

Die betalingskultuur onder verbruikers is onveranderd wat die invorderings negatief beinvloed.

The debtors age analysis per Income source and customer group is as follows:

Notes

Material increases in value of creditors' categories compared to previous month to be explained

0

Reasons for balances oustanding for more than 30 days:
-Amounts did not appear on statement
-Account is in dispute

`

The movement in investments is detailed below.

Monthly Budget Statement Report
Section 71 for September 2022

Financial data is in respect of the period
1 July 2022 to 30 June 2023

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

2.3 Monthly budget statements

In terms of Section 71 of the MFMA the accounting officer must prepare monthly budget statements that comply with this section. This section read as follows:

"71. (1) The accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on—
(i) its share of the local government equitable share; and
(ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of—
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.

(2) The statement must include—

(a) a projection of the relevant municipality's revenue and expenditure for the rest of the financial year, and any revisions from initial projections; and
(b) the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10).

(3) The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.

(4) The statement to the provincial treasury must be in the format of a signed document and in electronic format.

(5) The accounting officer of a municipality which has received an allocation referred to in subsection (1)(e) during any particular month must, by no later than 10 working days after

2.3 Maandelikse begroting state

In terme van Artikel 71 van die MFMA die rekenpligtige beampte moet 'n maandelikse begroting state wat voldoen aan hierdie artikel. Hierdie artikel lees soos volg:

"71. (1) Die rekenpligtige beampte van 'n munisipaliteit moet nie later as 10 werk dae na die einde van elke maand aan die burgemeester van die munisipaliteit en die betrokke Provinsiale Tesourie 1 verklaring in die voorgeskrewe formaat oor die toestand van die munisipaliteit se begroting wat die volgende besonderhede vir die maand en vir die finansiële jaar tot die einde van die maand:

(a) werklike inkomste per bron van inkomste;
(b) werklike lenings;
(c) die werklike uitgawes per stem;
(d) die werklike kapitaalbesteding, per stem;
(e) die bedrag van enige toekennings ontvang;
(f) die werklike uitgawes op daardie toekennings, uitgesluit besteding op
(i) sy deel van die plaaslike regering billike deel;
(ii) toekennings vrygestel is by die jaarlikse Verdeling van Inkomste van die nakoming van hierdie paragraaf, en
(g) wanneer dit nodig is, 'n verduideliking van-
(i) enige wesenlike afwykings van die munisipaliteit se geprojekteerde inkomste deur die bron, en van die munisipaliteit se uitgawe projeksies per stem;
(ii) enige wesenlike afwykings van die dienslewering en begrotings implementeringsplan;
(iii) enige remediërende of korrektiewe stappe geneem is of geneem word om te verseker dat die geprojekteerde inkomste en uitgawes in die munisipaliteit se goedgekeurde begroting bly.

(2) Die staat moet die volgende insluit-

(a) 'n projeksie van die betrokke munisipaliteit se inkomste en uitgawes vir die res van die finansiële jaar, en enige wysigings van die aanvanklike projeksies, en
(b) die voorgeskrewe inligting met betrekking tot die toestand van die begroting van elke munisipale entiteit wat aan die munisipaliteit in terme van artikel 87 (10).

(3) die bedrae wat in die verklaring moet in elke geval in vergelyking met die ooreenstemmende bedrae begroot vir die munisipaliteit se goedgekeurde begroting.

(4) Die verklaring aan die provinsiale tesourie moet in die formaat van 'n getekende dokument en in elektroniese formaat.

(5) Die rekenpligtige beampte van 'n munisipaliteit wat 'n toekenning bedoel in subartikel (1)(e) gedurende 'n bepaalde maand ontvang het, moet nie later nie as 10 werksdae na die

the end of that month, submit that part of the statement reflecting the particulars referred to in subsection (1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation.

(6) The provincial treasury must by no later than 22 working days after the end of each month submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity.

(7) The provincial treasury must, within 30 days after the end of each quarter, make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter."

einde van die maand, moet daardie deel van die verklaring wat die besonderhede bedoel in subartikel (1)(e) en (f) om die nasionale of provinsiale orgaan van die staat of munisipaliteit wat die toekenning oorgedra

(6) Die Provinsiale Tesourie moet nie later nie as 22 werksdae na die einde van elke maand aan die Nasionale Tesourie 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van die munisipaliteite se begrotings, per munisipaliteit en per munisipale entiteit.

(7) Die Provinsiale Tesourie moet, binne 30 dae na die einde van elke kwartaal, openbaar te maak as wat voorgeskryf mag word, 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van munisipaliteite se begrotings per munisipaliteit en per munisipale entiteit. Die LUR vir finansies moet so 'n gekonsolideerde staat nie later nie as 45 dae na die einde van elke kwartaal aan die provinsiale wetgewer dien."

A MAYOR'S REPORT

Credit control for various reasons remains a challenge for the municipality.

The unwillingness / unability of government departments to pay their municipal accounts was a big concern. However department are slowing starting to make payment. The debt is in access of R8.39 million in comparison to the prior month figure of R12.69 million.

The monthly billing was also done as scheduled and during this process 20 072 accounts amounting to R88 million was printed and distributed to consumers. The prepaid electricity sales amounted to R5.7 million in comparison to a cost of R5.7 million for the same month during the prior financial year.

The indigent cost to the municipality for the month amounts to R 1.8 million in comparison to the prior month figure of R1.8 millon

The accumulated debtor's collection target for the year is 94%, and the actual accumulated year to date debtor's collection is 83% in comparison to a rate of 81% for the same month in the previous year.

The municipality issued orders to the value of R 39.4 million of which R171 thousand was in terms of deviations.

The municipality currently has R 82 million in its primary bank account and R100 million in investments. The bank balance at the end of the previous month was R90 million with R100 million in investments.

The calculated cost coverage ratio of the municipality as at the end of September 2022 is 3.4 months.

B RECOMMENDATION

It is recommended that council take cognisance of the quarterly budget assessment for the month of September 2022 .

C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

A BURGEMEESTERS VERSLAG

Kredietbeheer bly 'n uitdaging vir die munisipaliteit as gevolg van verskillende redes.

Die onwilligheid / onvermoë van staats departemente om hulle munisipale rekeninge te betaal was 'n groot bekommernis. Departemente is stadig besig om hul betalings te maak. Die skuld beloop tans R8.39 miljoen in vergelyking met die vorige maand syfer van R12.69 miljoen.

Die maandelikse rekeninge is ook gehef soos geskeduleer en tydens hierdie proses is 20 072 rekeninge ten bedrae van R881 miljoen gedruk en aan verbruikers versprei. Die voorafbetaalde elektrisiteit verkope beloop R5.7 miljoen en was R5.7 miljoen vir dieselfde maand gedurende die vorige finansiele jaar.

Die deernis subsidies vir die maand beloop R 1.8 miljoen in vergelyking met die vorige maand syfer van R1.8 miljoen.

Die opgehoopte debiteure verhaling se teiken vir die jaar is 94%, en die werklike jaar tot op datum invordering is 83% in vergelyking met 81% vir dieselfde maand in die vorige finansiele jaar.

Bestellings ter waarde van R 39.4 miljoen uitgereik, waarvan R171 duisend ten opsigte van afwykings is.

Die munisipaliteit het R 82 miljoen in die primêre bankrekening met R 100 miljoen op belegging. Die bankbalans aan die einde van die vorige maand was R90 miljoen met R100 miljoen op belegging.

Die berekende koste dekking verhouding van die munisipaliteit soos aan die einde van September 2022 is 3.4 maande.

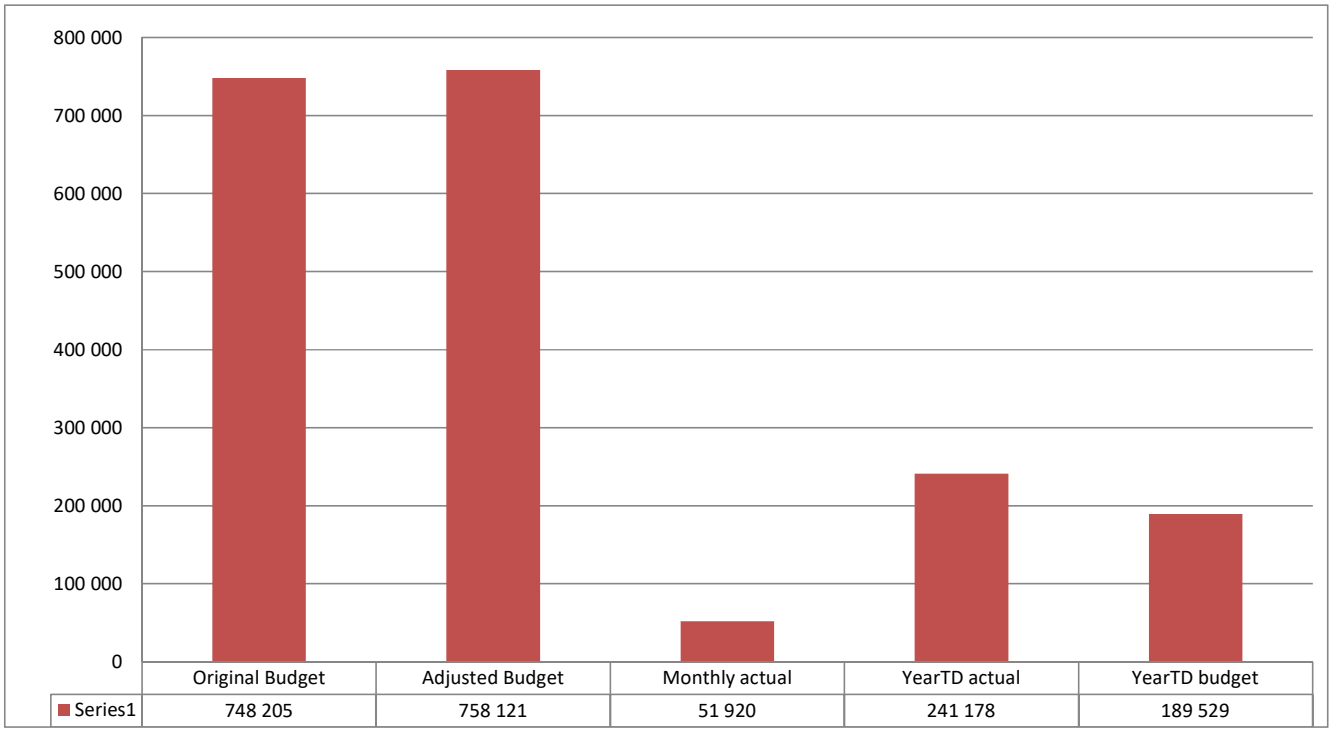
B AANBEVELING

Dit word aanbeveel dat die raad kennis neem van die finansiële maandverslag en ondersteunende dokumente vir September 2022 .

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

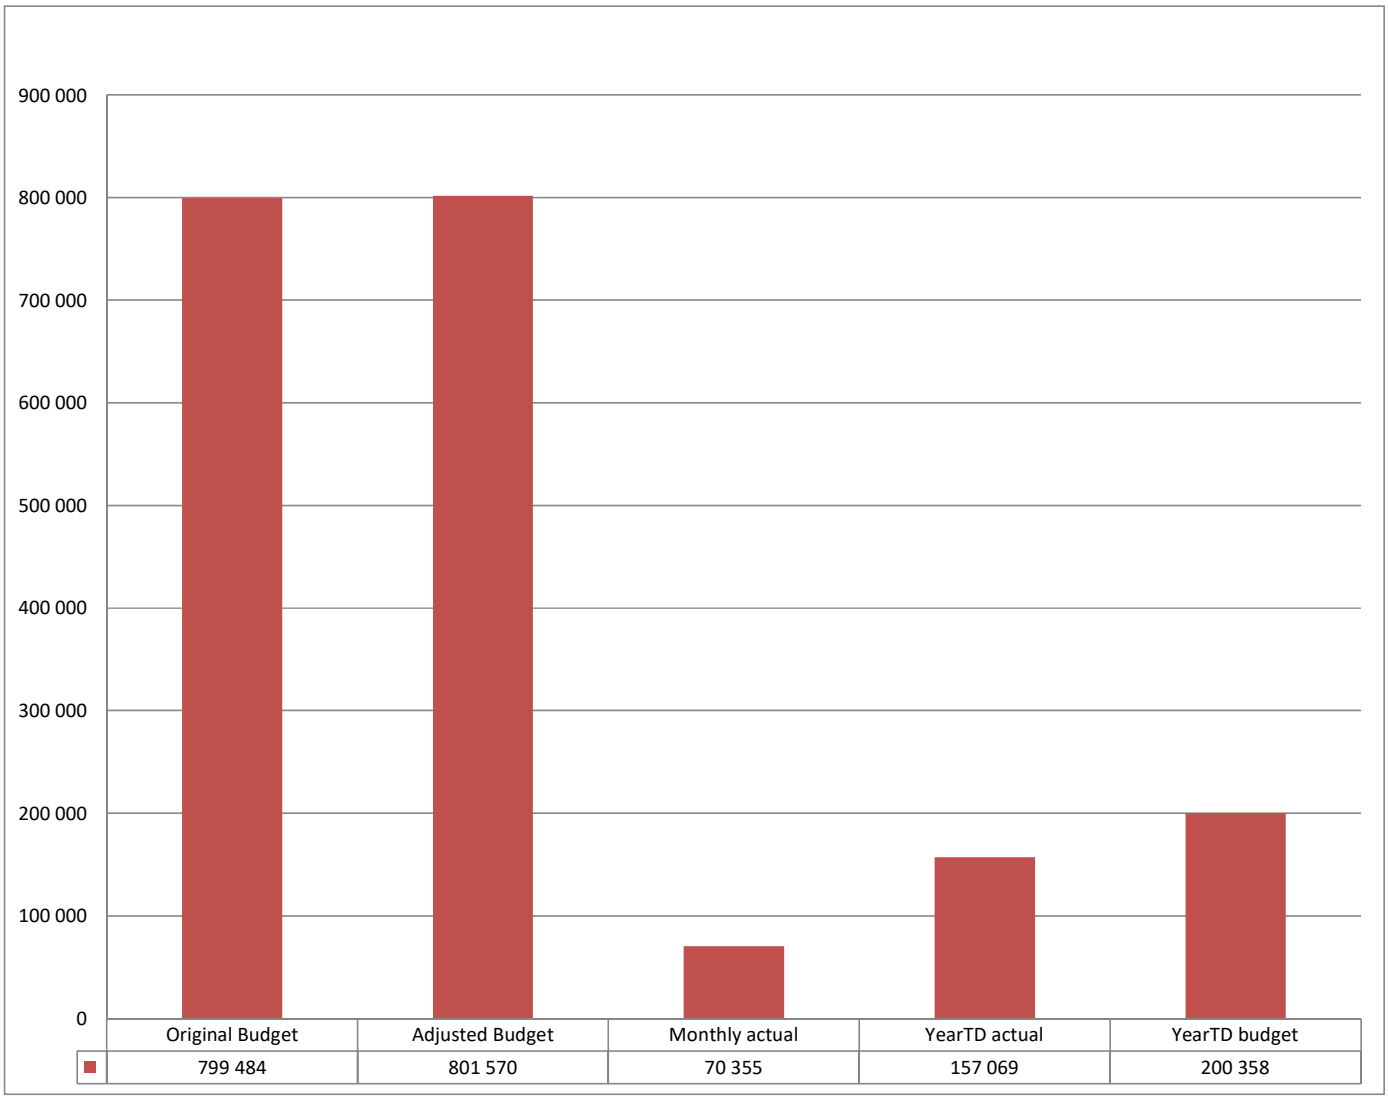
TOTAL OPERATIONAL REVENUE R'000



For the period 1 July 2022 to 30 September 2022, 31.81% of the budgeted operational revenue was raised.

Vir die periode 1 Julie 2022 tot 30 September 2022, is 31.81% van die begrote operasionele inkomste gehef.

TOTAL OPERATIONAL EXPENDITURE R'000



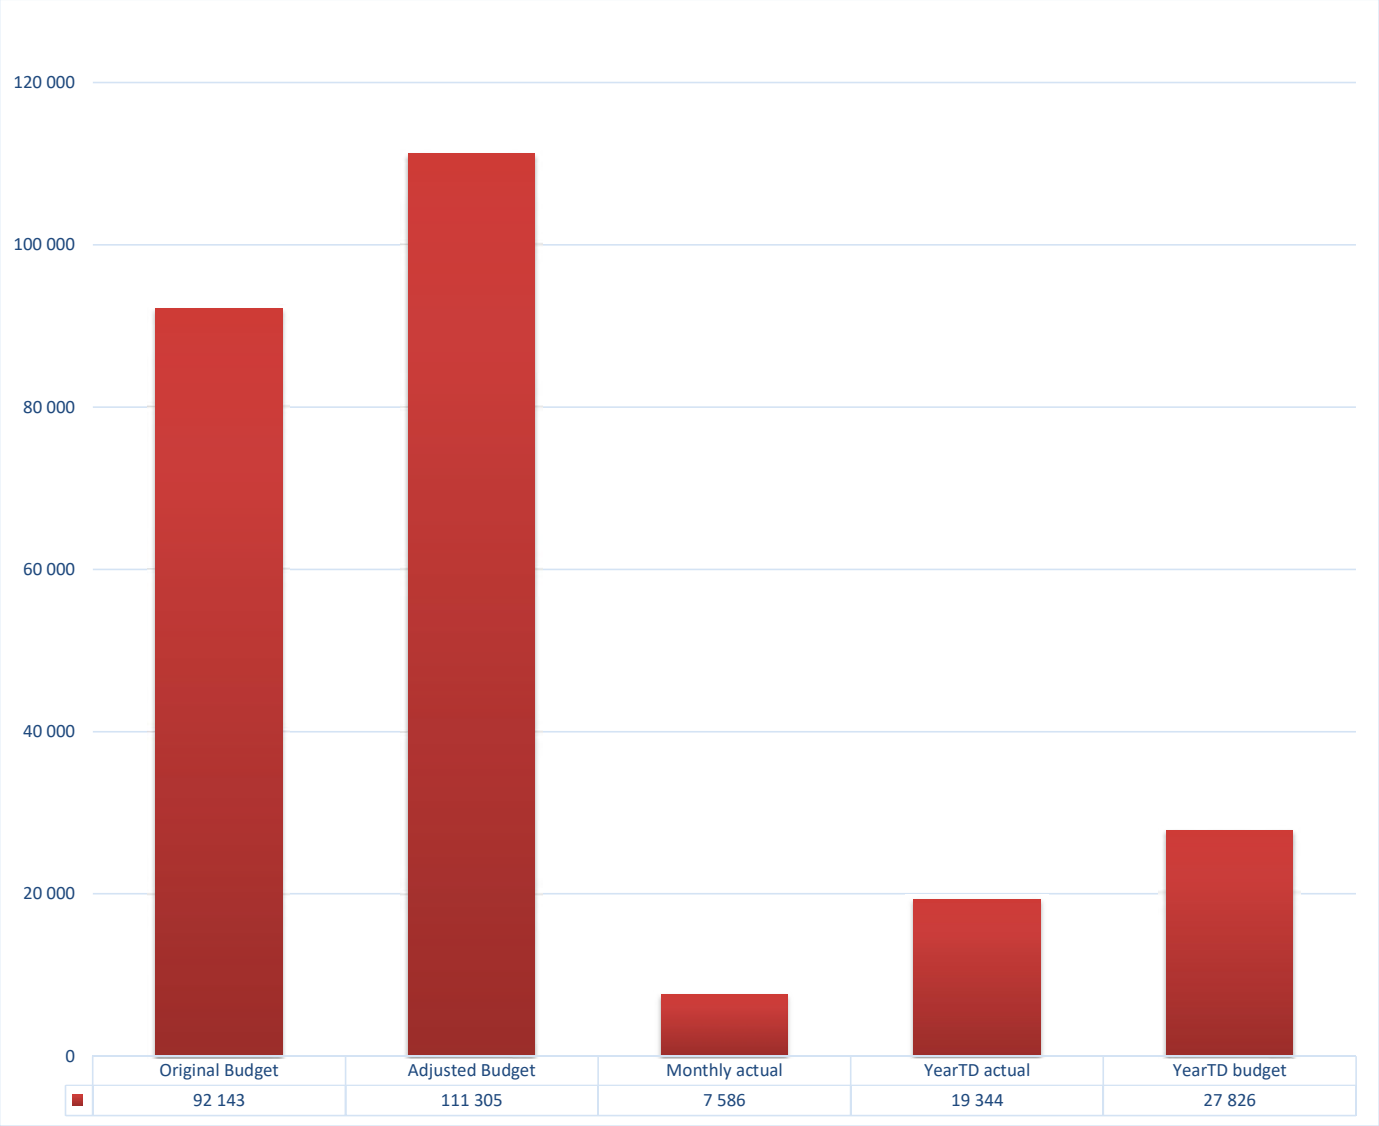
For the period 1 July 2022 to 30 September 2022, 19.6% of the budgeted operational expenditure was incurred.

Vir die periode 1 Julie 2022 tot 30 September 2022, is 19.6% van die begrote operasionele uitgawes aangegaan.

Please refer to Supporting Table SC1 for explanations regarding expendiure variances.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

CAPITAL EXPENDITURE R'000



For the period 1 July 2022 to 30 September 2022, 17.38% of the budgeted capital expenditure was incurred.

Please refer to Supporting Table SC1 for explanations regarding expenditure variances.

Vir die periode 1 Julie 2022 tot 30 September 2022, is 17.38% van die begrote kapitale uitgawes aangegaan.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

In-year budget statement tables

The revenue and expenditure figures excludes internal charges.

Other expenditure includes operational costs such as:

Advertising, Publicity and Marketing
External Audit Fees
Communication
External Computer Service
Insurance Underwriting
Travel and Subsistence
Printing, Publications and Books
Uniform and Protective Clothing
Wet Fuel
Hire Charges

The tables provides detail of capital expenditure according to municipal votes.

WC022 Witzenberg - Supporting Table SC1 Material variance explanations - M03 September

Ref	Description R thousands	Variance	Reasons for material deviations
1	**Revenue By Source**		
	Property rates	27 033	Annual Property Rates billed during July due at end of September.
	Service charges - electricity revenue	12 093	Higher winter tariffs and increased electricity usage during winter months.
	Service charges - water revenue	(1 957)	Variance due to seasonal fluctuations experienced.
	Service charges - sanitation revenue	4 048	Industrial Effluent charges raised in relation to last quarter of 2021-2022 during August 2022.
	Service charges - refuse revenue	211	Immaterial Variance.
	Service charges - other	–	
	Rental of facilities and equipment	275	Immaterial Variance.
	Interest earned - external investments	(78)	Immaterial Variance.
	Interest earned - outstanding debtors	2 544	Conservative approach to budgeting followed.
	Dividends received	–	
	Fines, penalties and forfeits	(186)	No service provider appointed.
	Licences and permits	(225)	Immaterial Variance.
	Agency services	256	Immaterial Variance.
	Transfers and subsidies	8 068	First tranch of equitable share and MIG funding received.
	Other revenue	(434)	Immaterial Variance.
	Gains on disposal of PPE	–	
2	**Expenditure By Type**		
	Employee related costs	995	Immaterial Variance.
	Post Employment Provisions	(4 629)	Adjustment to post employment provisions done on Annual Basis.
	Remuneration of councillors	(201)	Immaterial Variance.
	Debt impairment	(4 705)	end of September
	Depreciation & asset impairment	(9 897)	No depreciation runs done to date.
	Finance charges	(2 279)	Immaterial Variance.
	Bulk purchases - electricity	(9 621)	Payment of Bulk Purchases for July and August only, 1 month outstanding.
	Inventory consumed	(880)	Immaterial Variance.
	Contracted services	(8 470)	Expenditure expected to increase as projects are rolled out during financial year and service provider for security services is appointed.
	Transfers and subsidies	(2 744)	Immaterial Variance.
	Other expenditure	(858)	Immaterial Variance.
	Losses	(0)	
3	**Capital Expenditure**		
	Total Capital Expenditure	(8 482)	Expenditure expected to increase as capital projects are rolled out during financial year
		–	
4	**Financial Position**		
5	**Cash Flow**		
	Receipts		
	Property rates	14 245	Annual Property Rates billed during July.
	Service charges	18 147	Higher winter tariffs and increased electricity usage during winter months.
	Other revenue	1 097	Immaterial Variance.
	Government - operating	18 737	First tranch of equitable share received during July.
	Government - capital	7 920	MIG, RBIG and WSIG funding received.
	Interest	(2 356)	Immaterial Variance.
	Dividends	–	
	Payments		
	Suppliers and employees	13 330	Increased payments relating to bulk purchases due to higher winter tariffs and increased electricity usage during winter months.
	Finance charges	–	Immaterial Variance.
	Transfers and Grants	546	Immaterial Variance.
6	**Measureable performance**		
7	**Municipal Entities**		

	1	2	3	4	5	6	7	8	9	10	11	12

Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate the collection against targets set for the relevant months. The target for the month is 94% while the actual figure for September 2022 amounts to 134% in comparison to the previous year 114%.

Die doel van hierdie grafiek is om die verhaling van debiteure te illustreer teen die teikens gestel vir die onderskeie maande. Die teiken vir die maand is 94%, terwyl die syfer vir September 2022 134% beloop in vergelyking met die vorige jaar 114%.

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	62%	82%	86%	85%	88%	89%	88%	89%	89%	89%	90%

22/23	47%	66%	83%									
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate effectiveness of collection of debt against targets set for the year. The target for the year to date is 94% while the actual figure is 83%.

Die doel van hierdie grafiek is om die doeltreffendheid van die verhaling van skuld te illustreer teen die teikens gestel vir die jaar. Die teiken vir die jaar tot datum is 94%, terwyl die werklike syfer 83% beloop.

The payment culture of consumers are still the same which has a negative impact on collections.

Die betalingskultuur onder verbruikers is onveranderd wat die invorderings negatief beinvloed.

The debtors age analysis per Income source and customer group is as follows:

Notes

Material increases in value of creditors' categories compared to previous month to be explained

0

Reasons for balances oustanding for more than 30 days:

-Amounts did not appear on statement

-Account is in dispute

`

The movement in investments is detailed below.

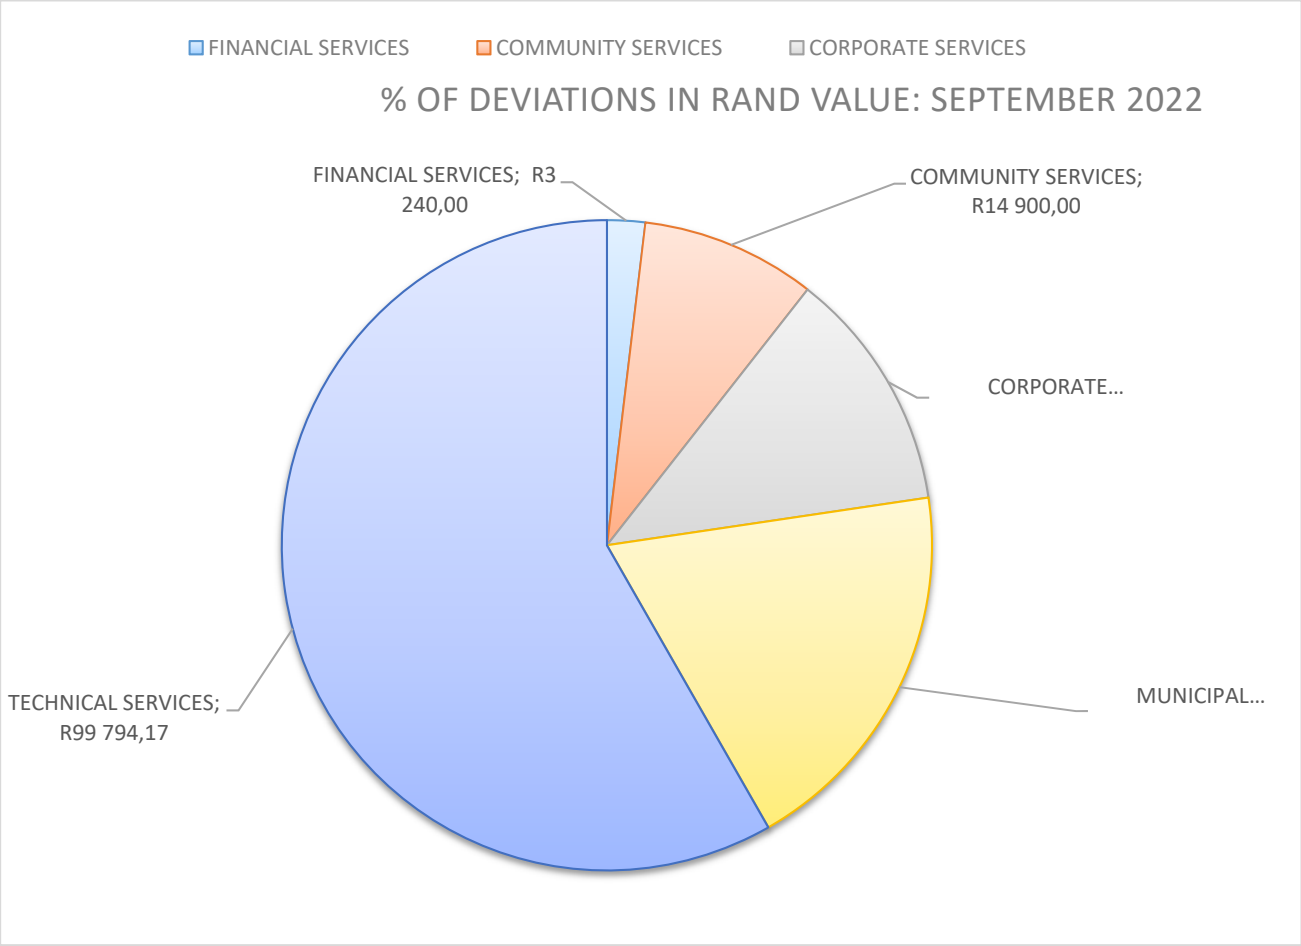
DEVIATIONS PER DIRECTORATE:



Logistics

The table below contains a high level summary of information regarding the stores section:

Logistieke

Die tabel hieronder bevat 'n hoë vlak opsomming van inligting rakende die magasyn (stoor):

MONTH	July 2022	Aug 2022	Sept 2022
Value of inventory at hand	R 6 669 232	R 8 471 380	R 7 846 245
Turnover rate of total value of inventory	1.33	1.16	1.24
Date of latest stores reconciliation	30 September 2022		
Date of last stock count	21 September 2022		
Date of next stock count	7 December 2022		

Cash Flow Forecast

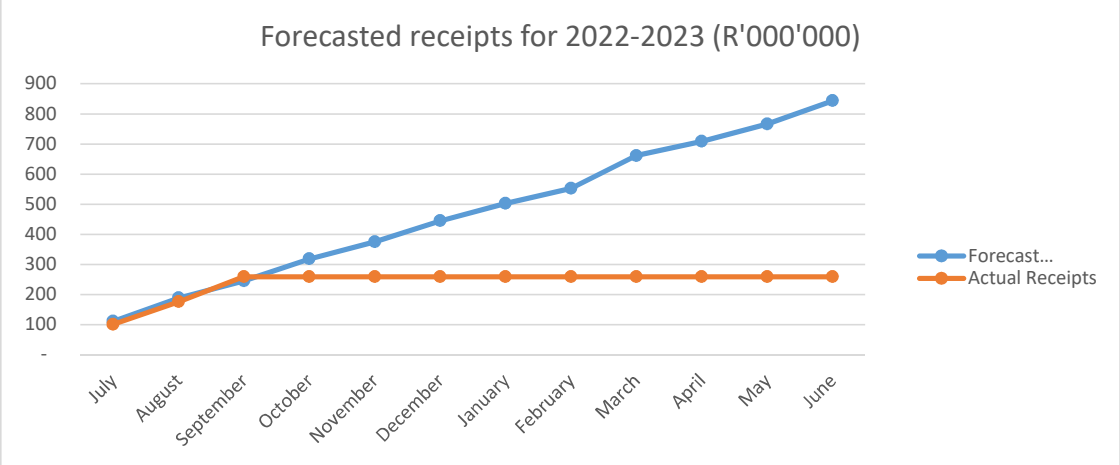
Current commitments against cash

Cash Book Balance plus Investments	R	182 001 057
Total Commitments		(R164 347 469)
Unspent Grants		(R17 485 662)
Outstanding orders exlcluding grants		(R42 202 971)
Eskom Account		(R20 417 352)
Consumer Deposits		(R11 159 774)
Required Annual Contribution to the Provis		(R44 841 016)
Provision Current Employee Benefits		(R28 240 694)
Uncommitted Cash Balance	R	17 653 588

The estimated cost coverage ratio is as follow

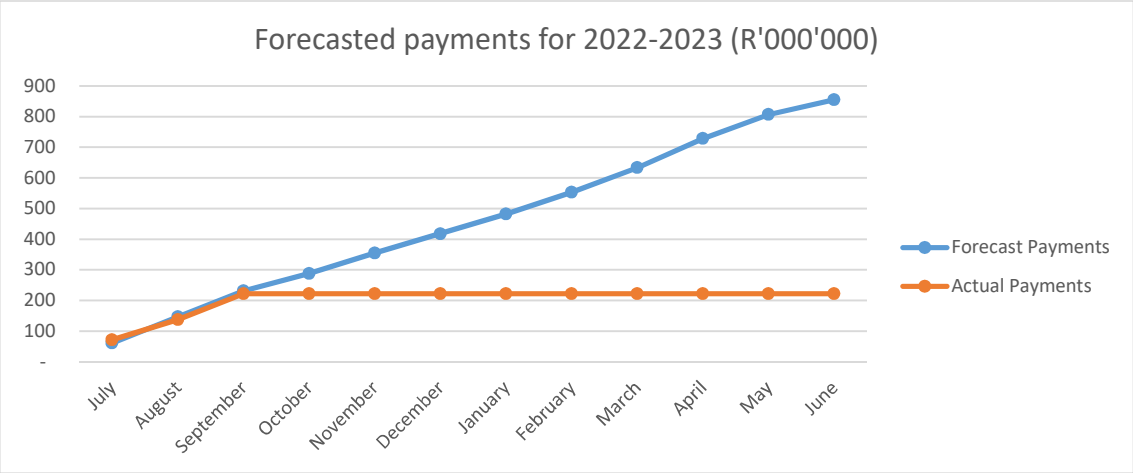
		Current
Bank Balance	R	182 001 057
Average fixed cost per month	R	53 501 277
Ratio		3,40

The ratio indicates that the municipality has sufficient cash available to cover its fixed cost for the next 3,26 months.This is slightly below the acceptable norm
of 3 months. It is estimated that the ratio will improve the following months as the municipality is currently in the high season of Electricity



It is estimated that cash receipts will amount to R835 m for the 2022-2023 Financial Year
The performance of actual receipts against projected receipts for the month can be summarised as follow

Month	Projected Receitps	Actual Receipts
July	R111m	R101m
August	R78m	R75m
September	R56m	R83m



It is estimated that cash payments will amount to R834 m for the 2022-2023 Financial Year
The performance of actual payments against projected payments for the month can be summarised as follow

Month	Projected Payments	Actual payments
July	R61m	R72m
August	R86m	R66m
September	R85m	R84m

Monthly Budget Statement Report
Section 71 for October 2022

Financial data is in respect of the period
1 July 2022 to 30 June 2023

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

2.3 Monthly budget statements

In terms of Section 71 of the MFMA the accounting officer must prepare monthly budget statements that comply with this section. This section read as follows:

"71. (1) The accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on—
(i) its share of the local government equitable share; and
(ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of—
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.

(2) The statement must include—

(a) a projection of the relevant municipality's revenue and expenditure for the rest of the financial year, and any revisions from initial projections; and
(b) the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10).

(3) The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.

(4) The statement to the provincial treasury must be in the format of a signed document and in electronic format.

(5) The accounting officer of a municipality which has received an allocation referred to in subsection (1)(e) during any particular month must, by no later than 10 working days after

2.3 Maandelikse begroting state

In terme van Artikel 71 van die MFMA die rekenpligtige beampte moet 'n maandelikse begroting state wat voldoen aan hierdie artikel. Hierdie artikel lees soos volg:

"71. (1) Die rekenpligtige beampte van 'n munisipaliteit moet nie later as 10 werk dae na die einde van elke maand aan die burgemeester van die munisipaliteit en die betrokke Provinsiale Tesourie 1 verklaring in die voorgeskrewe formaat oor die toestand van die munisipaliteit se begroting wat die volgende besonderhede vir die maand en vir die finansiële jaar tot die einde van die maand:

(a) werklike inkomste per bron van inkomste;
(b) werklike lenings;
(c) die werklike uitgawes per stem;
(d) die werklike kapitaalbesteding, per stem;
(e) die bedrag van enige toekennings ontvang;
(f) die werklike uitgawes op daardie toekennings, uitgesluit besteding op
(i) sy deel van die plaaslike regering billike deel;
(ii) toekennings vrygestel is by die jaarlikse Verdeling van Inkomste van die nakoming van hierdie paragraaf, en
(g) wanneer dit nodig is, 'n verduideliking van-
(i) enige wesenlike afwykings van die munisipaliteit se geprojekteerde inkomste deur die bron, en van die munisipaliteit se uitgawe projeksies per stem;
(ii) enige wesenlike afwykings van die dienslewering en begrotings implementeringsplan;
(iii) enige remediërende of korrektiewe stappe geneem is of geneem word om te verseker dat die geprojekteerde inkomste en uitgawes in die munisipaliteit se goedgekeurde begroting bly.

(2) Die staat moet die volgende insluit-

(a) 'n projeksie van die betrokke munisipaliteit se inkomste en uitgawes vir die res van die finansiële jaar, en enige wysigings van die aanvanklike projeksies, en
(b) die voorgeskrewe inligting met betrekking tot die toestand van die begroting van elke munisipale entiteit wat aan die munisipaliteit in terme van artikel 87 (10).

(3) die bedrae wat in die verklaring moet in elke geval in vergelyking met die ooreenstemmende bedrae begroot vir die munisipaliteit se goedgekeurde begroting.

(4) Die verklaring aan die provinsiale tesourie moet in die formaat van 'n getekende dokument en in elektroniese formaat.

(5) Die rekenpligtige beampte van 'n munisipaliteit wat 'n toekenning bedoel in subartikel (1)(e) gedurende 'n bepaalde maand ontvang het, moet nie later nie as 10 werksdae na die

the end of that month, submit that part of the statement reflecting the particulars referred to in subsection (1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation.

(6) The provincial treasury must by no later than 22 working days after the end of each month submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity.

(7) The provincial treasury must, within 30 days after the end of each quarter, make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter."

einde van die maand, moet daardie deel van die verklaring wat die besonderhede bedoel in subartikel (1)(e) en (f) om die nasionale of provinsiale orgaan van die staat of munisipaliteit wat die toekenning oorgedra

(6) Die Provinsiale Tesourie moet nie later nie as 22 werksdae na die einde van elke maand aan die Nasionale Tesourie 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van die munisipaliteite se begrotings, per munisipaliteit en per munisipale entiteit.

(7) Die Provinsiale Tesourie moet, binne 30 dae na die einde van elke kwartaal, openbaar te maak as wat voorgeskryf mag word, 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van munisipaliteite se begrotings per munisipaliteit en per munisipale entiteit. Die LUR vir finansies moet so 'n gekonsolideerde staat nie later nie as 45 dae na die einde van elke kwartaal aan die provinsiale wetgewer dien."

A MAYOR'S REPORT

Credit control for various reasons remains a challenge for the municipality.

The unwillingness / unability of government departments to pay their municipal accounts was a big concern. However department are slowing starting to make payment. The debt is in access of R9.35 million in comparison to the prior month figure of R8.39 million.

The monthly billing was also done as scheduled and during this process 19 934 accounts amounting to R36.1 million was printed and distributed to consumers. The prepaid electricity sales amounted to R5.8 million in comparison to a cost of R5.6 million for the same month during the prior financial year.

The indigent cost to the municipality for the month amounts to R 1.9 million in comparison to the prior month figure of R1.8 millon

The accumulated debtor's collection target for the year is 94%, and the actual accumulated year to date debtor's collection is 88% in comparison to a rate of 90% for the same month in the previous year.

The municipality issued orders to the value of R 29.6 million of which R354 thousand was in terms of deviations.

The municipality currently has R 65 million in its primary bank account and R120 million in investments. The bank balance at the end of the previous month was R82 million with R100 million in investments.

The calculated cost coverage ratio of the municipality as at the end of October 2022 is 3.34 months.

A BURGEMEESTERS VERSLAG

Kredietbeheer bly 'n uitdaging vir die munisipaliteit as gevolg van verskillende redes.

Die onwilligheid / onvermoë van staats departemente om hulle munisipale rekeninge te betaal was 'n groot bekommernis. Departemente is stadig besig om hul betalings te maak. Die skuld beloop tans R9.35 miljoen in vergelyking met die vorige maand syfer van R8.39 miljoen.

Die maandelikse rekeninge is ook gehef soos geskeduleer en tydens hierdie proses is 19 934 rekeninge ten bedrae van R36.1 miljoen gedruk en aan verbruikers versprei. Die voorafbetaalde elektrisiteit verkope beloop R5.8 miljoen en was R5.6 miljoen vir dieselfde maand gedurende die vorige finansiele jaar.

Die deernis subsidies vir die maand beloop R 1.9 miljoen in vergelyking met die vorige maand syfer van R1.8 miljoen.

Die opgehoopte debiteure verhaling se teiken vir die jaar is 94%, en die werklike jaar tot op datum invordering is 88% in vergelyking met 90% vir dieselfde maand in die vorige finansiele jaar.

Bestellings ter waarde van R 29.6 miljoen uitgereik, waarvan R354 duisend ten opsigte van afwykings is.

Die munisipaliteit het R 65 miljoen in die primêre bankrekening met R 120 miljoen op belegging. Die bankbalans aan die einde van die vorige maand was R82 miljoen met R100 miljoen op belegging.

Die berekende koste dekking verhouding van die munisipaliteit soos aan die einde van October 2022 is 3.34 maande.

B RECOMMENDATION

It is recommended that council take cognisance of the quarterly budget assessment for the month of October 2022 .

B AANBEVELING

Dit word aanbeveel dat die raad kennis neem van die finansiele maandverslag en ondersteunende dokumente vir Oktober 2022

C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

TOTAL OPERATIONAL REVENUE R'000

	Original Budget	Adjusted Budget	Monthly actual	YearTD actual	YearTD budget
Series1	748 205	758 121	44 833	286 011	252 705

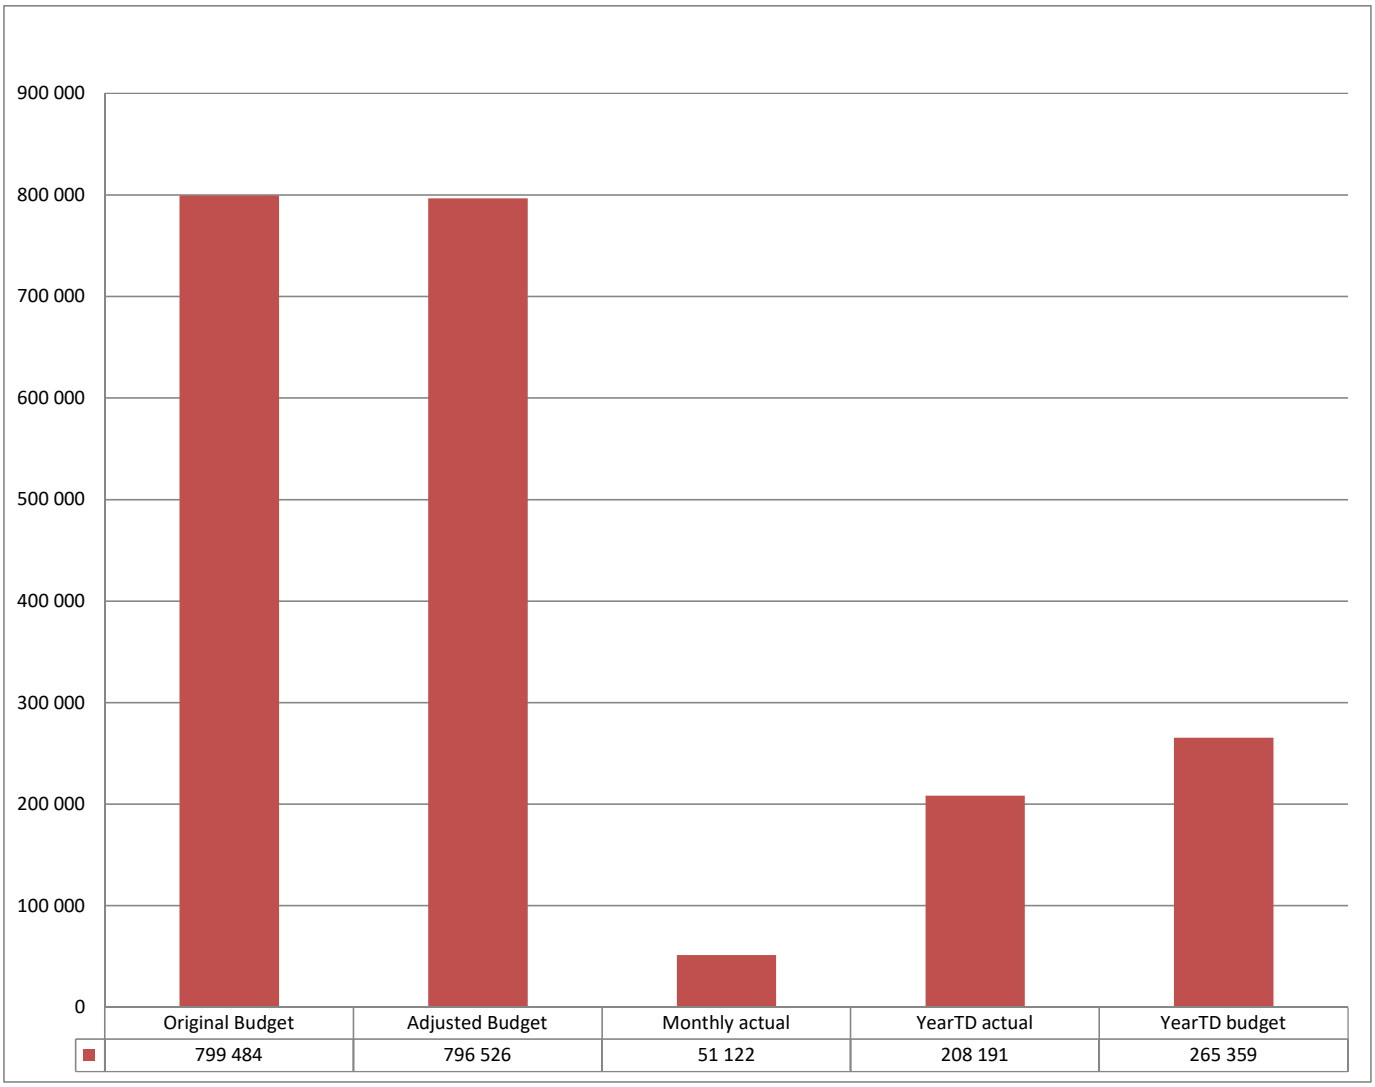
For the period 1 July 2022 to 31 October 2022, 37.73% of the budgeted operational revenue was raised.

Please refer to Supporting Table SC1 for explanations regarding revenue variances.

Vir die periode 1 Julie 2022 tot 31 Oktober 2022, is 37.73% van die begrote operasionele inkomste gehef.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot inkomste afwykings.

TOTAL OPERATIONAL EXPENDITURE R'000



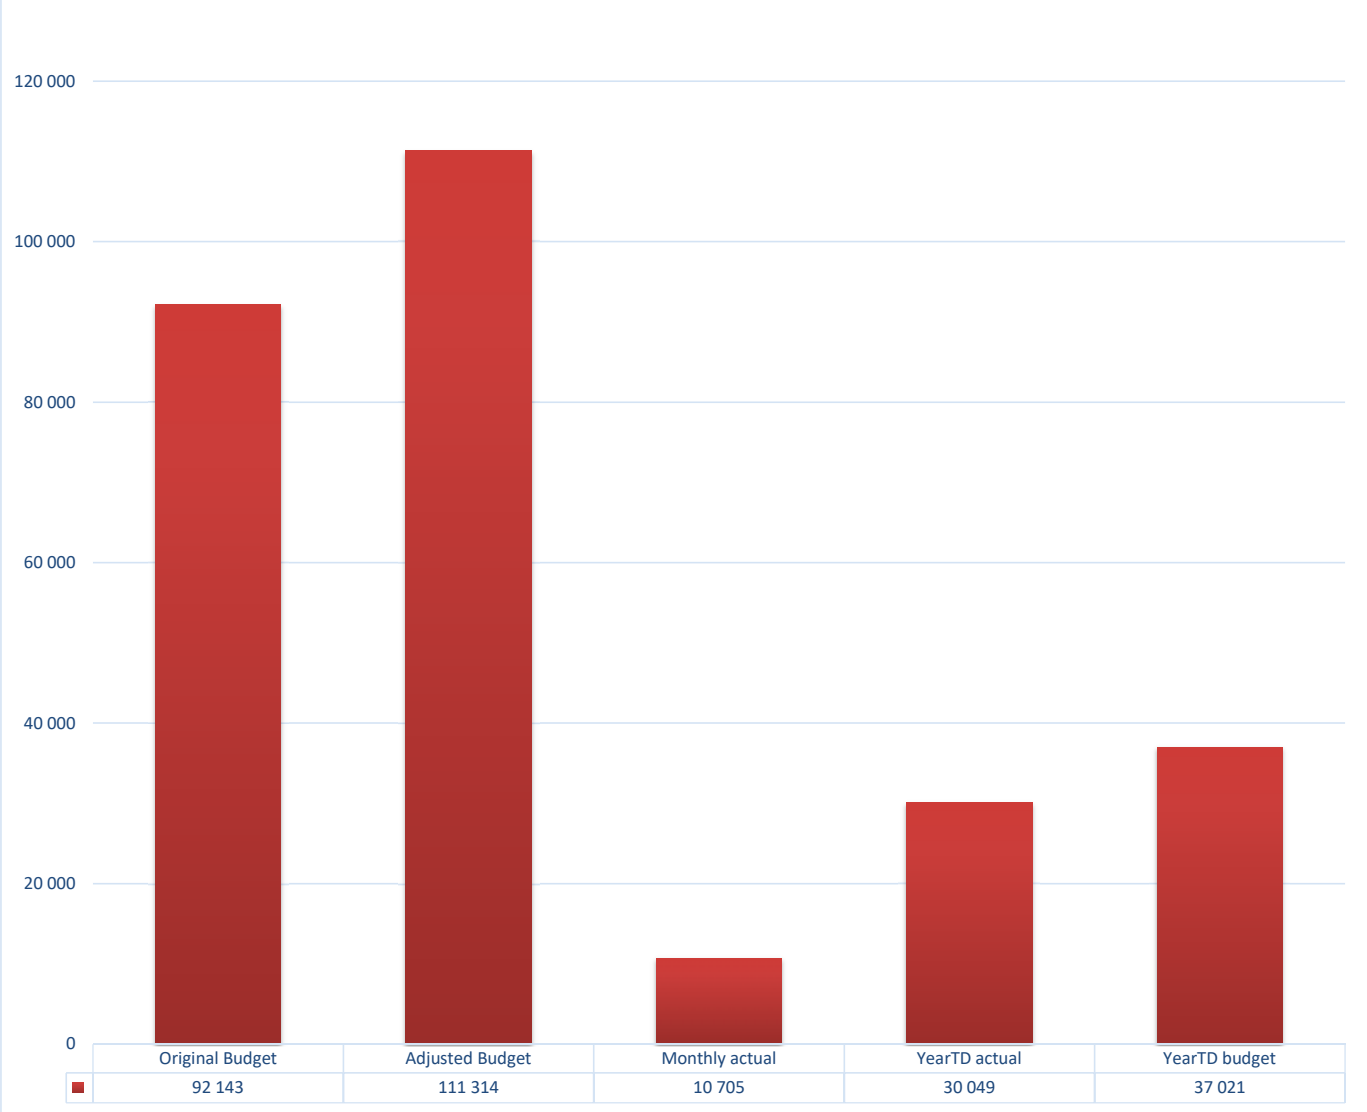
For the period 1 July 2022 to 31 October 2022, 26.14% of the budgeted operational expenditure was incurred.

Vir die periode 1 Julie 2022 tot 31 Oktober 2022, is 26.14% van die begrote operasionele uitgawes aangegaan.

Please refer to Supporting Table SC1 for explanations regarding expenditure variances.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

CAPITAL EXPENDITURE R'000



For the period 1 July 2022 to 31 October 2022, 26.99% of the budgeted capital expenditure was incurred.

Please refer to Supporting Table SC1 for explanations regarding expenditure variances.

Vir die periode 1 Julie 2022 tot 31 Oktober 2022, is 26.99% van die begrote kapitale uitgawes aangegaan.

WC022 Witzenberg - Supporting Table SC1 Material variance explanations - M04 October

Ref	Description R thousands	Variance	Reasons for material deviations
1	Revenue By Source		
	Property rates	24 323	Annual Property Rates billed during July due at end of September.
	Service charges - electricity revenue	6 038	Higher winter tariffs and increased electricity usage during winter months - downward trend experienced starting from October.
	Service charges - water revenue	(2 320)	Variance due to seasonal fluctuations experienced.
	Service charges - sanitation revenue	3 752	Industrial Effluent charges raised in relation to last quarter of 2021-2022 during August 2022.
	Service charges - refuse revenue	244	Immaterial Variance.
	Service charges - other	–	
	Rental of facilities and equipment	296	Immaterial Variance.
	Interest earned - external investments	2 077	More funds available for investment due to low initial capital expenditure as well as increase in interest rates.
	Interest earned - outstanding debtors	3 946	Conservative approach to budgeting followed.
	Dividends received	–	
	Fines, penalties and forfeits	(295)	No service provider appointed.
	Licences and permits	(326)	Immaterial Variance.
	Agency services	276	Immaterial Variance.
	Transfers and subsidies	(4 456)	Revenue in respect of capital grants only recognised when capitalisation of related grant expenditure is processed.
	Other revenue	(249)	Immaterial Variance.
	Gains on disposal of PPE	–	
2	Expenditure By Type		
	Employee related costs	2 225	Immaterial Variance.
	Post Employment Provisions	(6 172)	Adjustment to post employment provisions done on Annual Basis.
	Remuneration of councillors	(322)	Immaterial Variance.
	Debt impairment	(3 171)	Adjustment to debt impairment provision based on provision included in draft Annual Financial Statements and debtors aging as at end of October.
	Depreciation & asset impairment	(13 196)	No depreciation runs done to date.
	Finance charges	(3 015)	Immaterial Variance.
	Bulk purchases - electricity	(17 750)	Payment of Bulk Purchases for July to September only, 1 month outstanding.
	Inventory consumed	(861)	Immaterial Variance.
	Contracted services	(9 264)	Expenditure expected to increase as projects are rolled out during financial year and service provider for security services is appointed.
	Transfers and subsidies	(3 584)	Delay in Housing Top Structures.
	Other expenditure	(2 058)	Decline in expenditure in respect of items such as Hire Charges and Travel and Subsistence.
	Losses	(0)	
3	Capital Expenditure		
	Total Capital Expenditure	(7 056)	Expenditure expected to increase as capital projects are rolled out during financial year
		–	
4	Financial Position		
5	Cash Flow		
	Receipts		
	Property rates	14 038	Annual Property Rates billed during July.
	Service charges	15 154	Higher winter tariffs and increased electricity usage during winter months.
	Other revenue	1 019	Immaterial Variance.
	Government - operating	9 766	First tranch of equitable share received during July.
	Government - capital	2 697	MIG, RBIG and WSIG funding received.
	Interest	(2 871)	Conservative approach to budgeting followed.
	Dividends	–	
	Payments		
	Suppliers and employees	(7 746)	Expenditure expected to increase as projects are rolled out during financial year and service provider for security services is appointed.
	Finance charges	–	Immaterial Variance.
	Transfers and Grants	797	Immaterial Variance.
6	Measureable performance		
7	Municipal Entities		

	1	2	3	4	5	6	7	8	9	10	11	12

21/22	44%	116%	114%	129%	93%	77%	95%	81%	94%	86%	99%	117%
21/22	47%	97%	134%	106%								
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate the collection against targets set for the relevant months. The target for the month is 94% while the actual figure for October 2022 amounts to 106% in comparison to the previous year 129%.

Die doel van hierdie grafiek is om die verhaling van debiteure te illustreer teen die teikens gestel vir die onderskeie maande. Die teiken vir die maand is 94%, terwyl die syfer vir Oktober 2022 106% beloop in vergelyking met die vorige jaar 129%.

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	67%	82%	86%	85%	88%	89%	88%	89%	89%	89%	90%
21/22	44%	71%	81%	90%	90%	88%	89%	88%	89%	88%	89%	91%
22/23	47%	66%	83%	88%								
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate effectiveness of collection of debt against targets set for the year. The target for the year to date is 94% while the actual figure is 88%.

The payment culture of consumers are still the same which has a negative impact on collections.

Die doel van hierdie grafiek is om die doeltreffendheid van die verhaling van skuld te illustreer teen die teikens gestel vir die jaar. Die teiken vir die jaar tot datum is 94%, terwyl die werklike syfer 88% beloop.

Die betalingskultuur onder verbruikers is onveranderd wat die invorderings negatief beinvloed.

The debtors age analysis per Income source and customer group is as follows:

Notes

Material increases in value of creditors' categories compared to previous month to be explained

0

Reasons for balances oustanding for more than 30 days:
-Amounts did not appear on statement
-Account is in dispute

`

The movement in investments is detailed below.

Cash Flow Forecast

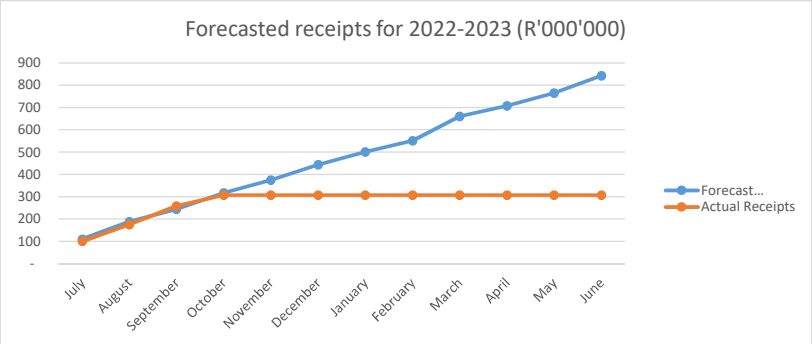
Current commitments against cash

Cash Book Balance plus Investments	R	178 635 465	-3 365 592
Total Commitments		(R164 347 469)	
Unspent Grants		(R17 485 662)	
Outstanding orders exlcluding grants		(R42 202 971)	
Eskom Account		(R20 417 352)	
Consumer Deposits		(R11 159 774)	
Required Annual Contribution to the Provi		(R44 841 016)	
Provision Current Employee Benefits		(R28 240 694)	
Uncommitted Cash Balance	R	14 287 996	

The estimated cost coverage ratio is as follow

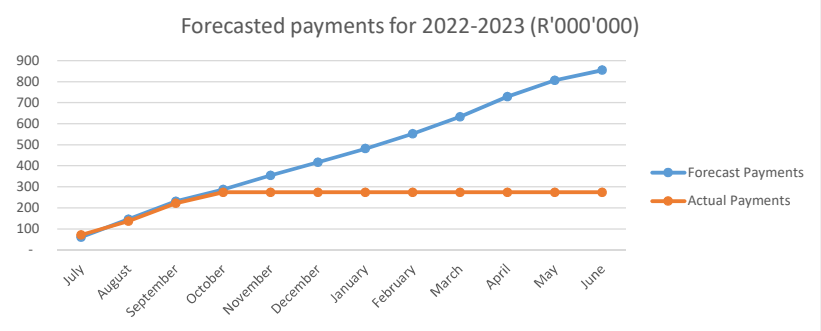
		Current
Bank Balance	R	178 635 465
Average fixed cost per month	R	53 473 444
Ratio		3,34

The ratio indicates that the municipality has sufficient cash available to cover its fixed cost for the next 3,34 months.This is slightly above the acceptable norm of 3 months.



It is estimated that cash receipts will amount to R835 m for the 2022-2023 Financial Year
The performance of actual receipts against projected receipts for the month can be summarised as follow

Month	Projected Receitps	Actual Receipts
August	R78m	R75m
September	R56m	R83m
October	R73m	R49m



It is estimated that cash payments will amount to R834 m for the 2022-2023 Financial Year
The performance of actual payments against projected payments for the month can be summarised as follow

Month	Projected Payments	Actual payments
August	R86m	R66m
September	R85m	R84m
October	R56m	R53m

Monthly Budget Statement Report Section 71 for November 2022

Financial data is in respect of the period 1 July 2022 to 30 June 2023

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

2.3 Monthly budget statements

In terms of Section 71 of the MFMA the accounting officer must prepare monthly budget statements that comply with this section. This section read as follows:

"71. (1) The accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on—
(i) its share of the local government equitable share; and
(ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of—
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.

(2) The statement must include—

(a) a projection of the relevant municipality's revenue and expenditure for the rest of the financial year, and any revisions from initial projections; and
(b) the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10).

(3) The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.

(4) The statement to the provincial treasury must be in the format of a signed document and in electronic format.

(5) The accounting officer of a municipality which has received an allocation referred to in subsection (1)(e) during any particular month must, by no later than 10 working days after

2.3 Maandelikse begroting state

In terme van Artikel 71 van die MFMA die rekenpligtige beampte moet 'n maandelikse begroting state wat voldoen aan hierdie artikel. Hierdie artikel lees soos volg:

"71. (1) Die rekenpligtige beampte van 'n munisipaliteit moet nie later as 10 werk dae na die einde van elke maand aan die burgemeester van die munisipaliteit en die betrokke Provinsiale Tesourie 1 verklaring in die voorgeskrewe formaat oor die toestand van die munisipaliteit se begroting wat die volgende besonderhede vir die maand en vir die finansiële jaar tot die einde van die maand:

(a) werklike inkomste per bron van inkomste;
(b) werklike lenings;
(c) die werklike uitgawes per stem;
(d) die werklike kapitaalbesteding, per stem;
(e) die bedrag van enige toekennings ontvang;
(f) die werklike uitgawes op daardie toekennings, uitgesluit besteding op
(i) sy deel van die plaaslike regering billike deel;
(ii) toekennings vrygestel is by die jaarlikse Verdeling van Inkomste van die nakoming van hierdie paragraaf, en
(g) wanneer dit nodig is, 'n verduideliking van-
(i) enige wesenlike afwykings van die munisipaliteit se geprojekteerde inkomste deur die bron, en van die munisipaliteit se uitgawe projeksies per stem;
(ii) enige wesenlike afwykings van die dienslewering en begrotings implementeringsplan;
(iii) enige remediërende of korrektiewe stappe geneem is of geneem word om te verseker dat die geprojekteerde inkomste en uitgawes in die munisipaliteit se goedgekeurde begroting bly.

(2) Die staat moet die volgende insluit-

(a) 'n projeksie van die betrokke munisipaliteit se inkomste en uitgawes vir die res van die finansiële jaar, en enige wysigings van die aanvanklike projeksies, en
(b) die voorgeskrewe inligting met betrekking tot die toestand van die begroting van elke munisipale entiteit wat aan die munisipaliteit in terme van artikel 87 (10).

(3) die bedrae wat in die verklaring moet in elke geval in vergelyking met die ooreenstemmende bedrae begroot vir die munisipaliteit se goedgekeurde begroting.

(4) Die verklaring aan die provinsiale tesourie moet in die formaat van 'n getekende dokument en in elektroniese formaat.

(5) Die rekenpligtige beampte van 'n munisipaliteit wat 'n toekenning bedoel in subartikel (1)(e) gedurende 'n bepaalde maand ontvang het, moet nie later nie as 10 werksdae na die

the end of that month, submit that part of the statement reflecting the particulars referred to in subsection (1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation.

(6) The provincial treasury must by no later than 22 working days after the end of each month submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity.

(7) The provincial treasury must, within 30 days after the end of each quarter, make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter."

einde van die maand, moet daardie deel van die verklaring wat die besonderhede bedoel in subartikel (1)(e) en (f) om die nasionale of provinsiale orgaan van die staat of munisipaliteit wat die toekenning oorgedra

(6) Die Provinsiale Tesourie moet nie later nie as 22 werksdae na die einde van elke maand aan die Nasionale Tesourie 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van die munisipaliteite se begrotings, per munisipaliteit en per munisipale entiteit.

(7) Die Provinsiale Tesourie moet, binne 30 dae na die einde van elke kwartaal, openbaar te maak as wat voorgeskryf mag word, 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van munisipaliteite se begrotings per munisipaliteit en per munisipale entiteit. Die LUR vir finansies moet so 'n gekonsolideerde staat nie later nie as 45 dae na die einde van elke kwartaal aan die provinsiale wetgewer dien."

A MAYOR'S REPORT

Credit control for various reasons remains a challenge for the municipality.

The unwillingness / unability of government departments to pay their municipal accounts was a big concern. However department are slowing starting to make payment. The debt is in access of R10.03 million in comparison to the prior month figure of R9.35 million.

The monthly billing was also done as scheduled and during this process 19 764 accounts amounting to R38.5 million was printed and distributed to consumers. The prepaid electricity sales amounted to R5.7. million in comparison to a cost of R5.6 million for the same month during the prior financial year.

The indigent cost to the municipality for the month amounts to R 1.8 million in comparison to the prior month figure of R1.9 millon

The accumulated debtor's collection target for the year is 94%, and the actual accumulated year to date debtor's collection is 87% in comparison to a rate of 90% for the same month in the previous year.

The municipality issued orders to the value of R 25.2 million of which R1.5 million was in terms of deviations.

The municipality currently has R 70 million in its primary bank account and R95 million in investments. The bank balance at the end of the previous month was R65 million with R120 million in investments.

The calculated cost coverage ratio of the municipality as at the end of November 2022 is 3.09 months.

A BURGEMEESTERS VERSLAG

Kredietbeheer bly 'n uitdaging vir die munisipaliteit as gevolg van verskillende redes.

Die onwilligheid / onvermoë van staats departemente om hulle munisipale rekeninge te betaal was 'n groot bekommernis. Departemente is stadig besig om hul betalings te maak. Die skuld beloop tans R10.03 miljoen in vergelyking met die vorige maand syfer van R9.35 miljoen.

Die maandelikse rekeninge is ook gehef soos geskeduleer en tydens hierdie proses is 19 764 rekeninge ten bedrae van R38.5 miljoen gedruk en aan verbruikers versprei. Die voorafbetaalde elektrisiteit verkope beloop R5.7 miljoen en was R5.6 miljoen vir dieselfde maand gedurende die vorige finansiele jaar.

Die deernis subsidies vir die maand beloop R 1.8 miljoen in vergelyking met die vorige maand syfer van R1.9 miljoen.

Die opgehoopte debiteure verhaling se teiken vir die jaar is 94%, en die werklike jaar tot op datum invordering is 87% in vergelyking met 90% vir dieselfde maand in die vorige finansiele jaar.

Bestellings ter waarde van R 25.2 miljoen uitgereik, waarvan R1.5 miljoen ten opsigte van afwykings is.

Die munisipaliteit het R 70 miljoen in die primêre bankrekening met R 95 miljoen op belegging. Die bankbalans aan die einde van die vorige maand was R65 miljoen met R120 miljoen op belegging.

Die berekende koste dekking verhouding van die munisipaliteit soos aan die einde van November 2022 is 3.09 maande.

B RECOMMENDATION

It is recommended that council take cognisance of the quarterly budget assessment for the month of November 2022 .

B AANBEVELING

Dit word aanbeveel dat die raad kennis neem van die finansiële maandverslag en ondersteunende dokumente vir November 2022 .

WC022 Witzenberg - Supporting Table SC1 Material variance explanations - M05 November

Ref	Description R thousands	Variance	Reasons for material deviations
1	Revenue By Source		
	Property rates	21 604	Annual Property Rates billed during July due at end of September.
	Service charges - electricity revenue	(473)	experienced starting from October.
	Service charges - water revenue	(2 133)	prior years.
	Service charges - sanitation revenue	3 510	Industrial Effluent charges raised in relation to last quarter of 2021-2022 during August 2022.
	Service charges - refuse revenue	303	Immaterial Variance.
	Service charges - other	–	
	Rental of facilities and equipment	545	Immaterial Variance.
	Interest earned - external investments	2 726	More funds available for investment due to low initial capital expenditure as well as increase in interest rates.
	Interest earned - outstanding debtors	5 337	Conservative approach to budgeting followed.
	Dividends received	–	
	Fines, penalties and forfeits	(555)	Immaterial Variance.
	Licences and permits	(406)	Immaterial Variance.
	Agency services	475	Immaterial Variance.
			Revenue in respect of capital grants only recognised when capitalisation of related grant expenditure is processed.
	Transfers and subsidies	(17 454)	
	Other revenue	(645)	Immaterial Variance.
	Gains on disposal of PPE	–	
2	Expenditure By Type		
	Employee related costs	2 504	Increase in expenditure related to standby and overtime.
	Post Employment Provisions	(7 715)	Adjustment to post employment provisions done on Annual Basis.
	Remuneration of councillors	(452)	Immaterial Variance.
	Debt impairment	(816)	debtors aging as at end of November.
	Depreciation & asset impairment	(16 495)	No depreciation runs done to date.
	Finance charges	(3 757)	Finance charges relating to landfill sites recognised on an annual basis.
	Bulk purchases - electricity	(26 092)	Payment of Bulk Purchases for July to October only, 1 month outstanding.
	Inventory consumed	(748)	Immaterial Variance.
	Contracted services	(11 020)	Expenditure expected to increase due to appointment of service provider for security services and as projects are rolled out during financial year.
	Transfers and subsidies	(4 560)	Delay in Housing Top Structures.
	Other expenditure	(1 381)	Decline in expenditure in respect of items such as Hire Charges and Travel and Subsistence.
	Losses	(0)	
3	Capital Expenditure		
	Total Capital Expenditure	(11 702)	Expenditure expected to increase as capital projects are rolled out during financial year
		–	
4	Financial Position		
5	Cash Flow		
	Receipts		
	Property rates	12 618	Annual Property Rates billed during July.
	Service charges	8 521	Higher winter tariffs and increased electricity usage during winter months.
	Other revenue	3 694	Increased receipts pertaining to camping fees and agency fees relating to vehicle registrations.
	Government - operating	(2 711)	Various provincial grant receipts still outstanding of which most significant is related to Housing.
	Government - capital	2 314	MIG, RBIG and WSIG funding received.
	Interest	(3 079)	Conservative approach to budgeting followed.
	Dividends	–	
	Payments		
	Suppliers and employees	(11 917)	rolled out during financial year.
	Finance charges	–	Immaterial Variance.
	Transfers and Grants	911	Immaterial Variance.
6	Measureable performance		
7	Municipal Entities		

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	109%	148%	100%	81%	108%	96%	79%	98%	90%	94%	98%
21/22	44%	116%	114%	129%	93%	77%	95%	81%	94%	86%	99%	117%
21/22	47%	97%	134%	107%	88%							
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate the collection against targets set for the relevant months. The target for the month is 94% while the actual figure for November 2022 amounts to 88% in comparison to the previous year 93%.

Die doel van hierdie grafiek is om die verhaling van debiteure te illustreer teen die teikens gestel vir die onderskeie maande. Die teiken vir die maand is 94%, terwyl die syfer vir November 2022 88% beloop in vergelyking met die vorige jaar 93%.

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	62%	82%	86%	85%	88%	89%	88%	89%	89%	89%	90%
21/22	44%	71%	81%	90%	90%	88%	89%	88%	89%	88%	89%	91%
22/23	47%	66%	83%	87%	87%							
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate effectiveness of collection of debt against targets set for the year. The target for the year to date is 94% while the actual figure is 87%.

The payment culture of consumers are still the same which has a negative impact on collections.

Die doel van hierdie grafiek is om die doeltreffendheid van die verhaling van skuld te illustreer teen die teikens gestel vir die jaar. Die teiken vir die jaar tot datum is 94%, terwyl die werklike syfer 87% beloop.

Die betalingskultuur onder verbruikers is onveranderd wat die invorderings negatief beinvloed.

The debtors age analysis per Income source and customer group is as follows:

Notes

Material increases in value of creditors' categories compared to previous month to be explained

0

Reasons for balances oustanding for more than 30 days:

-Amounts did not appear on statement

-Account is in dispute

`

The movement in investments is detailed below.

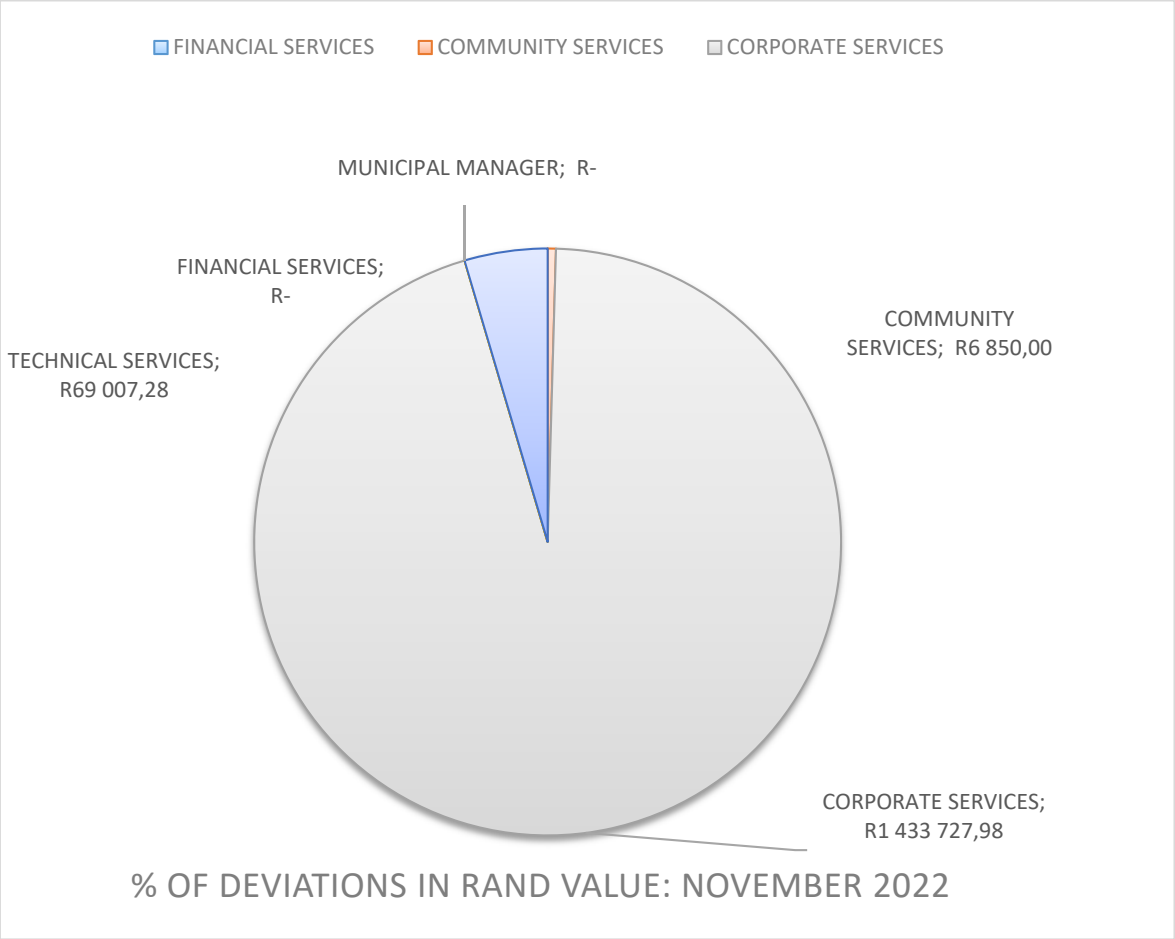
DEVIATIONS PER DIRECTORATE:



Logistics

The table below contains a high level summary of information regarding the stores section:

Logistieke

Die tabel hieronder bevat 'n hoë vlak opsomming van inligting rakende die magasyn (stoor):

MONTH	Sep 2022	Oct 2022	Nov 2022
Value of inventory at hand	R 7 846 245	R 7 487 603	R 8 203 345
Turnover rate of total value of inventory	1.24	1.27	1.24
Date of latest stores reconciliation	30 Nov 2022		
Date of last stock count	06 Dec 2022		
Date of next stock count	22 Mar 2023		

Cash Flow Forecast

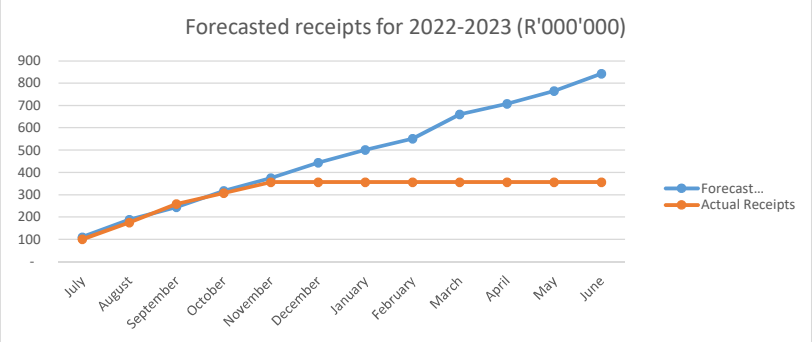
Current commitments against cash

Cash Book Balance plus Investments	R	165 254 261
Total Commitments		(R145 232 925)
Unspent Grants		(R27 074 130)
Outstanding orders exlcluding grants		(R37 434 342)
Eskom Account		(R20 198 611)
Consumer Deposits		(R7 649 382)
Required Annual Contribution to the Provi		(R29 052 145)
Provision Current Employee Benefits		(R23 824 316)
Uncommitted Cash Balance	R	20 021 336

The estimated cost coverage ratio is as follow

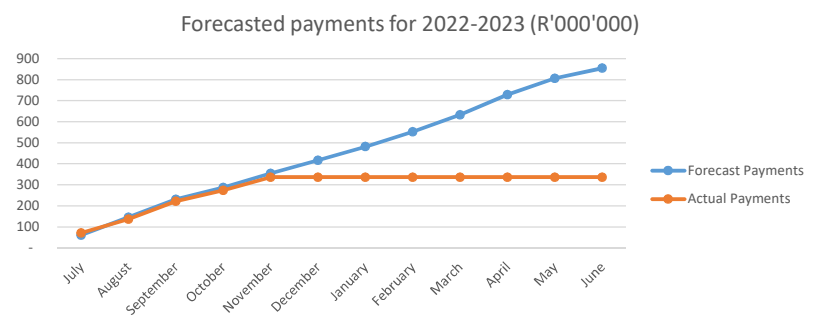
		Current
Bank Balance	R	260 254 261
Average fixed cost per month	R	53 416 713
Ratio		4,87

The ratio indicates that the municipality has sufficient cash available to cover its fixed cost for the next 3,09 months.This is slightly below the acceptable norm of 3 months



It is estimated that cash receipts will amount to R835 m for the 2022-2023 Financial Year
The performance of actual receipts against projected receipts for the month can be summarised as follow

Month	Projected Receitps	Actual Receipts
September	R56m	R83m
October	R73m	R49m
November	R57m	R49m



It is estimated that cash payments will amount to R834 m for the 2022-2023 Financial Year
The performance of actual payments against projected payments for the month can be summarised as follow

Month	Projected Payments	Actual payments
September	R85m	R84m
October	R56m	R53m
November	R67m	R62m

Aging of Insurance Claims

Monthly Budget Statement Report Section 71 for December 2022

Financial data is in respect of the period 1 July 2022 to 30 June 2023

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

2.3 Monthly budget statements

In terms of Section 71 of the MFMA the accounting officer must prepare monthly budget statements that comply with this section. This section read as follows:

"71. (1) The accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on—
(i) its share of the local government equitable share; and
(ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of—
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.

(2) The statement must include—

(a) a projection of the relevant municipality's revenue and expenditure for the rest of the financial year, and any revisions from initial projections; and
(b) the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10).

(3) The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.

(4) The statement to the provincial treasury must be in the format of a signed document and in electronic format.

(5) The accounting officer of a municipality which has received an allocation referred to in subsection (1)(e) during any particular month must, by no later than 10 working days after

2.3 Maandelikse begroting state

"71. (1) Die rekenpligtige beampte van 'n munisipaliteit moet nie later as 10 werk dae na die einde van elke maand aan die burgemeester van die munisipaliteit en die betrokke Provinsiale Tesourie 1 verklaring in die voorgeskrewe formaat oor die toestand van die munisipaliteit se begroting wat die volgende besonderhede vir die maand en vir die finansiële jaar tot die einde van die maand:

(a) werklike inkomste per bron van inkomste;
(b) werklike lenings;
(c) die werklike uitgawes per stem;
(d) die werklike kapitaalbesteding, per stem;
(e) die bedrag van enige toekennings ontvang;
(f) die werklike uitgawes op daardie toekennings, uitgesluit besteding op
(i) sy deel van die plaaslike regering billike deel;
(ii) toekennings vrygestel is by die jaarlikse Verdeling van Inkomste van die nakoming van hierdie paragraaf, en
(g) wanneer dit nodig is, 'n verduideliking van-
(i) enige wesenlike afwykings van die munisipaliteit se geprojekteerde inkomste deur die bron, en van die munisipaliteit se uitgawe projeksies per stem;
(ii) enige wesenlike afwykings van die dienslewering en begrotings implementeringsplan;
(iii) enige remediërende of korrektiewe stappe geneem is of geneem word om te verseker dat die geprojekteerde inkomste en uitgawes in die munisipaliteit se goedgekeurde begroting bly.

(2) Die staat moet die volgende insluit-

(a) 'n projeksie van die betrokke munisipaliteit se inkomste en uitgawes vir die res van die finansiële jaar, en enige wysigings van die aanvanklike projeksies, en
(b) die voorgeskrewe inligting met betrekking tot die toestand van die begroting van elke munisipale entiteit wat aan die munisipaliteit in terme van artikel 87 (10).

(3) die bedrae wat in die verklaring moet in elke geval in vergelyking met die ooreenstemmende bedrae begroot vir die munisipaliteit se goedgekeurde begroting.

(4) Die verklaring aan die provinsiale tesourie moet in die formaat van 'n getekende dokument en in elektroniese formaat.

(5) Die rekenpligtige beampte van 'n munisipaliteit wat 'n toekenning bedoel in subartikel (1)(e) gedurende 'n bepaalde maand ontvang het, moet nie later nie as 10 werksdae na die

the end of that month, submit that part of the statement reflecting the particulars referred to in subsection (1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation.

(6) The provincial treasury must by no later than 22 working days after the end of each month submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity.

(7) The provincial treasury must, within 30 days after the end of each quarter, make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter."

einde van die maand, moet daardie deel van die verklaring wat die besonderhede bedoel in subartikel (1)(e) en (f) om die nasionale of provinsiale orgaan van die staat of munisipaliteit wat die toekenning oorgedra

(6) Die Provinsiale Tesourie moet nie later nie as 22 werksdae na die einde van elke maand aan die Nasionale Tesourie 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van die munisipaliteite se begrotings, per munisipaliteit en per munisipale entiteit.

(7) Die Provinsiale Tesourie moet, binne 30 dae na die einde van elke kwartaal, openbaar te maak as wat voorgeskryf mag word, 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van munisipaliteite se begrotings per munisipaliteit en per munisipale entiteit. Die LUR vir finansies moet so 'n gekonsolideerde staat nie later nie as 45 dae na die einde van elke kwartaal aan die provinsiale wetgewer dien."

A MAYOR'S REPORT

Credit control for various reasons remains a challenge for the municipality.

The unwillingness / unability of government departments to pay their municipal accounts was a big concern. However department are slowing starting to make payment. The debt is in access of R9.15 million in comparison to the prior month figure of R10.03 million.

The monthly billing was also done as scheduled and during this process 19 764 accounts amounting to R40.5 million was printed and distributed to consumers. The prepaid electricity sales amounted to R5.4. million in comparison to a cost of R6.1 million for the same month during the prior financial year.

The indigent cost to the municipality for the month amounts to R 1.8 million in comparison to the prior month figure of R1.8 millon

The accumulated debtor's collection target for the year is 94%, and the actual accumulated year to date debtor's collection is 84% in comparison to a rate of 88% for the same month in the previous year.

The municipality issued orders to the value of R 18.7 million of which R2.1 million was in terms of deviations.

The municipality currently has R 120.6 million in its primary bank account and R95 million in investments. The bank balance at the end of the previous month was R76 million with R95 million in investments.

The calculated cost coverage ratio of the municipality as at the end of December 2022 is 3.85 months.

B RECOMMENDATION

It is recommended that council take cognisance of the quarterly budget assessment for the month of December 2022 .

C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

A BURGEMEESTERS VERSLAG

Kredietbeheer bly 'n uitdaging vir die munisipaliteit as gevolg van verskillende redes.

Die onwilligheid / onvermoë van staats departemente om hulle munisipale rekeninge te betaal was 'n groot bekommernis. Departemente is stadig besig om hul betalings te maak. Die skuld beloop tans R9.15 miljoen in vergelyking met die vorige maand syfer van R10.03 miljoen.

Die maandelikse rekeninge is ook gehef soos geskeduleer en tydens hierdie proses is 19 764 rekeninge ten bedrae van R40.5 miljoen gedruk en aan verbruikers versprei. Die voorafbetaalde elektrisiteit verkope beloop R5.4 miljoen en was R6.1 miljoen vir dieselfde maand gedurende die vorige finansiele jaar.

Die deernis subsidies vir die maand beloop R 1.8 miljoen in vergelyking met die vorige maand syfer van R1.8 miljoen.

Die opgehoopte debiteure verhaling se teiken vir die jaar is 94%, en die werklike jaar tot op datum invordering is 84% in vergelyking met 88% vir dieselfde maand in die vorige finansiele jaar.

Bestellings ter waarde van R 18.7 miljoen uitgereik, waarvan R2.1 miljoen ten opsigte van afwykings is.

Die munisipaliteit het R 120.6 miljoen in die primêre bankrekening met R 95 miljoen op belegging. Die bankbalans aan die einde van die vorige maand was R76 miljoen met R95 miljoen op belegging.

Die berekende koste dekking verhouding van die munisipaliteit soos aan die einde van Desember 2022 is 3.85 maande.

B AANBEVELING

Dit word aanbeveel dat die raad kennis neem van die finansiële maandverslag en ondersteunende dokumente vir Desember 2022 .

WC022 Witzenberg - Supporting Table SC1 Material variance explanations - M06 December

Ref	Description R thousands	Variance	Reasons for material deviations
1	Revenue By Source		
	Property rates	18 894	Annual Property Rates billed during July due at end of September.
	Service charges - electricity revenue	(8 876)	Higher winter tariffs and increased electricity usage during winter months - downward trend experienced starting from October. Based on historical data usage expected to increase during last quarter of financial year.
	Service charges - water revenue	(2 263)	Seasonal fluctuations experienced as well as lower dam levels due to lower winter rains experienced in relation to prior years.
	Service charges - sanitation revenue	12 749	Industrial Effluent charges raised in relation to last quarter of 2021-2022 during August and December 2022 - reversal of August billing to be done during January 2023
	Service charges - refuse revenue	432	Immaterial Variance.
	Service charges - other	–	
	Rental of facilities and equipment	534	Immaterial Variance.
	Interest earned - external investments	3 242	More funds available for investment due to low initial capital expenditure as well as increase in interest rates.
	Interest earned - outstanding debtors	6 872	Conservative approach to budgeting followed.
	Dividends received	–	
	Fines, penalties and forfeits	(559)	Immaterial Variance.
	Licences and permits	(542)	Immaterial Variance.
	Agency services	424	Immaterial Variance.
	Transfers and subsidies	4 542	Revenue in respect of capital grants only recognised when capitalisation of related grant expenditure is processed.
	Other revenue	(946)	Immaterial Variance.
	Gains on disposal of PPE	–	
2	Expenditure By Type		
	Employee related costs	511	Immaterial Variance.
	Post Employment Provisions	(9 258)	Adjustment to post employment provisions done on Annual Basis.
	Remuneration of councillors	(581)	Immaterial Variance.
	Debt impairment	6 042	Adjustment to debt impairment provision based on provision included in draft Annual Financial Statements and debtors aging as at end of December.
	Depreciation & asset impairment	(19 794)	No depreciation runs done to date.
	Finance charges	(4 507)	Finance charges relating to landfill sites recognised on an annual basis.
	Bulk purchases - electricity	(34 398)	Payment of Bulk Purchases for July to November only, 1 month outstanding.
	Inventory consumed	(1 153)	Immaterial Variance.
	Contracted services	(12 479)	Expenditure expected to increase due to appointment of service provider for security services and as projects are rolled out during financial year.
	Transfers and subsidies	(5 653)	Delay in Housing Top Structures.
	Other expenditure	(1 165)	Decline in expenditure in respect of items such as Hire Charges and Travel and Subsistence.
	Losses	(0)	
3	Capital Expenditure		
	Total Capital Expenditure	(17 903)	Expenditure expected to increase as capital projects are rolled out during financial year.
		–	
4	Financial Position		
5	Cash Flow		
	Receipts		
	Property rates	10 194	Annual Property Rates billed during July due at end of September.
	Service charges	206	Immaterial Variance.
	Other revenue	2 938	Increased receipts pertaining to camping fees during December 2022 and agency fees relating to vehicle registrations.
	Government - operating	19 816	Second Equitable Share tranch received during December 2022.
	Government - capital	20 646	MIG, RBIG, WSIG and Van Breda Bridge Project funding received.
	Interest	(3 913)	Conservative approach to budgeting followed.
	Dividends	–	
	Payments		
	Suppliers and employees	(21 382)	Expenditure expected to increase due to appointment of service provider for security services and as projects are rolled out during financial year.
	Finance charges	10	Immaterial Variance.
	Transfers and Grants	911	Immaterial Variance.
6	Measureable performance		
7	Municipal Entities		

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	109%	148%	100%	81%	108%	96%	79%	98%	90%	94%	98%
21/22	44%	116%	114%	129%	93%	77%	95%	81%	94%	86%	99%	117%
21/22	47%	97%	134%	107%	88%	64%						
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate the collection against targets set for the relevant months. The target for the month is 94% while the actual figure for December 2022 amounts to 64% in comparison to the previous year 77%.

Die doel van hierdie grafiek is om die verhaling van debiteure te illustreer teen die teikens gestel vir die onderskeie maande. Die teiken vir die maand is 94%, terwyl die syfer vir Desember 2022 64% beloop in vergelyking met die vorige jaar 77%.

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	62%	82%	86%	85%	88%	89%	88%	89%	89%	89%	90%
21/22	44%	71%	81%	90%	90%	88%	89%	88%	89%	88%	89%	91%
22/23	47%	66%	83%	87%	87%	84%						
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate effectiveness of collection of debt against targets set for the year. The target for the year to date is 94% while the actual figure is 84%.

The payment culture of consumers are still the same which has a negative impact on collections.

Die doel van hierdie grafiek is om die doeltreffendheid van die verhaling van skuld te illustreer teen die teikens gestel vir die jaar. Die teiken vir die jaar tot datum is 94%, terwyl die werklike syfer 84% beloop.

Die betalingskultuur onder verbruikers is onveranderd wat die invorderings negatief beinvloed.

The debtors age analysis per Income source and customer group is as follows:

Notes

Material increases in value of creditors' categories compared to previous month to be explained

0

Reasons for balances oustanding for more than 30 days:

-Amounts did not appear on statement

-Account is in dispute

`

The movement in investments is detailed below.

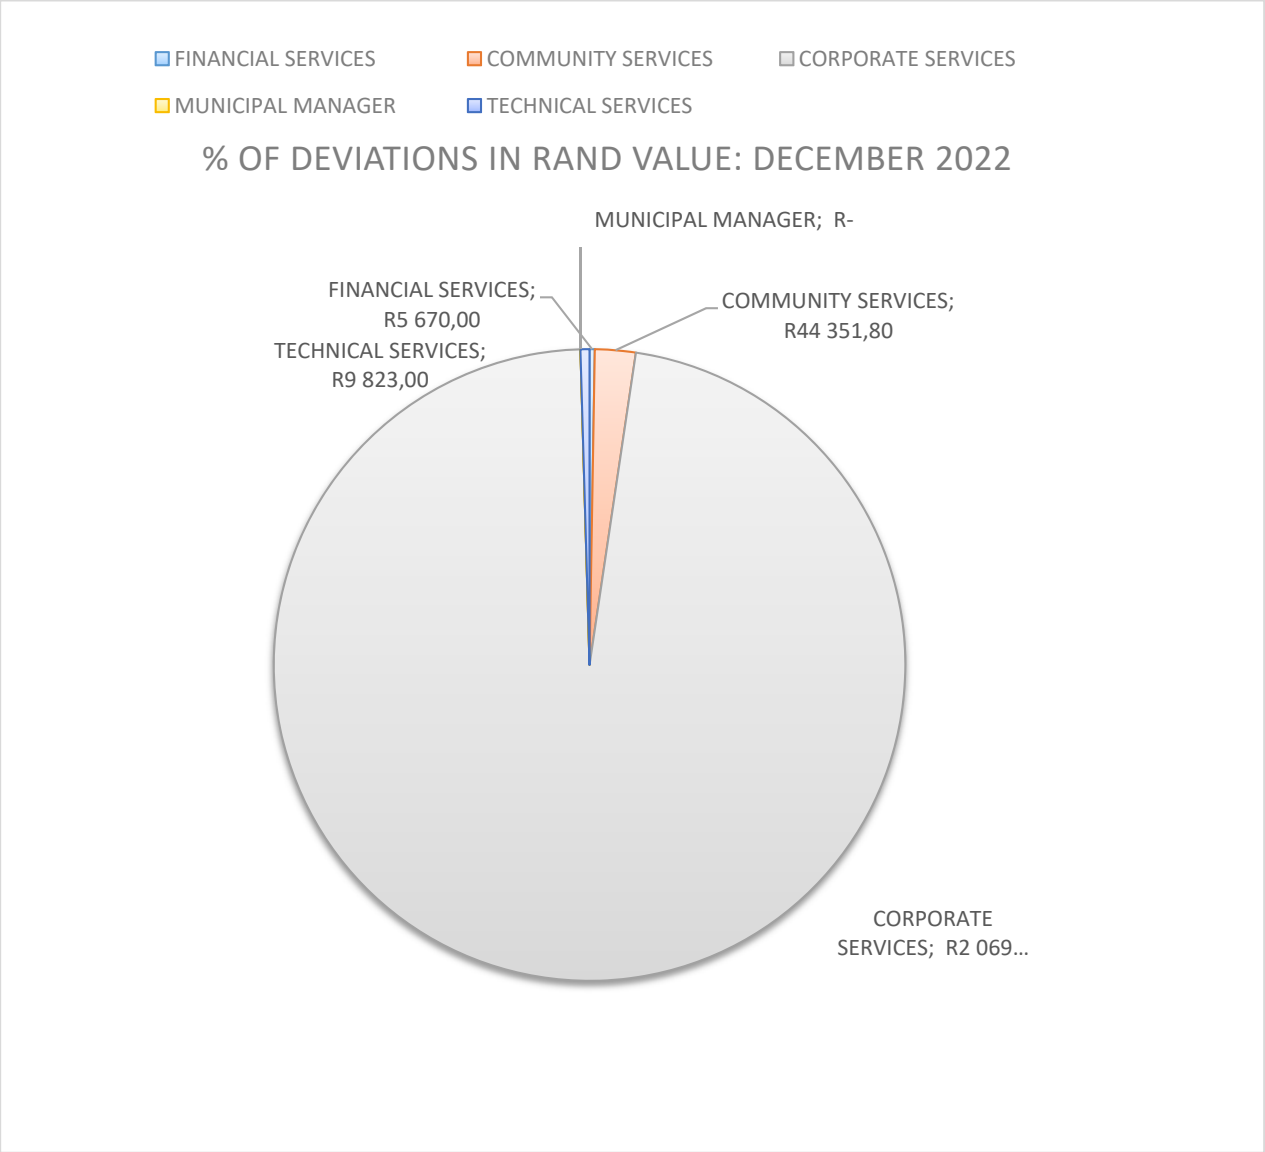
DEVIATIONS PER DIRECTORATE:



Logistics

The table below contains a high level summary of information regarding the stores section:

Logistieke

Die tabel hieronder bevat 'n hoë vlak opsomming van inligting rakende die magasyn (stoor):

MONTH	Oct 2022	Nov 2022	Dec 2022
Value of inventory at hand	R 7 487 603	R 8 203 345	R 8 445 302
Turnover rate of total value of inventory	1.27	1.24	1.21
Date of latest stores reconciliation	31 Dec 2022		
Date of last stock count	06 Dec 2022		
Date of next stock count	14 Mar 2023		

Cash Flow Forecast

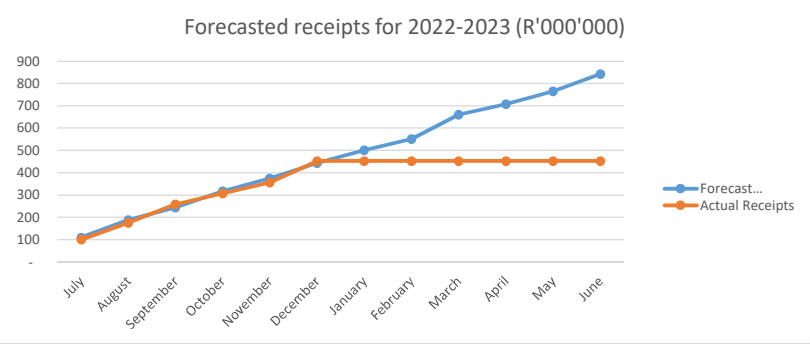
Current commitments against cash

Cash Book Balance plus Investments	R	205 642 274
Total Commitments		(R139 475 164)
Unspent Grants		(R27 880 795)
Outstanding orders exlcluding grants		(R24 393 156)
Eskom Account		(R16 951 006)
Consumer Deposits		(R11 830 629)
Required Annual Contribution to the Provi		(R29 052 145)
Provision Current Employee Benefits		(R29 367 434)
Uncommitted Cash Balance	R	66 167 110

The estimated cost coverage ratio is as follow

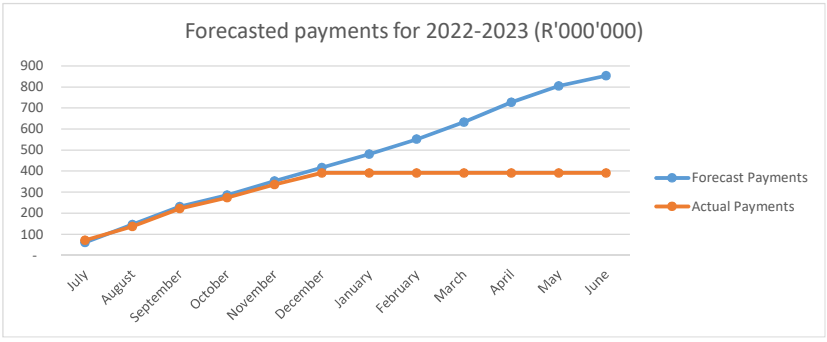
		Current
Bank Balance	R	205 642 274
Average fixed cost per month	R	53 460 029
Ratio		3,85

The ratio indicates that the municipality has sufficient cash available to cover its fixed cost for the next 3,85 months.This is slightly below the acceptable norm of 3 months



It is estimated that cash receipts will amount to R835 m for the 2022-2023 Financial Year
The performance of actual receipts against projected receipts for the month can be summarised as follow

Month	Projected Receitps	Actual Receipts
October	R73m	R49m
November	R57m	R49m
December	R70m	R96m



It is estimated that cash payments will amount to R834 m for the 2022-2023 Financial Year
The performance of actual payments against projected payments for the month can be summarised as follow

Month	Projected Payments	Actual payments
October	R55m	R53m
November	R67m	R62m
December	R63m	R55m

Monthly Budget Statement Report Section 71 for January 2023

Financial data is in respect of the period 1 July 2022 to 30 June 2023

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

2.3 Monthly budget statements

In terms of Section 71 of the MFMA the accounting officer must prepare monthly budget statements that comply with this section. This section read as follows:

"71. (1) The accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on—
(i) its share of the local government equitable share; and
(ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of—
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.

(2) The statement must include—

(a) a projection of the relevant municipality's revenue and expenditure for the rest of the financial year, and any revisions from initial projections; and
(b) the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10).

(3) The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.

(4) The statement to the provincial treasury must be in the format of a signed document and in electronic format.

(5) The accounting officer of a municipality which has received an allocation referred to in subsection (1)(e) during any particular month must, by no later than 10 working days after

2.3 Maandelikse begroting state

In terme van Artikel 71 van die MFMA die rekenpligtige beampte moet 'n maandelikse begroting state wat voldoen aan hierdie artikel. Hierdie artikel lees soos volg:

"71. (1) Die rekenpligtige beampte van 'n munisipaliteit moet nie later as 10 werk dae na die einde van elke maand aan die burgemeester van die munisipaliteit en die betrokke Provinsiale Tesourie 1 verklaring in die voorgeskrewe formaat oor die toestand van die munisipaliteit se begroting wat die volgende besonderhede vir die maand en vir die finansiële jaar tot die einde van die maand:

(a) werklike inkomste per bron van inkomste;
(b) werklike lenings;
(c) die werklike uitgawes per stem;
(d) die werklike kapitaalbesteding, per stem;
(e) die bedrag van enige toekennings ontvang;
(f) die werklike uitgawes op daardie toekennings, uitgesluit besteding op
(i) sy deel van die plaaslike regering billike deel;
(ii) toekennings vrygestel is by die jaarlikse Verdeling van Inkomste van die nakoming van hierdie paragraaf, en
(g) wanneer dit nodig is, 'n verduideliking van-
(i) enige wesenlike afwykings van die munisipaliteit se geprojekteerde inkomste deur die bron, en van die munisipaliteit se uitgawe projeksies per stem;
(ii) enige wesenlike afwykings van die dienslewering en begrotings implementeringsplan;
(iii) enige remediërende of korrektiewe stappe geneem is of geneem word om te verseker dat die geprojekteerde inkomste en uitgawes in die munisipaliteit se goedgekeurde begroting bly.

(2) Die staat moet die volgende insluit-

(a) 'n projeksie van die betrokke munisipaliteit se inkomste en uitgawes vir die res van die finansiële jaar, en enige wysigings van die aanvanklike projeksies, en
(b) die voorgeskrewe inligting met betrekking tot die toestand van die begroting van elke munisipale entiteit wat aan die munisipaliteit in terme van artikel 87 (10).

(3) die bedrae wat in die verklaring moet in elke geval in vergelyking met die ooreenstemmende bedrae begroot vir die munisipaliteit se goedgekeurde begroting.

(4) Die verklaring aan die provinsiale tesourie moet in die formaat van 'n getekende dokument en in elektroniese formaat.

(5) Die rekenpligtige beampte van 'n munisipaliteit wat 'n toekenning bedoel in subartikel (1)(e) gedurende 'n bepaalde maand ontvang het, moet nie later nie as 10 werksdae na die

the end of that month, submit that part of the statement reflecting the particulars referred to in subsection (1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation.

(6) The provincial treasury must by no later than 22 working days after the end of each month submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity.

(7) The provincial treasury must, within 30 days after the end of each quarter, make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter."

einde van die maand, moet daardie deel van die verklaring wat die besonderhede bedoel in subartikel (1)(e) en (f) om die nasionale of provinsiale orgaan van die staat of munisipaliteit wat die toekenning oorgedra

(6) Die Provinsiale Tesourie moet nie later nie as 22 werksdae na die einde van elke maand aan die Nasionale Tesourie 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van die munisipaliteite se begrotings, per munisipaliteit en per munisipale entiteit.

(7) Die Provinsiale Tesourie moet, binne 30 dae na die einde van elke kwartaal, openbaar te maak as wat voorgeskryf mag word, 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van munisipaliteite se begrotings per munisipaliteit en per munisipale entiteit. Die LUR vir finansies moet so 'n gekonsolideerde staat nie later nie as 45 dae na die einde van elke kwartaal aan die provinsiale wetgewer dien."

A MAYOR'S REPORT

Credit control for various reasons remains a challenge for the municipality.

The unwillingness / unability of government departments to pay their municipal accounts was a big concern. However department are slowing starting to make payment. The debt is in access of R9.58 million in comparison to the prior month figure of R9.15 million.

The monthly billing was also done as scheduled and during this process 19 732 accounts amounting to R34.5 million was printed and distributed to consumers. The prepaid electricity sales amounted to R5.4. million in comparison to a cost of R6.2 million for the same month during the prior financial year.

The indigent cost to the municipality for the month amounts to R 1.8 million in comparison to the prior month figure of R1.8 millon

The accumulated debtor's collection target for the year is 94%, and the actual accumulated year to date debtor's collection is 88% in comparison to a rate of 89% for the same month in the previous year.

The municipality issued orders to the value of R 29.5 million of which R151 thousand was in terms of deviations.

The municipality currently has R 151.5 million in its primary bank account and R60 million in investments. The bank balance at the end of the previous month was R120.6 million with R95 million in investments.

The calculated cost coverage ratio of the municipality as at the end of January 2023 is 3.85 months.

B RECOMMENDATION

It is recommended that council take cognisance of the quarterly budget assessment for the month of January 2023 .

C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

A BURGEMEESTERS VERSLAG

Kredietbeheer bly 'n uitdaging vir die munisipaliteit as gevolg van verskillende redes.

Die onwilligheid / onvermoë van staats departemente om hulle munisipale rekeninge te betaal was 'n groot bekommernis. Departemente is stadig besig om hul betalings te maak. Die skuld beloop tans R9.58 miljoen in vergelyking met die vorige maand syfer van R9.15 miljoen.

Die maandelikse rekeninge is ook gehef soos geskeduleer en tydens hierdie proses is 19 732 rekeninge ten bedrae van R40.5 miljoen gedruk en aan verbruikers versprei. Die voorafbetaalde elektrisiteit verkope beloop R5.4 miljoen en was R6.2 miljoen vir dieselfde maand gedurende die vorige finansiele jaar.

Die deernis subsidies vir die maand beloop R 1.8 miljoen in vergelyking met die vorige maand syfer van R1.8 miljoen.

Die opgehoopte debiteure verhaling se teiken vir die jaar is 94%, en die werklike jaar tot op datum invordering is 88% in vergelyking met 89% vir dieselfde maand in die vorige finansiele jaar.

Bestellings ter waarde van R 29.5 miljoen uitgereik, waarvan R151 duisend ten opsigte van afwykings is.

Die munisipaliteit het R 151.5 miljoen in die primêre bankrekening met R 60 miljoen op belegging. Die bankbalans aan die einde van die vorige maand was R120.6 miljoen met R95 miljoen op belegging.

Die berekende koste dekking verhouding van die munisipaliteit soos aan die einde van Januarie 2023 is 3.85 maande.

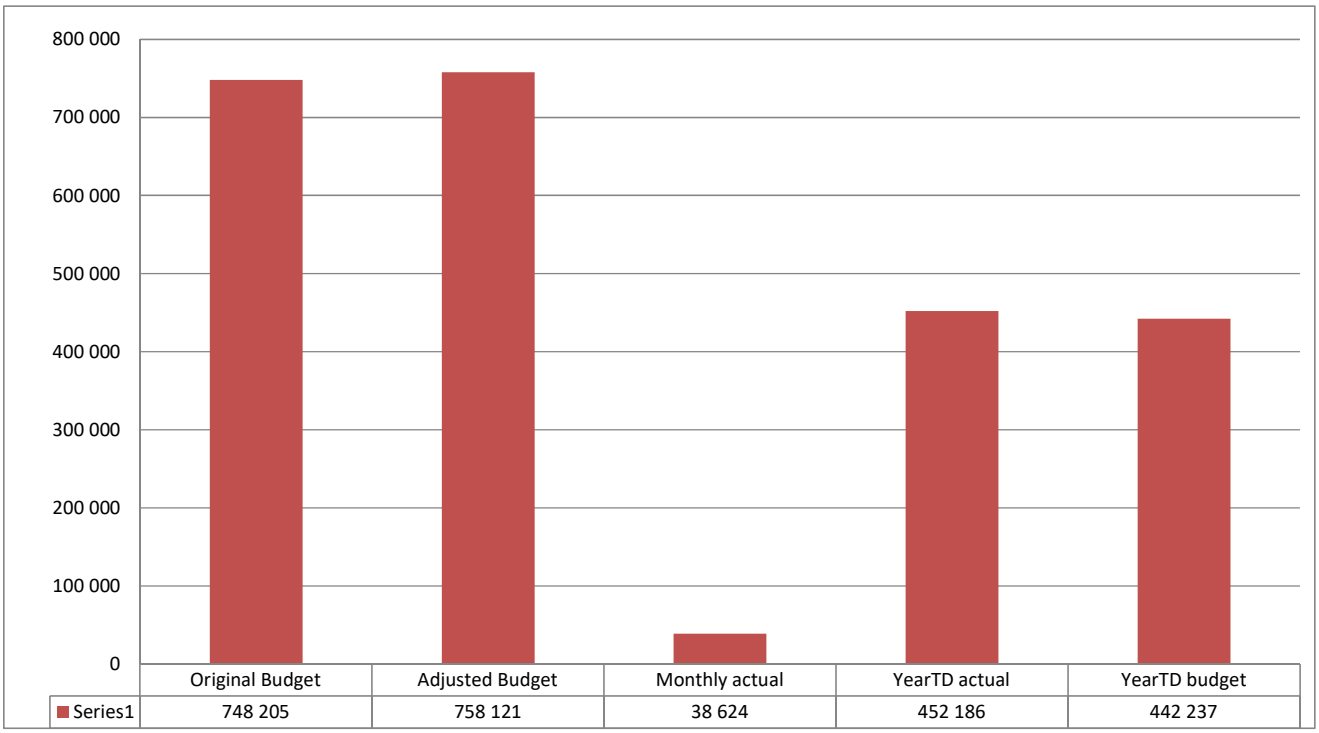
B AANBEVELING

Dit word aanbeveel dat die raad kennis neem van die finansiële maandverslag en ondersteunende dokumente vir Januarie 2023 .

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

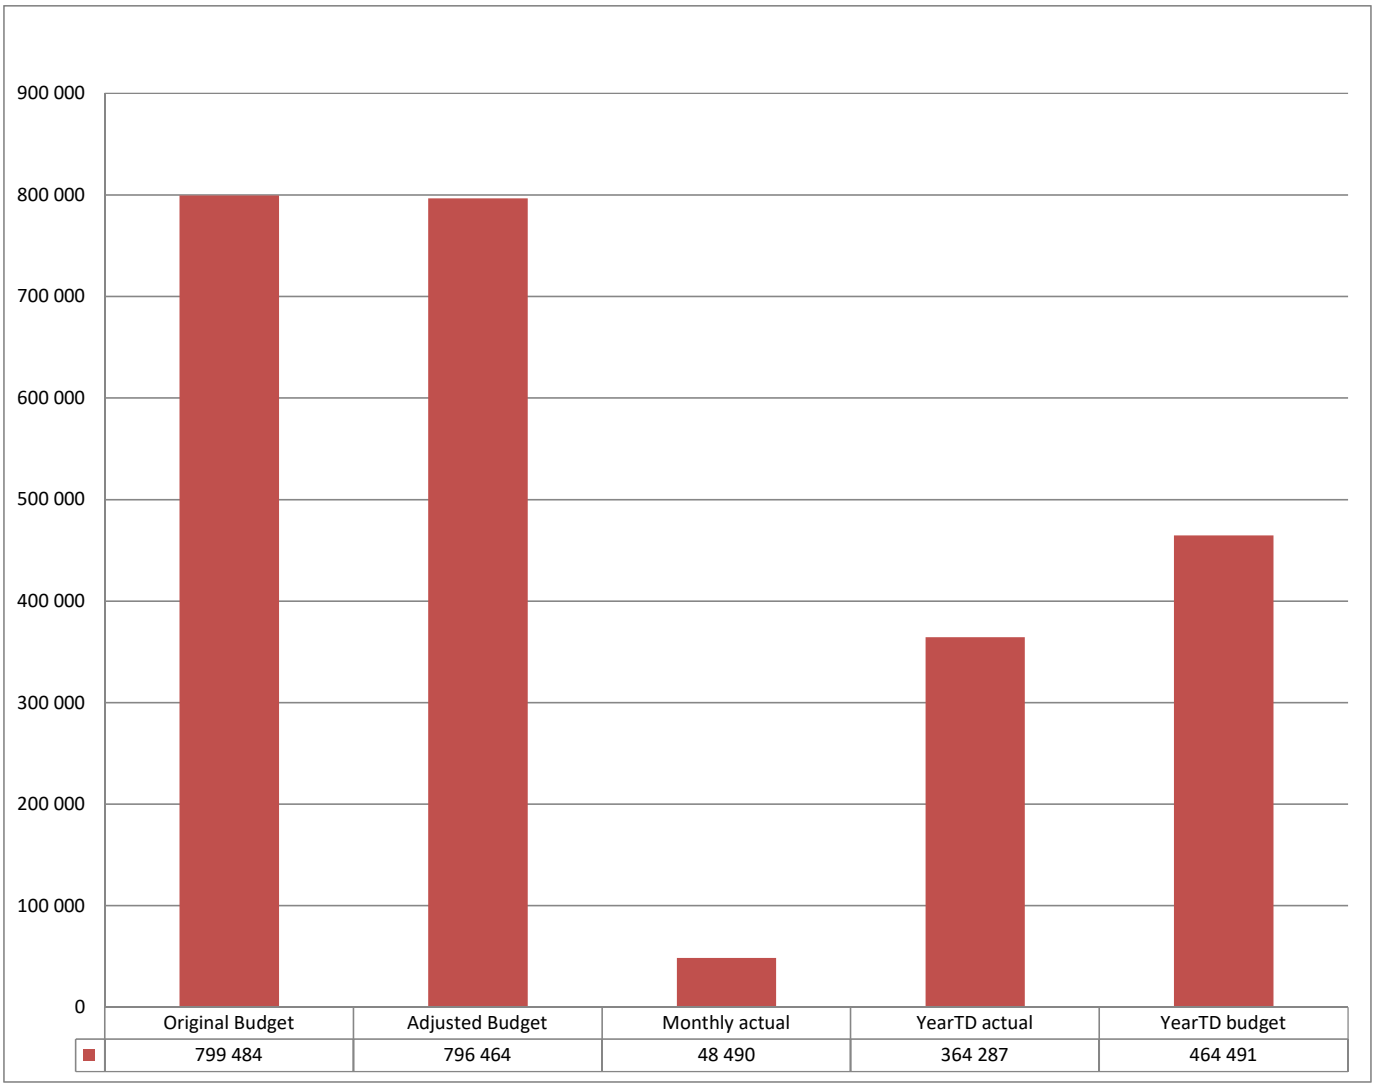
TOTAL OPERATIONAL REVENUE R'000



For the period 1 July 2022 to 31 January 2023, 59.65% of the budgeted operational revenue was raised.

Vir die periode 1 Julie 2022 tot 31 Januarie 2023, is 59.65% van die begrote operasionele inkomste gehef.

TOTAL OPERATIONAL EXPENDITURE R'000



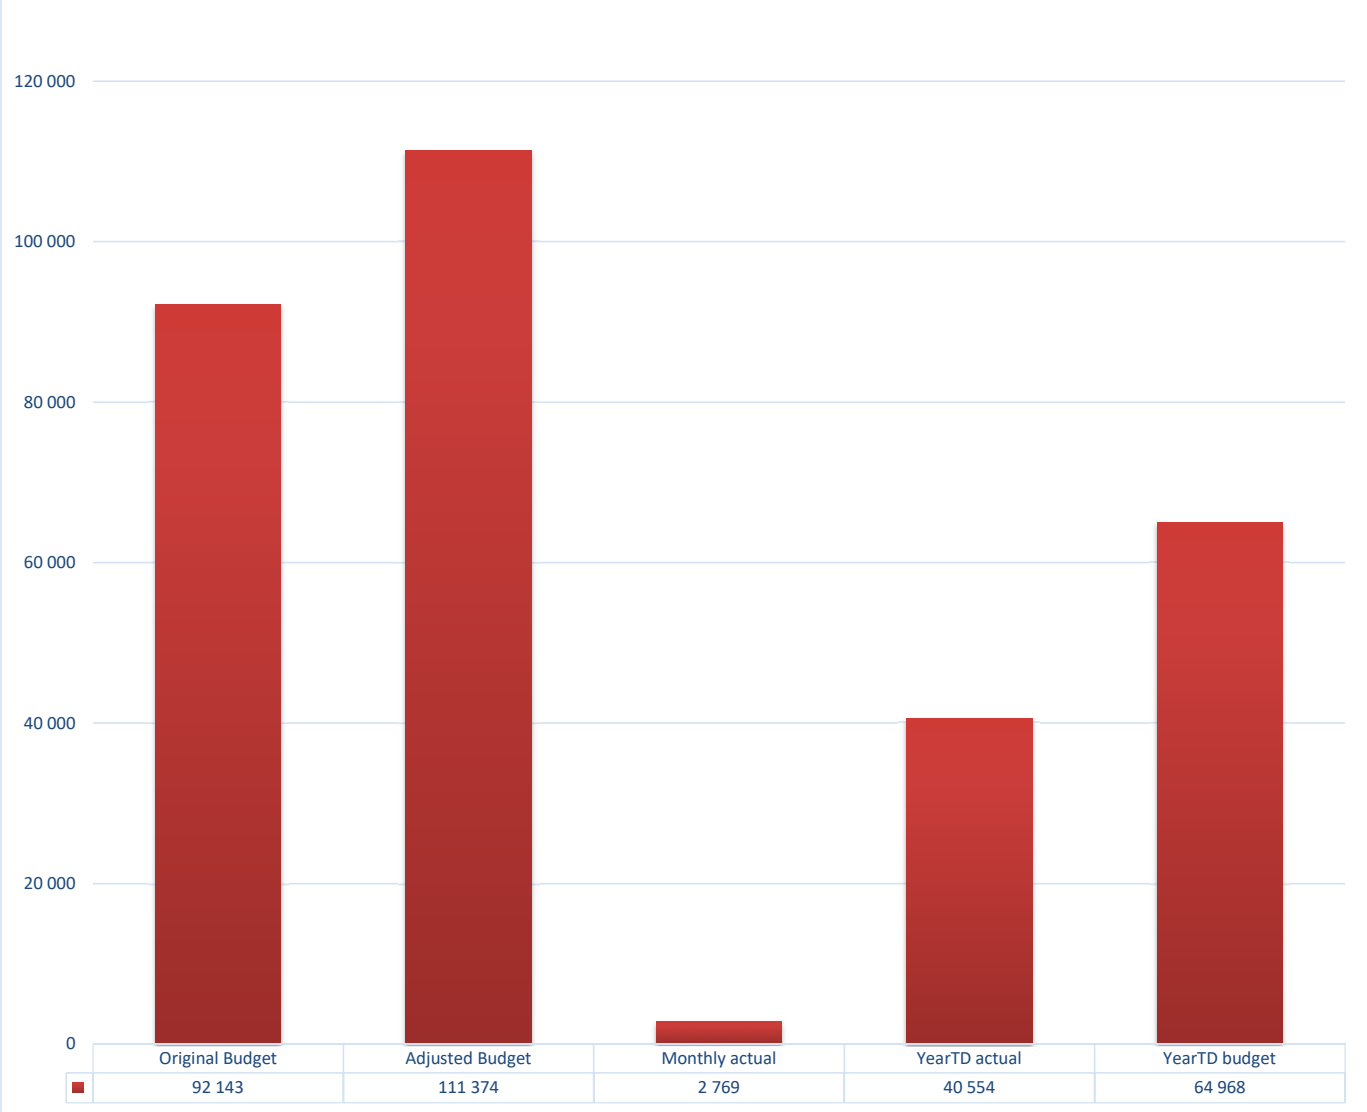
For the period 1 July 2022 to 31 January 2023, 45.74% of the budgeted operational expenditure was incurred.

Vir die periode 1 Julie 2022 tot 31 Januarie 2023, is 45.74% van die begrote operasionele uitgawes aangegaan.

Please refer to Supporting Table SC1 for explanations regarding expendiure variances.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

CAPITAL EXPENDITURE R'000



For the period 1 July 2022 to 31 January 2023, 36.41% of the budgeted capital expenditure was incurred.

Please refer to Supporting Table SC1 for explanations regarding expenditure variances.

Vir die periode 1 Julie 2022 tot 31 Januarie 2023, is 36.41% van die begrote kapitale uitgawes aangegaan.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

WC022 Witzenberg - Supporting Table SC1 Material variance explanations - M07 January

Ref	Description R thousands	Variance	Reasons for material deviations
1	Revenue By Source		
	Property rates	16 059	Annual Property Rates billed during July due at end of September.
	Service charges - electricity revenue	(16 506)	Based on historical data usage expected to increase during last quarter of financial year (Agriculture Season). Reduced usage due to impact of Load Shedding.
	Service charges - water revenue	(1 821)	Seasonal fluctuations experienced as well as lower dam levels due to lower winter rains experienced in relation to prior years.
	Service charges - sanitation revenue	7 997	Industrial Effluent charges raised in relation to last quarter of 2021-2022 during August and December 2022 - reversal of August billing done during January 2023
	Service charges - refuse revenue	425	Immaterial Variance.
	Service charges - other	–	
	Rental of facilities and equipment	783	Immaterial Variance.
	Interest earned - external investments	3 876	More funds available for investment due to low initial capital expenditure as well as increase in interest rates.
	Interest earned - outstanding debtors	8 436	Conservative approach to budgeting followed.
	Dividends received	–	
	Fines, penalties and forfeits	(304)	Immaterial Variance.
	Licences and permits	(662)	Immaterial Variance.
	Agency services	351	Immaterial Variance.
	Transfers and subsidies	(8 480)	Revenue in respect of capital grants only recognised when capitalisation of related grant expenditure is processed.
	Other revenue	(205)	Immaterial Variance.
	Gains on disposal of PPE	–	
2	Expenditure By Type		
	Employee related costs	662	Immaterial Variance.
	Post Employment Provisions	(10 801)	Adjustment to post employment provisions done on Annual Basis.
	Remuneration of councillors	(673)	Immaterial Variance.
	Debt impairment	7 843	Adjustment to debt impairment provision based on provision included in Annual Financial Statements and debtors aging as at end of January.
	Depreciation & asset impairment	(23 093)	No depreciation runs done to date.
	Finance charges	(5 267)	Finance charges relating to landfill sites recognised on an annual basis.
	Bulk purchases - electricity	(45 543)	Payment of Bulk Purchases for July to December only, 1 month outstanding. Based on historical data usage expected to increase during last quarter of financial year (Agriculture Season). Reduced usage due to impact of Load Shedding.
	Inventory consumed	(1 141)	Low expenditure trends experienced.
	Contracted services	(13 061)	Expenditure expected to increase due to appointment of service provider for security services and as projects are rolled out during financial year.
	Transfers and subsidies	(6 581)	Delay in Housing Top Structures.
	Other expenditure	(2 550)	Decline in expenditure in respect of items such as Hire Charges and Travel and Subsistence.
	Losses	(0)	
3	Capital Expenditure		
	Total Capital Expenditure	(24 415)	Expenditure expected to increase as capital projects are rolled out during financial year.
		–	
4	Financial Position		
5	Cash Flow		
	Receipts		
	Property rates	8 271	Annual Property Rates billed during July due at end of September.
	Service charges	(1 980)	Based on historical data electricity usage expected to increase during last quarter of financial year (Agriculture Season). Reduced electricity usage due to impact of Load Shedding.
	Other revenue	4 323	Increased receipts pertaining to camping fees and agency fees relating to vehicle registrations and insurance claims.
	Government - operating	7 475	Second Equitable Share tranch received during December 2022.
	Government - capital	15 423	MIG, RBIG, WSIG and Van Breda Bridge Project funding received.
	Interest	(3 480)	Conservative approach to budgeting followed.
	Dividends	–	
	Payments		
	Suppliers and employees	(37 831)	Expenditure expected to increase due to appointment of service provider for security services and as projects are rolled out during financial year.
	Finance charges	10	Immaterial Variance.
	Transfers and Grants	1 136	Delay in Housing Top Structures.
6	Measureable performance		
7	Municipal Entities		

	1	2	3	4	5	6	7	8	9	10	11	12

21/22	47%	97%	134%	107%	88%	71%	108%					
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate the collection against targets set for the relevant months. The target for the month is 94% while the actual figure for January 2023 amounts to 108% in comparison to the previous year 95%.

Die doel van hierdie grafiek is om die verhaling van debiteure te illustreer teen die teikens gestel vir die onderskeie maande. Die teiken vir die maand is 94%, terwyl die syfer vir Januarie 2023 108% beloop in vergelyking met die vorige jaar 95%.

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	62%	82%	86%	85%	88%	89%	88%	89%	89%	89%	90%

22/23	47%	66%	83%	87%	87%	85%	88%					
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate effectiveness of collection of debt against targets set for the year. The target for the year to date is 94% while the actual figure is 88%.

Die doel van hierdie grafiek is om die doeltreffendheid van die verhaling van skuld te illustreer teen die teikens gestel vir die jaar. Die teiken vir die jaar tot datum is 94%, terwyl die werklike syfer 88% beloop.

The payment culture of consumers are still the same which has a negative impact on collections.

Die betalingskultuur onder verbruikers is onveranderd wat die invorderings negatief beinvloed.

The debtors age analysis per Income source and customer group is as follows:

Monthly Budget Statement Report Section 71 for February 2023

Financial data is in respect of the period 1 July 2022 to 30 June 2023

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

2.3 Monthly budget statements

In terms of Section 71 of the MFMA the accounting officer must prepare monthly budget statements that comply with this section. This section read as follows:

"71. (1) The accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on—
(i) its share of the local government equitable share; and
(ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of—
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.

(2) The statement must include—

(a) a projection of the relevant municipality's revenue and expenditure for the rest of the financial year, and any revisions from initial projections; and
(b) the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10).

(3) The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.

(4) The statement to the provincial treasury must be in the format of a signed document and in electronic format.

(5) The accounting officer of a municipality which has received an allocation referred to in subsection (1)(e) during any particular month must, by no later than 10 working days after

In terme van Artikel 71 van die MFMA die rekenpligtige beampte moet 'n maandelikse begroting state wat voldoen aan hierdie artikel. Hierdie artikel lees soos volg:

"71. (1) Die rekenpligtige beampte van 'n munisipaliteit moet nie later as 10 werk dae na die einde van elke maand aan die burgemeester van die munisipaliteit en die betrokke Provinsiale Tesourie 1 verklaring in die voorgeskrewe formaat oor die toestand van die munisipaliteit se begroting wat die volgende besonderhede vir die maand en vir die finansiële jaar tot die einde van die maand:

(a) werklike inkomste per bron van inkomste;
(b) werklike lenings;
(c) die werklike uitgawes per stem;
(d) die werklike kapitaalbesteding, per stem;
(e) die bedrag van enige toekennings ontvang;
(f) die werklike uitgawes op daardie toekennings, uitgesluit besteding op
(i) sy deel van die plaaslike regering billike deel;
(ii) toekennings vrygestel is by die jaarlikse Verdeling van Inkomste van die nakoming van hierdie paragraaf, en
(g) wanneer dit nodig is, 'n verduideliking van-
(i) enige wesenlike afwykings van die munisipaliteit se geprojekteerde inkomste deur die bron, en van die munisipaliteit se uitgawe projeksies per stem;
(ii) enige wesenlike afwykings van die dienslewering en begrotings implementeringsplan;
(iii) enige remediërende of korrektiewe stappe geneem is of geneem word om te verseker dat die geprojekteerde inkomste en uitgawes in die munisipaliteit se goedgekeurde begroting bly.

(2) Die staat moet die volgende insluit-

(a) 'n projeksie van die betrokke munisipaliteit se inkomste en uitgawes vir die res van die finansiële jaar, en enige wysigings van die aanvanklike projeksies, en
(b) die voorgeskrewe inligting met betrekking tot die toestand van die begroting van elke munisipale entiteit wat aan die munisipaliteit in terme van artikel 87 (10).

(3) die bedrae wat in die verklaring moet in elke geval in vergelyking met die ooreenstemmende bedrae begroot vir die munisipaliteit se goedgekeurde begroting.

(4) Die verklaring aan die provinsiale tesourie moet in die formaat van 'n getekende dokument en in elektroniese formaat.

(5) Die rekenpligtige beampte van 'n munisipaliteit wat 'n toekenning bedoel in subartikel (1)(e) gedurende 'n bepaalde maand ontvang het, moet nie later nie as 10 werksdae na die

the end of that month, submit that part of the statement reflecting the particulars referred to in subsection (1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation.

(6) The provincial treasury must by no later than 22 working days after the end of each month submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity.

(7) The provincial treasury must, within 30 days after the end of each quarter, make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter."

einde van die maand, moet daardie deel van die verklaring wat die besonderhede bedoel in subartikel (1)(e) en (f) om die nasionale of provinsiale orgaan van die staat of munisipaliteit wat die toekenning oorgedra

(6) Die Provinsiale Tesourie moet nie later nie as 22 werksdae na die einde van elke maand aan die Nasionale Tesourie 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van die munisipaliteite se begrotings, per munisipaliteit en per munisipale entiteit.

(7) Die Provinsiale Tesourie moet, binne 30 dae na die einde van elke kwartaal, openbaar te maak as wat voorgeskryf mag word, 'n gekonsolideerde staat in die voorgeskrewe formaat oor die stand van munisipaliteite se begrotings per munisipaliteit en per munisipale entiteit. Die LUR vir finansies moet so 'n gekonsolideerde staat nie later nie as 45 dae na die einde van elke kwartaal aan die provinsiale wetgewer dien."

A MAYOR'S REPORT

Credit control for various reasons remains a challenge for the municipality.

The unwillingness / unability of government departments to pay their municipal accounts was a big concern. However department are slowing starting to make payment. The debt is in access of R6.8 million in comparison to the prior month figure of R9.58 million.

The monthly billing was also done as scheduled and during this process 19 777 accounts amounting to R38.5 million was printed and distributed to consumers. The prepaid electricity sales amounted to R4.9 million in comparison to a cost of R5.6 million for the same month during the prior financial year.

The indigent cost to the municipality for the month amounts to R 1.8 million in comparison to the prior month figure of R1.8 millon

The accumulated debtor's collection target for the year is 94%, and the actual accumulated year to date debtor's collection is 87% in comparison to a rate of 88% for the same month in the previous year.

The municipality issued orders to the value of R 21.2 million of which R1.4 milion was in terms of deviations.

The municipality currently has R 200 million in its primary bank account and R10 million in investments. The bank balance at the end of the previous month was R151.5 million with R60 million in investments.

The calculated cost coverage ratio of the municipality as at the end of February 2023 is 3.53 months.

A BURGEMEESTERS VERSLAG

Kredietbeheer bly 'n uitdaging vir die munisipaliteit as gevolg van verskillende redes.

Die onwilligheid / onvermoë van staats departemente om hulle munisipale rekeninge te betaal was 'n groot bekommernis. Departemente is stadig besig om hul betalings te maak. Die skuld beloop tans R6.8 miljoen in vergelyking met die vorige maand syfer van R9.58 miljoen.

Die maandelikse rekeninge is ook gehef soos geskeduleer en tydens hierdie proses is 19 777 rekeninge ten bedrae van R38.5 miljoen gedruk en aan verbruikers versprei. Die voorafbetaalde elektrisiteit verkope beloop R4.9 miljoen en was R5.6 miljoen vir dieselfde maand gedurende die vorige finansiele jaar.

Die deernis subsidies vir die maand beloop R 1.8 miljoen in vergelyking met die vorige maand syfer van R1.8 miljoen.

Die opgehoopte debiteure verhaling se teiken vir die jaar is 94%, en die werklike jaar tot op datum invordering is 87% in vergelyking met 88% vir dieselfde maand in die vorige finansiele jaar.

Bestellings ter waarde van R 21.2 miljoen uitgereik, waarvan R1.4 miljoen ten opsigte van afwykings is.

Die munisipaliteit het R 200 miljoen in die primêre bankrekening met R 10 miljoen op belegging. Die bankbalans aan die einde van die vorige maand was R151.5 miljoen met R60 miljoen op belegging.

Die berekende koste dekking verhouding van die munisipaliteit soos aan die einde van Februarie 2023 is 3.53 maande.

B RECOMMENDATION

It is recommended that council take cognisance of the quarterly budget assessment for the month of February 2023 .

B AANBEVELING

Dit word aanbeveel dat die raad kennis neem van die finansiële maandverslag en ondersteunende dokumente vir Februarie 2023 .

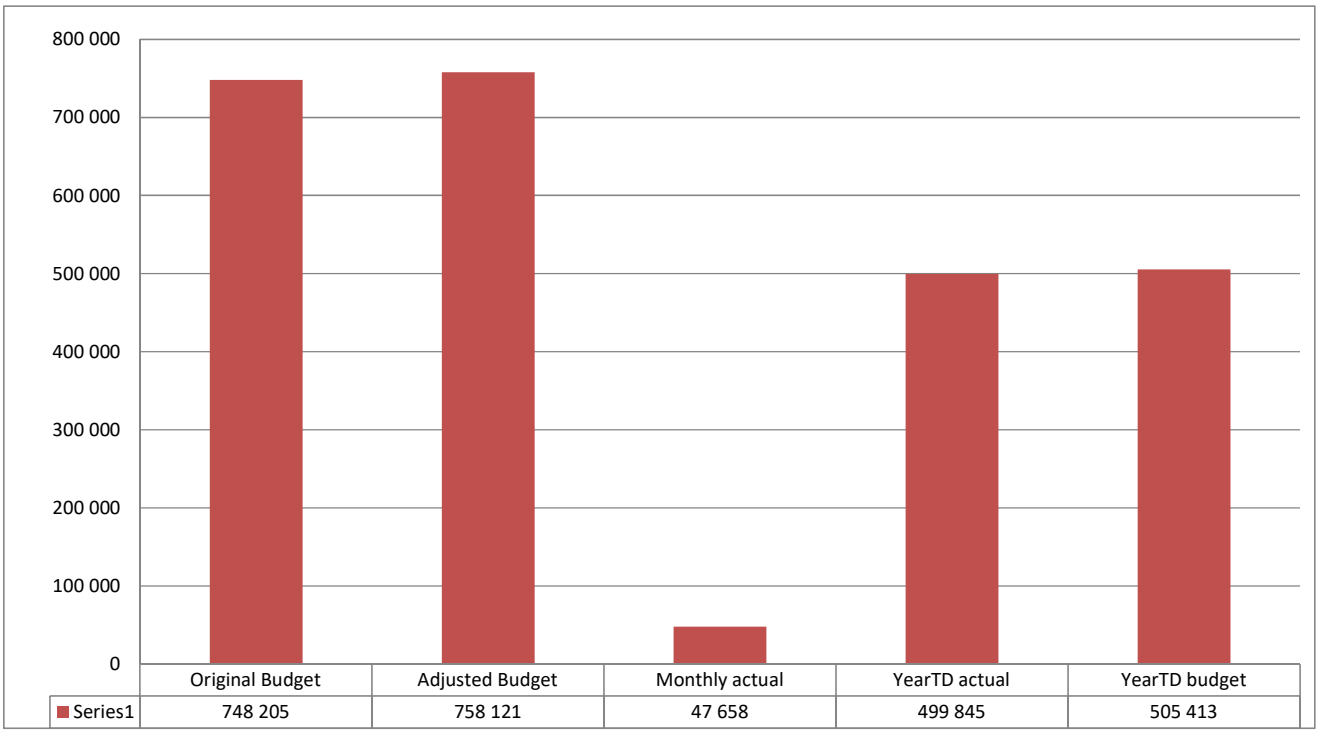
C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

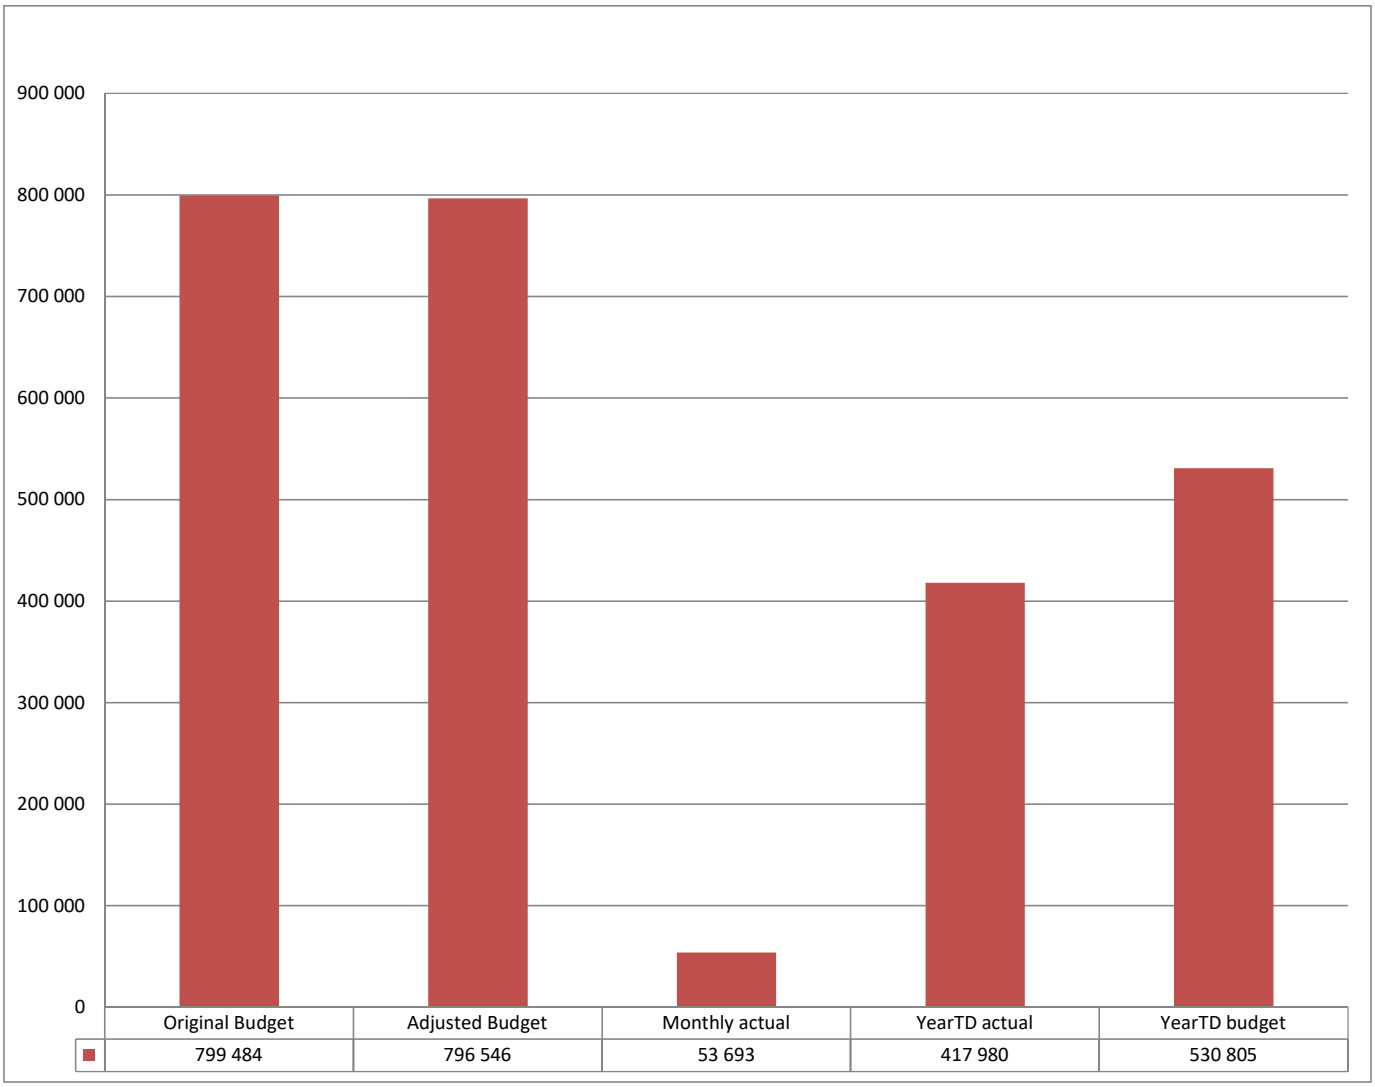
TOTAL OPERATIONAL REVENUE R'000



For the period 1 July 2022 to 28 February 2023, 65.93% of the budgeted operational revenue was raised.

Vir die periode 1 Julie 2022 tot 28 Februarie 2023, is 65.93% van die begrote operasionele inkomste gehef.

TOTAL OPERATIONAL EXPENDITURE R'000



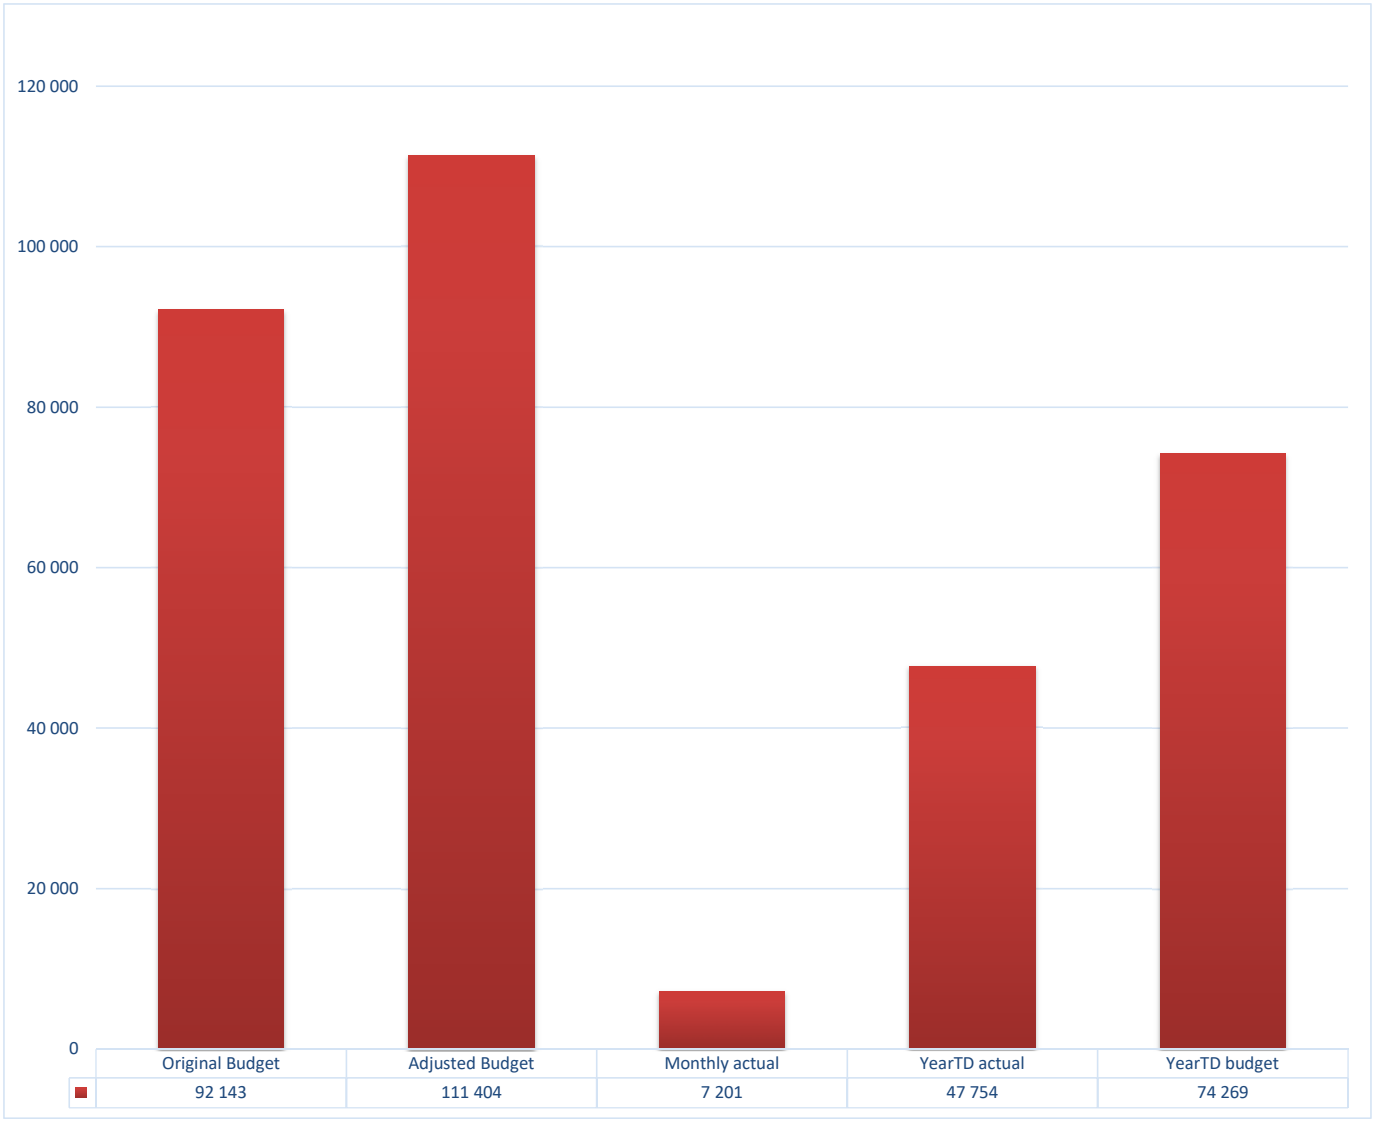
For the period 1 July 2022 to 28 February 2023, 52.47% of the budgeted operational expenditure was incurred.

Vir die periode 1 Julie 2022 tot 28 Februarie 2023, is 52.47% van die begrote operasionele uitgawes aangegaan.

Please refer to Supporting Table SC1 for explanations regarding expendiure variances.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

CAPITAL EXPENDITURE R'000



For the period 1 July 2022 to 28 February 2023, 42.87% of the budgeted capital expenditure was incurred.

Please refer to Supporting Table SC1 for explanations regarding expenditure variances.

Vir die periode 1 Julie 2022 tot 28 Februarie 2023, is 42.87% van die begrote kapitale uitgawes aangegaan.

Verwys asb na "Supporting Table SC1" vir stawende redes met betrekking tot spandering afwykings.

In-year budget statement tables

The following table provides a summary of the financial performance and financial position of the municipality as at 28 February 2023.

The revenue and expenditure figures excludes internal charges

Other expenditure includes operational costs such as:

Advertising, Publicity and Marketing
External Audit Fees
Communication
External Computer Service
Insurance Underwriting
Travel and Subsistence
Printing, Publications and Books
Uniform and Protective Clothing
Wet Fuel
Hire Charges

The tables provides detail of capital expenditure according to municipal votes.

WC022 Witzenberg - Supporting Table SC1 Material variance explanations - M08 February

Ref	Description R thousands	Variance	Reasons for material deviations
1	Revenue By Source		
	Property rates	13 186	Annual Property Rates billed during July due at end of September.
	Service charges - electricity revenue	(20 100)	Based on historical data usage expected to increase during last quarter of financial year (Agriculture Season). Reduced usage due to impact of Load Shedding.
	Service charges - water revenue	(1 306)	Seasonal fluctuations experienced as well as lower dam levels due to lower winter rains experienced in relation to prior years.
	Service charges - sanitation revenue	8 311	Industrial Effluent charges raised in relation to last quarter of 2021-2022 during August and December 2022.
	Service charges - refuse revenue	713	Immaterial Variance.
	Service charges - other	–	
	Rental of facilities and equipment	1 091	Immaterial Variance.
	Interest earned - external investments	4 464	More funds available for investment due to low initial capital expenditure as well as increase in interest rates.
	Interest earned - outstanding debtors	10 060	Conservative approach to budgeting followed.
	Dividends received	–	
	Fines, penalties and forfeits	(573)	Immaterial Variance.
	Licences and permits	(710)	Immaterial Variance.
	Agency services	451	Immaterial Variance.
	Transfers and subsidies	(20 755)	Revenue in respect of capital grants only recognised when capitalisation of related grant expenditure is processed.
	Other revenue	(400)	Immaterial Variance.
	Gains on disposal of PPE	–	
2	Expenditure By Type		
	Employee related costs	338	Immaterial Variance.
	Post Employment Provisions	(12 344)	Adjustment to post employment provisions done on Annual Basis.
	Remuneration of councillors	(802)	Immaterial Variance.
	Debt impairment	8 554	Adjustment to debt impairment provision based on provision included in Annual Financial Statements and debtors aging as at end of January.
	Depreciation & asset impairment	(26 392)	No depreciation runs done to date.
	Finance charges	(6 027)	Finance charges relating to landfill sites recognised on an annual basis.
	Bulk purchases - electricity	(51 449)	Payment of Bulk Purchases for July to January only, 1 month outstanding. Based on historical data usage expected to increase during last quarter of financial year (Agriculture Season). Reduced usage due to impact of Load Shedding.
	Inventory consumed	(653)	Low expenditure trends experienced.
	Contracted services	(12 876)	Expenditure expected to increase due to appointment of service provider for security services and as projects are rolled out during financial year.
	Transfers and subsidies	(7 759)	Delay in Housing Top Structures.
	Other expenditure	(3 416)	Decline in expenditure in respect of items such as Hire Charges and Travel and Subsistence.
	Losses	(0)	
3	Capital Expenditure		
	Total Capital Expenditure	(26 515)	Expenditure expected to increase as capital projects are rolled out during financial year. Delays experienced in major capital projects such as the Tulbagh Dam and Van Breda Bridge
		–	
4	Financial Position		
5	Cash Flow		
	Receipts		
	Property rates	8 230	Annual Property Rates billed during July due at end of September.
	Service charges	(7 882)	Based on historical data electricity usage expected to increase during last quarter of financial year (Agriculture Season). Reduced electricity usage due to impact of Load Shedding.
	Other revenue	5 377	Increased receipts pertaining to camping fees and agency fees relating to vehicle registrations and insurance claims.
	Government - operating	(1 366)	Second Equitable Share tranch received during December 2022.
	Government - capital	14 291	MIG, RBIG, WSIG and Van Breda Bridge Project funding received.
	Interest	(2 091)	Conservative approach to budgeting followed.
	Dividends	–	
	Payments		
	Suppliers and employees	(46 205)	Expenditure expected to increase due to appointment of service provider for security services and as projects are rolled out during financial year. Payment of Bulk Purchases for July to January only, 1 month outstanding.
	Finance charges	10	Immaterial Variance.
	Transfers and Grants	1 251	Delay in Housing Top Structures.
6	Measureable performance		
7	Municipal Entities		

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	109%	148%	100%	81%	108%	96%	79%	98%	90%	94%	98%
21/22	44%	116%	114%	129%	93%	77%	95%	81%	94%	86%	99%	117%
21/22	47%	97%	134%	107%	88%	71%	108%	85%				
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate the collection against targets set for the relevant months. The target for the month is 94% while the actual figure for February 2023 amounts to 85% in comparison to the previous year 81%.

Die doel van hierdie grafiek is om die verhaling van debiteure te illustreer teen die teikens gestel vir die onderskeie maande. Die teiken vir die maand is 94%, terwyl die syfer vir Februarie 2023 85% beloop in vergelyking met die vorige jaar 81%.

	1	2	3	4	5	6	7	8	9	10	11	12
20/21	37%	62%	82%	86%	85%	88%	89%	88%	89%	89%	89%	90%
21/22	44%	71%	81%	90%	90%	88%	89%	88%	89%	88%	89%	91%
22/23	47%	66%	83%	87%	87%	85%	88%	87%				
Target	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%	94%

The purpose of this graph is to illustrate effectiveness of collection of debt against targets set for the year. The target for the year to date is 94% while the actual figure is 87%.

The payment culture of consumers are still the same which has a negative impact on collections.

Die doel van hierdie grafiek is om die doeltreffendheid van die verhaling van skuld te illustreer teen die teikens gestel vir die jaar. Die teiken vir die jaar tot datum is 94%, terwyl die werklike syfer 87% beloop.

Die betalingskultuur onder verbruikers is onveranderd wat die invorderings negatief beinvloed.

The debtors age analysis per Income source and customer group is as follows:

Notes

Material increases in value of creditors' categories compared to previous month to be explained

0

Reasons for balances oustanding for more than 30 days:
-Amounts did not appear on statement
-Account is in dispute

`

The movement in investments is detailed below.

- MEMORANDUM -

AAN / TO: Chief Financial Officer

VAN / FROM: Manager: Supply Chain

DATUM / DATE: 04 April 2023

VERW. / REF.: 09/1/2/2

SUPPLY CHAIN MANAGEMENT: PARAGRAPH 7 (4) QUARTERLY REPORT ENDING 31 MARCH 2023: IMPLEMENTATION OF SUPPLY CHAIN MANAGEMENT POLICY

1. PURPOSE

(a) To report on the implementation of Council's Supply Chain Management Policy with regards to the following sub sections:

(i) Demand management
(ii) Acquisition management
(iii) Logistics management
(iv) Disposal management
(v) Performance management
(vi) Other matters

2. POLICY REQUIREMENTS

Paragraph 7 (3) of Council's Supply Chain Management Policy as approved on 30 May 2022, states the following:

The Supply Chain Manager must, within 4 days of the end of each quarter, submit a report on the implementation of the supply chain management policy to the Chief Financial Officer, of which he must submit it within 3 days to the Accounting Officer. The Accounting Officer must within 3 days after receiving the report submit it to the Mayor.

3. DISCUSSION: SUPPLY CHAIN MANAGEMENT COMPONENTS

(a) Demand management

Demand management requires timely planning and management process to ensure that all goods and services which are required are quantified, budgeted for and delivered in a timely and effective manner at the right locations and at the critical delivery dates. These goods and services must be of appropriate quality and quantity at a fair cost.

✉ 44 Ceres 6835 ☎ (023) 316 1854 (023) 316 1877 admin@witzenberg.gov.za

Furthermore the required specifications must ensure that needs are met.

In order to enhance the demand planning process, an annual procurement plan was implemented for the 2022-2023 financial year for capital spending. The revised Capital budget for 2022-2023 is R 100 871 408. The capital spending for the third quarter amounted to R 55 747 925 which equals **55%.** This is below the target of **60%** for the third quarter. Measures have been put in place to ensure that targets are met.

Specifications have been drafted unbiased and advertised as such in order to promote the five pillars of procurement as set out in section 217 of the Constitution of South Africa (Act 108 of 1996). It ultimately ensured that the needs are addressed effectively.

(b) Acquisition management

The system of acquisition management must ensure the following:

(i) That goods and services are procured in accordance with authorized processes only;
(ii) That expenditure on goods and services is incurred in terms of an approved budget in terms of section 15 of the Municipal Finance Management Act (Act 56 of 2003);
(iii) That the threshold values for different procurement processes are complied with;
(iv) That bid documentation, evaluation and adjudication criteria and general conditions of a contract are in accordance with any applicable legislation; and
(v) That any Treasury guidelines on acquisition management are properly taken into account.

The bid documentation that is utilized is in accordance with the general conditions of contract and applicable legislation such as the Construction Industry Development Board Act (Act 38 of 2000). We have also taken into account guidelines issued by National and Provincial Treasury in order to further enhance our processes.

I. Bid committees

The following table details the number of bid committee meetings held for the quarter under review:

Month	Bid Specification Committee	Bid Evaluation Committee	Bid Adjudication Committee
Jan 2023	4	4	3
Feb 2023	4	5	4
Mar 2023	5	4	5

In addition, the Internal Audit section, Legal Services and the Local Economic development department have been invited to attend our bid committee meetings on an ad-hoc basis. This is an effort to promote transparency with regards to the processes that they will be concentrating on.

Competitive bids (in excess of R 200 000) to the value of **R 64 424 440.71 (incl. VAT)** was awarded during the quarter under review.

The following table details the number of competitive bids awarded by the bid adjudication committee including the combined values of those bids:

Month	Number of awards	Combined value of awards
Jan 2023	4	R 12 490 328
Feb 2023	4	R 18 714 410
Mar 2023	4	R 13 984 088
Total	**14**	**R 45 188 826**

The following competitive bid(s) was awarded by the Accounting Officer during the quarter under review:

Month	Number of awards	Combined value of awards
Jan 2023	1	R 17 942 165
Feb 2023	0	R 0
Mar 2023	1	R 1 293 448
Total	**2**	**R 19 235 613**

The municipality made use of Supply Chain Management Regulation 32 which refers to contracts secured by other organs of state for the quarter under review for the following bids:

Bid ref number	Date	Municipality	Name of supplier	Brief description of services	Value (incl. VAT)
RT 57/2019	15-Feb-2023	National Treasury	Isuzu Motors South Africa (PTY) Ltd	Supply and Delivery of Sedan, Light and Heavy Commercial Vehicles, Busses, Motor Cycles, Agricultural Tractors, Construction Plant and Equipment to the State	R1 483 714 (Incl. VAT)

The following table details the five highest bids awarded during the quarter under review according to its contract value:

Department	Bid number	Bid description	Contract value
Technical Services	08/2/20/29	Supply and delivery of disposable bags for refuse removal	R 10 000 000
Corporate Services	08/2/20/13	Supply, delivery installation, commissioning and maintenance of an end-to-end voice over IP and unified communication solution, including cabling, networking and connectivity for Witzenberg municipality for a period of five years	R 9 678 362
Technical Services	08/2/20/03	Road Markings in the Witzenberg Municipal Area	R 5 935 460
Financial Services	08/2/19/71	Supply of banking services to Witzenberg Municipality	R 5 221 730
Technical Services	08/2/18/64	Appointment of contractors for maintenance, repair and replacement of general electrical infrastructure and wiring of premises for Witzenberg municipality ***MV Works***	R 5 000 000

II. Formal written price quotations

Formal written price quotations (between R 30 000 and R 200 000) to the value of **R 1 523 902** (incl. VAT) were awarded during the quarter under review. The following table details the number of formal written price quotations that were awarded including the combined values of those quotations:

Month	Number of awards	Combined value of awards
Jan 2023	9	R 1 043 843
Feb 2023	0	R 0
Mar 2023	3	R 480 058
Total	**12**	**R 1 523 902**

III. Awards made to companies according to their with Broad-Based Black Economic Empowerment (B-BBEE) level of contribution

As from 16 January 2023, the Preferential Procurement Regulations, 2022 became effective.

B-BBEE status level of contribution	Combined contract values for competitive bids	Combined contract values for formal written price quotations	Grand total	% of grand total
Level 1	R 44 222 414	R 678 445	R 44 900 862	68.08%
Level 2	R 5 202 025	R 388 789	R 5 590 815	8.48%
Level 3	-	-	-	0%
Level 4	-	R 456 667	R 456 667	0.69%
Level 5	-	-	-	0%
Level 6	-	-	-	0%
Level 7	-	-	-	0%
Level 8	-	-	-	0%
Non-compliant contributors	R 15 000 000	-	R 15 000 000	22.75%
Total	**R 64 424 440**	**R 1 523 902**	**R 65 948 343**	**100%**

The new regulations provide for points to be allocated for specific goals" as contemplated in section 2(1)(d) of the Act which may include contracting with persons, or categories of persons, historically disadvantaged by unfair discrimination on the basis of race, gender and disability including the implementation of programmes of the Reconstruction and Development Programme as published in Government Gazette No. 16085 dated 23 November 1994. Council approved a Preferential Procurement Policy on 10 March 2023 for implementation on same date in compliance with the latest Preferential Procurement Regulations.

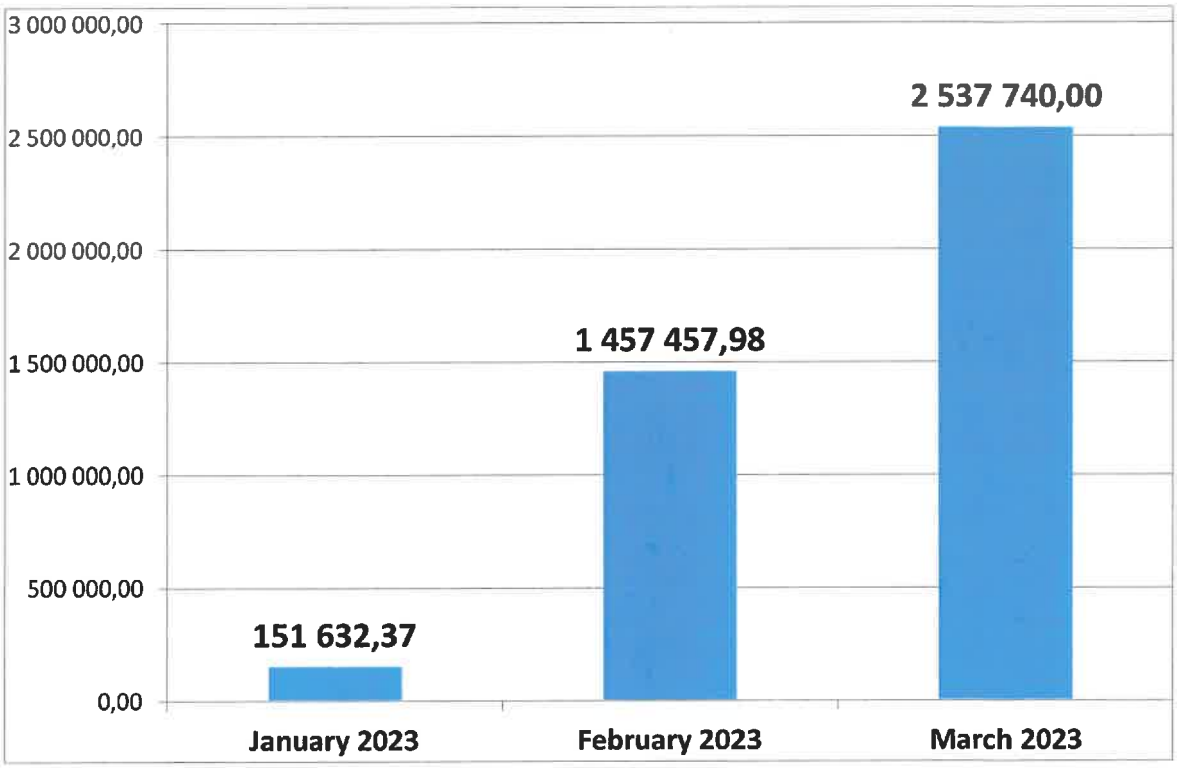
IV. Appeals by aggrieved bidders

No appeals were received from aggrieved bidders on awards or were dealt with in terms of section 62 of the Municipal Systems Act (Act 32 of 2000) for the quarter under review:

V. Deviations from normal procurement processes

Deviations from the normal procurement processes have been monitored on an ongoing basis. Monthly reporting in terms of paragraph 44 of the SCM policy has been complied with. SCM has identified instances where the normal procurement processes can be followed to avoid having to follow the deviation process.
For the quarter under review, the total deviations approved by the Accounting Officer amounted to R 4 146 829, compared to the previous quarter's figure of R 3 992 915. This represents an increase compared to the previous quarter. It is noted that deviation values fluctuate during each period and will not necessarily reflect the same patterns.

The following graph shows the breakdown of deviations for the quarter under review:



(c) Logistics management

The system of logistics management must ensure the following:

(i) the monitoring of spending patterns on types or classes of goods and services incorporating, where practical, the coding of items to ensure that each item has a unique number;

(ii) the setting of inventory levels that includes minimum and maximum levels and lead times wherever goods are placed in stock;

(iii) the placing of manual or electronic orders for all acquisitions other than those from petty cash;

(iv) before payment is approved , certification by the responsible officer that the goods and services are received or rendered on time and is in accordance with the order, the general conditions of contract and specifications where applicable and that the price charged is as quoted in terms of a contract;

(v) appropriate standards of internal control and warehouse management to ensure that goods placed in stores are secure and only used for the purpose for which they were purchased;
(vi) regular checking to ensure that all assets including official vehicles are properly managed, appropriately maintained and only used for official purposes; and
(vii) Monitoring and review of the supply vendor performance to ensure compliance with specifications and contract conditions for particular goods or services.

Each stock item at the municipal stores, Dromedaris Street are coded and are listed on the financial system. Monthly monitoring of patterns of issues and receipts are performed by the Storekeeper.

Inventory levels were revised at the start of each financial year to ensure sufficient stock for normal operations. Regular checking of the condition of stock is performed.

As at 31 March 2023 the value of stock at hand was R 10 112 182. The stock turnover rate was 1.29 times, which is below the norm of 1.50 times. The quarterly stock count of 15 March 2023 revealed no redundant stock.

Shortages, surpluses and damaged stock were reported on. The quarterly report pertaining to the stock count will be submitted to the relevant portfolio committee, MAYCO and Council in due course.

(d) <u>Disposal management</u>

The system of disposal management must ensure the following:

(i) immovable property is sold only at market related prices except when the public interest or the plight of the poor demands otherwise;

(ii) movable assets are sold either by way of written price quotations, a competitive bidding process, auction or at market related prices, whichever is the most advantageous;

(iii) Firearms are not sold or donated to any person or institution within or outside the Republic unless approved by the National Conventional Arms Control Committee;

(iv) Immovable property is let at market related rates except when the public interest or the plight of the poor demands otherwise;

(v) All fees, charges, rates, tariffs, scales of fees or other charges relating to the letting of immovable property are annually reviewed;

(vi) Where assets are traded in for other assets, the highest possible trade-in price is negotiated; and

(vii) In the case of the free disposal of computer equipment, the provincial department of education is first approached to indicate within 30 days whether any of the local schools are interested in the equipment.

We are complying with section 14 of the MFMA which deals with the disposal of capital assets. A Consolidated report of all assets identified for disposal were approved by Council and will be

auctioned. An auctioneer was appointed in January 2023 and an auction is being scheduled for June 2023.

(e) Performance management

The SCM policy requires that an internal monitoring system be established and implemented in order to determine, on the basis of retrospective analysis, whether the SCM processes were followed and whether the objectives of the SCM policy were achieved.

The Accounting Officer has appointed the Internal Auditor as an independent observer. His task is only to observe the bidding process at a bid committee level and to report back to the Accounting Officer on the following issues:

- Compliance with chapter 11 of the Municipal Finance Management Act (Act 56 of 2003);
- Adherence to bid committee structures as stipulated in the Supply Chain Management regulations of 2005 and the Witzenberg Municipality's Supply Chain Management Policy;
- The applicable sections relating to points scoring and the evaluation of bids in terms of the Preferential Procurement Policy Framework Act (Act 5 of 2005);
- Compliance with the code of conduct for Supply Chain Practitioners and Bid Committee Members; and
- To propose improvements to the bid committee system and process.

No meetings were attended by the Internal Audit section during this quarter therefore no report is available.

(f) Other matters

The SCM staff is equipped to comply with the provisions of the said regulations.

The following training/ workshops were attended by SCM staff during the quarter under review:

Presenter	Topic	Name of attendee(s) and position(s)	Date from	Date to
Premier Conferencing	Health & Safety Representatives Training	Andrewnecia Poole – Senior Clerk SCM R Munsamy – Storeman J Esau – Storeman	16 Mar 2023	17 Mar 2023

Furthermore:

(i) No awards were made to persons whose tax matters were not in order.

(ii) No awards were made to persons who are in the service of the state.

5. RECOMMENDATION

(a) That the Chief Financial Officer submits the report to the Accounting Officer by 7 April 2023;

(b) That the Accounting Officer submits the report to the Executive Mayor by 10 April 2023;

(c) That the report serves before the relevant portfolio committee, the Executive Mayoral Committee and Council for information; and

(d) That the report be made available to the public in terms of section 21 A of the Municipal Systems Act (Act no 32 of 2000) after it has served before Council.

Yours sincerely

The Council
Witzenberg Municipality
50 Voortrekker Street
Ceres
6835

Dear Council

1. Purpose

The Performance, Risk and Audit Committee (PRAC) have conducted a mandatory review of the municipality's Performance Management System in terms of the Municipal Planning and Performance Regulations. The purpose of this report is to inform the Municipal Council regarding the result of the review that focuses on economy, efficiency, effectiveness and impact in so far as the key performance indicators and performance targets are concerned.

2. Background

Witzenberg Municipality has opted in terms of section 14(c) of the Local Government Municipal Planning and Performance Regulations, 2001 to utilize the Audit Committee established in terms of the MFMA, as their Performance Audit Committee.

The role of the Performance Risk and Audit Committee is to assist Council by providing inputs to ensure effective systems that complement service delivery, safeguarding of municipal assets, the maintenance of financial records, risk management, corporate governance and an effective internal control system.

3. Legal framework

In terms of the Municipal Finance Management Act, No. 56 of 2003, section 166(2) (a), *"An audit committee is an independent advisory body which must—*

(a) Advise the municipal council, the political office-bearers, the accounting officer and the management staff of the municipality, or the board of directors, the accounting officer and the management staff of the municipal entity, on matters relating to—

(v) performance management;

(viii) performance evaluation;"

In terms of the Local Government Municipal Planning and Performance Management Regulations, 14(4)(a),

"A performance audit committee must –

(i) *review the quarterly reports submitted to it in terms of sub-regulation (1)(c)(ii)*;

(ii) review the municipality's performance management system and make recommendations in this regard to the council of the municipality; and

(iii) at least twice during a financial year submit an audit report to the municipal council concerned."

4. Mandate

To fulfil its role, PRAC have the following objectives in terms of section 166(2) (a) (i to ix) of the Municipal Finance Management Act of 2003:

- Advise the Municipal Council, the political office-bearers, the accounting officer and the management staff of the municipality, on matters relating to:
  - Internal financial control and internal audits;
  - Risk management;
  - Accounting policies;
  - The adequacy, reliability and accuracy of financial reporting and information;
  - Performance management;
  - Effective Governance;
  - Compliance with the MFMA, Division of Revenue Act (DoRA) and any other applicable legislation;
  - Performance evaluation; and
  - Any other issues referred to it by the municipality.

In terms of the Local Government Municipal Planning and Performance Management Regulations, 2001 a Performance Audit Committee must be appointed to fulfil the following objectives:

- To advise Council on the functionality of the Performance Management System;
- To advise Council whether the Performance Management System complies with the Act;
- To advise Council on the extent to which the municipality's performance measures are reliable in measuring performance;

5. PRAC Assessment of Performance Management

A Performance Management System (PMS) is a process used to communicate organizational goals and objectives to the individuals who are accountable for these goals and to track and evaluate individual and organizational performance results. The system can be defined as effective when Management has ensured that legal compliance is met and that the performance information reported is reliable and that any deficiencies in the system detected are addressed.

PERFORMANCE MANAGEMENT ASSESSMENT	
Functionality of the performance management system*	
Performance Management System complies with the Act and regulations	
Extent to which the municipality's performance measures are reliable in measuring performance	

**Overall Assessment*

Legends:

	Adequate
	Needs Improvement
	Inadequate

5.1 Compliance Assessment

The objective of this graph is to assess the performance of compliance by management towards the implementation and adherence to relevant performance management legislation and regulations. Compliance is assessed annually by Internal Audit and other key reporting requirements are assessed quarterly. No exceptions were noted.

	Total (Previous year)	Total (Current year)	Q 1	Q2	Q3	Q4
Compliance prescripts	34	51	45	4	2	0
Audit Findings (Max/High)	0	1	0	0	1	0
Number of Action plans	0	0	0	0	1	0
Number of action plans implemented	0	0	0	0	1	0

5.2 Reliability of Information Assessment

The objective of this graph is to assess the reliability of performance information reported by management that was audited by Internal Audit. The Internal Audit work is based on a random sample selection of the portfolio of evidence (POE) for top-layer performance indicators. This assessment focuses on high-rated findings that require management's urgent attention. Performance information must be valid, accurate and complete. It is notable that the finding rate is low and that corrective actions are taken by management.

	Total (Previous year)	Total (Current year)	Q1	Q2	Q3	Q4
Reliability of POE	28	84	15	15	15	39
Audit findings(Max/High)	6	11	2	1	2	6
Number of action plans	7	15	4	1	2	8
Number of action plans implemented	7	14	4	0	2	8

6. Key Root Causes Identified

- The KPI owner did not ensure that the performance information provided for reporting is reliable.
- A new reporting template was not implemented

7. Comment

For the 2020/2021 Performance Management audit, the Auditor-General South Africa (AGSA) report limited its review to the following objective:

- Strategic objective – essential services

For the first and second quarters of 2021/2022, Internal Audit has highlighted the following non-compliance and control weaknesses. Notably, Management has implemented the corrective action plans and is commended for that.

Project Title	Finding Title	Action Plan Title	Due Date	Progress Notes	Status
2021/2022 1st Quarter Performance Management	TecEl60: Unreliable KPI Performance reporting	TecEL60: Report of 0/0 performance results	29 November 2021	Action Plan was implemented immediately	Signed off as completed by Director

The Council
Witzenberg Municipality
50 Voortrekker Street
Ceres
6835

Dear Council

1. Purpose

The Performance, Risk and Audit Committee (PRAC) have conducted a mandatory review of the municipality's Performance Management System in terms of the Municipal Planning and Performance Regulations. The purpose of this report is to inform the Municipal Council regarding the result of the review that focuses on economy, efficiency, effectiveness and impact in so far as the key performance indicators and performance targets are concerned.

2. Background

Witzenberg Municipality has opted in terms of section 14(c) of the Local Government Municipal Planning and Performance Regulations, 2001 to utilize the Audit Committee established in terms of the MFMA, as their Performance Audit Committee.

The role of the Performance Risk and Audit Committee is to assist Council by providing inputs to ensure effective systems that complement service delivery, safeguarding of municipal assets, the maintenance of financial records, risk management, corporate governance and an effective internal control system.

3. Legal framework

In terms of the Municipal Finance Management Act, No. 56 of 2003, section 166(2) (a), *"An audit committee is an independent advisory body which must—*

(a) Advise the municipal council, the political office-bearers, the accounting officer and the management staff of the municipality, or the board of directors, the accounting officer and the management staff of the municipal entity, on matters relating to—

(v) performance management;

(viii) performance evaluation;"

In terms of the Local Government Municipal Planning and Performance Management Regulations, 14(4)(a),

"A performance audit committee must –

(i) *review the quarterly reports submitted to it in terms of sub-regulation (1)(c)(ii)*;

(ii) review the municipality's performance management system and make recommendations in this regard to the council of the municipality; and

(iii) at least twice during a financial year submit an audit report to the municipal council concerned."

4. Mandate

To fulfil its role, PRAC have the following objectives in terms of section 166(2) (a) (i to ix) of the Municipal Finance Management Act of 2003:

- Advise the Municipal Council, the political office-bearers, the accounting officer and the management staff of the municipality, on matters relating to:
  - Internal financial control and internal audits;
  - Risk management;
  - Accounting policies;
  - The adequacy, reliability and accuracy of financial reporting and information;
  - Performance management;
  - Effective governance;
  - Compliance with the MFMA, Division of Revenue Act (DoRA) and any other applicable legislation;
  - Performance evaluation; and
  - Any other issues referred to it by the municipality.

In terms of the Local Government Municipal Planning and Performance Management Regulations, 2001 a Performance Audit Committee must be appointed to fulfil the following objectives:

- To advise Council on the functionality of the Performance Management System;
- To advise Council whether the Performance Management System complies with the Act;
- To advise Council on the extent to which the municipality's performance measures are reliable in measuring performance;

5. PRAC Assessment of Performance Management

A Performance Management System (PMS) is a process used to communicate organizational goals and objectives to the individuals who are accountable for these goals and to track and evaluate individual and organizational performance results. The system can be defined as effective when Management has ensured that legal compliance is met and that the performance information reported is reliable and that any deficiencies in the system detected are addressed.

PERFORMANCE MANAGEMENT ASSESSMENT	
Functionality of the performance management system*	
Performance Management System complies with the Act and regulations	
Extent to which the municipality's performance measures are reliable in measuring performance	

**Overall Assessment*

Legends:

	Adequate
	Needs Improvement
	Inadequate

5.1 Compliance Assessment

The objective of this graph is to assess the performance of compliance by management towards the implementation and adherence to relevant performance management legislation and regulations. Compliance is assessed annually by Internal Audit and other key reporting requirements are assessed quarterly. No exceptions were noted.

	Total (Previous year)	Total (Current year)	Q 1	Q2	Q3	Q4
Compliance prescripts	51	49	46	3	0	0
Audit Findings (Max/High)	3	0	0	0	0	0
Number of Action plans	0	0	0	0	0	0
Number of action plans implemented	0	0	0	0	0	0

5.2 Reliability of Information Assessment

The objective of this graph is to assess the reliability of performance information reported by management that was audited by Internal Audit. The Internal Audit work is based on a random sample selection of the portfolio of evidence (POE) for top-layer performance indicators. This assessment focuses on high-rated findings that require management's urgent attention. Performance information must be valid, accurate and complete. It is notable that the finding rate is low and that corrective actions are taken by management.

	Total (Previous year)	Total (Current year)	Q1	Q2	Q3	Q4
Reliability of POE	84	15	0	15	0	0
Audit findings(Max/High)	6	1	0	1	0	0
Number of action plans	7	1	0	1	0	0
Number of action plans implemented	7	0	0	0	0	0

6. Key Root Causes Identified

Reassessment by Management not to include the preventative maintenance of the Transport Ukey Group without updating the Standard operating procedure.

7. Comment

For the 2021/2022 Performance Management audit, the Auditor-General South Africa (AGSA) report limited its review to the following objective:

- Strategic objective – essential services

For the first and second quarters of 2022/2023, Internal Audit has highlighted the following non-compliance and control weaknesses. Notably, Management has implemented the corrective action plan. Finaliasing.

Project Title	Finding Title	Action Plan Title	Due Date	Progress Notes	Status
2022/2023 2nd Quarter Performance Management	TecDir1 - Repairs and Maintenance relating to Transports assets are not correctly classified on the Municipal Standard Chart of Accounts "Mscoa"	Update system descriptions of TecDir1, MM1 and ComDir1	31 March 2023	System descriptions updated and in process to sign off by relevant officials	Ready for review by Director

8. Recommendation to Council

To maintain the overall functionality of the performance management system, timeous monitoring and reviewing of the portfolios of evidence, before or during the reporting stage, should be implemented.

Yours Faithfully

Mr Jonathan George

Quarterly Budget Statement Report Section 52(d) for the Period 1 July 2022 to 30 September 2022

Financial data is in respect of the financial year 1 July 2021 to 30 June 2022

SECTION 52

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

In terms of Section 52 of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003):

52. General Responsibilities. — The mayor of a municipality—

(*a*) must provide general political guidance over the fiscal and financial affairs of the municipality;

(*b*) in providing such general political guidance, may monitor and, to the extent provided in this Act, oversee the exercise of responsibilities assigned in terms of this Act to the accounting officer and the chief financial officer, but may not interfere in the exercise of those responsibilities;

(*c*) must take all reasonable steps to ensure that the municipality performs its constitutional and statutory functions within the limits of the municipality's approved budget;

(*d*) **must, within 30 days of the end of each quarter, submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality; and**

(*e*) must exercise the other powers and perform the other duties assigned to the mayor in terms of this Act or delegated by the council to the mayor.

In terms of section 11 (4) (a), the Accounting Officer must within 30 days after the end of each quarter table in the municipal council a consolidated report of all withdrawals made in terms of subsection (1) (b) to (j) during that quarter. Section 11(1) read as follow:

"11. (1) Only the accounting officer or the chief financial officer of a municipality, or any other senior financial official of the municipality acting on the written authority of the accounting officer, may withdraw money or authorise the withdrawal of money from any of the municipality's bank accounts, and may do so only—

(a) to defray expenditure appropriated in terms of an approved budget;
(b) to defray expenditure authorised in terms of section 26(4);
(c) to defray unforeseeable and unavoidable expenditure authorised in terms of section 29(1);
(d) in the case of a bank account opened in terms of section 12, to make payments from the account in accordance with subsection (4) of that section;
(e) to pay over to a person or organ of state money received by the municipality on behalf of that person or organ of state, including—
(i) money collected by the municipality on behalf of that person or organ of state by agreement; or
(ii) any insurance or other payments received by the municipality for that person or organ of state;
(f) to refund money incorrectly paid into a bank account;
(g) to refund guarantees, sureties and security deposits;
(h) for cash management and investment purposes in accordance with section 13;
(i) to defray increased expenditure in terms of section 31; or
(j) for such other purposes as may be prescribed."

In terms of Section 66 of the MFMA the Accounting Officer must prepare a report on all expenditure incurred with relation to staff benefits.

Section 66 reads as follow:
"66. The accounting officer of a municipality must, in a format and for periods as may be prescribed, report to the council on all expenditure incurred by the municipality on staff salaries, wages, allowances and benefits, and in a manner that discloses such expenditure per type of expenditure, namely—

(a) salaries and wages;
(b) contributions for pensions and medical aid;

(c) travel, motor car, accommodation, subsistence and other allowances;
(d) housing benefits and allowances;
(e) overtime payments;
(f) loans and advances; and
(g) any other type of benefit or allowance related to staff."

The following regulations of the Local Government: Municipal Finance Management Act Municipal Budget and Reporting Regulations are relevant:

Quarterly reports on implementation of budget

31. (1) The mayor's quarterly report on the implementation of the budget and the financial state of affairs of the municipality as required by section 52(d) of the Act must be-

{a) in the format specified in Schedule C and include all the required tables, charts and explanatory information, taking into account any guidelines issued by the Minister in terms of section 168(1) of the Act; and

(b) consistent with the monthly budget statements for September, December, March and June as applicable; and

(c) submitted to the National Treasury and the relevant provincial treasury within five days of tabling of the report in the council.

Publication of quarterly reports on implementation of budget

32. When publishing the quarterly reports on the implementation of the budget in terms of section 75(1)(k) of the Act, the municipal manager must make public any other information that the municipal council considers appropriate to facilitate public awareness of the quarterly report on the implementation of the budget and the financial state of affairs of the municipality, including -

(a) summaries of quarterly report in alternate languages predominant in the community; and

(b) information relevant to each ward in the municipality.

PART 1 - IN-YEAR REPORT

Mayors Report

Speaker
Deputy Executive Mayor
Members of the Mayoral Committee
Councilors
Representatives of Provincial Government
Municipal Manager
Directors and officials
Distinguished Guests
Members of the media

It is my privilege to present to you the Quarterly Budget Statement Report for the three months from 1 July 2022 to 30 September 2022.

The year-to-date recovery rate excluding traffic fines is 83% against the annual estimated target of 94%. Cognizance should be taken that the comparative rate for the same period in the prior year was 81% as well which resulted in a final collection rate of 91% at year-end. Government departments and commercial customers that are in arrears are receiving immediate attention in order to improve cash flow. It is expected that some property owners will pay their annual rates, which was due on 30 September by 15 October, the due date for payment of the September consumption accounts.

The vandalism of municipal assets remain a concern with major damages now also affecting service delivery. It is time for the community to take ownership of municipal assets and assist in the protection thereof.

Capital expenditure is currently at 17% of a total Capital Budget of R 111 million. The upgrade of the Van Breda Bridge is one of the key capital projects for the current year.

ALDERMAN HJ SMIT
EXECUTIVE MAYOR

Recommendation

It is recommended that council take cognizance of the quarterly budget assessment for the period 1 July 2022 to 30 September 2022.

Municipal Manager's quality certification

Quality Certificate

I, Mr. D Nasson, Municipal Manager of Witzenberg Municipality, hereby certify that the quarterly budget assessment has been prepared in accordance with the Municipal Finance Management Act and the regulations made under the Act.

MR D NASSON

Municipal Manager of WITZENBERG MUNICIPALITY

Signature: 
Date 19/10/2022

C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

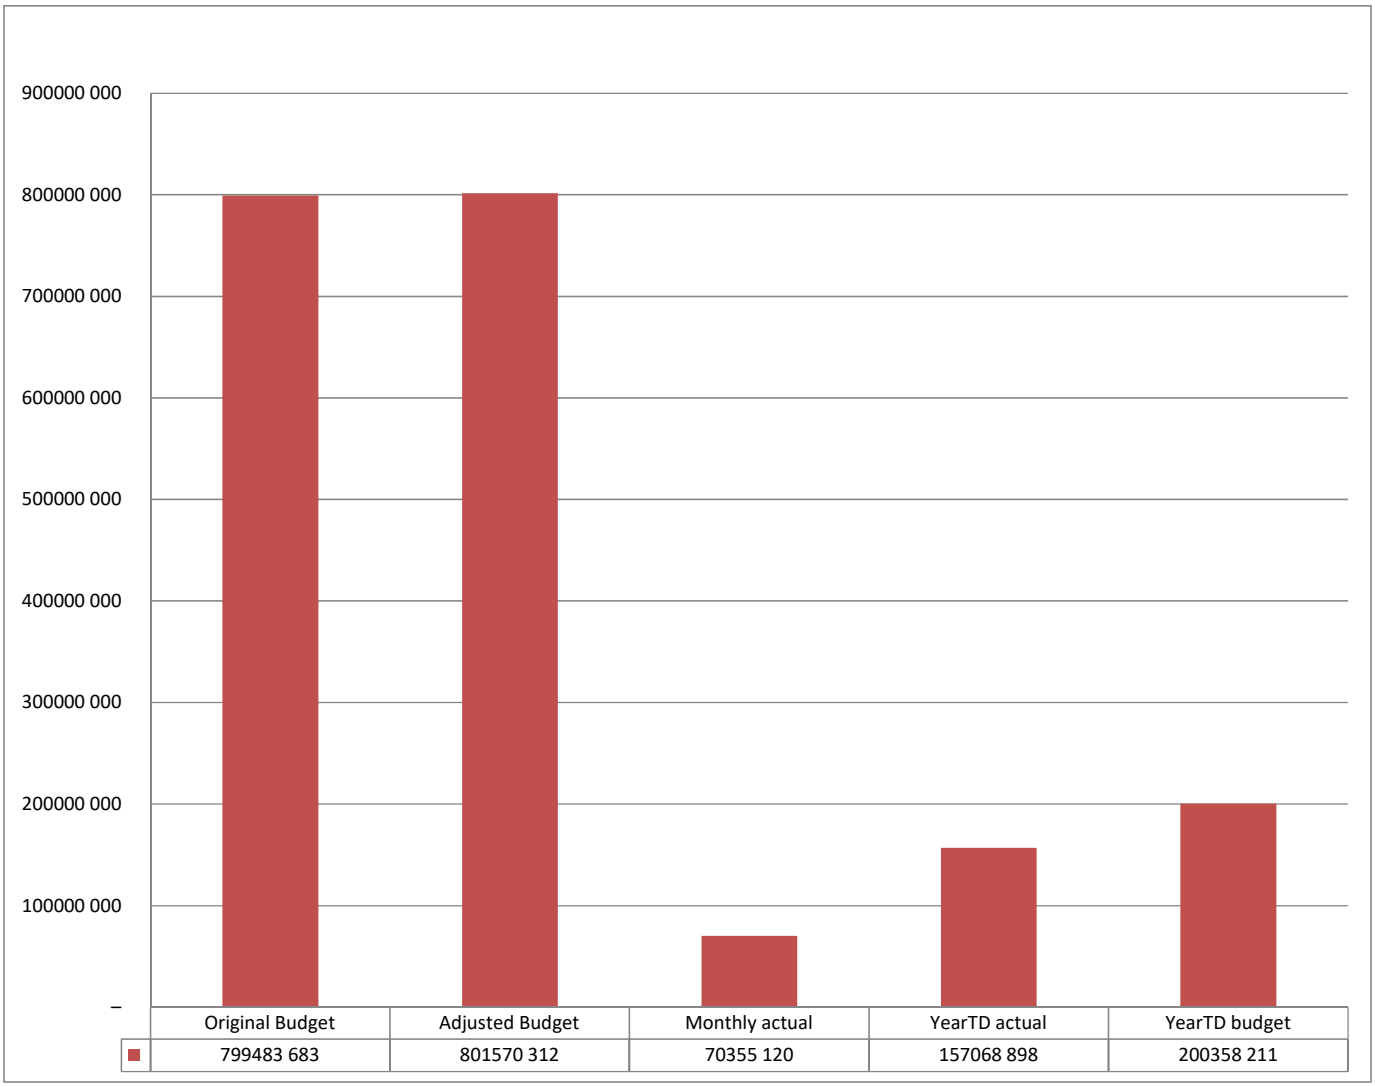
TOTAL OPERATIONAL REVENUE

	Original Budget	Adjusted Budget	Monthly actual	YearTD actual	YearTD budget
Series1	748204 546	758120 547	51920 368	241178 178	189528 933

For the period 1 July 2022 to 30 September 2022, 31.81% of the budgeted operational revenue was raised.

Vir die periode 1 Julie 2022 to 30 September 2022, is 31.81% van die begrote operasionele inkomste gehef.

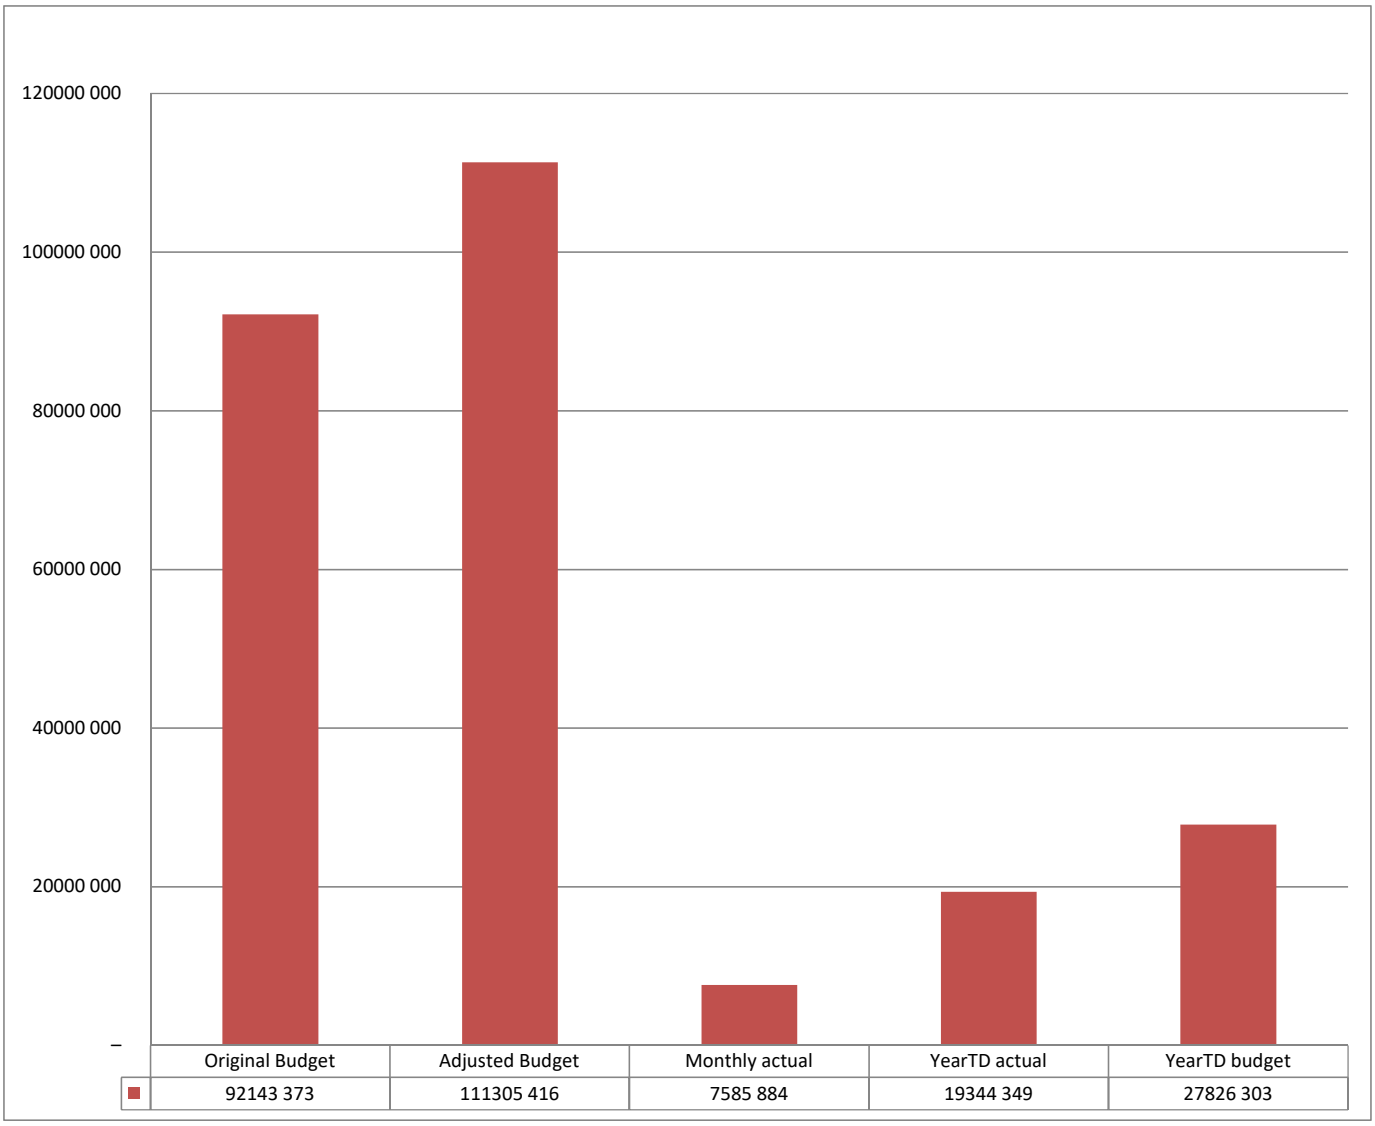
TOTAL OPERATIONAL EXPENDITURE



For the period 1 July 2022 to 30 September 2022, 19.6% of the budgeted operational expenditure was incurred. This figure will increase as some invoices are still outstanding.

Vir die periode 1 Julie 2022 to 30 September 2022, is 19.6% van die begrote operasionele uitgawes aangegaan. Die syfer mag verhoog aangesien daar nog uitstaande fakture is.

CAPITAL EXPENDITURE



For the period 1 July 2022 to 30 September 2022, 17.38% of the budgeted capital expenditure was incurred.

Vir die periode 1 Julie 2022 to 30 September 2022, is 17.38% van die begrote kapitale uitgawes aangegaan.

KEY PERFORMANCE AREA: 4. SOCIO-ECONOMIC SUPPORT SERVICES 18

Strategic Objective: 4.1 Support the poor & vulnerable through programmes & policy 18

Strategic Objective: 4.2 Create an enabling environment to support local economy 18

1. INTRODUCTION AND OVERVIEW

1.1 Purpose of the Service Delivery & Budget Implementation Plan

The Municipal Finance Management Act No. 56 of 2003 (MFMA) and National Treasury MFMA Circular No. 13 requires that municipalities must prepare a service delivery budget implementation plan (SDBIP) indicating how the budget and the strategic objectives of Council will be implemented. The SDBIP is prepared in terms of Section 53(1)(c)(ii) of the Municipal Finance Management (MFMA), National Treasury MFMA Circular No. 13 and the Budgeting and Reporting Regulation.

The SDBIP serves as a "contract" between the administration, council and community expressing the goals and objectives set by the council as quantifiable outcomes that can be implemented by the administration in the applicable financial year. It provides the link between the mayor, the council (executive) and the administration, and facilitates the process for holding management accountable for its performance. It is therefore a management, implementation and monitoring tool that will assist the mayor, councillors, municipal manager, senior managers and community to monitor the municipality's performance on a quarterly basis. The SDBIP will ensure that appropriate information is circulated internally and externally for purposes of monitoring the implementation of the budget, the execution of projects, the performance of senior management and the achievement of the strategic objectives set by council.

1.2 Approval of 2022/23 SDBIP

- Draft 2022/23 Top Layer SDBIP tabled at Council 30 March 2022
- 2022/23 Top Layer SDBIP approved by Mayor 22 June 2022
- 2022/23 Top Layer SDBIP tabled at Council 24 August 2022

1.3 Quarterly Reporting

The MFMA in terms of Section 52(d) oblige the Mayor to submit quarterly reports on the implementation of the budget and financial state of affairs of the Municipality.

The service delivery indicators and targets in the SDBIP need to be evaluated and reported on to Council. The quarterly report should thus report on the achievement of outcomes against financial and non-financial indicators.

2. STRATEGIC MAP

WITZENBERG MUNICIPALITY: STRATEGIC MAP 2022/23					
Vision	**Mission**	**Municipal KPA**		**Pre-determined Objectives**

Quarterly Budget Statement Report {Section 52(d)} for the Period 1 October 2022 to 31 December 2022

Accumulated Information for the period 1 July 2022 to 31 December 2022

Glossary

Adjustments Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Allocations – Money received from Provincial or National Government or other municipalities.

AFS – Annual Financial Statements

Budget – The financial plan of a municipality.

Budget related policy – Policy of a municipality affecting or affected by the budget.

Capital Expenditure – Spending on municipal assets such as land, buildings, distribution networks, treatment plants and vehicles. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the Municipality, and the month end balances of cash and short term investments. Cash receipts and payments do not always coincide with budgeted income and expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month that the services or goods are received, even though it may not be paid in the same period.

CFO – Chief Financial Officer / Director: Finance

DORA – Division of Revenue Act. An annual piece of legislation indicating the allocations from National Government to Local Government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to assist with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GDFI - Gross Domestic Fixed Investment

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates comparisons between municipalities.

GRAP – Generally Recognized Accounting Practice. The new standard for municipal accounting and basis upon which AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of a municipality.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MFMA – Municipal Finance Management Act (No 53 of 2003). The principle piece of legislation relating to municipal financial management.

Glossary (Continued)

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act (No 6 of 2004).

MTREF – Medium Term Revenue and Expenditure Framework as prescribed by the MFMA sets out indicative revenue and projected expenditure for the budget year plus two outer financial years to determine the affordability level. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of a municipality such as general expenses, salaries & wages and repairs & maintenance.

Rates – Local Government tax based on assessed valuation of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

RBIG – Regional Bulk Infrastructure Grant

R&M – Repairs and maintenance on property, plant and equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of a municipality as set out in the IDP Budgeted spending must contribute towards achievement of these strategic objectives.

TMA – Total Municipal Account

Unauthorised expenditure – Generally, **s**pending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote – One of the main segments into which a budget is divided, usually at department level.

WM – Witzenberg Municipality

Legal requirements

In terms of Section 52 of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003):

52. General Responsibilities. — The mayor of a municipality—

(*a*) must provide general political guidance over the fiscal and financial affairs of the municipality;

(*b*) in providing such general political guidance, may monitor and, to the extent provided in this Act, oversee the exercise of responsibilities assigned in terms of this Act to the accounting officer and the chief financial officer, but may not interfere in the exercise of those responsibilities;

(*c*) must take all reasonable steps to ensure that the municipality performs its constitutional and statutory functions within the limits of the municipality's approved budget;

(*d*) **must, within 30 days of the end of each quarter, submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality; and**

(*e*) must exercise the other powers and perform the other duties assigned to the mayor in terms of this Act or delegated by the council to the mayor.

In terms of section 11 (4) (a), the Accounting Officer must within 30 days after the end of each quarter table in the municipal council a consolidated report of all withdrawals made in terms of subsection (1) (b) to (j) during that quarter. Section 11(1) read as follow:

"11. (1) Only the accounting officer or the chief financial officer of a municipality, or any other senior financial official of the municipality acting on the written authority of the accounting officer, may withdraw money or authorise the withdrawal of money from any of the municipality's bank accounts, and may do so only—

(a) to defray expenditure appropriated in terms of an approved budget;
(b) to defray expenditure authorised in terms of section 26(4);
(c) to defray unforeseeable and unavoidable expenditure authorised in terms of section 29(1);
(d) in the case of a bank account opened in terms of section 12, to make payments from the account in accordance with subsection (4) of that section;
(e) to pay over to a person or organ of state money received by the municipality on behalf of that person or organ of state, including—
(i) money collected by the municipality on behalf of that person or organ of state by agreement; or
(ii) any insurance or other payments received by the municipality for that person or organ of state;
(f) to refund money incorrectly paid into a bank account;
(g) to refund guarantees, sureties and security deposits;
(h) for cash management and investment purposes in accordance with section 13;
(i) to defray increased expenditure in terms of section 31; or
(j) for such other purposes as may be prescribed."

In terms of Section 66 of the MFMA the Accounting Officer must prepare a report on all expenditure incurred with relation to staff benefits.

Section 66 reads as follow:

"66. The accounting officer of a municipality must, in a format and for periods as may be prescribed, report to the council on all expenditure incurred by the municipality on staff salaries, wages, allowances and benefits, and in a manner that discloses such expenditure per type of expenditure, namely—

(a) salaries and wages;
(b) contributions for pensions and medical aid;
(c) travel, motor car, accommodation, subsistence and other allowances;
(d) housing benefits and allowances;

(e) overtime payments;
(f) loans and advances; and
(g) any other type of benefit or allowance related to staff."

The following regulations of the Local Government: Municipal Finance Management Act Municipal Budget and Reporting Regulations are relevant:

Quarterly reports on implementation of budget

31. (1) The mayor's quarterly report on the implementation of the budget and the financial state of affairs of the municipality as required by section 52(d) of the Act must be-

{a) in the format specified in Schedule C and include all the required tables, charts and explanatory information, taking into account any guidelines issued by the Minister in terms of section 168(1) of the Act; and

(b) consistent with the monthly budget statements for September, December, March and June as applicable; and

(c) submitted to the National Treasury and the relevant provincial treasury within five days of tabling of the report in the council.

Publication of quarterly reports on implementation of budget

32. When publishing the quarterly reports on the implementation of the budget in terms of section 75(1)(k) of the Act, the municipal manager must make public any other information that the municipal council considers appropriate to facilitate public awareness of the quarterly report on the implementation of the budget and the financial state of affairs of the municipality, including -

(a) summaries of quarterly report in alternate languages predominant in the community; and

{b) information relevant to each ward in the municipality.

PART 1 - IN-YEAR REPORT

Mayors Report

Speaker
Deputy Executive Mayor
Members of the Mayoral Committee
Aldermen
Councillors

It is my privilege to present to you the quarterly Budget Statement Report for the three months from 1 October 2022 to 31 December 2022.

The year to date recovery rate for the year excluding traffic fines is 85%. The annual target for debt collection is 94%. Unfortunately, some government departments were also late with their payments. Steps must be implemented against defaulters to improve the collection rate.

The ever increasing hours of load shedding is a major concern as it has a negative effect on the economy of the Witzenberg municipal area. The electricity revenue for the period under review is R 11 million less than budgeted, as illustrated in the following graph:

	July	Aug	Sept	Oct	Nov	Dec	Jan	Feb	Mrt	Apr	May	Jun
2020/21 Purchases	27,787	53,046	67,972	82,532	96,467	110,440	127,231	146,915	169,938	191,359	212,117	239,632
2021/22 Purchases	33,599	62,931	80,917	97,465	113,496	130,456	152,402	176,382	205,140	230,567	254,281	285,716
2022/23 Purchases	32,832	68,982	87,053	104,912	122,807	137,547						
2022/23 Budget	36,738	69,410	89,107	107,725	125,669	144,172	167,355	193,487	224,477	252,515	279,130	314,411

The electricity purchases from Eskom for the period under review is R 7 million less than budgeted. The decline in electricity purchases can be attributed to the ongoing load shedding, as well as Eskom's inability to expand the electricity supply to the Witzenberg Area. These factors have a direct negative impact on the growth and expansion of the local economy.

We must consider other local sources of electricity to enable economic growth and the resulting job creation, as the current Eskom network cannot transport the needed quantities of electricity.

ALDERMAN HJ SMIT
EXECUTIVE MAYOR

Municipal Manager's quality certification

Quality Certificate

I, Mr D Nasson, Municipal Manager of Witzenberg Municipality, hereby certify that the quarterly budget assessment has been prepared in accordance with the Municipal Finance Management Act and the regulations made under the Act.

Print name Mr D NASSON

Municipal Manager of WITZENBERG MUNICIPALITY.

Signature:

Date 16 January 2023

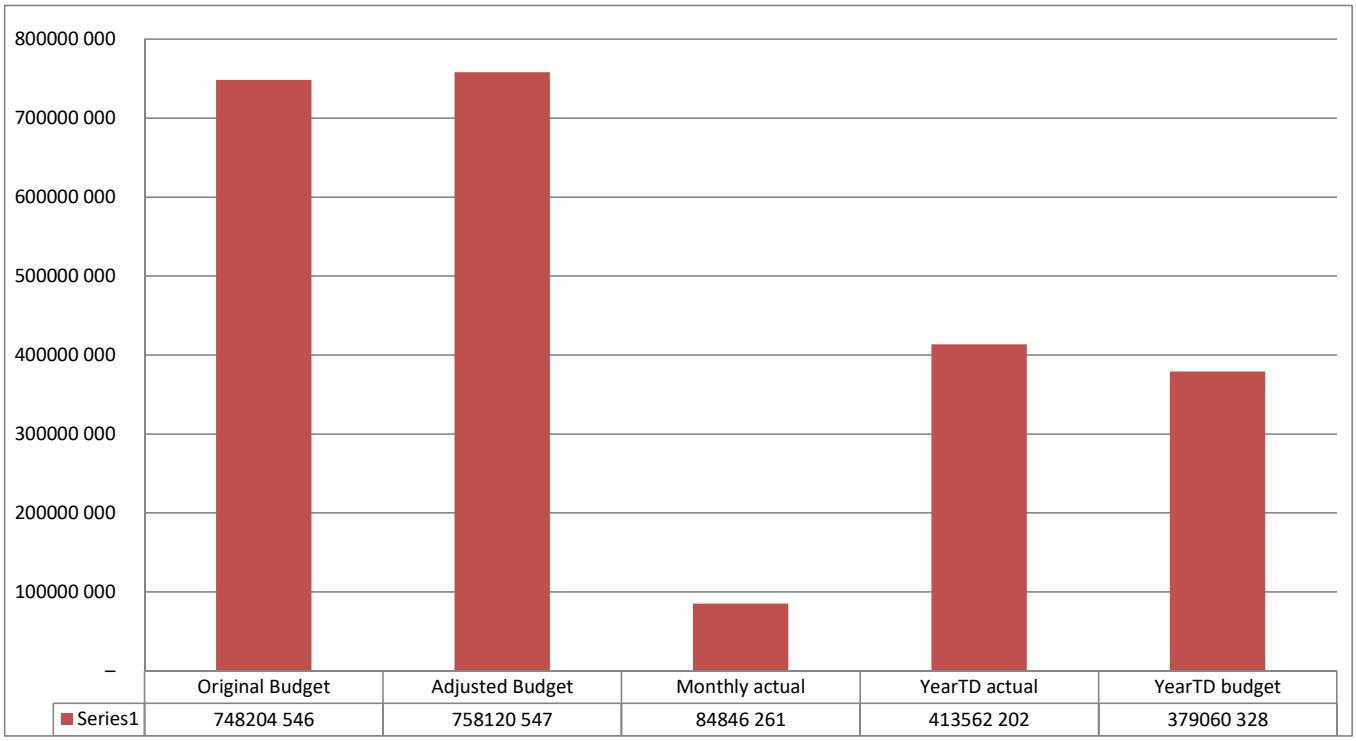
C EXECUTIVE SUMMARY

The following tables provides a summary of the financial information:

C OPSOMMING

Die volgende tabelle voorsien n opsomming van die finansiele inligting:

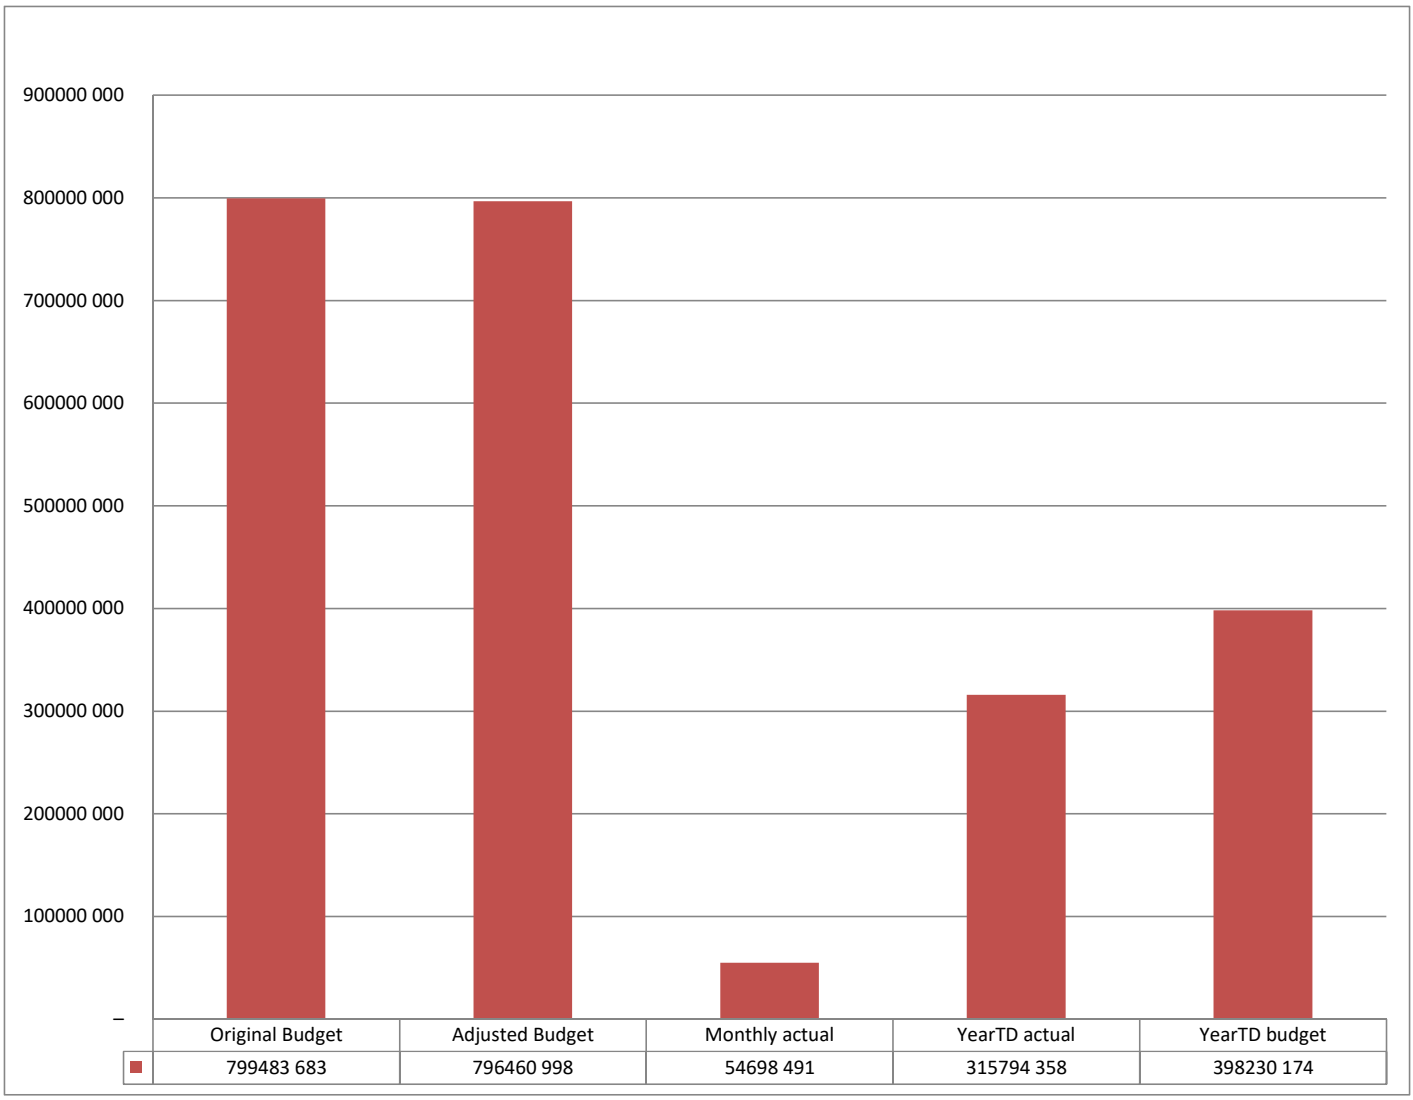
TOTAL OPERATIONAL REVENUE



For the period 1 October 2022 to 31 December 2022, 54.55% of the budgeted operational revenue was raised.

Vir die periode 1 Oktober 2022 to 31 Desember 2022, is 54.55% van die begrote operasionele inkomste gehef.

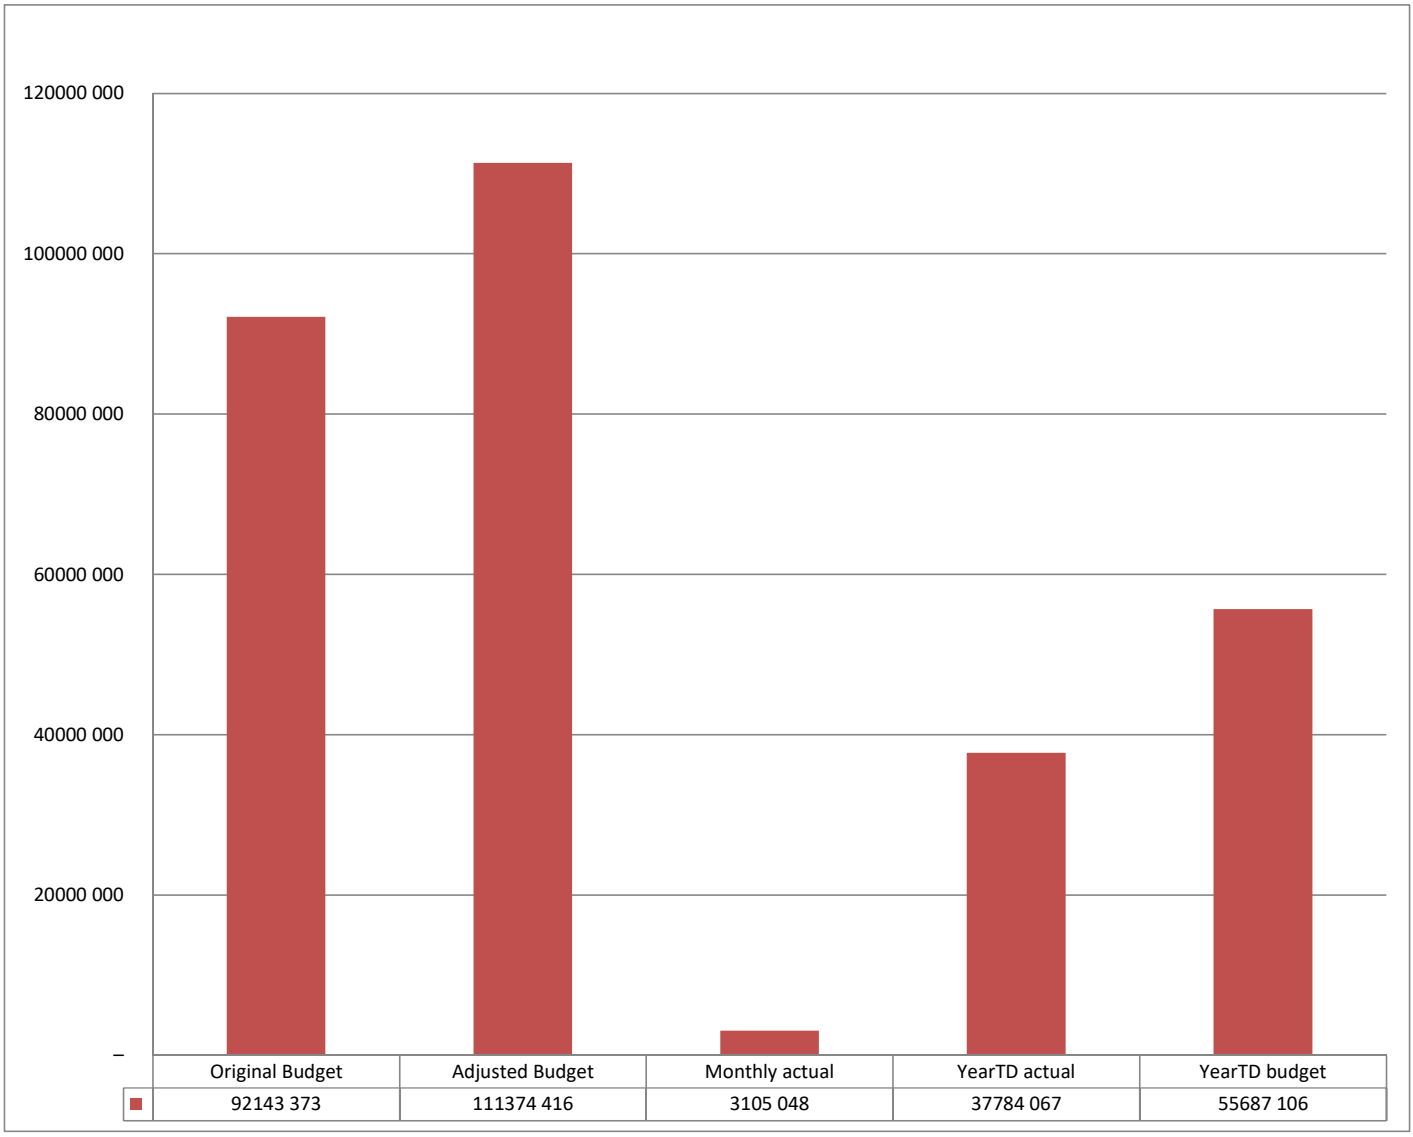
TOTAL OPERATIONAL EXPENDITURE



For the period 1 October 2022 to 31 December 2022, 39.65% of the budgeted operational expenditure was incurred. This figure will increase as some invoices are still outstanding.

Vir die periode 1 Oktober 2022 to 31 Desember 2022, is 39.65% van die begrote operasionele uitgawes aangegaan. Die syfer mag verhoog aangesien daar nog uitstaande fakture is.

CAPITAL EXPENDITURE



For the period 1 October 2022 to 31 December 2022, 33.93% of the budgeted capital expenditure was incurred.

Vir die periode 1 Oktober 2022 to 31 Desember 2022, is 33.93% van die begrote kapitale uitgawes aangegaan.

References

1. Municipalities may choose to appropriate for capital expenditure for three years or for one year (if one year appropriation projected expenditure required for yr2 and yr3).

2. Include capital component of PPP unitary payment

3. Capital expenditure by standard classification must reconcile to the total of multi-year and single year appropriations

4. Include expenditure on investment property, intangible and biological assets

5. Must reconcile to Monthly Budget

6. Include finance leases and PPP capital

Strategic Objective: 3.1 Provide and Maintain Facilities and Environment that make citizens feel at home 16

KEY PERFORMANCE AREA: 4. SOCIO-ECONOMIC SUPPORT SERVICES 17

Strategic Objective: 4.1 Support the poor & vulnerable through programmes & policy 17

Strategic Objective: 4.2 Create an enabling environment to support local economy 18

1. INTRODUCTION AND OVERVIEW

1.1 Purpose of the Service Delivery & Budget Implementation Plan

The Municipal Finance Management Act No. 56 of 2003 (MFMA) and National Treasury MFMA Circular No. 13 requires that municipalities must prepare a service delivery budget implementation plan (SDBIP) indicating how the budget and the strategic objectives of Council will be implemented. The SDBIP is prepared in terms of Section 53(1)(c)(ii) of the Municipal Finance Management (MFMA), National Treasury MFMA Circular No. 13 and the Budgeting and Reporting Regulation.

The SDBIP serves as a "contract" between the administration, council and community expressing the goals and objectives set by the council as quantifiable outcomes that can be implemented by the administration in the applicable financial year. It provides the link between the mayor, the council (executive) and the administration, and facilitates the process for holding management accountable for its performance. It is therefore a management, implementation and monitoring tool that will assist the mayor, councillors, municipal manager, senior managers and community to monitor the municipality's performance on a quarterly basis. The SDBIP will ensure that appropriate information is circulated internally and externally for purposes of monitoring the implementation of the budget, the execution of projects, the performance of senior management and the achievement of the strategic objectives set by council.

1.2 Approval of 2022/23 SDBIP

- Draft 2022/23 Top Layer SDBIP tabled at Council 30 March 2022
- 2022/23 Top Layer SDBIP approved by Mayor 22 June 2022
- 2022/23 Top Layer SDBIP tabled at Council 24 August 2022

1.3 Quarterly Reporting

The MFMA in terms of Section 52(d) oblige the Mayor to submit quarterly reports on the implementation of the budget and financial state of affairs of the Municipality.

The service delivery indicators and targets in the SDBIP need to be evaluated and reported on to Council. The quarterly report should thus report on the achievement of outcomes against financial and non-financial indicators.

2. STRATEGIC MAP

WITZENBERG MUNICIPALITY: STRATEGIC MAP 2022/23					
Vision	**Mission**	**Municipal KPA**		**Pre-determined Objectives**	
A municipality that cares for its community, creating growth and opportunities. MUNISIPALITEIT UMASIPALA MUNICIPALITY

- MEMORANDUM -

AAN / TO: Munisipale Bestuurder

VAN / FROM: Direkteur : Tegniese Dienste

DATUM / DATE: 14 Junie 2022

VERW. / REF.: 17/3/2

VOORGESTELDE POSISIES **VAN DIE "***WASTE TRANSFER STATIONS***"**

1. Doel

Om die posisies van die "*Waste Transfer Stations*" soos per goedgekeurde kapitale begroting vir 2022/23 vas te stel.

2. Agtergrond

Die kapitale begroting , maak voorsiening vir die konstruksie van "*Drop-Offs / Waste Transfer Stations*" ten bedrae van R6,0 miljoen. (BTW uitgesluit).

3. Bespreking

Volgens die "*National Environmental Waste Act 2008"* moet ons vullis herwin en minder vullis stort by die vullisstortingsterreine.

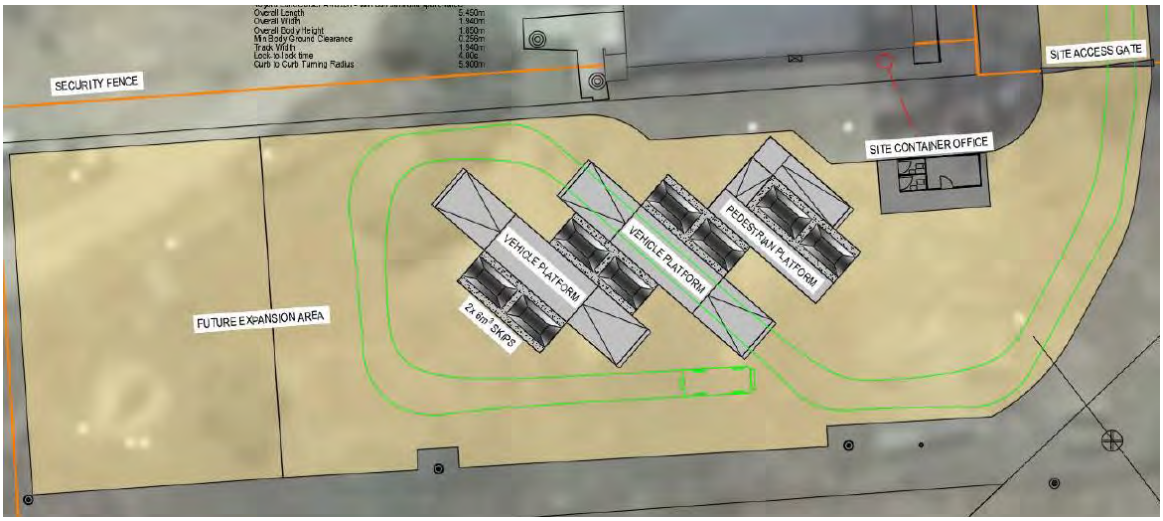
Die mees aanvaarbare manier om hierdie te verrig is met 'n "*Drop-Offs / Waste Transfer Stations*" wat beteken alle herwinbare materiaal, tuinvullis en bourommel word na die "*Waste Transfer Station*" geneem en in groen skips geplaas deur die inwoners, by die perseel sal 'n werker wees om te wys in watter skips dit gegooi word. Herwinbare goedere kan dan aan herwinnaars beskikbaar gestel word wat werkskepping kan skep en tuinvullis na kompostering aanleg en bourommel na vullisstortingsterrein geneem word.

WITZENBERG

MUNISIPALITEIT UMASIPALA MUNICIPALITY

- MEMORANDUM -

Tipiese Uitleg



Die voorstel is dat daar drie "*Drop-Offs / Waste Transfer Stations*" gebou word as volg:

Bella Vista

✉ 44 Ceres 6835 ☎ (023) 316 1854 ✆ (023) 316 1877 admin@witzenberg.gov.za

Evaluering van opsies te Bella Vista

- Opsie 1 (erf 2725)

o Die erf is 735 m^2 groot.
o Area van ten minste 1 040 m^2 word benodig.

- Opsie 2 (erf 2722)

o Die erf is 736 m^2 groot.
o Area van ten minste 1 040 m^2 word benodig

- Opsie 3 (erf 8714)

o Die erf is 1 802,56 m^2 groot.
o Area van ten minste 1 040 m^2 word benodig
o
- Opsie 4 (erf 3292/3/4)
-
o Die 3 erwe gesamentlik is 1 020 m^2 groot.
o Area van ten minste 1 040 m^2 word benodig

Kommentaar Stadsbeplanning

Die sonering vir hierdie gebruik is "authority use" wat ingevolge die Skema as volg omskryf word:

Land use description: "authority use" means a use which is practised by or on behalf of an organ of state and that cannot be classified or defined under other uses in this zoning scheme, and includes
a use practised by—
(a) the national government, including a military centre or installation, police station or correctional facility;
(b) the provincial government, including a road station or road camp;
(c) the Municipality, such as treatment works, dumping grounds, transfer stations, reservoirs, electricity substations, public ablution facilities, fire service or a municipal depot with related uses, including limited accommodation for staff who are required to be on standby for emergencies.

- Opsie 1 (erf 2725)

Sonering is "Open Space I". Erf moet hersoneer word na "Authority Use"

- Opsie 2 (erf 2722)

Soner is “Open Space I”. Erf moet hersoneer word na “Authority Use”.

- Opsie 3 (erf 8714)

  Sonering is “Business II”. Erf moet hersoneer word na “Authority Use”.

- Opsie 4 (erf 3292/3/4)

  Sonering is “Single Residential I”. Erf moet hersoneer word na “Authority Use”.

REF.: 17/3/2

INTEGRATED WASTE MANAGEMENT PLAN (IWMP)

PURPOSE

The purpose of this report is to update Council on the progress with regard to the 3rd Generation Integrated Waste Management Plan 2011- 2027 for Witzenberg

BACKGROUND

The development of an Integrated Waste Management Plan (IWMP) is a statutory requirement of the National Environmental Management: Waste Act, 2008 (Act 59 of 2008) that has been promulgated and came into effect on 1 July 2009. Its goal is the transformation of the current methodology of waste management, i.e. collection and disposal, to a sustainable practice focusing on waste avoidance and environmental sustainability. Implementation of this IWMP will be through municipal by-laws and in accordance with an implementation schedule. The development of the IWMP is necessary as it is an integral tool to identify current needs and acts as a guide towards sustainable waste management. The IWMP also shows alignment of its goals to achieve an effective waste management system.

LEGISLATION

This report details the roles and responsibilities in terms of waste management at national, provincial, district and municipal level that inform and assist integrated waste management. The roles and responsibilities are as follows:

- National government: The national government is tasked with the establishment of a national waste management strategy, including norms, standards and targets. The national norms and standards may cover all aspects of the waste value chain, from planning to service delivery.
- Provincial government: The provincial governments are tasked with the implementation of the National Environment Management Waste Act (NEM: WA), waste management Regulation and the National Waste Management Strategy, Norms and Standards (NWMS). The Constitution requires provincial government to monitor and provide support to municipalities in the province, and to see to the implementation of waste-related regulations and strategies.

- District municipalities: The Municipal Structures Act, 1998 (Act 117 of 1998) assigns a function of waste disposal to district municipalities. Not all district municipalities are fulfilling this role. However, when the need arises for a regional site, the district can perform this role.
- Local government: The NEM: WA, 2008 (Act 59 of 2008) requires local authorities to implement mechanisms for the provision of waste collection services including collection, storage and disposal. Local authorities are also required to facilitate recycling and waste diversion from landfill and manage waste information appropriately.

LOCAL BY-LAWS AND PLANS

The WLM IWMP will be aligned with Strategic Objectives 1, 3 and 4 of the IDP, which are to provide essential solid waste management services, maintain waste management facilities and provide socio-economic support services. The WLM IWMP will be aligned with the waste management-related matters set out in the WLM by-laws. The by-laws make reference to the development of an integrated refuse management plan, the provision of waste management services, handling of recyclable waste, prohibitions in terms of waste management, handling different types of waste, and compliance and enforcement.

WASTE CATEGORIES AND GENERATION

The following categories of waste are generated in the WLM:

- General waste
- Organic waste
- Construction and demolition (C&D) waste
- Health care risk waste (HCRW)
- Hazardous waste
- Other waste types.

A waste characterisation and brand audit study was undertaken by the Wellington Association Against the Incinerator (WAAI) in March/April 2019. A total of 4 103 kg of general domestic waste was sampled and categorised from Nduli, Ceres, Bella Vista, Prince Alfred Hamlet, Op die-Berg, Tulbagh and Wolseley (WAAI, 2019). The waste characterisation study illustrated that organic waste (excluding garden refuse) constituted the largest proportion (37%) of total waste (WAAI, 2019). If garden waste is included, the actual total organic waste would be 40% of total waste. The recyclable materials (paper, glass, plastic and metals) constituted 38% of the waste stream.

The WLM consists of large agricultural areas. Hazardous waste from these areas includes fertiliser, chemical packaging and expired pesticides. The management of chemical packaging waste is an important environmental, health and safety issue. Of particular concern are the containers from pesticide or herbicide chemicals. Typically, farmers are known to burn these empty plastic chemical containers as well as empty plastic fertiliser bags in open fires on farms, which is in turn resulting in significant air pollution. Currently (2021), household hazardous waste such as batteries and small fluorescent lights are included in the general waste, which is disposed of at the Tulbagh or Op-die-Berg landfill site.

The major health care risk waste (HCRW) generators in the WLM are the hospitals and clinics. The WLM does not provide HCRW treatment and disposal services, resulting in it being the responsibility of the generator to enter a service contract with private service providers for the safe collection, transport,

treatment and disposal of such waste. Compass Medical Waste Services is currently (2020) the HCRW service provider for the private and provincial WLM hospitals and clinics. Compass is licensed to transport infectious HCRW, sharps HCRW, anatomical HCRW and expired pharmaceutical HCRW. Compass reports all HCRW collected, treated and disposed of on the Integrated Pollutant and Waste Information System (IPWIS). Compass is permitted to treat sharps and infectious HCRW via Autoclave. This treatment process is done in closed chambers that apply heat through steam under high pressure to disinfect HCRW. All HCRW treated by Compass is shredded after being treated and sent to the Vissershok hazardous waste landfill for disposal. Anatomical HCRW and pharmaceutical HCRW is sent to a third party (BCL Medical Waste) for treatment by means of incineration. Schedule 0-4 pharmaceutical HCRW is treated and disposed of at the Vissershok hazardous waste landfill. Schedule 5-6 pharmaceutical HCRW is incinerated (at BCL Medical Waste) and the ash is disposed of at the Vissershok hazardous waste landfill.

Agricultural waste refers to waste produced because of various agricultural operations. Some examples of agricultural waste include crop-growing, harvest residues and harvest waste (such as herbs, grains, root tubers, etc.). Waste from livestock farming such as grass, litter or feed is also considered to be agricultural waste. In the WLM, the agricultural waste from farms is either used as animal feedstock, for home composting or it is taken to the nearest landfill site.

GAP AND NEEDS ANALYSIS

A gap and needs analysis was undertaken to identify the shortcomings in the waste management system. Based on the gap and needs analysis, the following goals and objectivesrelated to each goal were developed for the WLM:

- Goal 1: Effective solid waste service delivery:
    - Objective 1: Update the collection schedule
    - Objective 2: Prevent illegal dumping
    - Objective 3: Evaluate waste management fleet.
- Goal 2: Promote waste minimisation and recycling:
    - Objective 1: Implement separation at source in all towns
    - Objective 2: Improve recyclables diversion rates – with appropriate processing after collection
    - Objective 3: Draft an organic waste diversion plan
    - Objective 4: Implement organic waste diversion initiatives
    - Objective 5: Implement swop-shops
    - Objective 6: Establish drop-off facilities in all towns.
- Goal 3: Ensure safe and integrated management of hazardous waste:
    - Objective 1: Provide household hazardous waste solutions; and provide systems for safe collection, bulking, storage as well as transport and appropriate disposal of all hazardous waste generated in and around the WLM
    - Objective 2: Ensure major hazardous waste generators are registered on SAWIS.
- Goal 4: Improved waste education and public awareness:
    - Objective 1: Appoint public awareness task force
    - Objective 2 Implement appropriate waste awareness programmes
    - Objective 3: Develop/acquire access to relevant waste management training courses
    - Objective 4: Improve hazardous waste awareness and management expertise.
- Goal 5: Ensure sound budgeting for integrated waste management:

    - Objective 1: Evaluate staff structures, adjust where required and obtain approval for reallocation of existing or appointment of new staff. Undertake reallocation or fill vacancies based on the findings
    - Objective 2: Ensure availability of sufficient budget for landfill rehabilitation and closure
    - Objective 3: Ensure availability of sufficient budget for new waste management facilities
    - Objective 4: Conduct cost analysis study for the transportation of waste to the regional landfill site in Worcester.
- Goal 6: Improve regulatory compliance:
    - Objective 1: Conduct external landfill audits as per landfill licence requirements and implement remedial actions in accordance with a schedule approved by both the municipality as well as the regulating authority
    - Objective 2: Ensure compliance of the landfill containment barriers with R. 636.
- Goal 7: Improve waste information management:
    - Objective 1: Implement effective recyclables recordkeeping and ensure regularand accurate reporting
    - Objective 2: Implement effective organic waste recordkeeping and ensure accurate and regular reporting, and implement effective hazardous waste recordkeeping and ensure regular and accurate reporting
    - Objective 3: Develop industry waste database with regular and accurate data reporting.

The comments from the public participation phase have been addressed and incorporated into this final report.

RECOMMENDATIONS

- Based on the outcome of the assessment of your IWMP, in my capacity as the Minister for Local Government, Environmental Affairs and Development Planning, I hereby endorse your IWMP in terms of Section 11 (4) (b) (iii) of the Waste Act.

- That the Committee for Technical Services recommends to the Executive Mayoral Committee and Council for approval.

EXECUTIVE SUMMARY

The development of an Integrated Waste Management Plan (IWMP) is a statutory requirement of the National Environmental Management: Waste Act, 2008 (Act 59 of 2008) that has been promulgated and came into effect on 1 July 2009. Its goal is the transformation of the current methodology of waste management, i.e. collection and disposal, to a sustainable practice focusing on waste avoidance and environmental sustainability. Implementation of this IWMP will be through municipal by-laws and in accordance with an implementation schedule. The development of the IWMP is necessary as it is an integral tool to identify current needs and acts as a guide towards sustainable waste management. The IWMP also shows alignment of its goals to achieve an effective waste management system.

The Witzenberg Local Municipality (WLM) is located within the Cape Winelands District Municipality (CWDM). Covering a total area of approximately 10 753 km^2, the main towns include Ceres, Tulbagh, Wolseley, Prince Alfred Hamlet and Op-die-Berg.

The CWDM has appointed Delta Built Environment Consultants (Delta BEC) to compile the third generation WLM IWMP.

LEGISLATION

This report details the roles and responsibilities in terms of waste management at national, provincial, district and municipal level that inform and assist integrated waste management. The roles and responsibilities are as follows:

- **National government:** The national government is tasked with the establishment of a national waste management strategy, including norms, standards and targets. The national norms and standards may cover all aspects of the waste value chain, from planning to service delivery.
- **Provincial government:** The provincial governments are tasked with the implementation of the National Environment Management Waste Act (NEM:WA), waste management Regulation and the National Waste Management Strategy, Norms and Standards (NWMS). The Constitution requires provincial government to monitor and provide support to municipalities in the province, and to see to the implementation of waste-related regulations and strategies.
- **District municipalities**: The Municipal Structures Act, 1998 (Act 117 of 1998) assigns a function of waste disposal to district municipalities. Not all district municipalities are fulfilling this role. However, when the need arises for a regional site, the district can perform this role.
- **Local government:** The NEM:WA, 2008 (Act 59 of 2008) requires local authorities to implement mechanisms for the provision of waste collection services including collection, storage and disposal. Local authorities are also required to facilitate recycling and waste diversion from landfill and manage waste information appropriately.

International, national, provincial and local level strategic linkages in terms of waste management will be considered during the development of the IWMP. The following provincial strategies will be considered:

- **Western Cape Integrated Waste Management Plan (2017-2022)**
  The Western Cape outlined four goals in the 2nd Generation IWMP (2017-2022). The WLM's goals and targets will be developed in line with the following four goals from the Western Cape IWMP:

    - Goal 1: Strengthened education, capacity and advocacy towards integrated waste management.
    - Goal 2: Improved integrated waste management planning and implementation for efficient waste service infrastructure.
    - Goal 3: Effective and efficient utilisation of resources.
    - Goal 4: Improved compliance with environmental regulatory framework.

- **Western Cape Green Economy Strategy Framework (2013)**
  The 2013 Western Cape Green Economy Strategy Framework aims to achieve the double dividend of optimising green economic opportunities and enhancing environmental performance.

  The strategy identifies three high-level priorities for green growth:

    1) Natural gas and renewables.
    2) Financial infrastructure.
    3) Green jobs – including the waste sector.

- **Western Cape Diversion Targets for Organic Waste Management (2018)**
  Organic waste is identified as a problematic waste stream in the Western Cape, with more than 37% of waste generated in the province being organic waste. Landfilling of organic waste results in loss of airspace, methane and leachate generation, odour and health impacts.

  Diversion of organic waste from landfill can reduce these negative impacts and can also aid in job creation at waste management facilities. Compost and biochar produced from organic waste can be used as an alternative to fertilisers to improve soil condition.

  The Department of Environmental Affairs and Development Planning (DEA&DP) proposed a 50% diversion from landfill sites by 2022, and a landfill ban on organic waste to landfill by 2027.

- **Guideline for Management of Abattoir Waste in Western Cape (2015)**
  The guideline on the management of abattoir waste in the Western Cape was developed by the DEA&DP as one of the recommendations stemming from the status quo study of abattoir waste conducted in 2015.

  The guideline provides an overview of the current status quo of abattoir waste, treatments and disposal methods.

Local by-laws and plans

The WLM IWMP will be aligned with Strategic Objectives 1, 3 and 4 of the IDP, which are to provide essential solid waste management services, maintain waste management facilities

and provide socio-economic support services. The WLM IWMP will be aligned with the waste management-related matters set out in the WLM by-laws. The by-laws make reference to the development of an integrated refuse management plan, the provision of waste management services, handling of recyclable waste, prohibitions in terms of waste management, handling different types of waste, and compliance and enforcement.

DEMOGRAPHIC PROFILE

The WLM is the second lowest populated municipal area in the CWD, with a population of 142 466 in 2019 (SEP, 2019). This total is expected to grow to 153 987 by 2023, equating to an average annual growth rate of 2.0%. The number of households in the WLM area is increasing, but the size of households is generally on a downward trend from 2019 to 2023. In 2019, there were 35 976 households in the WLM (WLM SEP, 2019).

The WLM IDP (2017-2022) provides the following breakdown on the income per household distribution:

- Low-income groups: 56.6%
- Middle-income groups: 38.0%
- High-income groups: 5.4%.

In 2017, the WLM contributed 62 953 jobs to formal employment in the CWD (WLM SEP, 2019). Between 2008 and 2017, a total of 9 309 jobs were created in WLM – notable job creation in the wholesale and retail trade (1 093), catering and accommodation (4 917) as well as the community, social and personal service (3 299) sectors. This was, however, offset by job losses in the agriculture, forestry and fisheries sector (-7 308).

FINANCIAL BUDGET

The WLM's waste management capital budget for the 2020/21 financial year is R11 400 000. This will be utilised for the materials recovery facility and the transfer station in Wolseley. The WLM waste management operational budget for 2020/21 is R38 858 618. This will be utilised for maintenance of public toilets, landfill site maintenance and general waste collection services.

WASTE CATEGORIES AND GENERATION

The following categories of waste are generated in the WLM:

- General waste
- Organic waste
- Construction and demolition (C&D) waste
- Health care risk waste (HCRW)
- Hazardous waste
- Other waste types.

A waste characterisation and brand audit study was undertaken by the Wellington Association Against the Incinerator (WAAI) in March/April 2019. A total of 4 103 kg of general domestic waste was sampled and categorised from Nduli, Ceres, Bella Vista, Prince Alfred Hamlet, Op-

die-Berg, Tulbagh and Wolseley (WAAI, 2019). The waste characterisation study illustrated that organic waste (excluding garden refuse) constituted the largest proportion (37%) of total waste (WAAI, 2019). If garden waste is included, the actual total organic waste would be 40% of total waste. The recyclable materials (paper, glass, plastic and metals) constituted 38% of the waste stream.

The WLM consists of large agricultural areas. Hazardous waste from these areas includes fertiliser, chemical packaging and expired pesticides. The management of chemical packaging waste is an important environmental, health and safety issue. Of particular concern are the containers from pesticide or herbicide chemicals. Typically, farmers are known to burn these empty plastic chemical containers as well as empty plastic fertiliser bags in open fires on farms, which is in turn resulting in significant air pollution. Currently (2021), household hazardous waste such as batteries and small fluorescent lights are included in the general waste, which is disposed of at the Tulbagh or Op-die-Berg landfill site. From the waste characterisation study conducted by WAAI in 2019, 11% of the waste stream consists of household hazardous waste.

Currently (2021), used oil from workshops is collected by Oilkol (Pty) Limited. Oilkol collects the used oil from clients in bulk containers and transports it to Exol Oil Refinery, where the oil is then processed and sold as industrial furnace fuel (IFF). Waste oil from filling stations generally consists of oil from car leakages and used oil bottles purchased by a client. Currently, the oil bottles purchased at the filling stations are disposed of in a separate bin on site and collated by the WLM

The major health care risk waste (HCRW) generators in the WLM are the hospitals and clinics. The WLM does not provide HCRW treatment and disposal services, resulting in it being the responsibility of the generator to enter a service contract with private service providers for the safe collection, transport, treatment and disposal of such waste. Compass Medical Waste Services is currently (2020) the HCRW service provider for the private and provincial WLM hospitals and clinics. Compass is licensed to transport infectious HCRW, sharps HCRW, anatomical HCRW and expired pharmaceutical HCRW. Compass reports all HCRW collected, treated and disposed of on the Integrated Pollutant and Waste Information System (IPWIS). Compass is permitted to treat sharps and infectious HCRW via Autoclave. This treatment process is done in closed chambers that apply heat through steam under high pressure to disinfect HCRW. All HCRW treated by Compass is shredded after being treated and sent to the Vissershok hazardous waste landfill for disposal. Anatomical HCRW and pharmaceutical HCRW is sent to a third party (BCL Medical Waste) for treatment by means of incineration. Schedule 0-4 pharmaceutical HCRW is treated and disposed of at the Vissershok hazardous waste landfill. Schedule 5-6 pharmaceutical HCRW is incinerated (at BCL Medical Waste) and the ash is disposed of at the Vissershok hazardous waste landfill.

Agricultural waste refers to waste produced because of various agricultural operations. Some examples of agricultural waste include crop-growing, harvest residues and harvest waste (such as herbs, grains, root tubers, etc.). Waste from livestock farming such as grass, litter or feed is also considered to be agricultural waste. In the WLM, the agricultural waste from farms is either used as animal feedstock, for home composting or it is taken to the nearest landfill site.

Sewage sludge is a key hazardous waste type generated from wastewater treatment works (WWTW) plants. Sewage sludge can be treated for agricultural use, or it should be disposed of at a hazardous landfill site. Guidelines have been developed by the Water Research Commission that details for the safe disposal of sewage sludge. The WLM has four WWTW plants and all sewage sludge is currently illegally disposed at the landfill site.

The WLM does not accept tyres for disposal at any landfill site. In the case of tyres being disposed of at a landfill site, the WLM will stockpile the tyres and use them as barriers at parks or landfill sites. The tyre fitment shops (Supa Quick, Hi-Q, Tiger Wheel and Tyre, etc.) have a dedicated area where the used tyres are stockpiled until collected by the respective suppliers.

SERVICE DELIVERY

The WLM provides waste collection services to high, medium and low-income groups, informal settlements, businesses and schools. Green bags are provided for garden refuse. The green bags are collected from the households and transported to the Prince Alfred Hamlet landfill site. Clear bags are used for recyclables. The clear bags are collected from the households in Tulbagh with the cage truck and transported to the Tulbagh landfill site where an external company (Frank Boomshiar Recyclables) collects the recyclables. Skips are used in informal settlements and in all towns for garden refuse and C&D waste storage. At informal areas, it is impossible to access the area with a compactor, due to the denseness of the area, but skips are provided where informal dwellers dispose of their waste. Black and green bags are also provided to the informal dwellers and are serviced by a LDV where accessible. There are currently (2021) 77 skips (6 m^3) placed in the WLM.

COMPLIANCE AND ENFORCEMENT

The WLM has operating licences for four landfills, but the Wolseley landfill site has been completely vandalised in 2013 and has since been non-operational. The WLM's general waste is disposed of at the Op-die-Berg and Tulbagh landfills. The garden waste is disposed of at the Prince Alfred Hamlet site. None of these sites are equipped with a weighbridge, but a weigh pad has recently been installed at the Tulbagh landfill by the DEA.

The WLM has the following landfill sites:

- Ceres landfill site (closed)
- Prince Alfred Hamlet landfill site (operational)
- Op-die-Berg landfill site (operational)
- Tulbagh landfill site (operational)
- Wolseley landfill site (non-operational).

The DEA&DP conducted a study in 2016 focusing on overall compliance and the infrastructure required to divert waste from landfills (waste minimisation). This was done to provide the tools for landfills to ensure their compliance by 2030.

A study conducted by Aurecon in 2020 identified the following minimum waste management civil infrastructure requirements to improve the waste management services in the WLM:

- Public waste drop-off facilities where the public can drop off typical non-collected wastes (builders' rubble, garden waste, general recyclables), located in each of the towns of the WLM.
- A combined dirty material recovery facility (MRF) and transfer station, centrally located in the town of Ceres, where all the collected waste from the greater WLM area will be reduced, consolidated and transported to either the regional landfill site in Worcester (once established) or the Tulbagh landfill site.

WASTE AVOIDANCE, REDUCTION AND RECYCLING

The WLM gave consent to WAAI to undertake a Zero Waste to Landfill Pilot Project. An area in Tulbagh was selected by the WLM for the pilot project. The pilot project was conducted in an area in Tulbagh town from 02 October to 04 December 2019. Approximately 100 households were chosen to participate in the pilot project. All households that were selected to participate in the pilot area were provided with pamphlets that explained the reasons for the Zero Waste Pilot Project and how to separate their waste according to the bags provided to them free-of-charge (WAAI, 2019). The Zero Waste to Landfill model proposes that the organic waste, recyclable waste and residual waste be collected separately and transported separately to avoid cross-contamination and to improve recycling efficiency, quality and quantity – and to divert waste from landfill. The results from the pilot project indicate an increase in household participation, an increase in recyclables, and a reduction in general household waste destined for disposal. The Zero Waste to Landfill Pilot Project has proven that separation at source, especially the source separation of organic waste, is practical and feasible in the WLM. The successful separation at source proves that at least 85% of what is currently regarded as waste can be diverted away from the landfill.

Spar has a recycling programme where all plastic and cardboard are bailed and transported back to the Spar warehouse, thus ensuring that the plastic and cardboard packaging materials from the warehouse never enter the waste stream. Other packaging factories in WLM make use of Winterberge Recycling and War Against Waste to collect plastics and cardboard from the factories. Winterberge Recycling and War Against Waste have a contract with the WLM to report the recyclable tonnages to the municipality.

WASTE AWARENESS AND EDUCATION

The WLM appointed 25 waste ambassadors for environmental education and waste awareness campaigns. These waste ambassadors are employed for door-to-door waste campaign and clean-up projects, and to conduct visits to schools, clinics and residents to raise awareness.

GAP AND NEEDS ANALYSIS

A gap and needs analysis was undertaken to identify the shortcomings in the waste management system. Based on the gap and needs analysis, the following goals and objectives related to each goal were developed for the WLM:

- Goal 1: Effective solid waste service delivery:
    - Objective 1: Update the collection schedule
    - Objective 2: Prevent illegal dumping

    - Objective 3: Evaluate waste management fleet.
- Goal 2: Promote waste minimisation and recycling:
    - Objective 1: Implement separation at source in all towns
    - Objective 2: Improve recyclables diversion rates – with appropriate processing after collection
    - Objective 3: Draft an organic waste diversion plan
    - Objective 4: Implement organic waste diversion initiatives
    - Objective 5: Implement swop-shops
    - Objective 6: Establish drop-off facilities in all towns.
- Goal 3: Ensure safe and integrated management of hazardous waste:
    - Objective 1: Provide household hazardous waste solutions; and provide systems for safe collection, bulking, storage as well as transport and appropriate disposal of all hazardous waste generated in and around the WLM
    - Objective 2: Ensure major hazardous waste generators are registered on SAWIS.
- Goal 4: Improved waste education and public awareness:
    - Objective 1: Appoint public awareness task force
    - Objective 2 Implement appropriate waste awareness programmes
    - Objective 3: Develop/acquire access to relevant waste management training courses
    - Objective 4: Improve hazardous waste awareness and management expertise.
- Goal 5: Ensure sound budgeting for integrated waste management:
    - Objective 1: Evaluate staff structures, adjust where required and obtain approval for reallocation of existing or appointment of new staff. Undertake reallocation or fill vacancies based on the findings
    - Objective 2: Ensure availability of sufficient budget for landfill rehabilitation and closure
    - Objective 3: Ensure availability of sufficient budget for new waste management facilities
    - Objective 4: Conduct cost analysis study for the transportation of waste to the regional landfill site in Worcester.
- Goal 6: Improve regulatory compliance:
    - Objective 1: Conduct external landfill audits as per landfill licence requirements and implement remedial actions in accordance with a schedule approved by both the municipality as well as the regulating authority
    - Objective 2: Ensure compliance of the landfill containment barriers with R. 636.
- Goal 7: Improve waste information management:
    - Objective 1: Implement effective recyclables recordkeeping and ensure regular and accurate reporting
    - Objective 2: Implement effective organic waste recordkeeping and ensure accurate and regular reporting, and implement effective hazardous waste recordkeeping and ensure regular and accurate reporting
    - Objective 3: Develop industry waste database with regular and accurate data reporting.

The comments from the public participation phase have been addressed and incorporated into this final report.

1 INTRODUCTION

1.1 BACKGROUND

The National Waste Management Strategy (2020) (NWMS) is a legislative requirement of the National Environmental Management: Waste Act (NEM:WA), 2008 (Act 59 of 2008), intended to achieve the objectives of the NEM:WA and seeking to systematically improve waste management in South Africa. This approach recognises the widely adopted waste hierarchy (Figure 1-1), of which the primary objective is to reduce the amount of waste going to landfills. This approach suggests disposal of waste as a last resort.

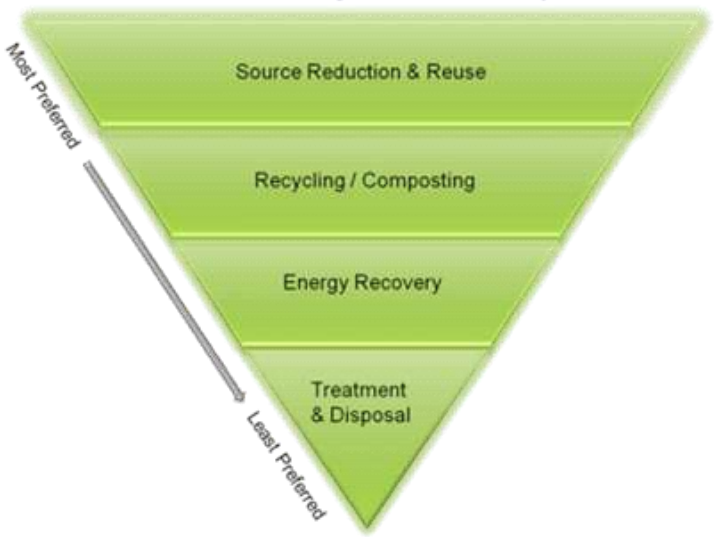

Figure 1-1: National Waste Management Strategy (NWMS, 2011) hierarchy – waste hierarchy

The development of an Integrated Waste Management Plan (IWMP) is a statutory requirement of NEM:WA that has been promulgated and came into effect on 1 July 2009. Its goal is the transformation of the historic methodology of waste management, i.e. collection and disposal, to a sustainable practice focusing on waste avoidance and environmental sustainability. The development of the IWMP is necessary, as it is an integral tool to identify current needs and acts as a guide towards sustainable waste management. The IWMP will be developed in line with the WLM's Integrated Development Plan's (IDP) strategic objectives.

In an effort to ensure that the WLM provides an efficient and cost-effective waste management service, the CWDM has appointed Delta Built Environment Consultants (Delta BEC) to compile the third generation (2021-2027) WLM Integrated Waste Management Plan (IWMP).

1.2 LOCALITY

The Witzenberg Local Municipality (WLM) lies within the Cape Winelands District Municipality (CWDM). The WLM covers a total area of approximately 10 753 km^2

and the main towns include Ceres, Tulbagh, Wolseley, Prince Alfred, Hamlet and Op-die-Berg.

Figure 1-2: Cape Winelands District Municipality area

The role of the WLM in relation to environmental management is detailed in Section 152 of the Constitution, which requires municipalities, amongst others, to ensure the provision of municipal services to communities in a sustainable manner, and to promote a safe and healthy environment.

1.3 HYDROLOGY

The Witzenberg Municipality falls within the winter rainfall region of South Africa and has a Mediterranean climate. The climate is characterised by warm to hot, dry summers and mild to cool, wet winters. Mediterranean climates are characterised by the long-growing seasons with moderate to warm temperatures. Rainfall mostly occurs between May and October, with snowfalls occurring periodically on the highest mountain tops. The Western Cape is characterised as a water-scare region. Projections for the Western Cape include a drying trend from west to east, with a weakening of winter rainfall and possibly slightly more summer rainfall (mainly in the east of the province). Other projected impacts are a shift to more irregular

rainfall of possible greater intensity, and rising mean, minimum and maximum temperatures everywhere.

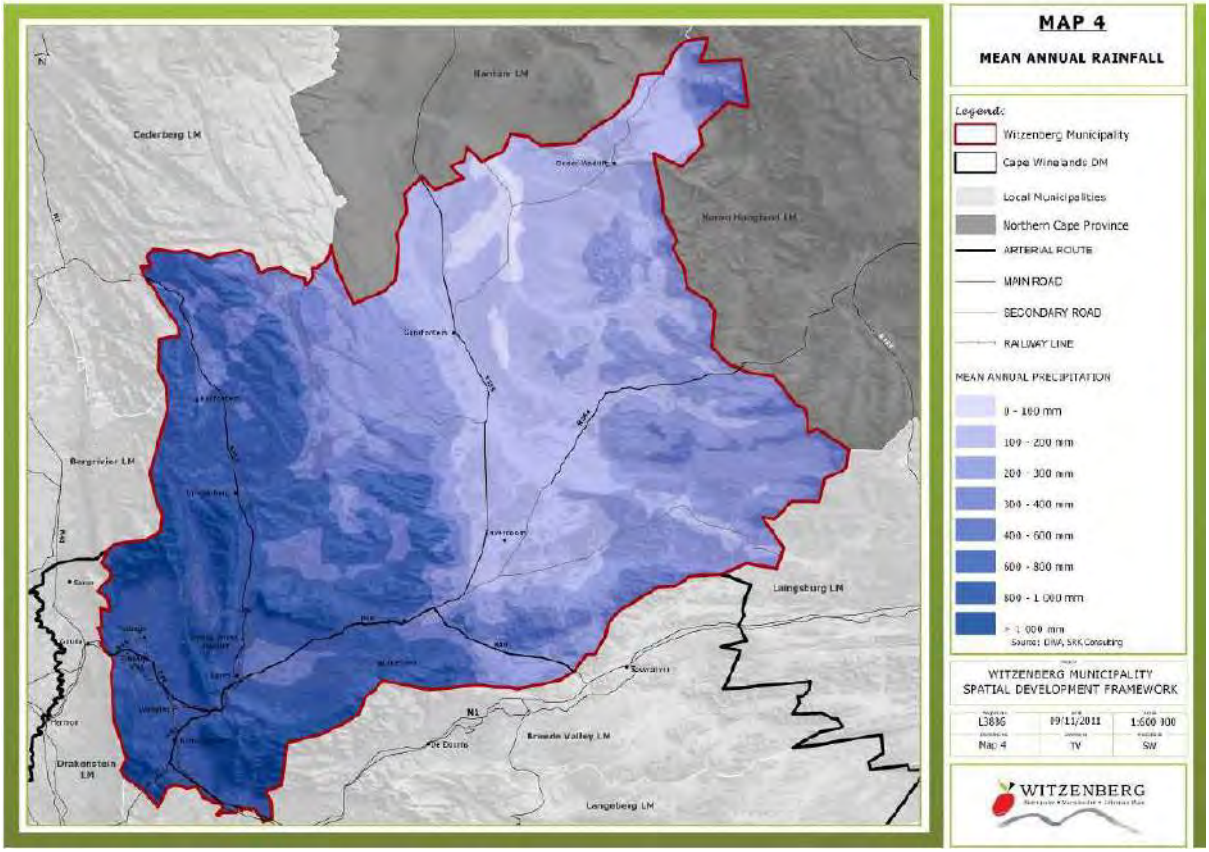

Figure 1-3: Mean Annual Rainfall in the WLM

The importance of the water resources must be considered within the context that large portions of the Witzenberg area are semi-arid. The availability of water is, therefore, the most critical factor in the municipal area. Water resources are crucial to the wellbeing of humans, and it plays a fundamental role in the continuing existence and health of our ecosystems. Water is also vital for cultivation, processing and manufacturing activities, which drives the economy of Witzenberg. It furthermore contributes to the unique sense of place of the area. Land-use patterns largely influence the maintenance of water yields. Interference with the natural conditions in mountain catchment areas, e.g. draining, canalising or cultivating areas such as vleis, seepage areas, riparian areas and stream-bed alluvium, over-exploitation of natural vegetation (e.g. flowering picking) and the uncontrolled spread of alien vegetation are detrimental to the proper functioning of a catchment system. The availability of water also holds the key to the settlement of emergent or small farmers. It is paramount for proposed new developments to be considered in a bioregional context in terms of (a) water availability, (b) environmental requirements, and (c) overall viability of the proposed scheme.

The Olifants/Doorn Water Management Area (WMA) covers most of the Witzenberg Municipality, while Berg WMA, Breede WMA and Gourits WMA cover the western, southern and south-eastern parts of the area (WLM IDP 2020 – 2021).

Table 1-1: WMAs Descriptions in the WLM

WMA	DESCRIPTION
Olifants/Doorn WMA	The Olifants/Doorn WMA covers the Ceres and Tankwa Karoo and extends beyond the Witzenberg Municipality to the West Coast and into the Northern Cape Province. The area is generally an arid region with an average rainfall of less than 300 mm per annum. The catchment is drained by the Olifants River of which the Doring River, draining the Koue Bokkeveld and Doring subareas, is the main tributary. The Olifants, Doring and Koue Bokkeveld subareas contribute the highest run-off to the WMA (Ninham Shand Consulting Services et al, 2005). More than 90% of available water resources are used for irrigation purposes in the summer months, making bulk water storage an essential component of water resources management (DWAF, 2004).
Berg WMA	Only a small portion of the Berg WMA is located within the Witzenberg municipal area. Tulbagh and environs are in the eastern-most section of the Upper Berg subarea.
Breede WMA	The Breede River Water Management Area (WMA) is the southern-most water management area in South Africa and lies entirely in the Western Cape Province. Most of the towns of the Witzenberg Municipality fall within the Upper Breede subarea.
Gouritz WMA	The Groot subarea of the Gouritz WMA covers a very small portion of the south-eastern part of the Witzenberg Municipality.

1.4 GEOLOGY

There are five geological formations present in the area. From oldest to youngest in age these are the Malmesbury, Table Mountain, Bokkeveld and Witteberg Groups and superficial alluvial deposits.

The Malmesbury Group rocks are very old (>600 million years) and have been extensively deformed and reconstituted (metamorphosed). They comprise shale, phyllite and impure sandstones. Some minor doleritic intrusions (dykes) are present. These rocks give rise to low, undulating topography.

The Table Mountain Group rocks consist predominantly of resistant quartzitic sandstones and form the characteristic grey, craggy mountains of the Western Cape. Two main formations are present, the upper Nardouw Subgroup and the lower Peninsula Sandstone Formation. These are separated by the Cedarberg Formation, a shaley more easily weathered horizon that forms a prominent green to brown (seasonal) marker band between the grey sandstones.

The Bokkeveld Group comprises a series of alternating fossiliferous shales and sandstones, with the former being more dominant.

The Witteberg Group also comprises alternating shales and sandstones but has a more quartzitic character.

Alluvial deposits occur mainly in the upper reaches of the Breë River from below Mitchells Pass (south-west of Ceres) to the southern boundary of the study area. Elsewhere they mainly occur as thin and narrow strips along the main drainage channels.

The Ceres area is located near the convergence of the N-S and E-W trending limbs of the Cape Fold Belt. Ceres Valley itself is a broad synclinal structure with a smaller enclosed syncline centred on the Agter Witzenberg Valley. A series of sub-parallel faults trending WNN-ESE cut across the area (WLM IWMP 2013).

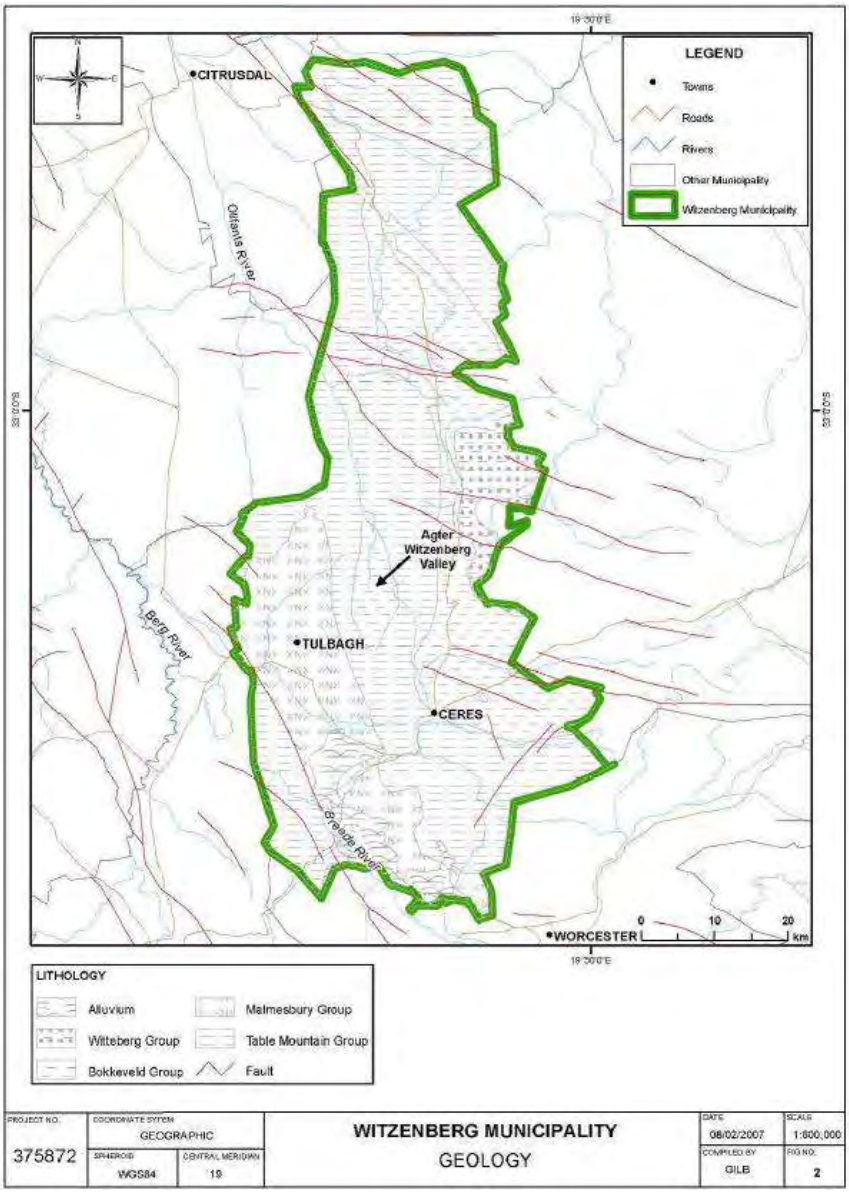

Figure 1-4: Geology of WLM

1.5 GROUNDWATER

In broad terms, any aquifers developed in rocks of the Malmesbury, Table Mountain, Bokkeveld or Witteberg Groups will be of the fractured or secondary type. These are shown as shades of green in the figure below. Aquifers developed

in the alluvium will be of the intergranular or primary type. These are shown as shades of violet in the figure below.

The Witzenberg Municipal area is one of generally good hydrogeological potential, with large parts having a mean borehole yield of >2 ℓ/s.

The Malmesbury and Witteberg Groups generally have the lowest potential, being classified as B3, which implies a median borehole yield of 0.5 to 2.0 ℓ/s. However, there is a patch of very high potential in the Malmesbury Group in the upper Tulbagh Valley, rated as B5.

The Table Mountain Group (TMG) is usually regarded as the major regional aquifer of the Western Cape. In the study area it is uniformly classified as B4, i.e. a median borehole yield of 2.0 to 5.0 ℓ/s. However, much of this aquifer is inaccessible for drilling and exploitation. During exploration drilling and yield testing for Ceres Municipality in 1995, consistent long-term yields of ~8 to 10 ℓ/s were obtained from this aquifer.

The Bokkeveld Aquifer has the highest potential in the study area, being classified as B5. A similar classification is given to this aquifer in the Hex Valley and Grabouw areas. Drilling and testing of three boreholes in this aquifer in the Ceres area in 1995 supports this high classification, with long-term yields of up to 20 ℓ/s being determined.

Groundwater is used on a large scale for municipal and irrigation use. Ceres Municipality has a wellfield capable of supplying 100 ℓ/s combined from the TMG and Bokkeveld Aquifers. Extensive use is made of groundwater for irrigation in the Ceres and Agter Witzenberg Valleys. In the latter, >10 million m_3/a is abstracted.

Groundwater quality is mostly good on account of the relatively high rainfall and therefore recharge and the influence of the TMG Aquifer. Consisting mostly of silica, these rocks contain very pure groundwater with electrical conductivity (EC) mostly <10 mS/m. The drawback with such unbuffered groundwater is that it has a low pH, usually <6, which is aggressive and corrosive. High iron content is also a characteristic aesthetic problem. Over most of the area EC is <70 mS/m, increasing above this in parts of the Malmesbury and Bokkeveld Aquifers (WLM IWMP 2031).

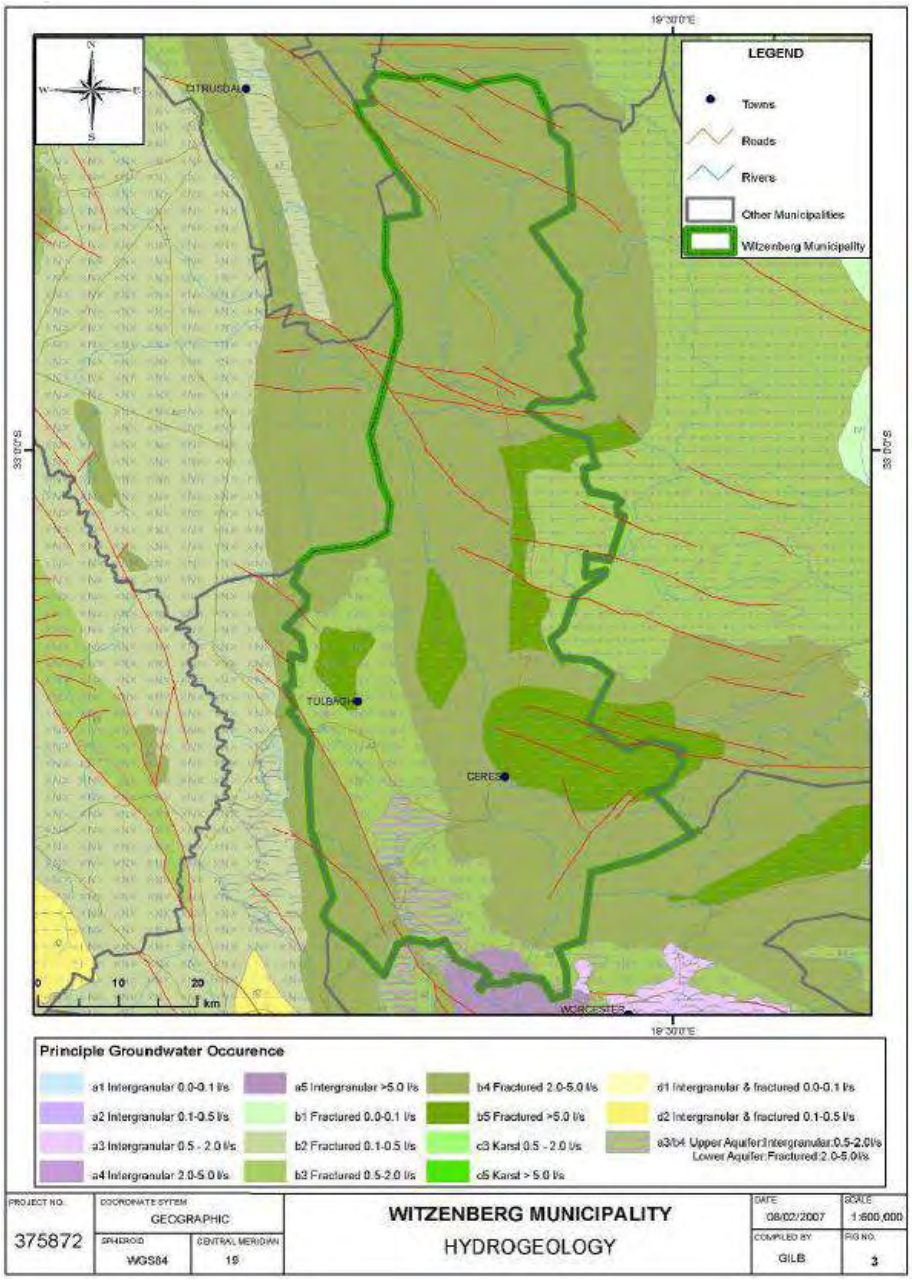

Figure 1-5: Hydrogeology of WLM

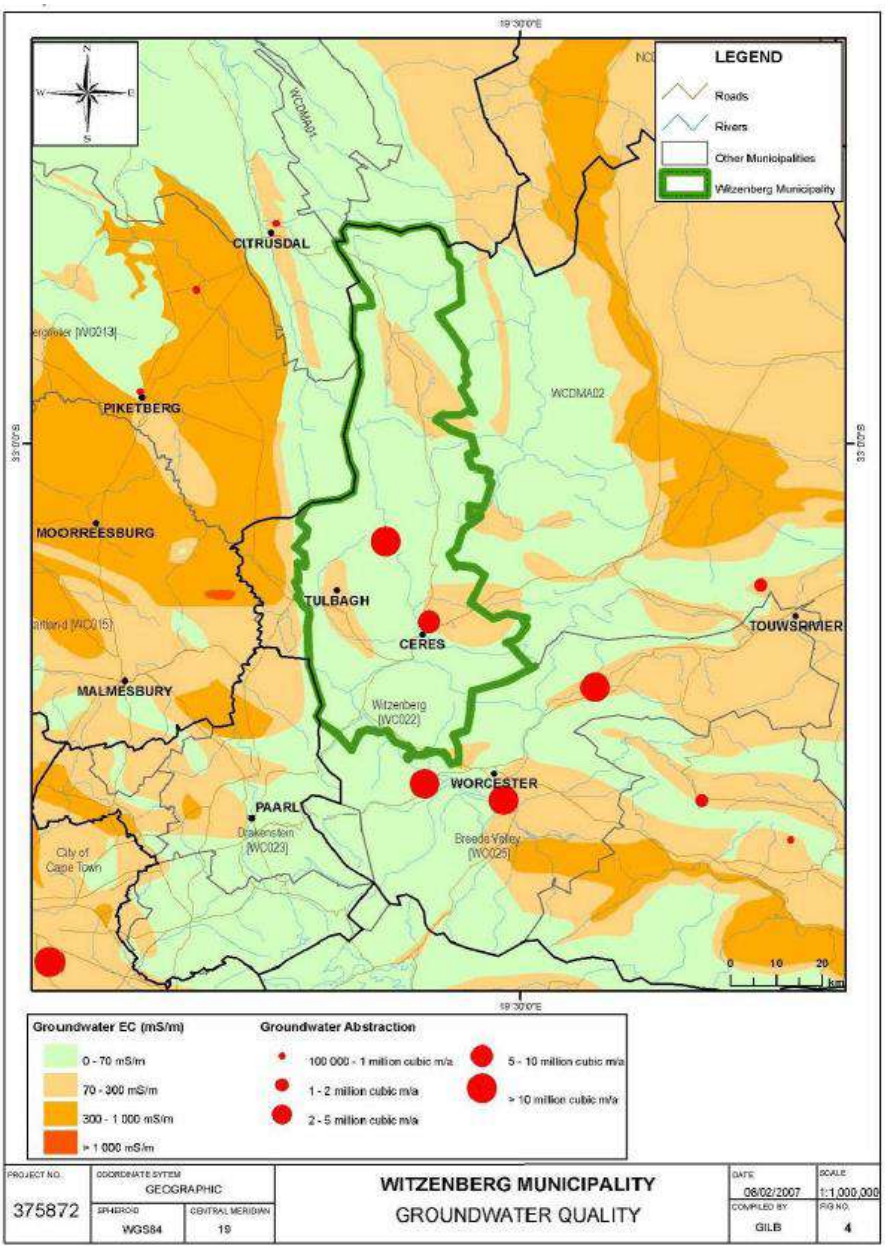

Figure 1-6: Groundwater Quality of the WLM

1.6 ROAD INFRASTRUCTURE

The road network in Witzenberg Municipality consists of provincial roads, owned and managed by the provincial road authority. Apart from the provincial roads, which are also known as the rural road network, the upgrade and maintenance of the local street network is the responsibility of the local authority. The condition of the road surface indicated that 66% of the surfacing is in good or very good condition. The corresponding value for road structure is 79%. If road surface conditions deteriorate too much, the road structure will be adversely affected. Therefore, upkeep to protection of the structure through regular maintenance is very important. Fruit and vegetables are brought from various farms around Wolseley, from Op-die Berg and Tulbagh to the factory in Ceres to be packed. This

creates an inflow of heavy vehicles to Ceres. From Wolseley and Tulbagh, heavy vehicles travel to Ceres via the Mitchell's Pass.

The pass has a high-quality surface, able to withstand high volumes of traffic. In contrast, the proclaimed road through Ceres is of a different standard and must accommodate the same high volume of heavy vehicles. In the urban streets of Ceres, special signage restricts heavy vehicles from entering the urban areas. A Pavement Management System (PMS) is used for maintaining the roads in the area through an assessment of the network based on methodical visual ratings of each pavement section. The priorities are divided into routine maintenance (e.g. patching), to normal maintenance (resurfacing) through to heavy rehabilitation (e.g. thick overlays and reconstruction). This is supported by visual inspections which are performed according to a schedule and data is recorded and prioritised for implementation. Limited and funding backlogs are the greatest challenge faced in maintaining the road network (WLM Annual Performance Report, 2018-2019).

1.7 PURPOSE OF REPORT

The purpose of this report is to analyse and quantify all aspects related to current waste management services and practices carried out by the WLM, as well as the private sector, with the view of using such information as a baseline for future planning for sustainable service delivery.

1.8 STRUCTURE OF REPORT

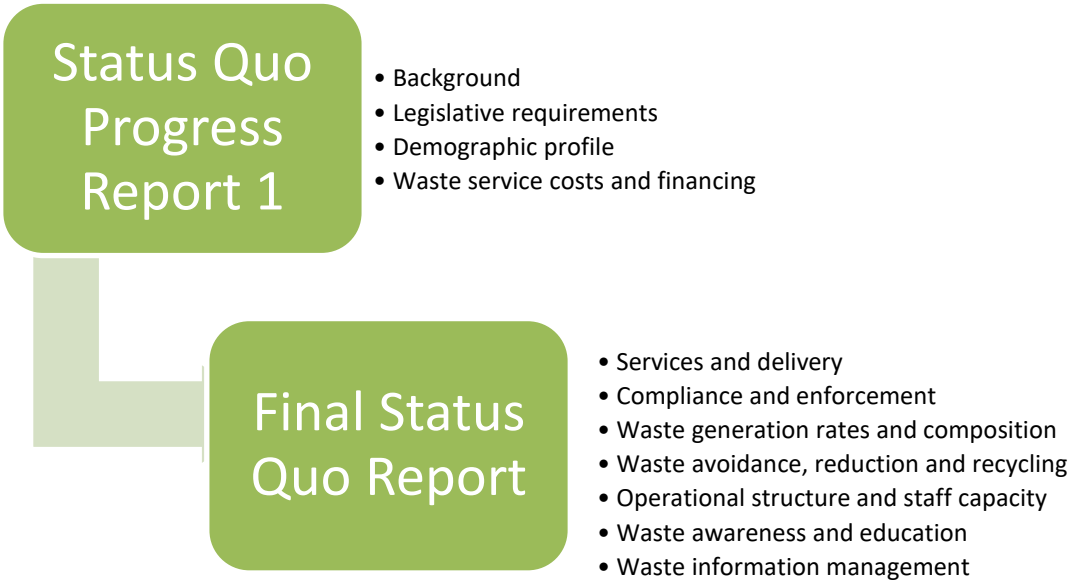
The report comprises the following sections:

- Section 2: Status quo study approach
- Section 3: Relevant legislation
- Section 4: Status quo study findings
- Section 5: Gap and needs analysis
- Section 6: Goals, objectives and targets assessment
- Section 7: Implementation plan
- Section 8: IWMP monitoring and review
- Section 9: Public participation process
- Section 10: Conclusion
- Section 11: References
- Appendices.

2 STATUS QUO STUDY APPROACH

This section details the approach that the Delta BEC team followed during execution of the status quo phase of the project.

The process flow diagram below details the activities added to each progress report to generate the final status quo report. Site visits were conducted during the status quo investigation phase of the project. The site visits were conducted during the week of 31 August 2020 to 04 September 2020.



3 RELEVANT LEGISLATION

This chapter of the report details the roles and responsibilities in terms of waste management at national, provincial, district and local municipal level that inform and assist integrated waste management.

3.1 ROLES AND RESPONSIBILITIES

3.1.1 NATIONAL GOVERNMENT

The national government is tasked with the establishment of a national waste management strategy, including norms, standards and targets. The national norms and standards may cover all aspects of the waste value chain, from planning to service delivery.

3.1.2 PROVINCIAL GOVERNMENT

The provincial governments are tasked with the implementation of the National Environment Management Waste Act (NEM:WA), Waste Management Regulation and the National Waste Management Strategy, Norms and Standards (NWMS). The Constitution requires provincial government to monitor and provide support to municipalities in the province, and to see to the implementation of waste-related regulations and strategies.

3.1.3 DISTRICT MUNICIPALITIES

The Municipal Structures Act, 1998 (Act 117 of 1998) assigns a function of waste disposal to district municipalities. Not all district municipalities are fulfilling this role. However, when the need arises for a regional site, district municipalities can cooperate roles.

3.1.4 LOCAL GOVERNMENT

The NEM:WA, 2008 (Act 59 of 2008) requires local authorities to implement mechanisms for the provision of waste collection services including collection, transportation, storage and disposal. Local authorities are also required to facilitate recycling and waste diversion from landfill and manage waste information appropriately.

3.2 STRATEGIC LINKAGES IN TERMS OF WASTE MANAGEMENT ON INTERNATIONAL, NATIONAL, PROVINCIAL AND LOCAL LEVEL

3.2.1 INTERNATIONAL TREATIES

The following list of international treaties will be considered:

- Basel Convention
- Rotterdam Convention

- Stockholm Convention.

3.2.1.1 The Basel Convention

The Basel Convention (1989) is a global agreement that seeks to address the transboundary movement of hazardous waste. It also aims to ensure that strict controls are in place when any transboundary movement and disposal of hazardous waste does occur and ensures that it is undertaken in an environmentally sound and responsible manner.

The Basel Convention, held on 22 March 1989, came into effect during May 1992 after ratification by the prerequisite number of countries. South Africa ratified the Convention in 1994, with the Department of Environmental Affairs (DEA) being the focal point for the convention. Whilst South Africa subsequently acceded to this Convention, no legislation was passed at the time to give effect to it. The second Basel Convention, held on 08 October 2005, set standards for the control of transboundary movements of hazardous wastes and their disposal, setting out the categorisation of hazardous wastes and the policies for their disposal between member countries. South Africa accedes to this convention and implements its provisions.

The main objective of the Basel Convention is to protect human health and the environment against the adverse effects of hazardous wastes. The Convention specifically aims to reduce hazardous waste generation, promote environmentally sound management of hazardous wastes, restrict transboundary movements of hazardous wastes and provides a regulatory system that applies to cases where transboundary movement of hazardous waste is permissible (United Nations Environment Programme, 2020).

3.2.1.2 The Rotterdam Convention

The Rotterdam Convention promotes and enforces transparency in the importation of hazardous chemicals and whilst it explicitly excludes waste, its implementation may lead to bans on listed chemicals. Some of these chemicals may occur in stockpiles of obsolete chemicals such as pesticides that have been identified as a major waste management challenge. Extended producer responsibility schemes will be used to effectively manage obsolete chemicals (United Nations Environment Programme, 2020).

3.2.1.3 The Stockholm Convention

In 1995, the United Nations Environment Programme called for global action to be taken on persistent organic pollutants (POPs), which pose a threat to both health and the environment. As a result, the negotiations for the Stockholm Convention on POPs were initiated and culminated in May 2001, with the convention enforced in May 2004. South Africa accedes to this convention, whereby member countries have agreed to phase out POPs, and prevent their import or export. It imposes restrictions on the handling of all intentionally produced POPs. Parties to the

Convention are also required to undertake the following responsibilities (United Nations Environment Programme , 2020):

- Develop and implement appropriate strategies to identify stockpiles, products and articles in use that contain or are contaminated with POPs
- Manage stockpiles and wastes in an environmentally sound manner
- Dispose of waste in a way that destroys or irreversibly transforms POPs content
- Prohibit recycling, recovery, reclamation, direct reuse or alternative use of POPs
- Endeavour to develop strategies to identify contaminated sites and perform eventual remediation in an environmentally sound manner.

3.2.2 NATIONAL ACTS, REGULATIONS AND STRATEGIES

3.2.2.1 The South African Constitution, 1996 (Act 108 of 1996)

Section 24 of the Bill of Rights of the Constitution of South Africa clearly states that everyone has the right to:

a) An environment that is not harmful to their health or well-being.
b) Have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that:
    i) Prevent pollution and ecological degradation.
    ii) Promote conservation.
    iii) Secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development.

The Constitution places an emphasis on the need to have the environment protected for the benefit of present and future generations through reasonable legislative and other measures, e.g. IWMPs. It is within this provision that IWMPs must strive or come up with measures to uphold the rights of all citizens within the jurisdiction of the municipality and should enhance and promote environmental protection from any form of degradation as enshrined by the South African Constitution.

3.2.2.2 The National Environmental Management Act (Act 107 of 1998)

NEMA is the cornerstone of all environmental legislation in South Africa. The purpose of NEMA is to uphold the provisions of Section 24 of the Bill of Rights (the Constitution of the Republic of South Africa). It aims to promote and uphold the rights of South African citizens to live in an environment that is not harmful to health or well-being.

NEMA places sustainable development at the centre of every development process that has the potential to have an impact on social, economic and environmental matters, whereby it requires the integration of social, economic and environmental

factors in the planning, implementation and evaluation of decisions to ensure that development serves present and future generations.

3.2.2.3 The Hazardous Substances Act (Act 15 of 1973)

This Act and its regulations provide for the control of substances that may cause injury or ill-health to or death of human beings due to their toxic, corrosive, irritant, strongly sensitising or flammable nature, the division of such substances or products into groups in relation to the degree of danger, to provide for the prohibition and control of the importation, manufacture, sale, use, operation, application, modification and disposal of such substances and products.

3.2.2.4 The National Environmental Management: Waste Act, 2008 (Act 59 of 2008)

The first waste-specific legislation published in South Africa was the National Environmental Management: Waste Act (NEM:WA). It provided the mechanism to regulate the waste value chain aiming to minimise adverse effects on human health and the environment. The National Department of Environmental Affairs (DEA) is the regulatory body for the licensing of Hazardous Waste Facilities, according to NEM:WA's Chapter 5. In addition, the management of hazardous waste is included in the concurrent legislative competence of both national and provincial government assigned by the South African Constitution with respect to environment and pollution control.

3.2.2.5 Waste Classification and Management Regulations (G.N. No. R. 634 of August 2013)

These regulations support and implement the provisions of the NEM:WA and, amongst others, establish a procedure and mechanism for the listing of waste management activities that do not require a Waste Management Licence. It also states that waste must be classified according to the South African National Standard Globally Harmonized System of Classification and Labelling of Chemicals (SANS 10234:2008). SANS 10234:2008 is a standard that classifies waste according to the physical and health hazards specific substances could potentially pose (including hazards to the aquatic environment).

GN. No. R. 634 also talks to the requirements for disposal, recordkeeping and reclassification. For example, it is stated that:

'Waste must be classified within 180 days of generation and should be re-used, recycled, recovered, treated and/or disposed of within 18 months of generation.'

3.2.2.6 The National Environmental Management: Waste Amendment Act, 2014 (Act 26 of 2014)

On 02 June 2014, an amendment of Section 1 of the NEM:WA, as amended by the National Environmental Management: Waste Amendment Act (NEM:WA), was enacted, whereby *Schedule 3: Defined Wastes* was inserted. The purpose of Schedule 3 is to define all types of waste and to categorise them to assist with the

identification of wastes. This schedule is divided into Category A: Hazardous Waste and Category B: General Waste. Schedule 3, Category A defines hazardous waste as follows:

*''Hazardous waste' means any waste that contains organic or inorganic elements or compounds that may, owing to the inherent physical, chemical or toxicological characteristics of that waste, have a detrimental impact on health and the environment a*nd *includes hazardous substances, materials or objects within business waste, residue deposits and residue stockpiles.*'

3.2.2.7 The Municipal Systems Act, 2000 (Act 32 of 2000)

In terms of Section 25 of the Municipal Systems Act (MSA), each municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan (IDP) for the development of the municipality. The IDP is required to include sectoral environmental plans, which would be an IWMP for waste management. In their IDPs, municipalities are required to ensure proper resource allocation to achieve the targets set in the respective plans.

3.2.2.8 The Local Government: Municipal Structures Act, 1998 (Act 117 of 1998)

This Act provides for an appropriate division of functions and powers between categories of municipalities, which include solid waste disposal sites, in so far as it relates to:

a) The determination of a waste disposal strategy
b) The regulation of waste disposal
c) The establishment, operation and control of waste disposal sites, bulk waste transfer facilities and waste disposal facilities for more than one local municipality in the district.

3.2.2.9 The National Environmental Management: Waste Act: Waste Classification & Management Regulations (R. 634 August 2013)

This regulation provides for the classification of waste-by-waste generators in accordance with SANS 10234:2008, within 180 days of generation. The GHS classifies waste in terms of its physical and health hazards as well as the hazards it presents to the aquatic environment. Waste that was previously classified in terms of the Minimum Requirements for the Handling, Classification and Disposal of Hazardous Waste (1998) must now be classified in terms of SANS 10234:2008. Waste listed in Annexure 1 of the WCMR does not require classification in terms of SANS 10234:2008.

3.2.2.10 The National Environmental Management: Waste Act: National Standard for Assessment of Waste (R. 635 August 2013)

The standards prescribe the requirements for the assessment of waste prior to disposal to landfill, as required by Regulation 8 (1) (b) and (c) of the Waste Classification and Management Regulations of 2013. The standards classify waste

into four categories based on its total concentration (TC) and leachable concentration (LC) in comparison with the acceptable limits.

3.2.2.11 The National Environmental Management: Waste Act: National Standard for Disposal of Waste to Landfill (R. 636 August 2013)

The standard provides for the new classification of landfill sites and requirements for containment and barrier designs. The new classifications are Class A, B, C and D. The standards prescribe types of waste (as per the classification of waste by R.635) to be disposed at different classes of landfill sites. The standards also provide for waste disposal restrictions on certain types of waste such as tyres, asbestos, persistent organic pollutants (POPs) and organic waste.

3.2.2.12 National Environmental Management: Waste Act: National Waste Information Regulations (January 2013)

Waste generators are obliged to report waste quantities generated, diverted and treated. This is required to ensure efficient planning for waste management activities. In terms of the regulations, certain requirements must be complied with during reporting, such as the name of the facility, waste types and quantities generated, percentage of waste diverted, etc.

3.2.2.13 National Environmental Management: Waste Act (59/2008): Waste Tyre Regulations (29 September 2019)

The aim of this regulation is to provide guidelines for the safe management of tyre waste. It outlines the prohibitions, registration of waste generators, duties of tyre dealers, the waste tyre stockpile abatement plan and the storage of waste tyres.

3.2.2.14 National Environmental Management Act: NEMA, EIA Regulations (18 June 2010)

The EIA Regulations regulate the procedure and criteria relating to the preparation, evaluation, submission, processing and approval of applications for environmental authorisations for the commencement of activities, subjected to environmental impact assessment, to avoid or mitigate detrimental impacts on the environment, and to optimise positive environmental impacts. Waste activities that should be subjected to EIA are prescribed in GN. 921, NEM:WA schedule.

3.2.2.15 The National Environmental Management: Waste Act: Draft National Norms and Standards for Organic Waste Composting (4 September 2019)

The norms and standards are aimed at controlling the composting of organic waste at facilities falling within certain thresholds as described in Paragraph 3 of these norms and standards to prevent or minimise potential negative impacts on the biophysical and socio-economic environment.

3.2.2.16 The White Paper on Integrated Pollution and Waste Management for South Africa (17 March 2000)

Government Gazette 20978, 17 March 2000 – DEA National Waste Management Policy. It is focused on a holistic and integrated system and process of management, aimed at pollution prevention and minimisation at source, managing the impact of pollution and waste on the receiving environment, and remediating damaged environments.

3.2.2.17 The National Waste Management Strategy (2020)

The NWMS (2020) was approved by Cabinet on 9 September 2020. This strategy was developed in alignment with the National Environmental Management: Waste Act and builds on the successes and lessons learnt from the NWMS (2011).

The NWMS (2020) is broadly focused on preventing waste and diverting waste from landfill by leveraging the concept of the Circular Economy to drive sustainable, inclusive economic growth and development in the waste sector, while reducing the social and environmental impacts of waste. Its implementation plan will create jobs in the waste sector and increase awareness and compliance around waste.

The following are the three strategic goals in the revised NWMS (2020):

- Waste Minimisation – The aim is to prevent waste and where waste cannot be prevented, 40% should be diverted from landfill within five years through reuse, recycling, recovery and alternative waste treatment: 20% of waste reduction in waste generation; and 20% waste reused in the economic value chain.
- Effective and Sustainable Waste Services – This would see all South Africans living in clean communities with waste services that are well managed and financially sustainable.
- Waste Awareness and Compliance – The aim is to create a culture of compliance with zero tolerance of pollution, litter and illegal dumping.

Among the significant strategic shifts from the 2011 strategy in the NWMS 2020 are addressing the role of waste pickers and the informal sector in the Circular Economy, promoting product design packaging that reduces waste or encourages reuse, repair and preparation for recycling, and support markets for source separated recyclables. NWMS 2020 also investigates potential regulatory or economic interventions to increase participation rates in residential separation at source programmes, alongside investing in the economies associated with transporting of recyclables to waste processing facilities and addressing the skills gaps within the sector.

The strategy also requires engagement with the National Treasury regarding the operational expenditures for municipalities associated with implementing the NWMS and Waste Act.

3.2.2.18 National Environmental Management: Waste Act, 2008 (Act 59 of 2008); Draft National Norms and Standards for Organic Waste Composting (4 September 2019)

The purpose of these norms and standards is to provide a national uniform approach relating to controlling the composting of organic waste at a facility that falls within the threshold to prevent or minimise potential negative impacts on the biophysical and socio-economic environment. The aim of the norms and standards is also to ensure Best Practicable Environmental Option (BPEO) in the composting of organic waste.

3.2.3 PROVINCIAL PLANS, STRATEGIES AND GUIDELINES

3.2.3.1 Western Cape Integrated Waste Management Plan (2017-2022)

The Western Cape outlined four goals in the 2nd Generation IWMP (2017-2022). The WLM's goals and targets will be developed in line with the following four goals from the Western Cape IWMP.

- Goal 1: Strengthened education, capacity and advocacy towards integrated waste management.
- Goal 2: Improved integrated waste management planning and implementation for efficient waste services and infrastructure.
- Goal 3: Effective and efficient utilisation of resources.
- Goal 4: Improved compliance with environmental regulatory framework.

These four goals were identified by the Western Cape to address the following:

- Promoting sustainable waste management; this includes waste avoidance, cleaner production, waste minimisation, resource-use efficiency, resource recovery and recycling
- Diverting waste from waste management disposal facilities
- Minimising adverse environmental and social impacts of waste management, particularly for the vulnerable
- Providing guidance and support for both municipalities and industries in developing IWMPs that promote integrated waste management.

3.2.3.2 Western Cape Green Economy Strategy Framework (2013)

The 2013 Western Cape Green Economy Strategy Framework aims to achieve the double dividend of optimising green economic opportunities and enhancing environmental performance.

The strategy identifies three high-level priorities for green growth:

1) Natural gas and renewables
2) Financial infrastructure
3) Green jobs – including the waste sector.

3.2.3.3 Western Cape Diversion Targets for Organic Waste Management (2018)

Organic waste is identified as a problematic waste stream in the Western Cape, with more than 37% of waste generated in the province being organic waste. Landfilling of organic waste results in loss of airspace, methane and leachate generation, odour and health impacts.

Diversion of organic waste from landfill can reduce these negative impacts and can also aid in job creation at waste management facilities. Compost and biochar produced from organic waste can be used as an alternative to fertilisers to improve soil condition.

The Department of Environmental Affairs and Development Planning (DEA&DP) proposed a 50% diversion from landfill sites by 2025, and a landfill ban on organic waste to landfill by 2027.

3.2.3.4 Guideline for Management of Abattoir Waste in Western Cape (2015)

The guideline on the management of abattoir waste in the Western Cape was developed by the DEA&DP as one of the recommendations stemming from the status quo study of abattoir waste conducted in 2015.

The guideline provides an overview of the current status quo of abattoir waste, treatments and disposal methods.

3.2.4 LOCAL BY-LAWS AND PLANS

3.2.4.1 Cape Winelands By-Laws

The Cape Winelands District Municipality does not manage waste collection or disposal. Therefore, it does not have Solid Waste By-Laws. However, Chapter 8 of the Municipal Health By-Laws of the Cape Winelands District Municipality relates to waste management. The Waste Management section is outdated and needs to be reviewed to include NEM:WA and NWMS. The section reads as follows:

‘Part 1: General provisions regarding recovery, storage and disposal of waste

Recovery, storage and disposal of waste

4) *Waste must be recovered, stored, transported and disposed of —*
   a) *without endangering human health;*
   b) *without the use of processes or methods likely to harm or pollute the environment; and*
   c) *in a manner that does not create a health nuisance.*
5) *A person who contravenes subsection (1) commits an offence.*

Part 2: Hazardous Waste

Applicable legislation

The municipality, taking cognizance of the provisions of the Environment Conservation Act, 1989 (Act No. 73 of 1989) the Hazardous Substances Act, 1973 (Act 15 of 1973), the National Health Act, 61 of 2003, and the regulations made under these Acts, adopts the provisions in this Part.

Storage of hazardous waste

6) *An empty container in which hazardous waste such as, but not limited to, pesticides was stored is to be treated as hazardous waste, and —*
   a) *must be stored in such a manner that —*
      i) *no pollution of the environment occurs at any time;*
      ii) *no health nuisance is created at any time;*
   b) *while being stored on site, must be clearly marked or labelled with the words ''Hazardous Waste'';*
   c) *the owner or occupier of the land must fence off the storage area to prevent unauthorised access; and*
   d) *shall be dealt with as Class 6 waste as described in the Minimum Requirements for the Handling, Classification and Disposal of Hazardous Waste (Second Edition, 1998) as published by the Department of Water Affairs and Forestry and as amended from time to time.*
7) *A person who contravenes a provision of subsection (1)(a) to (d) commits an offence.'*

3.2.4.2 WLM Integrated Development Plan (IDP)

The IWMP forms part of the Integrated Development Plan (IDP) required in terms of Chapter 5 of the Municipal Systems Act. To align the IWMP with the IDP (2017-2022) of the WLM, the strategic goals from the IDP will be considered in this IWMP.

Section 24 of the Municipal Systems Act states:

'(1) The planning undertaken by a municipality must be aligned with, and complement, the development plans and strategies of other affected municipalities and other organs of state so as to give effect to the principles of cooperative government contained in Section 41 of the Constitution.
(2) Municipalities must participate in national and provincial development programmes as required in Section 153(b) of the Constitution.'

The following are the strategic objectives of the WLM IDP:

- Strategic Objective 1: Essential Services:
  i. Sustainable provision and maintenance of basic infrastructure.
  ii. Provide for the needs of informal settlements through improved services.
- Strategic Objective 2: Governance:
  i. Support institutional transformation and development.
  ii. Ensure financial viability.

iii. Maintain and strengthen relations with international and inter-governmental partners as well as the local community through the creation of participative structures.

- Strategic Objective 3: Communal Services:
  i. Provide and maintain facilities that make citizens feel at home.
- Strategic Objective 4: Socio-Economic Support Services:
  i. Support the poor and vulnerable through programmes and policy.
  ii. Create an enabling environment to attract investment and support the local economy.

The WLM IWMP will be aligned with Strategic Objectives 1, 3 and 4 of the IDP, which are to provide essential solid waste management services, maintain waste management facilities and provide socio-economic support services.

3.2.4.3 **The WLM By-Laws (2020)**

The WLM IWMP will be aligned with the waste management-related matters set out in the WLM by-laws. The by-laws, which was published in 2005, make reference to the development of an 'integrated refuse management plan', the provision of waste management services, handling of recyclable waste, prohibitions in terms of waste management, handling different types of waste, and compliance and enforcement. The WLM is currently updating the by-laws and it recommended that it adopts the Department's Model Integrated Waste Management by-law or adopts its clauses thereof to ensure that it is aligned to the NEM:WA Act.

4 STATUS QUO STUDY FINDINGS

This section of the report will be discussed under the following headings:

- Demographic profile
- Waste management cost and financing
- Waste categories and generation
- Service delivery
- Compliance and enforcement
- Waste avoidance, reduction and recycling
- Operational structure and staff capacity
- Waste awareness and education.

4.1 DEMOGRAPHIC PROFILE

The Socio-Economic Profile (WLM SEP, 2019) report, drafted by the Western Cape Department of Social Development, and the WLM Integrated Development plan (IDP, 2017-2020) were used to determine the demographic profile of the WLM.

4.1.1 POPULATION PROFILE

The WLM is the second lowest populated municipal area in the CWD, with a population of 142 466 in 2019 (WLM SEP, 2019). This total is projected to grow to 153 987 by 2023, equating to an average annual growth rate of 2.0%.

	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2019	142 466	284 475	186 274	186 796	117 450
2020	145 812	289 123	190 251	188 948	119 813
2021	149 189	293 846	194 292	191 048	122 204
2022	152 498	298 683	198 268	193 150	124 685
2023	153 987	301 349	200 157	194 104	126 018

Figure 4-1: WLM population profile (WLM SEP, 2019)

4.1.2 SOCIO-ECONOMIC GROUPS AND INCOME DISTRIBUTION

4.1.2.1 Age distribution

Table 4-1 depicts the population composition regarding age cohorts of the WLM. The total population is broken down into three different groups, namely:

- Age 0-14: children
- Age 15-65: working age population

- Age 65+: seniors.

Table 4-1 provides the WLM's population composition per age categories. These groupings are also expressed as a dependency ratio, which in turn indicates who is part of the workforce (age 15-65+) and those who are depending on them (children and seniors). A higher dependency ratio (above 60%) means a higher pressure on social systems and the delivery of basic services. Between 2019 and 2025, the largest population growth is projected in the 65+ aged category, which is expected to grow at an annual average rate of 3.9%.

Table 4-1: WLM age category (WLM SEP, 2019)

WITZENBERG: AGE COHORTS, 2019-2025				
Year	**Children 0-15 Years**	**Working Age 16-65 Years**	**Aged 65+**	**Dependency Ratio (%)**
2019	36 556	100 161	5 750	42.2
2022	38 235	107 725	6 538	41.6
2025	39 749	113 338	7 237	41.5
Growth	1.4%	2.1%	3.9%	-

4.1.2.2 Household size

Household size refers to the number of people per household. Although the number of households in the WLM area is increasing, the actual size of households is generally projected to be on a downward trend from 2019 to 2023. In 2019, there were 35 976 households in the WLM (WLM SEP, 2019).

Table 4-2: Household size (WLM SEP, 2019)

WITZENBERG: HOUSEHOLD SIZE, 2019-2023				
2019	**2020**	**2021**	**2022**	**2023**
4.1	4.1	4.0	4.2	4.0

4.1.2.3 Income distribution

The WLM IDP (2017-2022) provides the following income/household distribution in percentages:

- Low-income groups: 56.6%
- Middle-income groups: 38.0%
- High-income groups: 5.4%.

4.1.3 EMPLOYMENT STATUS AND EDUCATION LEVELS

Education and training improve access to employment opportunities and help to sustain and accelerate overall development.

4.1.3.1 Employment status

In 2017, the WLM contributed 62 953 jobs to formal employment in the CWD (WLM SEP, 2019). Between 2008 and 2017, a total of 9 309 jobs were created in the WLM. Notable job creation was in the wholesale and retail trade (1 093), catering and accommodation (4 917) as well as the community, social and personal service (3 299) sectors. This was, however, offset by job losses (-7 308) in the agriculture, forestry and fishing sector. Job losses in the agriculture, forestry and fisheries sector can mostly be attributed to the impact of the drought, but other factors such as mechanisation also contributed to job losses (WLM SEP, 2019). In 2017, the WLM labour force mostly consisted of low-skilled (50.2%) and semi-skilled (35.1%) workers (WLM SEP, 2019). Unemployment in the WLM was at 5.8% in 2018 and the CWD as a whole was at 9.5% (WLM SEP, 2019).

4.1.3.2 Education levels

4.1.3.2.1 Learner enrolment

Learner enrolment in the WLM increased from 18 048 to 18 377 learners between 2016 and 2018 (WLM SEP, 2019).

4.1.3.2.2 Educational facilities

The number of schools within the WLM in 2018 was 53 (SEP, 2018).

4.1.3.2.3 Educational outcomes

The matric pass rate for the CWD declined overall in 2018, with all municipalities except for the WLM experiencing a decrease in their matric pass rates. The 2018 pass rate in the WLM (73.9%) is, however, still lower than the district average (79.5%) (WLM SEP, 2019).

4.1.4 ECONOMIC PERFORMANCE

The ability of households to pay for services such as water, electricity, sanitation, and refuse removal depends on income generated from economic activities. A slowdown in economic activity will result in job losses[1] and the inability of households to pay for services, leading to reduced municipal revenues (WLM SEP, 2019).

[1] Job losses are severely aggravated in 2020 due to COVID-19, which is likely to have a significant impact on several other statistics presented in the Status Quo report.

The WLM Gross Domestic Product (GDPR) per capita, at R47 765.00 in 2018, has declined slightly from R47 915.00 in 2015. This could be attributed to the growing population or may be an indication of declining income levels in the area.

	Western Cape	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2012	R62 441	R51 483	R46 160	R55 147	R64 814	R44 810	R39 814
2015	R62 109	R52 088	R47 915	R55 519	R65 281	R45 521	R40 231
2018	R60 079	R50 717	R47 765	R53 493	R63 010	R44 489	R39 690

Figure 4-2: Cape Winelands District GDPR contribution (WLM SEP, 2019)

4.1.5 DEVELOPMENT PROFILES

4.1.5.1.1 Access to housing and basic services

In 2016, there was a total of 35 976 households within the WLM area, of which 83.3% had access to housing in the form of a formal dwelling (WLM SEP, 2019). The next household survey, which includes municipal level access to household services, will be the Census in 2021.

Table 4-3: WLM number of households' access to housing and basic services (WLM SEP, 2019)

COMMUNITY SURVEY 2016	WITZENBERG	CAPE WINELANDS DISTRICT
Total number of households	35 976	236 006
Formal main dwelling	29 969 83.3%	191 077 81.0%
Water (piped inside dwelling/within 200 m)	35 730 99.3%	232 605 98.6%
Electricity (primary source of lighting)	34 734 96.5%	228 650 96.9%
Sanitation (flush/chemical toilet)	34 017 94.6%	218 483 92.6%
Refuse removal (at least weekly)	35 976 100%	192 974 81.8%

4.1.5.1.2 Access to basic services

Figure 4-3 illustrates the access to basic services measured in terms of the number of consumer units that have access. In 2018, solid waste removal services represented the largest number of consumer units at 15 764.

	Water	Electricity	Sewerage	Solid Waste
2015	14 492	13 372	14 413	13 920
2016	15 173	15 240	14 567	13 920
2017	13 934	14 589	13 142	14 292
2018	13 984	14 889	13 155	15 764

Figure 4-3: WLM breakdown of access to basic services (WLM SEP, 2019)

4.1.5.1.3 Free basic service

Indigent households (a family earning a combined income of less than R3 200.00 per month) qualify for free basic water, electricity, sanitation and waste removal services. These households are required to register with municipalities to qualify for free basic services. The WLM had a total of 3 095 indigent households receiving free solid waste management services in 2020.

The table below provides statistics on the free basic services offered to indigent households.

Table 4-4: Summary of Free Basic Services for Indigent Households (WLM Annual Performance Report, 2018 - 2019)

FREE BASIC SERVICES TO INDIGENT HOUSEHOLDS									
YEAR	**NUMBER OF HOUSEHOLDS**								
	TOTAL NO. OF HH	**HOUSEHOLDS EARNING LESS THAN R3 000 PER MONTH**							
		FREE BASIC WATER		**FREE BASIC SANITATION**		**FREE BASIC ELECTRICITY**		**FREE BASIC REFUSE REMOVAL**	
		ACCESS	**%**	**ACCESS**	**%**	**ACCESS**	**%**	**ACCESS**	**%**
2015/16	14 085	4 614	33	4 614	33	4 614	33	4 614	33
2016/17	14 085	4 510	32	4 510	32	4 510	32	4 510	32
2017/18	14 391	4 591	32	4 591	32	4 591	32	4 591	32
2018/19	15 388	6 742	43	6 742	43	6 742	43	6 742	43

4.2 WASTE MANAGEMENT COST AND FINANCING

4.2.1 DETAILED BREAKDOWN OF OPERATIONAL AND CAPITAL BUDGET

Table 4-5 provides the capital and operational solid waste management budget for the 2020/21 financial year.

Table 4-5: WLM capital and operational budget for 2020/21

OPERATIONAL AND CAPITAL BUDGET FOR 2020/21	
Capital budget (2020/21)	**R11 400 000.00**
Materials recovery facility (MRF)	R9 000 000.00
Public drop-off in Wolseley	R2 400 000.00
Operational budget (2020/21)	**R38 858 618.00**
Public toilets	R 1 875 756.00
Landfill site	R 6 630 245.00
Garden refuse	R12 012 034.00
Collection	R18 340 583.00

4.2.2 DETAILED BREAKDOWN OF OPERATIONAL AND CAPITAL EXPENDITURE

This operational and capital expenditure section will be updated once the information is available.

4.2.3 TARIFF STRUCTURE (2020/21)

Table 4-6 provides the waste collection tariff structure for households and businesses in the WLM. The yearly increase in cost for the services is 1.06%.

Table 4-6: The WLM waste collection tariff structure

DESCRIPTION	TARIFFS 2020/2021 EXCLUDING VAT	TARIFFS 2020/21 INCLUDING VAT	INDICATIVE TARIFFS 2021/22 INCLUDING VAT	INDICATIVE TARIFFS 2022/23 INCLUDING VAT
Refuse service tariffs (all areas in respect of residential sites)				
Service availability charge per month or part of it: Unimproved sites	R74.51	R85.69	R90.80	R96.25
Monthly tariff per number of collections. Two refuse bags (unit) per collection per week per household. • **1 collection per week (2 refuse bags or less)** • **2 collections per week (2 refuse bags or less)** • **3 collections per week (2 refuse bags or less)** • **Additional units per collection** • **Informal settlements without an account (flat rate)** • **Departmental tariffs:** o **Dennebos** o **All other.**				
Residential properties: (2 refuse bags or less)				
Valuation in Rands ≤ 100 000	R167.22	R192.30	R203.84	R216.07
Valuation > 100 000 ≤ 150 000	R180.08	R207.09	R219.52	R232.69
Valuation > 150 000 ≤ 200 000	R192.94	R221.89	R235.20	R249.32

DESCRIPTION	TARIFFS 2020/2021 EXCLUDING VAT	TARIFFS 2020/21 INCLUDING VAT	INDICATIVE TARIFFS 2021/22 INCLUDING VAT	INDICATIVE TARIFFS 2022/23 INCLUDING VAT
Valuation > 200 000 ≤ 500 000	R205.81	R236.68	R250.88	R265.93
Valuation > 500 000 ≤ 800 000	R223.82	R257.39	R272.83	R289.20

4.2.4 FREE BASIC SERVICES BUDGET

The WLM consists of 3 095 indigent households that receive free basic refuse removal services. The budgeted amount for the 2020/21 financial year for free basic refuse services (once a week collection) is R12 040.

4.3 WASTE CATEGORIES AND GENERATION RATES

4.3.1 WASTE CATEGORIES GENERATED

Table 4-7 provides the categories of waste generated in the WLM.

Table 4-7: Categories of waste generated in WLM

CATEGORIES	DESCRIPTION
General waste	Domestic general waste: • Domestic waste generated by households. This waste usually contains recyclable materials, non-recyclable materials, garden refuse and C&D.
	Business general waste: • Business general waste includes all waste produced by supermarkets and businesses that is non-hazardous. This waste usually contains high quantities of recyclable materials.
Organic waste	Garden refuse and food waste
Construction and demolition (C&D) waste	Concrete, mortar, bricks, wood, insulation materials, gypsum, etc. generated from construction and demolition sites.
Health care risk waste (HCRW)	Discarded blood and human tissue, sharps, infectious materials, expired pharmaceuticals, etc.
Hazardous waste	Used mineral oils, solvent residues, paint and resin waste, organic chemical residues, putrescible waste (slaughterhouse), sewage sludge and expired agricultural chemicals (pesticides), etc.
Other waste types	This includes agriculture, abattoirs and waste tyres.

4.3.2 DOMESTIC WASTE PROFILE

A waste characterisation and brand audit study were undertaken by the Wellington Association Against the Incinerator (WAAI) in March/April 2019.

A total of 4 103 kg of general domestic waste was sampled and categorised from Nduli, Ceres, Bella Vista, Prince Alfred Hamlet, Op-die-Berg, Tulbagh and Wolseley (WAAI, 2019). The waste was sorted into the following categories:

- Paper and cardboard
- Glass
- Plastic
- Mixed packaging
- Multilayer packaging
- Tetrapak
- Metals
- E-waste
- Household hazardous waste, pharmaceuticals, fluorescent bulbs, nappies/sanitary products, garage waste and batteries
- Organics: meat, mixed food, fruit and veg, dairy and starches
- Textiles: clothing and shoes
- Residual waste: remaining waste fraction/tailing.

The waste characterisation study illustrated that organic waste (excluding garden refuse) constituted the largest proportion (37%) of total waste (WAAI, 2019). If garden waste is included, the actual total organic waste would be 40% of the total waste. The recyclable materials (paper, glass, plastic and metals) constituted 38% of the waste stream. The results from the waste characterisation study indicate that there is a significant portion of recyclables and organic waste within the WLM waste stream that can be diverted from landfills.

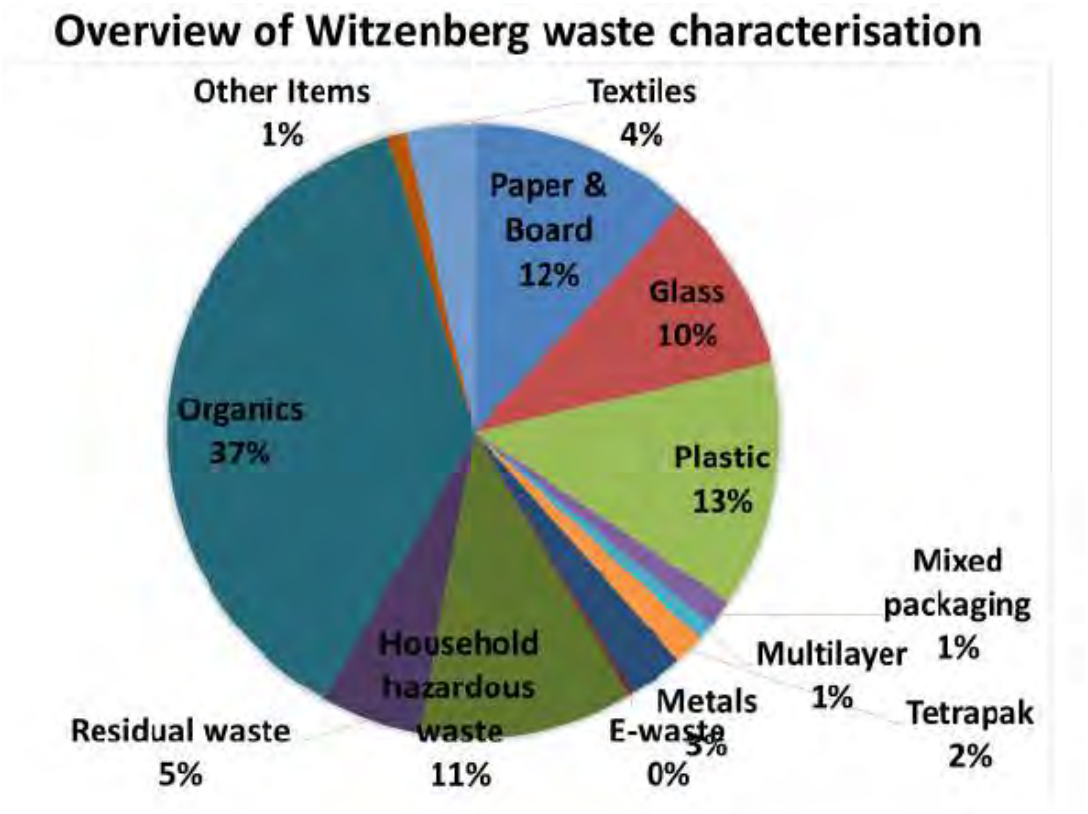

Figure 4-4: WLM waste characterisation study results (WAAI, 2019)

4.3.3 HAZARDOUS WASTE

For the purposes of this study Table 6: Schedule 3 of the National Environmental Management: Waste Amendment Act, 2014 (Act 26 of 2014): Category A: Hazardous Waste (refer to Appendix A) was used to determine the various industrial groups potentially generating hazardous waste in the study area.

Schedule 3 identifies 17 industrial groups, subdivided into 86 waste fractions. This study has determined that businesses and industries in the WLM generate hazardous waste categorised under four out of the potential 17 industrial groups listed in Schedule 3.

These are:

- Industrial Group 1: Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing, food preparation and processing.
- Industrial Group 9: Wastes from the manufacturing, formulation, supply and use (MFSU) of coatings (paints, varnishes and vitreous enamels), adhesives, sealants and printing inks.
- Industrial Group 12: Oil wastes and wastes of liquid fuels (except edible oils).
- Industrial Group 16: Wastes from human or animal health care and/or related research (except kitchen and restaurant wastes not arising from immediate health care).

Questionnaires were sent out to businesses within the WLM to indicate the type of waste generated, the disposal method and the quantities of the waste, if available. The information from the questionnaires, along with information provided in previous studies, was used provide an overview of the situation of these waste types. The information from Industrial Group 16 was received from Compass Medical Waste Services, the primary HCRW service provider in the WLM.

Table 4-8 provides the number of questionnaires sent out to the industrial groups and the number of questionnaires returned to date (04 February 2021).

Table 4-8: Number of questionnaires sent

INDUSTRIAL GROUP	SUBGROUP	NO. OF QUESTIONNAIRES SENT	NO. OF QUESTIONNAIRES RETURNED
Industrial Group 1	Food packaging factories, wineries, farms	6	0
Industrial Group 9	Paint store	2	0
Industrial Group 12	Filling stations and vehicle workshops	4	1
Industrial Group 16	Medical facilities (hospitals and clinics)	Not required – data sourced from Compass	-

The WLM consists of large agricultural areas. Hazardous waste from these areas includes fertiliser, chemical packaging and expired pesticides. The management of chemical packaging waste is an important environmental, health and safety issue. Of particular concern are the containers from pesticide or herbicide chemicals. Typically, farmers are known to burn these empty plastic chemical containers as well as empty plastic fertiliser bags in open fires on farms, which is in turn resulting in significant air pollution.

Currently (2021), household hazardous waste such as batteries and small fluorescent lights is included in the general waste, which is disposed of at the Tulbagh or Op-die-Berg landfill site. From the waste characterisation study conducted by WAAI in 2019, 11% of the waste stream consists of household hazardous waste.

Currently (2021), used oil from workshops is collected by Oilkol (Pty) Limited. Oilkol collects the used oil from clients in bulk containers and transports it to Exol Oil Refinery, where the oil is then processed and sold as Industrial Furnace Fuel (IFF). Waste oil from filling stations generally consists of oil from car leakages and used oil bottles purchased by a client. The following table provides the average oil sales per month and the disposal method for empty oil containers provided by the filling stations.

Table 4-9: Filling station waste oil

DESCRIPTION	CERES SHELL
Average oil sales per month	300 l (600 x 500 ml bottles)
Disposal method of empty oil containers	Separate bin for bottles on site
Service provider	WLM collects weekly
Grease traps service frequency	No grease traps

4.3.4 HEALTH CARE RISK WASTE

The major health care risk waste (HCRW) generators in the WLM are the hospitals and clinics. The WLM does not provide HCRW treatment and disposal services, resulting in it being the responsibility of the generator to enter a service contract with private service providers for the safe collection, transport, treatment and disposal of such waste. Compass Medical Waste Services is currently (2021) the HCRW service provider for the private and provincial WLM hospitals and clinics. Compass is licensed to transport infectious HCRW, sharps HCRW, anatomical HCRW and expired pharmaceutical HCRW. Compass reports all HCRW collected, treated and disposed of on IPWIS. Compass is permitted to treat sharps and infectious HCRW via Autoclave. This treatment process is done in closed chambers that apply heat through steam under high pressure to disinfect HCRW. All HCRW treated by Compass is shredded after being treated and sent to the Vissershok hazardous waste landfill for disposal. Anatomical HCRW and pharmaceutical HCRW are sent to a third party (BCL Medical Waste) for treatment by means of incineration. Schedule 0-4 pharmaceutical HCRW is treated and disposed of at the Vissershok

hazardous waste landfill. Schedule 5-6 pharmaceutical HCRW is incinerated (at BCL Medical Waste) and the ash is disposed of at the Vissershok hazardous waste landfill.

Table 4-10 provides the WLM's HCRW mass from November 2019 to August 2020 as provided by Compass. Compass only started collecting the HCRW in November 2019.

Table 4-10: HCRW quantities provided by Compass

TOWN	2019 TOTAL (kg) (FROM NOV 2019)	2020 TOTAL (kg) (TO AUGUST 2020)	AVERAGE MONTHLY (10 MONTHS) (kg)
Ceres	**3 405**	**20 342**	**1 187**
Ambulance - Ceres EMS Station	16	226	27
Clinic - Annie Brown	22	65	10
Clinic - CDC Ceres	704	1 170	187
Funeral - Ceres	78	48	7
Provincial Ceres Hospital	2 584	18 833	2 142
Op-die-Berg	**54**	**226**	**28**
Clinic – Op-die-Berg	54	226	28
Prince Alfred	**76**	**435**	**51**
Clinic – Prince Alfred Hamlet	76	435	51
Grand Total	**3 535**	**21 003**	**1 227**

4.3.5 COMPOSITION OF OTHER WASTE CATEGORIES

4.3.5.1.1 Agricultural waste

Agricultural waste refers to waste produced because of various agricultural operations. Some examples of agricultural waste include crop-growing, harvest residues and harvest waste (such as herbs, grains, root tubers, etc.). Waste from livestock farming such as grass, litter or feed is also considered to be an agricultural waste. In the WLM, the agricultural waste from farms is reportedly either used as animal feedstock, for home composting or it is taken to the nearest landfill site.

4.3.5.1.2 Sewage sludge

Sewage sludge is a key hazardous waste type generated from wastewater treatment works (WWTW) plants. Sewage sludge can be treated for agricultural use, or it should be disposed of at a hazardous landfill site. Table 4-11 provides the mass of the sludges generated at the WWTW plants in the WLM as well as the current disposal method.

Table 4-11: WWTW sludge quantities

NAME	EFFLUENT SOURCES	SLUDGE MASS (TONNES/MONTH) FOR 2019	DISPOSAL/CURRENT APPLICATIONS
Ceres WWTW	Residential and Industrial	70.1	Disposal to landfill site
Wolseley WWTW	Residential	8.1	Disposal in sludge dams
Tulbagh WWTW	Residential	Tank 1 = 2.2 Tank 2 = 4.5	Disposal to landfill site
ODB WWTW	Residential	1.1	Disposal to landfill site

4.3.5.1.3 Abattoirs

There are currently (2021) no abattoirs in the WLM.

4.3.5.1.4 Tyres

Waste tyres are regulated under the National Environmental Management: Waste Act, 2008 (Act 59 of 2008), the National Norms and Standards for Disposal of Waste to Landfill, 2013 (R. 636) and the Waste Tyre Regulations, 2017. The Waste Tyre Regulations, 2017 placed a ban on landfilling of waste tyres as of 29 September 2017.

The Waste Tyre Regulations (2017) outline several prohibitions as far as waste tyre management is concerned, such as:

No person may:

a) Manage waste tyres in a manner that does not comply to these regulations.
b) Recover or dispose of a waste tyre in a manner that is likely to cause pollution of the environment or harm to health and well-being.
c) Dispose of a waste tyre at a waste disposal facility.
d) Recover any financial contribution in terms of a waste tyre management plan from a subscriber to the plan, unless authorised by law.
e) Export waste tyres in whatever form unless the exportation of such waste tyres is authorised by the Minister in writing.

According to the regulations, the Waste Bureau is responsible for facilitating, supervising and controlling the management of waste tyres for the interim until a new industry waste management plan is approved in terms of Section 28 or 29 of the Act. The tyre producers must submit declarations on the quantities of tyres produced and imported to the Waste Bureau on a quarterly basis and the Bureau must establish a waste tyre forum with all affected industries to deal with the governance and operational matters pertaining to the management of waste tyres during the interim until the new industry waste tyre plan is approved[2] (CSIR, 2020).

[2] The new draft regulations on Industry Waste Plans have recently (2020) been circulated

The WLM does not accept tyres for disposal at any landfill site. In the case of tyres being disposed of at a landfill site, the WLM will stockpile the tyres and use them as barriers at parks or landfill sites. The tyre fitment shops (Supa Quick, Hi-Q, Tiger Wheel and Tyre, etc.) have a dedicated area where the used tyres are stockpiled until collected by the respective suppliers.

4.3.6 WASTE GENERATION RATES

4.3.6.1 Current waste generation rates (IPWIS)

The current generation of disposable general waste, recyclables, garden refuse and C&D was determined by analysing the landfill disposal reports submitted to the IPWIS. IPWIS data is done monthly. The Witzenberg Recovery and Op-Die-Berg Waste Disposal sites are up to date with IPWIS reporting whilst Prince Alfred Hamlet Waste Disposal Facility and Tulbagh Landfill are incomplete.

Table 4-12 provides a breakdown of the waste generation rates in the WLM from January 2018 to June 2020.

Table 4-12: Current waste generation as per IPWIS reports

The table provides a summary of the total waste generated per waste category and the fraction of the total waste that each waste category represents according to the IPWIS data.

Table 4-13: Summary table of current waste generation as per IPWIS reports

	MUNICIPAL	COMMERCIAL & INDUSTRIAL	ORGANICS	CONSTRUCTION & DEMOLITION	TOTAL
2018	5316	2411	4246	1760	13 733
2019	8540	0	3054	1255	12 849
2020 to June 2020	5588	0	1778	1138	8 504

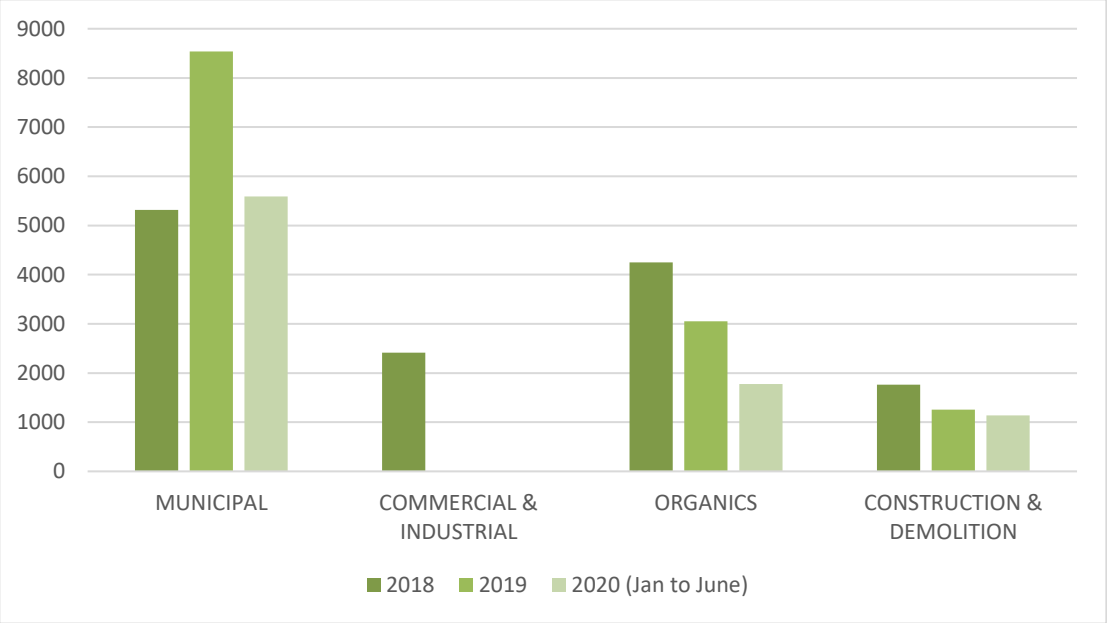

Figure 4-5: WLM waste generation

4.3.6.2 Projected future waste generation rates

The projected future waste generation rates were calculated using the projected future population figures for the WLM. The WLM 2019 population of 142 466 from the WLM SEP report (2019) was used as the base year for further extrapolation, along with the assumption that the population growth rate of 2% will remain unchanged. Table 4-14 provides the future population estimates.

Table 4-14: Future population of WLM

YEAR	POPULATION
2019	142 466
2020	145 315
2021	148 222
2022	151 186
2023	154 210
2024	157 294
2025	160 440
2026	163 649
2027	166 922

The waste generation rates per person per year (r), according to the *Guidelines for the Development of Integrated Waste Management Plans (IWMPs)*, was used along with the income distribution of the WLM. The WLM IDP (2017-2022) provides the following income household distribution percentages:

- Low-income groups: 56.6%
- Middle-income groups: 38.0%
- High-income groups: 5.4%.

The waste generation rates per person per year (r) as provided in the *Guidelines for the Development of Integrated Waste Management Plans (IWMPs)* are as follows (Department of Environmental Affairs, 2006):

- Low income = 149.65 kg/person/year = 0.14 tonnes/person/year
- Middle income = 270.1 kg/person/year = 0.27 tonnes/person/year
- High income = 470.85 kg/person/year = 0.47 tonnes/person/year.

The contribution of each income group was calculated as follows:

$$Waste\ generation_i = p\ x\ r$$

$$where\ i = income\ group$$

$$p = percentage\ of\ population\ in\ income\ group$$

$$r = waste\ generation\ rates\ per\ person\ per\ year.$$

Table 4-15 provides the future waste generation rates of the WLM based on the income distributions provided in the WLM IDP. There is a significant difference between the IPWIS data, and the estimated waste generation based on population. This could be due to inaccuracies with the IPWIS data or the fact that the calculated figures in the table below are based on a rate per person-day and do not provide for commercial and industrial.

Table 4-15: Future waste generation rates

YEAR	LOW-INCOME (TONNES)	MIDDLE-INCOME (TONNES)	HIGH-INCOME (TONNES)	TOTAL WASTE GENERATION (TONNES)
2019	11 289	14 617	3 616	29 522
2020	11 515	14 909	3 688	30 112
2021	11 745	15 208	3 762	30 714
2022	11 980	15 512	3 837	31 329
2023	12 220	15 822	3 914	31 955
2024	12 464	16 138	3 992	32 594
2025	12 713	16 461	4 072	33 246
2026	12 968	16 790	4 153	33 911
2027	13 227	17 126	4 236	34 589

4.4 SERVICE DELIVERY

Table 4-16 provides a summary of the WLM's service delivery.

Table 4-16: Service delivery summary table

SERVICE AREA	RECEPTACLE	TRUCK USED FOR COLLECTION	TYPE OF WASTE	COMMENT
Small businesses and schools	240 l and 770 l bins	REL compactor trucks	Domestic general waste and business general waste	The WLM provides waste collection services to high, medium and low-income groups, businesses and schools.
Households and informal settlements	Black bags	REL compactor trucks	Domestic general waste and business general waste	The WLM provides waste collection services to high, medium and low-income groups, businesses and schools.
Households and informal settlements	Green bags	Cage truck	Garden refuse	Green bags are used for garden refuse. The green bags are collected from the households and transported to the Prince Alfred Hamlet landfill site
Households, small businesses, shops and schools	Clear bags	Cage truck	Recyclables	The clear bags are collected from the households in Tulbagh with the cage truck and transported to the Tulbagh landfill site where an external company (Frank Boomshiar Recyclables) collects the recyclables.
Informal settlement areas and skip locations	6 m^3 Skips	Skip truck	Garden refuse, domestic general waste and C&D waste	Skips are used in informal settlements and in all towns for garden refuse and C&D waste storage. There are currently (202) 77 skips (6 m^3) placed in the WLM. The number of skips in each town is as follows: • Ceres: 17 • Bella Vista: 14 • Nduli: 4 • PA Hamlet: 12

SERVICE AREA	RECEPTACLE	TRUCK USED FOR COLLECTION	TYPE OF WASTE	COMMENT
				• Wolseley: 16 • Tulbagh: 10 • Op-die-Berg: 3 • Depots: 1.

4.4.1 FORMAL RESIDENTIAL HOUSES

The WLM provides waste collection services to high, medium and low-income groups. The WLM provides clear bags for recyclable separation in Tulbagh main town and green bags for garden refuse separation in all main towns. The WLM supplies clear and green bags on a quarterly basis to the participating households. The WLM provides weekly collection from households as per the collection schedule (Section 4.4.6.1).

The clear bags are only collected from Tulbagh town and transported to the Tulbagh landfill site where an external recycling company (Frank Boomshiar Recyclables) collects the recyclables. The green (garden refuse) bags are collected from households or skips and transported to the Prince Alfred Hamlet landfill site, where they are currently only disposed of. The disposable general household waste collected from the 770 l bins or bags is transported to the Tulbagh or Op-die-Berg landfill site for disposal.

4.4.2 INFORMAL SETTLEMENTS

At informal areas, it is impossible to access the area with a compactor, due to denseness of the area, but skips are provided where informal dwellers dispose of their waste. Black and green bags are also provided to the informal dwellers and are serviced by a LDV where accessible.

The WLM makes use of 6 m^3 skips to service the informal settlements and garden refuse sites. The general waste skips are collected with skip loader trucks and transported to the Tulbagh or Op-die-Berg landfill site. The garden refuse skips are emptied at the Prince Alfred Hamlet landfill site.

4.4.3 BUSINESS, INDUSTRIES AND SCHOOLS

The WLM provides waste collection services to businesses in all the towns. Most businesses in the WLM have waste storage areas where wheelie bins are stored and serviced by the WLM.

The WLM services the following schools

- Nduli Primary School
- Iingcinga Zethu Secondary School
- F.D. Conradie Laerskool
- Gericke Laerskool
- Koue Bokkeveld Laerskool
- Charlie Hofmeyr Hoërskool
- Ceres Primêre Skool
- Morrisdale Primêre Skool
- St. Mark's Primêre Skool
- Mooi-uitsig Primêre Skool
- Bella Vista Primêre Skool

- Boy Muller Primêre Skool
- Ceres Sekondêr
- Skurweberg Sekondêr
- Bella Vista Hoërskool
- Tulbagh Hoërskool
- Wolseley Laerskool
- Waveren Hoërskool
- W.F. Loots Primary School
- Witzenberg Primêre Skool
- Wolseley Sekondêr
- Errie Moller NGK Primêre Skool
- La Plaisante NGK Primêre Skool
- Ezelfontein NGK Primêre Skool
- Welvaart NGK Primêre Skool
- Laastedrif NGK Primêre Skool
- Boplaas NGK Primêre Skool
- De Meul NGK Primêre Skool
- Piet Hugo Gedenk Ngk Primêre Skoo
- Kromlin Primêre Skool
- Voorsorg NGK Primêre Skool
- Driefontein NGK Primêre Skool
- Achtertuin Ame Primêre Skool
- Wanganella NGK Primêre Skool
- Britsum NGK Primêre Skool
- Rietfontein NGK Primêre Skool (Worc)
- Tandfontein NGK Primêre Skool.

4.4.4 FARMS

The WLM consists of large agricultural areas, which include fruit farms, dairies, etc. The WLM does not service any farms. Most farmers reportedly make use of the nearest landfill site or own refuse dumps. The fruit processing farms in the WLM take their own general waste to the landfills and make use of and external companies (Winterberg Recycling Pty Ltd, Jc Services and Mr Paper) to collect their recyclables. Most of the fruit processing farms use the old fruits as animal feed or have an on-site composting system in place.

4.4.5 FREE BASIC REFUSE REMOVAL

The WLM consists of 3 095 indigent households that receive free basic refuse removal services.

4.4.6 WASTE COLLECTION AND TRANSPORT EFFICIENCIES

4.4.6.1 Waste collection schedule

Table 4-17 provides the waste collection schedule followed by the WLM.

Table 4-17: Waste collection schedule

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Ceres town including industries and businesses	Bella Vista residential area, Skoonvlei industrial area and N'duli residential area	Tulbagh town and all industries	Wolseley town and Op-die-Berg as well as all businesses	PA Hamlet town, Waterval residential area and Swaneberg Park as well as all businesses

4.4.6.2 Fleet

Table 4-18 provides the list of vehicles owned by the WLM for waste collection. The WLM's waste transportation cost per tonne is relatively higher than the other CWD municipalities because WLM is the largest municipality by land size, but it generates the smallest waste by tonnage in the district (WAAI, 2019).

Table 4-18: Waste collection vehicles

REGISTRATION NO.	TYPE OF VEHICLE	VEHICLE LOADING CAPACITY	YEAR MODEL
CT 10849	Skip Truck	6 m^3	2015

CT 4991	REL Compactor	19 m^3	2018

4.5 COMPLIANCE AND ENFORCEMENT

4.5.1 EXISTING WASTE MANAGEMENT INFRASTRUCTURE

The WLM has operating licences for four landfills, but one of these sites has been completely vandalised and is currently (2021) not operational. Op-die-Berg has its own communal landfill. The remainder of the WLM's waste is disposed of at the Tulbagh landfill and garden waste is disposed of at the Prince Alfred Hamlet site.

None of these sites are equipped with a weighbridge, but a weigh pad has recently been installed at the Tulbagh landfill by the DEA.

The WLM has the following landfill sites:

- Ceres landfill site (closed)
- Prince Alfred Hamlet landfill site (operational)
- Op-die-Berg landfill site (operational)
- Tulbagh landfill site (operational)
- Wolseley landfill site (non-operational).

4.5.1.1 Ceres landfill site (closed)

The Ceres landfill site was issued with a closure permit on 08 July 2003. The landfill site is considered legally closed and the waste body is capped. The classification of the landfill site is G:M:B+.

Figure 4-6: Ceres landfill site (Google Earth Image 2020)

Table 4-19: Ceres landfill summary

Overall challenges on-site	N/A – Landfill closed
Budget: Rehabilitation/ Operational/Development of new cells	N/A – Landfill closed

4.5.1.2 Prince Alfred Hamlet landfill site (operational)

The Prince Alfred Hamlet (PAH) landfill site was issued with a variation licence for operation on 12 July 2018 in terms of NEM:WA. The landfill site is classified as G:C:B-. The WLM only disposes garden refuse at the landfill site. The WLM currently (2021) distributes green bags for household garden refuse. All the green bags are collected by the WLM and transported to the PAH landfill site for disposal. The WLM has a chipper on site and plans to start on-site composting to sell to the farmers and community.

According to the rehabilitation and closure provision report, the PAH landfill site will reach its capacity by 2025, if the deposition rates remain unchanged (JPCE, 2020).

Waste Information Management	N/A
Overall compliance status of the facility	N/A
Overall challenges on-site	N/A
Budget: Rehabilitation/ Operational/Development of new cells	N/A

4.5.1.3 Op-die-Berg landfill site (operational)

The Op-die-Berg landfill site was issued with a variation licence on 22 August 2018 in terms of NEM:WA. The landfill site is classified as G:C:B+. The Op-die-Berg landfill site is used to dispose of all general waste. According to the rehabilitation and closure provision report, the Op-die-Berg landfill site will reach its capacity by 2021, assuming that the deposition rates remain unchanged (JPCE, 2020).

Figure 4-9: Op-die-Berg landfill site (Google Earth Image 2020)

Figure 4-10: Op-die-Berg landfill site

Table 4-21: Op-die-berg landfill summary

LANDFILL COMPLIANCE AND ENFORCEMENT SUMMARY	
Licence/permit no.	19/2/5/4/B5/8/WL0125/18
Location	33° 3'51.45"S 19°19'57.05"E
Classification	G:C:B+
Remaining airspace	Reach its capacity by 2021, assuming that the deposition rates remain unchanged (JPCE, 2020)
General management of the site (windblown litter, stormwater, access control, compaction, water quality monitoring, etc.)	During the time of the site visits, the landfill was well managed. The landfill's access control consists of lockable gates, fencing and a gate controller.
Informal salvaging	None
Internal audits (frequency, level of compliance, identification of main issues)	Internal audits were not conducted in 2020 and 2021.
External audits (frequency, level of compliance, identification of main issues)	External audits were not conducted in 2020 and 2021.
Are there any illegal activities taking place?	None
Waste Management control officer	Johnny Jacobs
Complaints register on site	TBC
Estimated size of the LFS	N/A
Buffer	No development within the buffer.
Access to facility	Access roads are in good condition.
Access control	Gate is locked and has security only when the site is open. The site is fenced.
Signage	Proper signage on site.
Persons on-site	No full-time staff on site.

LANDFILL COMPLIANCE AND ENFORCEMENT SUMMARY	
Amenities on-site for personnel	No sanitation facilities on site.
Equipment on site	No equipment on site. TLB brought in only when trenches need to be closed.
Description of waste management	Only garden waste and builder's rubble disposed on site.
Cover material	Daily compaction does not take place. The quantity of exposed waste in the trenches are minimal and it is covered when the trench is full, as per ordinary trench operational requirements.
Recycling Activities	N/A
Operational Hours	N/A
Estimated remaining lifespan of the site	N/A
Monitoring ito conditions	N/A
Waste Information Management	IPWIS reports are submitted monthly.
Overall compliance status of the facility	86.5% (Externa audit – 03/05/2018)
Overall challenges on-site	N/A
Budget: Rehabilitation/ Operational/Development of new cells	N/A

4.5.1.4 Tulbagh landfill site (operational)

The Tulbagh landfill site received an operational permit on 31 July 1998. It was amended on 15 July 2016 for further operations in terms of NEM:WA. The landfill site is classified as G:S:B+. The variation licence issued by DEA&DP during 2016 was appealed by a landowner and the court made a ruling that the WLM is only allowed to dispose of waste on the current footprint up to 8 m above National Ground Level. The WLM is currently (2021) busy with the final stages to allow DEA&DP to make a conclusion on the variation of the WLM. The Tulbagh landfill site is used to dispose of general waste.

Currently (2021), there are informal recycling activities on site (Figure 4-12). The recyclables are collected from the landfill site by an external company called Frank Boomshiar Recyclable. The mass of recyclables collected is reported to the WLM and recorded on IPWIS.

Figure 4-11: Tulbagh landfill site (Google Earth Image 2020)

Figure 4-12: Informal recycling on site

Table 4-22: Tulbagh landfill summary

LANDFILL COMPLIANCE AND ENFORCEMENT SUMMARY	
Licence/permit no.	12/9/11/L127/9
Location	33°16'30.11"S 19° 7'57.19"E
Classification	G:C:B+
Remaining airspace	TBC

LANDFILL COMPLIANCE AND ENFORCEMENT SUMMARY	
General management of the site (windblown litter, stormwater, access control, compaction, water quality monitoring, etc.)	During the time of the site visits, the landfill was well managed. The landfill's access control consists of lockable gates, fencing and a gate controller. The recycling on site is done under supervision.
Informal salvaging	None. Recycling on site is supervised.
Internal audits (frequency, level of compliance, identification of main issues)	Internal audits were not conducted in 2020 and 2021.
External audits (frequency, level of compliance, identification of main issues)	External audit was conducted on 30/04/2021 by Zutari.
Organic waste diversion strategy in place at the facility	None
Are there any illegal activities taking place?	None
Waste management control officer	Johnny Jacobs
Complaints register on site	A complaints register is kept on site. Complaints are addressed by the WMO.
Estimated size of the LFS	128 678 m^2
Buffer	No development within the buffer zone.
Access to facility	Access road to the site was in good condition.
Access control	Gate was manned and the site was fenced.
Signage	A notice board in three languages was present.
Persons on-site	There are permanent staff on site.
Amenities on-site for personnel	Adequate amenities available on site.
Equipment on site	Plant and equipment on site and in working condition.
Description of waste management	Only general waste disposed at site.
Cover material	Amount of cover material is insufficient.
Recycling Activities	Recycling occurring on site.
Operational Hours	N/A
Estimated remaining lifespan of the site	N/A
Monitoring ito conditions	Groundwater and leachate monitoring occurring on site.
Waste Information Management	Reporting to IPWIS.
Overall compliance status of the facility	84.37% (External audit – 30/04/2021)

LANDFILL COMPLIANCE AND ENFORCEMENT SUMMARY	
Overall challenges on-site	Wind-blown litter in surrounding areas is an issue.
Budget: Rehabilitation/ Operational/Development of new cells	N/A

4.5.1.5 Wolseley landfill site (non-operational)

The Wolseley landfill still has an operating licence issued on 28 August 2018, but due to vandalism the site has been effectively destroyed by the adjacent community. The landfill site is classified as G:S:B+. During the time of the site visit, it was impossible to access the site due to informal settlement houses blocking the road to the landfill site.

Figure 4-14: Wolseley landfill site (Google Earth Image 2020)

Table 4-23: Wolseley landfill site

LANDFILL COMPLIANCE AND ENFORCEMENT SUMMARY	
Licence/permit no.	19/2/5/4/B5/16/WL0037/13
Location	33°24'52.35"S 19°11'04.71"E
Classification	G:S:B+
Remaining airspace	TBC

LANDFILL COMPLIANCE AND ENFORCEMENT SUMMARY	
General management of the site (windblown litter, stormwater, access control, compaction, water quality monitoring, etc.)	During the time of the site visit, it was impossible to access the site due to informal settlement houses blocking the road to the landfill site.
Informal salvaging	None – site inaccessible
Internal audits (frequency, level of compliance, identification of main issues)	Internal audits were not conducted in 2020 and 2021.
External audits (frequency, level of compliance, identification of main issues)	External audits were not conducted in 2020 and 2021.
Organic waste diversion strategy in place at the facility	None – site inaccessible
Are there any illegal activities taking place?	None – site inaccessible
Waste management control officer	Johnny Jacobs
Complaints register on site	None – site inaccessible
Estimated size of the LFS	N/A
Buffer	Low-cost housing within buffer
Access to facility	Site inaccessible
Access control	Site inaccessible
Signage	N/A

Amenities on-site for personnel	N/A
Equipment on site	N/A
Description of waste management	N/A
Cover material	N/A
Recycling Activities	N/A
Operational Hours	N/A
Estimated remaining lifespan of the site	N/A
Monitoring ito conditions	N/A
Waste Information Management	N/A
Overall compliance status of the facility	N/A
Overall challenges on-site	N/A
Budget: Rehabilitation/ Operational/Development of new cells	N/A

4.5.2 PROPOSED WASTE MANAGEMENT INFRASTRUCTURE

A study conducted by Aurecon in 2020 identified the following minimum waste management civil infrastructure requirements to improve the waste management services in the WLM:

- Public waste drop-off facilities where the public can drop off typical non-collected wastes (builders' rubble, garden waste, general recyclables), located in each of the towns of the WLM.
- A combined dirty material recovery facility (MRF) and transfer station, centrally located in the town of Ceres, where all the collected waste from the greater WLM area will be reduced, consolidated and transported to either the regional landfill site in Worcester (once established) or the Tulbagh landfill site.

The study conducted by Aurecon focused on the design of the proposed MRF and transfer station in Ceres, as well as the first drop-off facility in Wolseley. The proposed MRF and transfer station will be located adjacent to the existing Ceres Wastewater Treatment Works (WWTW).

Figure 4-15: Identified location of proposed MRF and transfer station (Aurecon, 2020)

Figure 4-16 illustrates the conceptual layout of the proposed MRF. The MRF will be equipped with a weighbridge to weigh all incoming waste loads, as well as all recyclable material removed from the MRF.

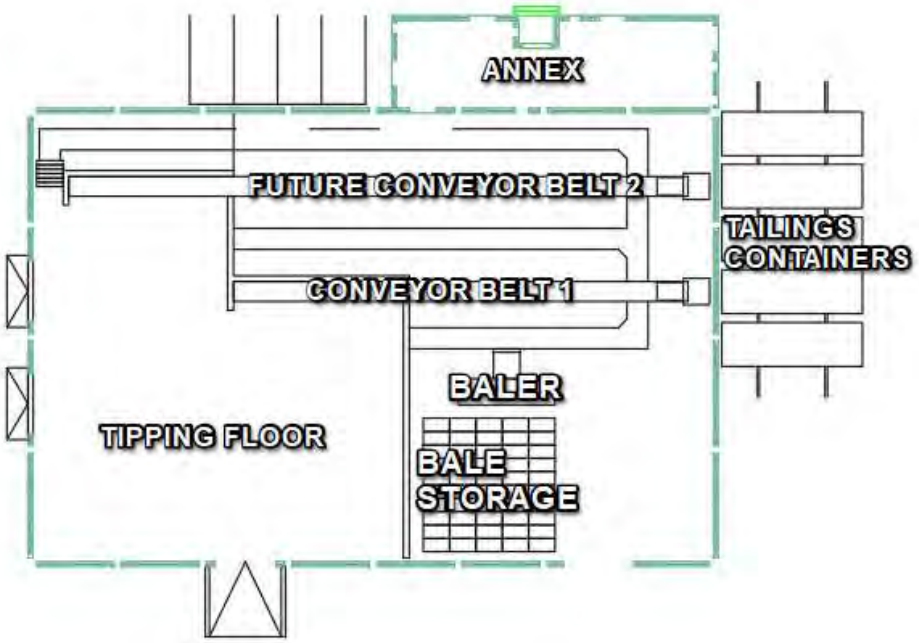

Figure 4-16: Proposed conceptual layout (Aurecon, 2020)

The project programme provided by Aurecon indicated that the MRF construction will commence in January 2021 and will be completed in February 2023. Along with the development of the MRF, the WLM will also establish the first public drop-off facility in Wolseley during the 2020/21 financial year. The estimated time of completion of the Wolseley drop-off is the end of March 2021.

4.5.3 ILLEGAL DUMPING AND CLEAN-UP EFFORTS

The WLM outsources illegal dumping clean-ups. The outsourced service budget is R462 000. There are no specific illegal dumping areas in the WLM. Illegal dumping occurs at random locations. There is currently (2021) no contaminated land that requires clean-up.

Within the WLM, the illegal dumping hotspots are in Nduli (Ceres), Pine Valley (Wolseley) and Chris Hani (Tulbagh).

4.6 WASTE AVOIDANCE, REDUCTION AND RECYCLING

4.6.1 WASTE MINIMISATION INITIATIVES

The WLM gave consent to WAAI to undertake a Zero Waste to Landfill Pilot Project. An area in Tulbagh (100 households) was selected by the WLM for the pilot project. The main objectives of the Zero Waste to Landfill Pilot Project were as follows (WAAI, 2019):

1) To prove that separation at source, especially of organic waste, is feasible and practical to implement.
2) To prove that separation at source will assist with the following:
   a) To overcome the municipality's landfill crises.

b) To improve the rate and quality of recyclables.
c) To promote the waste hierarchy in terms of the Waste Act.
d) To create job opportunities through waste beneficiation and related activities.
e) To reduce overall waste management costs.

3) To develop a sustainable model that can be replicated and implemented throughout WLM.

The pilot project was conducted in an area in Tulbagh town from 02 October to 04 December 2019. Approximately 100 households were chosen to participate in the pilot project. Community and household meetings were arranged through the WLM on 25 September 2019 at the Ceres Cultural Museum and on 09 October 2019 at the Tulbagh Town Hall to explain the purpose of the Zero Waste Project (WAAI, 2019). All households that were selected to participate in the pilot area were provided with pamphlets that explained the reasons for the Zero Waste to Landfill Pilot Project and how to separate their waste according to the bags provided to them free-of-charge (WAAI, 2019).

A four-bag separation at source model was implemented in the pilot project. Each household was provided with the following bags for separation at source:

- Compostable bags and caddy container for organic waste
- Green bags for garden waste
- Clear bags for recyclables e.g. plastic, glass, paper
- Black bags for other/residual waste.

The Zero Waste to Landfill model proposes that the organic waste, recyclable waste and residual waste be collected separately and transported separately to avoid cross-contamination and to improve recycling efficiency, quality and quantity – and to divert waste from landfill.

The results from the pilot project indicate an increase in household participation, an increase in recyclables, and a reduction in general household waste destined for disposal. The Zero Waste to Landfill Pilot Project has proven that separation at source, especially source separation of organic waste, is practical and feasible in the WLM. The successful separation at source proves that at least 85% of what is currently regarded as waste can be diverted away from the landfill.

After the Zero Waste pilot project, the WLM has decided to roll out separation at source in all towns. The WLM is currently in the planning phase for the implementation of separation at source in all towns.

4.6.2 PRIVATE SECTOR INITIATIVES

Spar has a recycling programme where all plastic and cardboard are bailed and transported back to the Spar warehouse, thus ensuring that the plastic and cardboard packaging materials from the warehouse never enter the waste stream. Other packaging factories in the WLM make use of Winterberge Recycling and War Against Waste to collect plastics and cardboard from the factories. Winterberge

Recycling and War Against Waste have a contract with the WLM to report the recyclable tonnages to the municipality. The Witzenberg Waste Forum ensure that all material quantities are captured and reflected on IPWIS.

4.6.3 WASTE DIVERSION PERCENTAGES

The table below provides the percentage of waste diverted from landfills in 2018, 2019 and 2020 according to the IPWIS data received. The diverted waste percentage only includes recyclables, since the garden refuse is still being disposed of at the Prince Alfred hamlet landfill site and composting operations have not yet started. No C&D waste or organic waste has been diverted in the last three years. The 2020 percentages will be updated once available.

Table 4-24: Percentage waste diverted

	MUNICIPAL			COMMERCIAL & INDUSTRIAL			ORGANICS			CONSTRUCTION & DEMOLITION		
	Generated	Diverted	%	Generated	Diverted	%	Generated	Diverted	%	Generated	Diverted	%
2018	5316	0	0%	2411	2391	99%	4246	0	0%	1760	0	0%
2019	8540	2453	29%	0	0	0	3054	0	0%	1255	0	0%
Jan 2020 to July 2020	5588	1102	20%	0	0	0	1778	0	0%	1138	0	0%

4.7 OPERATIONAL STRUCTURE AND STAFF CAPACITY

The following organograms provide the filled and vacant positions in the WLM waste management department. The current (2020) Waste Management Officer for the WLM is Mr Johnny Jacobs.

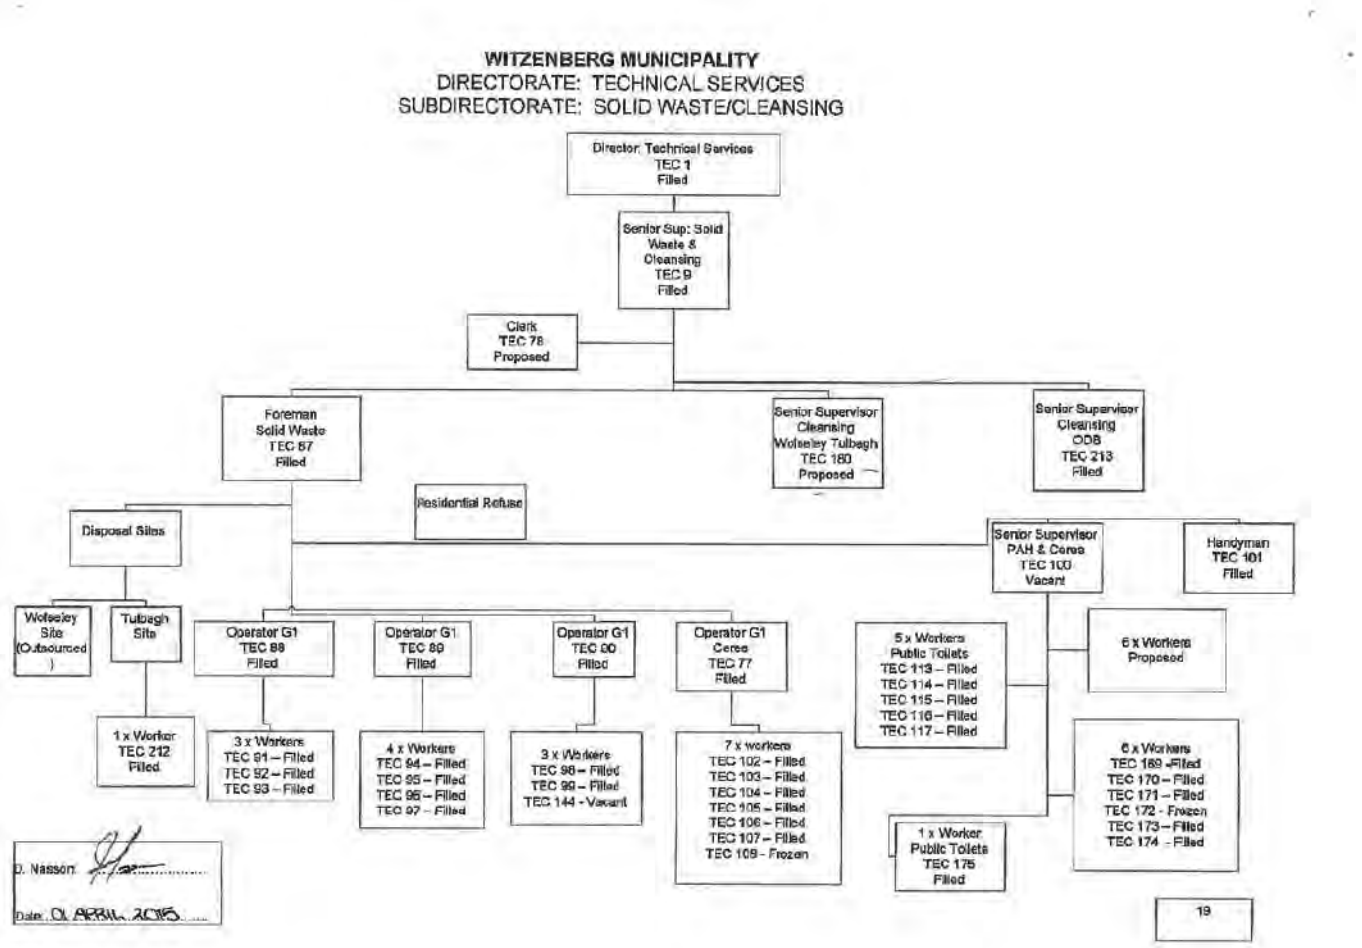

Figure 4-17: Solid waste/cleansing organogram

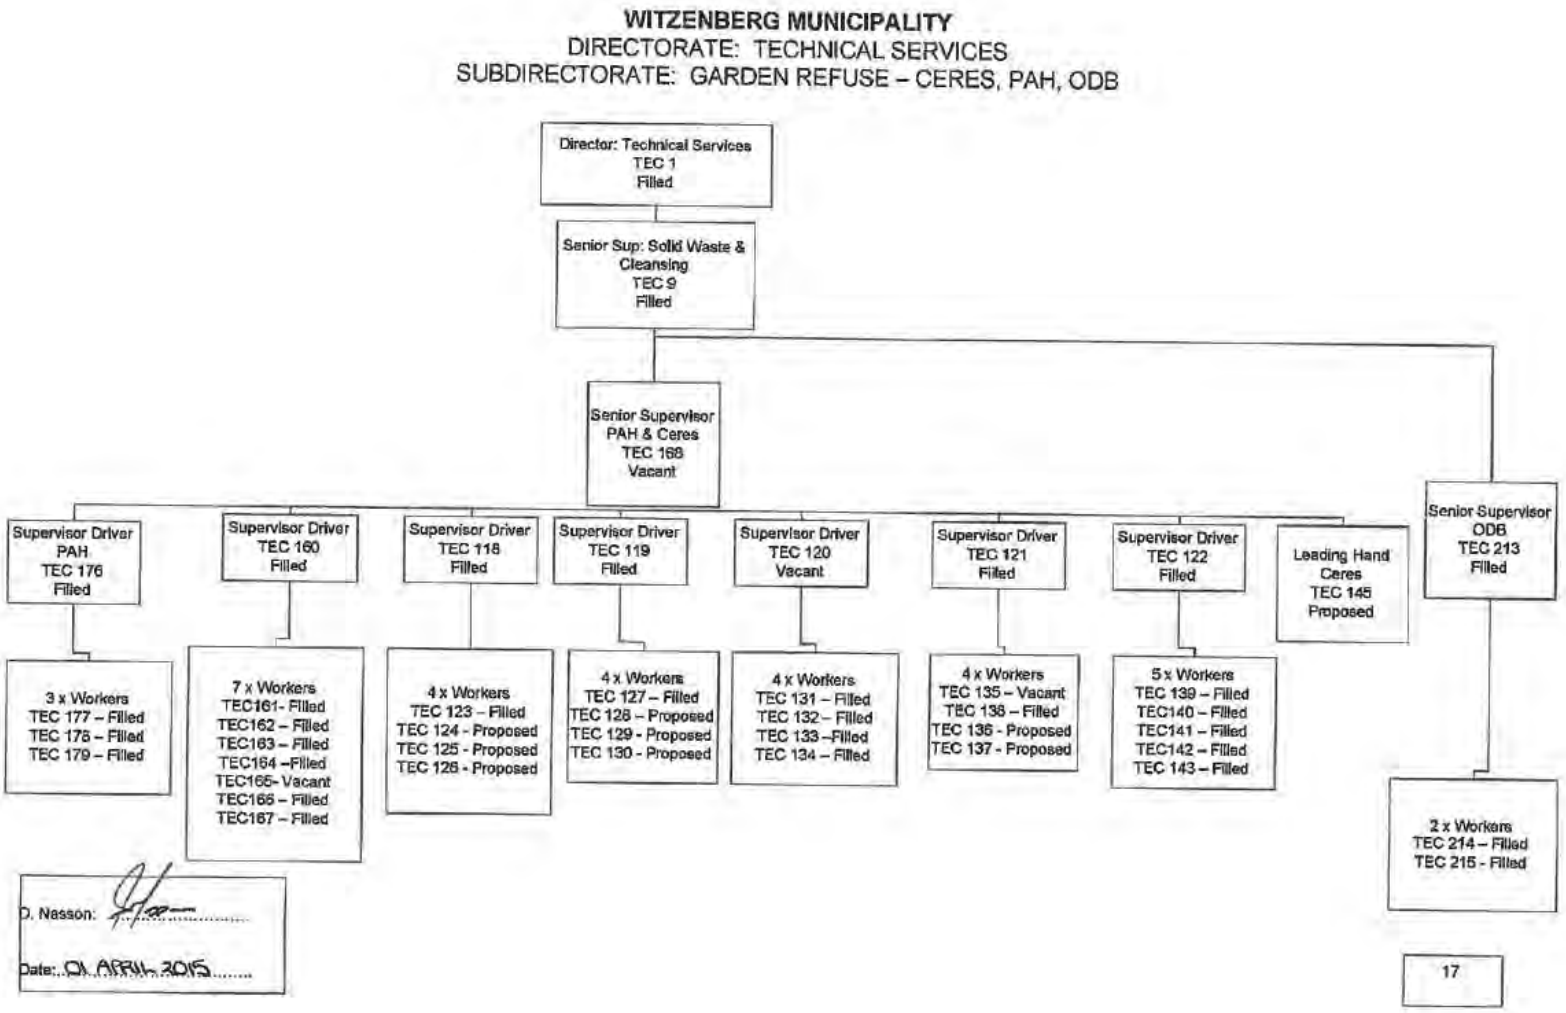

Figure 4-18: Garden refuse organogram – Ceres, Prince Alfred Hamlet and Op-die-Berg

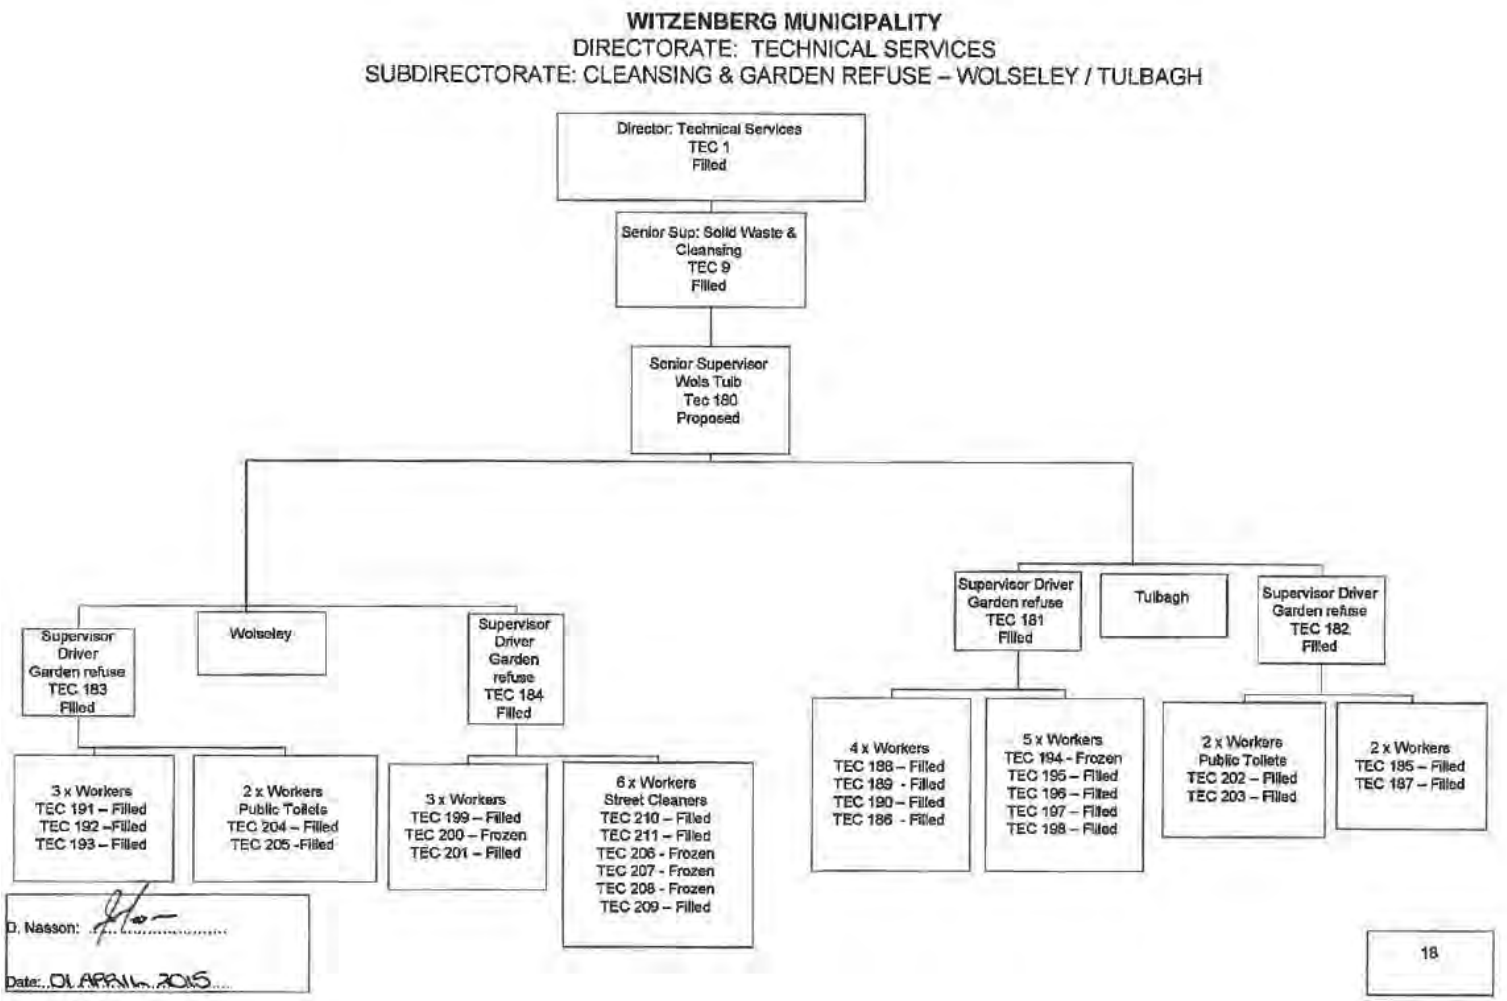

Figure 4-19: Cleaning and garden refuse organogram - Wolseley/Tulbagh

4.8 WASTE AWARENESS AND EDUCATION

The Belgium VVSG Program appointed 25 waste ambassadors for environmental education and waste awareness campaigns. These waste ambassadors are employed for door-to-door waste campaigns and clean-up projects, and to conduct visits to schools, clinics and residents to raise awareness. The following are achievements reached by the waste ambassadors:

- Educating the households and residents on waste minimisation and the collection of household refuse.
- Illustrating useful waste minimisation tips and refuse removal guide.
- Distributing wheelie bins applications to businesses.
- Creating awareness on correct waste disposal in strategic skips in communities.
- Completing a Waste Characterisation study led by and Witzenberg Municipality.
- Bringing the BATHO PELE principles to the communities via exhibitions.

The following is a list of events that was facilitated by the waste ambassadors:

- **Thursday, 30 January 2020** Witzenberg Municipality Waste Ambassadors held a clean-up in Bella Vista, Ward 3. The Municipal Waste Ambassadors cleaned up an open space between **Duiker Avenue and Burg Street.** Waste was thrown into refuse bags and then collected by Municipal truck. Green Waste was thrown in a Green Skip for removal.
- **Thursday, 27 February 2020** Witzenberg Municipality Waste Ambassadors in partnership with Association for People with Disability (APD) launched a clean-up and awareness campaign in the Ceres area (Rooikamp). The day started with a clean-up where Municipal Waste Ambassadors took the lead and cleaned up the Rooikamp area with disabled people. Youth Environmental Coordinator: Juandrey Saunders and Solid Waste Senior Supervisor: Mario February welcomed and thank the group for their contribution to the environment. Witzenberg Municipality also supplied hand gloves and refuse bags for the collection of waste the was picked up. Later the day, APD Chairperson: Mr Adams thanked Witzenberg Municipality for the kind gesture towards the disabled people and refreshments was handed out to end the day.
- **Wednesday, 11 March 2020** Witzenberg Municipality Waste Ambassadors held a clean-up in **Tulbagh (Chris Hani).** The Municipal Waste Ambassadors cleaned up an open space nearby the river**.** Waste was thrown into refuse bags and then collected by Municipal truck. Green Waste was thrown in a Green Skip for removal.
- **Tuesday, 24 March 2020,** the week of the **National Lockdown for COVID-19:** Witzenberg Municipality Waste Ambassadors held a clean-up in Bella Vista, Ward 3. The Municipal Waste Ambassadors cleaned up an open space

across the Community Hall**.** Waste was thrown into refuse bags and then collected by municipal truck. Green Waste was thrown in a Green Skip for removal.

- **Tuesday, 4 February 2020:** Municipal Waste Ambassadors raised awareness on Solid Waste Management by disseminating information to libraries and community members in the Witzenberg area. Posters and flyers were handed out. They also continued handing out recycling and compostable bags to the residents in Tulbagh where the Zero Waste to Landfill Pilot Study was undertaken in 2019.
- **Monday, 22 July 2020:** during Level 3 of the COVID-19 pandemic, the Municipal Waste Ambassadors was brave enough to enable the continuation of distribution recycling bags, compostable bags and pamphlets on the Zero Waste to Landfill, Pilot Study to Tulbagh residents that participate in the project.
- During **National Recycling Month in September 2020**, the Municipal Waste Ambassadors and temporary workers launched an awareness campaign on recycling in partnership with a local recycler on the following dates: 11 September 2020 in Prince Alfred Hamlet (Ward 4); 18 September 2020 in Ceres (Wards 2 & 5) and on 19 September 2020 in Bella Vista (Wards 3 & 4). Posters were handed out to businesses, flyers were distributed to residents, and recycling bags were given to those who wanted to do recycling.

The WLM aims to achieve the following through the distribution of educational material and awareness campaigns:

- Raise waste awareness.
- Provide a basic understanding of the environment and its associated problems.
- Attempt to change residents' attitudes towards waste.
- Help social groups and individuals acquire the skills for identifying and solving environmental problems.
- Provide social groups, individuals and ward councillors with an opportunity to be actively involved at all levels in working towards resolution of environmental problems.
- Modify environmental education and awareness towards the development of sustainable economies.
- Facilitate cooperative governance amongst respective units of the municipality.
- Encourage and demonstrate the need to pay for services inclusive of waste management.
- Discourage illegal dumping of waste.
- Promote waste diversion from landfills.

The following poster is an example of the educational material placed at schools, clinics and industries within the towns to raise recycling awareness.

Figure 4-20: Waste awareness poster

5 GAP AND NEEDS ANALYSIS

Based on the findings of the status quo investigation, several gaps and needs have been identified.

Gaps and needs related to waste management in the WLM have been identified in terms of each of the following waste management activities:

- Waste service delivery
- Waste minimisation, recycling and re-use initiatives
- Organic waste management
- Hazardous waste management
- Waste management facilities
- Waste management collection fleet, plant and equipment
- Waste management information
- Waste education and public awareness
- Human and financial resource management
- Strategic planning.

5.1 WASTE SERVICE DELIVERY

Table 5-1 provides the gaps identified in the waste management services with the resulting needs.

Table 5-1: Waste service delivery gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
WLM does not provide waste collection services to farms	The WLM is providing good waste management collection services to most households. The WLM needs to investigate the disposal methods and determine the feasibility of providing creative collection services at farms.
Illegal dumping hotspots	Identify illegal dumping hotspots

5.2 WASTE MINIMISATION, RECYCLING AND RE-USE INITIATIVES

Table 5-2 provides the gaps identified in terms of waste minimisation, recycling and reuse with the resulting needs.

Table 5-2: Waste minimisation, recycling and re-use initiatives gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
Separation at source only in Tulbagh town	Roll out separation at source in all towns
Only recyclable collection in Tulbagh town	Update collection plan to include recyclable collection in all towns
Low rates on recyclable material diversion from landfills	Improve rates on recyclable material diversion from landfills

GAP IDENTIFIED	RESULTING NEED
No swop-shop initiatives	Implement swop-shops in low-income areas
Lack of minimisation and diversion of C&D waste	Create a minimisation and diversion plan for C&D waste

5.3 ORGANIC WASTE MANAGEMENT

Table 5-3 provides the gaps identified in terms of organic waste management with the resulting needs.

Table 5-3: Organic waste management gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
Garden refuse collected from households is disposed of at the PAH landfill site	Divert garden refuse from landfill sites by starting with composting on site
Low garden refuse and organic waste diversion rates from landfills	Improve organic waste diversion rates
Organic waste diversion plan	Draft organic waste diversion plan
Lack of knowledge on home composting	Conduct home composting awareness and education campaigns
No composting facility	Establish a composting facility at the PAH landfill site
Lack of separation of organic waste at source	Focus on separation of this material at source will result in greater beneficiation options as well as cleaner recyclables.

5.4 HAZARDOUS WASTE MANAGEMENT

Although local municipalities are not legally responsible for the management and safe disposal of hazardous waste[3] generated by major businesses and industries within their area of jurisdiction, they do need to ensure that no hazardous waste is disposed of on municipal landfills that are not licensed, developed and operated to the required standards for disposal and hazardous waste. Table 5-4 provides the gaps identified in terms of hazardous waste management with the associated needs.

[3] In terms of the duty-of-care principle as required in NEMWA, generators of hazardous waste are responsible for the legally compliant management, treatment and disposal of such hazardous waste generated.

Table 5-4: Hazardous waste gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
There are no containers for safe disposal and storage for household hazardous waste at the drop-off/transfer station facilities	Provide service for household hazardous waste to be collected and disposed at legally compliant hazardous waste disposal facilities.
Lack of household hazardous waste awareness	Raise awareness regarding the separation at source and environmentally sound management of household hazardous waste.
Lack of hazardous waste information and generation rates from industries in WLM	Improve hazardous waste information system for the WLM to have accurate data on hazardous waste generation rates – allowing for effective monitoring and control over the WLM's industrial hazardous waste generation and management.
Sewage sludge disposed at landfill sites	Sewage sludge should be transported to a hazardous waste landfill site or used in an agricultural environment

5.5 WASTE MANAGEMENT FACILITIES

Table 5-5 provides the gaps identified in terms of the waste management facilities with the resulting needs.

Table 5-5: Waste management facilities gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
Wolseley landfill site is non-operational due to vandalization	Prevent vandalization and rehabilitate the landfill site
Lack of drop-off facilities	Establish drop-off facilities in all towns
Disposal of garden refuse at the PAH landfill site	Divert organic waste from landfills
The landfill containment barriers of all sites do not comply with R. 636 (National norms and standards for disposal of waste to landfill)	Ensure compliance with R. 636 on all new landfill cell developments.

5.6 WASTE MANAGEMENT COLLECTION FLEET, PLANT AND EQUIPMENT

Table 5-6 provides the gaps identified in terms of the waste management collection fleet, plant and equipment with the resulting needs.

Table 5-6: Waste management collection fleet and equipment gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
There are no household hazardous waste containers where residents can drop-off their hazardous waste	Provide household hazardous waste containers and ensure that such waste is managed, transported and disposed of in a legally compliant manner.
There are no used oil containers at drop off facilities	Provide used oil collection containers and have it serviced by the ROSE Foundation.
Lack of recyclable collection trucks in collection fleet	Budget and purchase additional trucks for recyclable collection
No chipping being done at PAH landfill site	Start chipping for on-site composting at PAH landfill site
One garden refuse truck is older than 20 years	Evaluate plant to determine the reliability, cost effectiveness and efficiency and replace where the service and maintenance costs exceeds the monthly instalments on new replacement plant
Expensive maintenance of older fleet	Some of the trucks are more than 8 years old, therefore the municipality must put a replacement policy in place to minimise the maintenance budget for these old vehicles.

5.7 WASTE MANAGEMENT INFORMATION

To effectively plan for waste management services, knowledge of waste generation quantities and types is required. Table 5-7 provides the gaps identified in terms of the availability of waste management information with the resulting needs.

Table 5-7: Waste management information gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
Limited information available regarding industrial general and hazardous waste categories and generation rates	Source information regarding industrial, general and hazardous waste categories and generation rates.
Lack of major waste generator information	Ensure that major waste generators are identified and information on waste generation is sourced
Limited reporting of waste quantities by industries	The municipality must put a system in place through their municipal by-law compelling the reporting of waste by industrial and commercial entities.

5.8 WASTE EDUCATION AND PUBLIC AWARENESS

Table 5-8 provides the gaps identified in terms of the waste education and initiatives with the resulting needs.

Table 5-8: Waste education and initiatives gaps and needs

GAP IDENTIFIED	RESULTING NEED
Limited information on awareness regarding industrial, general and hazardous waste generation	Determine awareness around industrial general and hazardous waste management and disposal.
Lack of general and domestic hazardous waste management knowledge at households – including 'reduce, reuse, and recycle.'	Improve knowledge of general and domestic hazardous waste management at household level – including 'reduce, reuse, and recycle.'
Lack of recycling information on recycling collection systems and drop-off facilities in and around the towns	Improve availability of information on recycling collection systems and drop-off facilities.
Lack of information on website	Basic information on waste minimisation could be provided here for easy access.

5.9 STAFF AND FINANCIAL RESOURCE MANAGEMENT

Table 5-9 provides the gaps identified in terms of the staff and financial resource management with the associated need to effectively address the gap.

Table 5-9: Staff and financial management gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
Vacancies in staff structure	Review staff structure needs and requirements and fill vacancies where required.
The municipality must ensure that there is sufficient provision in the operational and capital budget for upcoming projects	Ensure sufficient financial resources.

5.10 STRATEGIC PLANNING

Future planning is essential in ensuring that a waste management service can meet the changing requirements of a municipality and comply with changing legislation and best practice guidelines. Table 5-10 provides the gaps identified in terms of the future waste management planning with the associated need to effectively address the gap.

Table 5-10: Future planning gaps and needs identified

GAP IDENTIFIED	RESULTING NEED
Development of IWMPs at required 5-year intervals	Ensure for budgeting to review and update the IWMP at required 5-year intervals.

GAP IDENTIFIED	RESULTING NEED
No feasibility study has been done to determine and evaluate the financial and operational effect of using the new regional landfill site to dispose of waste in the future.	Undertake a feasibility study to determine and evaluate the financial and operational effect of using the new regional landfill site to dispose of waste in the future.
Op-die-Berg landfill rehabilitation and closure in 2021	Plan and budget for closure of Op-die-Berg landfill site in 2021

6 GOALS, OBJECTIVES AND TARGETS ASSESSMENT

The goals and objectives of an IWMP are used to address potential shortcomings or necessary improvements identified during the gaps and needs analysis. Goals are long-term aspirations for waste management, while objectives are more focused, measurable targets which, if implemented correctly, will allow the municipality to reach the identified goals.

The *Guidelines for the Development of Integrated Waste Management Plans* by the Western Cape (WC) DEA&DP states the following in terms of developing strategic goals, objectives and targets:

- Strategic goals must be set based on relevant waste legislation, regulations and policies, and should be guided by the waste management hierarchy.
- The setting of goals, objectives and targets must also take into consideration the municipal response to the goals and targets set in the NWMS.
- The strategic goals must include setting targets for waste management such as collection, recycling, recovery and disposal.

The DEA&DP Guidelines describe goals, objectives and targets as follows:

- **Goal:** Long-term desired result that can be accomplished through various projects. Goals are not necessarily measurable but instead present a long-term desired end state for the municipality. The goals will be aligned to the NWMS and the Western Cape IWMP.
- **Objectives:** Measurable outputs which, once completed, will contribute to the accomplishment of a goal. Objectives will have deadlines to drive their implementation.
- **Targets:** Smaller projects which, when combined, will fulfil the requirement of an objective. The targets will also have deadlines for implementation.

The NWMS 2020 strategic goals that will be used to align the IWMP are as follows:

- Waste Minimisation – The aim is to prevent waste and where waste cannot be prevented, 40% should be diverted from landfill within five years through reuse, recycling, recovery and alternative waste treatment: 25% of waste reduction in waste generation; and 20% waste reused in the economic value chain.
- Effective and Sustainable Waste Services – This would see all South Africans living in clean communities with waste services that are well managed and financially sustainable.
- Waste Awareness and Compliance – The aim is to create a culture of compliance with zero tolerance of pollution, litter and illegal dumping.

The Western Cape outlined four goals in the 2nd Generation IWMP (2017-2022). The LLM's goals and targets will be developed in line with the following four goals from the Western Cape IWMP.

- Goal 1: Strengthened education, capacity and advocacy towards integrated waste management.
- Goal 2: Improved integrated waste management planning and implementation for efficient waste services and infrastructure.
- Goal 3: Effective and efficient utilisation of resources.
- Goal 4: Improved compliance with environmental regulatory framework.

6.1 GOALS IDENTIFIED FOR WLM

To align the WLM's goals with those of the Western Cape IWMP (2017-2022) and the NWMS (2020), the following goals were formulated:

- Goal 1: Effective solid waste service delivery.
- Goal 2: Promote waste minimisation and recycling.
- Goal 3: Ensure safe and integrated management of hazardous waste.
- Goal 4: Improve waste education and public awareness.
- Goal 5: Ensure sound budgeting for integrated waste management.
- Goal 6: Improve regulatory compliance.
- Goal 7: Improve waste information management.

6.2 ALIGNMENT WITH NATIONAL AND PROVINCIAL WASTE MANAGEMENT GOALS

The NWMS (2011), NWMS (2020) and the Western Cape IWMP (2017-2022), along with the status quo of waste management within the WLM, were used to develope the 2021-2027 WLM IWMP. The table provides an overview of how the goals of the WLM will be aligned with the above-mentioned strategies.

Table 6-1: Alignment of WLM goals with provincial and national goals

WLM GOALS	WESTERN CAPE IWMP GOALS	NWMS 2011 GOALS	NWMS 2020 GOALS
Goal 1: Effective solid waste service delivery	Goal 3: Effective and efficient use of resources	Goal 2: Ensure effective and efficient delivery of waste services	Goal 2: All South Africans live in clean communities with waste services that are well managed and financially sustainable.
Goal 2: Promote waste minimisation and recycling	Goal 3: Effective and efficient use of resources	Goal 1: Promote waste minimisation, re-use, recycling and recovery of waste	Goal 1: Prevent waste and, where waste cannot be prevented, divert 50% of waste from landfill within 5 years, 65% within 10 years, and at least 80% of waste within 15 years through reuse, recycling, and recovery and alternative waste treatment
Goal 3: Ensure safe and integrated management of hazardous waste	Goal 3: Effective and efficient use of resources	Goal 2: Ensure effective and efficient delivery of waste services	Goal 2: All South Africans live in clean communities with waste services that are well managed and financially sustainable.
Goal 4: Improve waste education and public awareness	Goal 1: Strengthen education, capacity and advocacy towards integrated waste management	Goal 4: Ensure that people are aware of the impact of waste on their health, well-being and the environment	Goal 3: South Africans are aware of waste and a culture of compliance with waste management norms and standards exists, resulting in zero tolerance of pollution, litter and illegal dumping.
Goal 5: Ensure sound budgeting for integrated waste management	Goal 2: Improved integrated waste management planning and implementation for efficient waste services and infrastructure	Goal 5: Achieve integrated waste management planning	Goal 2: All South Africans live in clean communities with waste services that are well managed and financially sustainable.

WLM GOALS	WESTERN CAPE IWMP GOALS	NWMS 2011 GOALS	NWMS 2020 GOALS
		Goal 6: Ensure sound budgeting and financial management for waste services	
Goal 6: Improve regulatory compliance	Goal 4: Improved compliance with environmental regulatory framework	Goal 8: Establish effective compliance with and enforcement of the Waste Act	Goal 3: South Africans are aware of waste and a culture of compliance with waste management norms and standards exists, resulting in zero tolerance of pollution, litter and illegal dumping.
Goal 7: Improve waste information management	Goal 2: Improved integrated waste management planning and implementation for efficient waste services and infrastructure	-	Goal 2: All South Africans live in clean communities with waste services that are well managed and financially sustainable.

6.3 OBJECTIVES AND TARGETS FOR THE MUNICIPALITY

Table 6-2 provides the strategic objectives and targets for each of the seven goals identified for the WLM.

Table 6-2: Objectives and targets for each of the WLM's goals

GOAL	OBJECTIVE	ACTION/TARGET
Goal 1: Effective solid waste service delivery	Objective 1: Update the collection schedule	• Review and update the collection schedule to ensure efficient and cost-effective waste collection through route optimisation with the least possible unproductive travelling. • Develop recyclable waste collection route for implementation of separation at source in all towns.
	Objective 2: Prevent illegal dumping	Identify illegal dumping hotspots and add receptacles at these areas. The waste management officer should assess potential reasons causing the prevalence of illegal dumping by way of: • Identify illegal dumping hotspots • Make key observations • Conduct brief community surveys and interviews • Identify the stream of waste (and where possible potential sources) that is predominant at the illegal dumping sites • Provide appropriate infrastructure ensuring user-friendly waste disposal facilities – e.g. ramps allowing the emptying of wheelbarrows wheelie bins into skips; even by children and the elderly • Monitor and empty skips as required to prevent overfilling and waste subsequently being put on fire • Launch waste awareness campaigns to educate the community on proper waste management and disposal practices.

GOAL	OBJECTIVE	ACTION/TARGET
	Objective 3: Evaluate waste management fleet	• Evaluating waste collection vehicles to ensure that they remain reliable, cost-effective and efficient • Ensure that daily routine inspections be done on vehicles before waste collection commences • Undertaken preventative maintenance on vehicles where appropriate • Plan and budget for future fleet, plant and equipment requirements allowing for routine replacement of vehicles that are not reliable • Ensure that the landfill used for disposal is equipped with plant and tow cables to assist vehicles stuck in mud and do NOT allow waste collection vehicles to be pushed by bulldozers or landfill compactors • Have access to backup vehicle under all circumstances.
Goal 2: Promote waste minimisation and recycling	Objective 1: Implement separation at source in all towns	• Plan and budget for the implementation of separation at source at all households in the WLM • Budget to provide bags to households for recyclables.
	Objective 2: Improve recyclables diversion rates	• Provide public recycling drop-off facilities in secured areas and have material removed regularly to prevent overflowing containers • Establish buy-back centres in low-income areas • Implement recycling competitions and other awareness programmes at schools • Facilitate for municipalities to ringfence avoided landfill disposal costs for allocation to recyclers providing evidence of waste diverted from landfill • Once separation at source is implemented, ensure for effective sorting and recording of quantities at the new MRF in Ceres. • Implement a plan for the minimisation and diversion of C&D waste from landfills

GOAL	OBJECTIVE	ACTION/TARGET
	Objective 3: Draft an Organic Waste Diversion Plan	• Identify potential applications and markets for processed organic waste diverted from landfills • Undertake a cost-benefit study to determine the financial viability of the alternative processing options • Draft a plan documenting the initiatives to reduce organic waste sent to landfills. The municipality can also review the Department's Organic Waste template for guidance. • Create a diversion plan that aims to divert 50% of organic waste by 2022.
	Objective 4: Implement organic waste diversion initiatives	• Attract private sector interest in either setting up businesses for the processing and sale of organic waste independently, or alternatively in PPPs • Facilitate for municipalities to ringfence avoided landfill disposal costs for allocation to processors providing evidence of waste diverted from landfill • Promote and market increased use of compost instead of chemical fertilisers • Educate the communities and farmers on at-source composting • Establish a composting facility next to the PAH landfill • Prevent disposal of garden refuse at the PAH landfill site.
	Objective 5: Implement swop-shops	• Establish swop-shops in low-income areas • Appoint staff to implement and run the swop-shops: o Interact with local supermarkets to assist with products for the swop-shop • Educate the people on recyclable materials and the value thereof.
	Objective 6: Establish drop-off facilities in all towns	• Identify locations for drop-off facilities in all towns • Establish drop-off facilities and ensure for adequate recordkeeping.

GOAL	OBJECTIVE	ACTION/TARGET
Goal 3: Ensure safe integrated management of hazardous waste	Objective 1: Provide household hazardous waste solutions	• Provide household hazardous waste containers at the new public drop-off facility in Wolseley and have such waste collected and disposed of by a legally compliant contractor • Create public awareness about the environmental impact of inappropriate hazardous waste disposal, as well as any alternative collection and disposal systems available to them.
	Objective 2: Ensure major hazardous waste generators are registered on IPWIS	• Identify major hazardous waste generators in the WLM and determine the types and volumes of hazardous waste generated • Ensure that appropriate facilities are available for the safe storage, bilking, transport, and disposal of hazardous waste generated by industry • Monitor the registration of and regular accurate reporting by major hazardous waste generators in the WLM.
	Objective 3: Save disposal of sewerage sludge	• Establish a hazardous waste collection company to transport sewerage sludge to a hazardous landfill site • Use sewerage sludge in agricultural sector.
Goal 4: Improved waste education and public awareness	Objective 1: Appoint public awareness task force	• Appoint a team to establish a plan for the implementation of waste awareness campaigns in the LLM • Empower officials from relevant authorities for the monitoring and prosecution of polluters.
	Objective 2: Implement waste awareness programmes	• Initiate community-based waste management education and awareness programmes for rural councillors and communities • Budget and ensure personnel in the waste management department go for regular training to ensure compliance and enforcement of waste management acts, regulations and strategies • Ensure that both public and private sector staff are appropriately trained for their respective jobs and that refresher courses are offered if needed.

GOAL	OBJECTIVE	ACTION/TARGET
	Objective 3: Waste management training courses	• Initiate community-based waste management education and awareness programmes for rural councillors and communities • Budget and ensure personnel in the waste management department go for regular training to ensure compliance and enforcement of waste management acts, regulations and strategies.
	Objective 4: Improve hazardous waste knowledge	• Send relevant officials on formal training courses (training the trainers) to ensure they are well equipped to train fellow staff members as well as the public on appropriate hazardous waste management • Provide educational material to ensure that households are made aware of the effect of household hazardous waste • Provide a guideline to households on how to properly dispose of hazardous waste at appropriate facilities provided and maintained by the WLM.
Goal 5: Ensure sound budgeting for integrated waste management	Objective 1: Review organogram	• Undertake a survey to determine the staff compliment required and adjust the organogram accordingly • Reallocate redundant staff to alternative positions where suitably trained and experienced to fill such positions. Provide alternative training where feasible • Fill vacant positions with suitably qualified and experienced staff • Ensure for sound budgeting to fill vacancies in waste management department as per the finally approved organogram.
	Objective 2: Ensure availability of sufficient budget for landfill rehabilitation and closure	• Budget and plan for the rehabilitation of the Op-die-Berg landfill site • Appoint suitable qualified consultants and contractors to execute the work as per the contract amount and within the required timeframes.

GOAL	OBJECTIVE	ACTION/TARGET
	Objective 3: Ensure availability of sufficient budget for new waste management facilities	Budget for the implementation of the following waste management facilities: • Composting facility • Drop-off facilities in all towns • Swop-shops in low-income areas.
	Objective 4: Conduct cost analysis study	• Appoint a service provider to conduct a cost benefit analysis (feasibility) study to evaluate the effect that the disposal at the new regional landfill site in Worcester, together with associated transfer and transport costs, will have on the waste management operational costs.
Goal 6: Improve regulatory compliance	Objective 1: Conduct external landfill audits as per landfill licence requirements	• Review all landfill waste management licences to establish external audit dates. • Continue to conduct internal audits on a quarterly basis. • Appoint an external consultant to conduct annual external audits at all waste management facilities. • Undertake routine maintenance, and based on recommendations from specialists, implement mitigating measures where required. • Ensure PA Hamlet landfill site has proper access control and security and that they maintain all conditions of the WML.
	Objective 2: Ensure compliance of the landfill containment barriers with R. 636	Appoint a suitably qualified consultant to assist with closure and rehabilitation of existing unlined cells, and development of new lined cells in accordance with the relevant legislation.
Goal 7: Improve waste information management	Objective 1: Improve recyclables record keeping	• Ensure that the recycling company reports the mass correctly. • Once the MRF is established in Ceres, develop a recording system to ensure mass is captured correctly. • Implement strategies/tools that will ensure that recycling companies report the materials' tonnages to the municipality or IPWIS.

GOAL	OBJECTIVE	ACTION/TARGET
	Objective 2: Improve organic waste record keeping	• Ensure all organic waste and garden refuse are recorded correctly upon arrival at the PAH landfill site. • Once the composting facility is established, record mass of compost sold to farmers.
	Objective 3: Develop industry waste database	Implement effective communication system: • Place an advert in the local paper instructing organisations to register. • Make registration forms available on the website. • Develop a database of industries operating in the WLM and track the registration and reporting status. Issue written notifications to the organisations that are not registered or reporting accurately.

7 IMPLEMENTATION PLAN

The following section presents an implementation plan to assist the WLM in meeting the objectives and targets outlined in the gap and needs analysis section. The implementation plan contains a number of projects and respective actions which, if properly executed, should enable the WLM to achieve its objectives and targets. The identified projects have been prioritised and span a period of seven years (2021-2027). The table below provides the legend for the implementation plan.

Table 7-1: Implementation plan legend

TERM	IMPORTANCE
Short term	
Medium term	
Long term/continuous	

Table 7-2: Implementation plan

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
Goal 1: Effective solid waste service delivery	Objective 1: Update the collection schedule	• Review and update the collection schedule to ensure efficient and cost-effective waste collection through route optimisation with the least possible unproductive travelling. • Develop recyclable waste collection route for implementation of separation at source in all towns.								In-house. Municipality overheads
	Objective 2: Prevent illegal dumping	Identify illegal dumping hotspots and add receptacles at these areas. The waste management officer should assess potential reasons causing the prevalence of illegal dumping by way of: • Identifying illegal dumping hotspots • Making key observations • Conducting brief community surveys and interviews • Identifying the stream of waste (and where possible potential sources) that is predominant at the illegal dumping sites • Providing appropriate infrastructure ensuring user-friendly waste disposal facilities – e.g. ramps allowing the emptying of wheelbarrows wheelie bins into skips; even by children and the elderly								In-house. Municipality overheads

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
		• Monitor and empty skips as required to prevent overfilling and waste subsequently being put on fire • Launch waste awareness campaigns to educate the community on proper waste management and disposal practices.								
	Objective 3: Evaluate waste management fleet	• Evaluate waste collection vehicles to ensure that they remain reliable, cost-effective and efficient • Ensure that daily routine inspections be done on vehicles before waste collection commences • Undertake preventative maintenance on vehicles where appropriate • Plan and budget for future fleet, plant and equipment requirements allowing for routine replacement of vehicles that are not reliable • Ensure that the landfill used for disposal is equipped with plant and tow cables to assist vehicles stuck in mud and do NOT allow waste collection vehicles to be pushed by bulldozers or landfill compactors								In-house. Municipality overheads

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
		• Have access to a backup vehicle under all circumstances.								
Goal 2: Promote waste minimisation and recycling	Objective 1: Implement separation at source in all towns	• Plan and budget for the implementation of separation at source at all households in the WLM. • Budget to provide bags to households for recyclables.								R3 000 000 for provision of bags and additional equipment
	Objective 2: Improve recyclables diversion rates	• Provide public recycling drop-off facilities in secured areas and have material removed regularly to prevent overflowing containers. • Establish buy-back centres in low-income areas. • Implement recycling competitions and other awareness programmes at schools. • Facilitate for municipalities to ringfence avoided landfill disposal costs for allocation to recyclers providing evidence of waste diverted from landfill.								R2 000 per annum for awareness materials at schools R10 000 to establish buy-back centres and R1 000 per annum for maintenance & repairs

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
		• Once separation at source is implemented, ensure for effective sorting and recording of quantities at the new MRF in Ceres. • Implement a plan for the minimisation and diversion of C&D waste from landfills.								
	Objective 3: Draft an Organic Waste Diversion Plan	• Identify potential applications and markets for processed organic waste diverted from landfills. • Undertake cost-benefit study to determine the financial viability of the alternative processing options. • Draft a plan documenting the initiatives to reduce organic waste sent to landfills. The municipality can also review the Department Organic Waste template for guidance. • Create a diversion plan that aims to divert 50% of organic waste by 2022.								In-house. Municipality overheads
	Objective 4: Implement organic waste diversion initiatives	• Attract private sector interest in either setting up businesses for the processing and sale of organic waste independently, or alternatively in PPPs. • Facilitate for municipalities to ringfence avoided landfill disposal								To be determined by consultants

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
		costs for allocation to processors providing evidence of waste diverted from landfill. • Promote and market increased use of compost instead of chemical fertilisers. • Educate the communities and farmers on at-source composting. • Establish a composting facility next to the PAH landfill. • Prevent disposal of garden refuse at the PAH landfill site.								
	Objective 5: Implement swop-shops	• Establish swop-shops in low-income areas. • Appoint staff to implement and run the swop-shops: o Interact with local supermarkets to assist with products for the swop-shop. • Educate the people on recyclable materials and the value thereof.								R1 000 00 for establishment of swop-shop and equipment
	Objective 6: Establish drop-off facilities in all towns	• Identify locations for drop-off facilities in all towns. • Establish drop-off facilities and ensure for adequate recordkeeping.								To be determined by consultants

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
Goal 3: Ensure safe integrated management of hazardous waste	Objective 1: Provide household hazardous waste solutions	• Provide household hazardous waste containers at the new public drop-off facility in Wolseley and have such waste collected and disposed of by a legally compliant contractor. • Create public awareness about the environmental impact of inappropriate hazardous waste disposal, as well as any alternative collection and disposal systems available to them.								R1 500 per lockable container R 1 000 000 per annum for waste removal service
	Objective 2: Ensure major hazardous waste generators are registered on IPWIS	• Identify major hazardous waste generators in the WLM and determine the types and volumes of hazardous waste generated. • Ensure that appropriate facilities are available for the safe storage, bilking, transport, and disposal of hazardous waste generated by industry. • Monitor the registration of and regular accurate reporting by major hazardous waste generators in the WLM.								In-house. Municipality overheads
	Objective 3: Save disposal of sewerage sludge	• Establish a hazardous waste collection company to transport sewerage sludge to a hazardous landfill site.								To be determined by collection company

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
		• Use sewerage sludge in agricultural sector.								
Goal 4: Improve waste education and public awareness	Objective 1: Appoint public awareness task force	• Appoint a team to establish a plan for the implementation of waste awareness campaigns in the LLM. • Empower officials from relevant authorities for the monitoring and prosecution of polluters.								R3 000 000 per annum for awareness materials.
	Objective 2: Implement waste awareness programmes	• Initiate community-based waste management education and awareness programmes for rural councillors and communities. • Budget and ensure personnel in the waste management department to go for regular training to ensure compliance and enforcement of waste management acts, regulations and strategies. • Ensure that both public and private sector staff are appropriately trained for their respective jobs and that refresher courses are offered.								R2 000 per annum for awareness materials.

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
	Objective 3: Waste management training courses	• Initiate community-based waste management education and awareness programmes for rural councillors and communities. • Budget and ensure personnel in the waste management department go for regular training to ensure compliance and enforcement of waste management acts, regulations and strategies.								R7 500 per course for department training
	Objective 4: Improve hazardous waste knowledge	• Send relevant officials on formal training courses (training the trainers) to ensure they are well equipped to train fellow staff members as well as the public on appropriate hazardous waste management. • Provide educational material to ensure that households are made aware of the effect of household hazardous waste. • Provide guidelines to households on how to properly dispose of hazardous waste at appropriate facilities provided and maintained by the WLM.								R2 000 per annum for awareness materials.

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
Goal 5: Ensure sound budgeting for integrated waste management	Objective 1: Review organogram	• Undertake a survey to determine the staff compliment required and adjust the organogram accordingly. • Reallocate redundant staff to alternative positions where suitable trained and experienced to fill such positions. Provide alternative training where feasible. • Fill vacant positions with suitable, qualified and experienced staff. • Ensure for sound budgeting to fill vacancies in the waste management department as per the finally approved organogram.								To be confirmed with Municipality
	Objective 2: Ensure availability of sufficient budget for landfill rehabilitation and closure	• Budget and plan for the rehabilitation of the Op-die-Berg landfill site. • Appoint suitably qualified consultants and contractors to execute the work as per the contract amount and within the required timeframes.								R100 000 per landfill for rehabilitation design and approval. Rehabilitation cost R 5 000 000
	Objective 3: Ensure availability of sufficient budget for new waste	Budget for the implementation of the following waste management facilities: • Composting facility								To be determined

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
	management facilities	• Drop-off facilities in all towns • Swop-shops in low-income areas.								by consultants
	Objective 4: Conduct cost analysis study	Appoint a service provider to conduct a cost benefit analysis (feasibility) study to evaluate the effect that the disposal at the new regional landfill site in Worcester, together with associated transfer and transport costs, will have on the waste management operational costs.								R1 500 000
Goal 6: Improve regulatory compliance	Objective 1: Conduct external landfill audits as per landfill licence requirements	• Review all landfill waste management licences to establish external audit dates. • Continue to conduct internal audits on a quarterly basis. • Appoint an external consultant to conduct annual external audits at all waste management facilities. • Undertake routine maintenance and based on recommendations from specialists, implement mitigating measures where required. • Ensure that the PA Hamlet landfill site has proper access control and security, and maintains all conditions of the WML.								R 500 000 per landfill for survey and calculations of remaining airspace

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
	Objective 2: Ensure compliance of the landfill containment barriers with R. 636	Appoint a suitably qualified consultant to assist with closure and rehabilitation of existing unlined cells, and development of new lined cells in accordance with the relevant legislation.								To be determined by consultants, estimated as R 300 000
Goal 7: Improve waste information management	Objective 1: Improve recyclables record keeping	• Ensure that the recycling company reports the mass correctly. • Once the MRF is established in Ceres, develop a recording system to ensure mass is captured correctly. • Implement strategies/tools that will ensure that recycling companies report the materials' tonnages to the municipality or IPWIS.								In-house. Municipality overheads
	Objective 2: Improve organic waste record keeping	• Ensure all organic waste and garden refuse is recorded correctly upon arrival at the PAH landfill site. • Once the composting facility is established, record mass of compost sold to farmers.								In-house. municipality overheads
	Objective 3: Develop industry waste database	Implement an effective communication system: • Place an advert in the local paper instructing organisations to register.								R100 000 for software and Municipality overheads

GOAL	OBJECTIVE	PROJECT DESCRIPTION	TIMEFRAME							ESTIMATED BUDGET REQUIRED
			2021	2022	2023	2024	2025	2026	2027	
		• Make registration forms available on the website. • Develop a database of industries operating in the WLM and track the registration and reporting status. Issue written notifications to the organisations that are not registered or reporting accurately.								

8 IWMP MONITORING AND REVIEW

Regular and ongoing monitoring of the implementation plan (outlined in Section 7) is required to ensure the goals, objectives and targets of the IWMP are accomplished within designated timeframes.

8.1 REPORTING

According to Section 13(2) of The National Environmental Management Waste Act, 2008 (Act 59 of 2008), performance reports on the implementation of the Integrated Waste Management Plan must be prepared in terms of Section 46 of the Municipal Systems Act and must contain the following information:

- The extent to which the plan has been implemented during the period
- The waste management initiatives that have been undertaken during the reporting period
- The delivery of waste management services and measures taken to secure the efficient delivery of waste management services, if applicable
- The level of compliance with the plan and any applicable waste management standards
- The measures taken to secure compliance with waste management standards
- The waste management monitoring activities
- The actual budget expended on implementing the plan
- The measures that have been taken to make any necessary amendments to the plan.

8.2 MONITORING AND REVIEW

The designated waste management officer (WMO) is responsible for preparing the performance reports on the implementation of the IWMP on an annual basis. An IWMP monitoring committee should be established to monitor the implementation and progress of the IWMP activities.

The Annual Performance Report must summarise the municipality's progress towards meeting the goals, targets and objectives outlined in the implementation plan of the IWMP. More specifically, the report should comprise the following:

- Strategic Issues: The WLM's performance and progress on meeting the short, medium- and long-term goals, objectives and targets
- Financial Issues: Reporting on budget forecasting, obtaining sufficient budgets and budgeting constraints with respect to both existing waste management operations and the implementation of this IWMP
- IWMP Amendments: Amendments to the IWMP necessitated by the outcomes of feasibility studies, financial constraints, etc.
- Communication: Keeping councillors, key stakeholders and the residents informed on the progress in meeting the IWMP.

8.3 REVISION OF THE IWMP

As this IWMP forms part of the Integrated Development Plan required in terms of Chapter 5 of the Municipal Systems Act, the next comprehensive revision of the IWMP should occur in 2027.

The comprehensive review will update the status quo, evaluate overall progress against the goals, objectives and targets outlined in this IWMP, review gaps and needs, and reformulate the goals and objectives as required to continue to improve waste management services in the WLM.

9 PUBLIC PARTICIPATION PROCESS

As part of the development of the IWMP, the consultants have engaged with stakeholders and members of the community. Stakeholders and interested and affected parties (I&APs) were notified that the draft IWMP is out for commenting. The figure below provides the advertisement that was placed on the WLM's website. Due to COVID-19, the public participation was done via online methods. The public participation period was from 01 April 2021 to 01 May 2021. The advert and proof of publication can be found below.

WITZENBERG	**NOTICE OF THE REVIEW AND UPDATE OF THE WITZENBERG LOCAL MUNICIPALITY (WLM) INTEGRATED WASTE MANAGEMENT PLAN (IWMP) FOR THE WLM IN TERMS OF THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT NO. 59 OF 2008).**
Notice is hereby given in terms of the National Environmental Management: Waste Act (Act No. 59 of 2008) that the Witzenberg Local Municipality (WLM) is reviewing the Integrated Waste Management Plan (IWMP).	
Municipality:	Witzenberg Local Municipality
Lead Consultant:	Delta Built Environment Consultants (Delta BEC)
Competent Authority:	Western Cape Department of Environmental Affairs and Development Planning
Project Nature and Location:	The project's primary objective of the review and updating of WLM's IWMP is to ensure that waste management practices in the WLM comply with the National Environmental Management: Waste Act, 2008 (Act No.59 of 2008).
Opportunity to Participate:	As part of the Public Participation process, the public is afforded a 30-day period from 1 April 2021 to 1 May 2021 to comment on the draft IWMP. The draft IWMP will be available on the WLM website from 1 April. Comments on the Draft IWMP can be forwarded to: **Mrs Chanté Stander** **Tel:** 012 368 1850 **Email:** chante.stander@deltabec.com

Figure 9-1: WLM IWMP Advert

Figure 9-2: The Standard

The following parties commented on the Draft IWMP:

- Department of Environmental Affairs and Development Planning

The comments on the Draft WLM IWMP were incorporated into the Final WLM IWMP.

The comments on the Draft IWMP can be found in Appendix C.

10 CONCLUSION

This report served to analyse and quantify all aspects related to current waste management services and practices carried out by the WLM with the view of using such information as a baseline for future planning.

In terms of service delivery, the WLM provides waste collection services to high, medium and low-income groups, informal settlements, businesses and schools. Green bags are provided for garden refuse. The green bags are collected from the households and transported to the Prince Alfred Hamlet landfill site. Clear bags are used for recyclables. The clear bags are collected from the households in Tulbagh with the cage truck and transported to the Tulbagh landfill site where an external company (Frank Boomshiar Recyclables) collects the recyclables. At informal areas, it is impossible to access the area with a compactor, due to denseness of the area, but skips are provided where informal dwellers dispose of their waste. Black and green bags are also provided to the informal dwellers and are serviced by a LDV where accessible. Skips are used in informal settlements and in all towns for garden refuse and C&D waste storage. There are currently (2021) 77 skips (6 m^3) placed in the WLM.

The WLM has operating licences for four landfills, but the Wolseley landfill site has been completely vandalised in 2013 and has since been non-operational. The WLM's general waste is disposed of at the Op-die-Berg and Tulbagh landfill. The garden waste is disposed of at the Prince Alfred Hamlet site. None of these sites are equipped with a weighbridge, but a weigh pad has recently been installed at the Tulbagh landfill by the DEA.

The analyses of the current waste management system have led to the identification of gaps and needs (Chapter 5), and these are addressed with the overarching goals, objectives and targets in Chapter 6.

The main goals for integrated waste management in the WLM can be summarised as follows

- To ensure for effective solid waste service delivery
- To promote waste minimisation and recycling
- To ensure safe and integrated management of hazardous waste
- To improve waste education and public awareness
- To ensure sound budgeting for integrated waste management
- To improve regulatory compliance
- To improve waste information management.

For these goals to be met, a series of implementation instruments (action plans) will need to be implemented. These action plans are detailed in the implementation plan in Chapter 7 of this report.

The next phase of the development of the IWMP is to conduct a public participation period. During this period, the consultants will engage with stakeholders and

members of the community. Stakeholders and interested and affected parties (I&APs) will be notified that the draft IWMP is out for commenting. The comments on the Draft WLM IWMP will be incorporated into the Final WLM IWMP.

APPENDIX A: TABLE 6: SCHEDULE 3 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE AMENDMENT ACT, 2014 ACT NO. 26 OF 2014: CATEGORY A: HAZARDOUS WASTE

INDUSTRIAL GROUP	WASTE FRACTIONS
1. Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing, food preparation and processing	(a) hazardous portion of wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing
2. Wastes from wood processing and the production of panels and furniture, pulp, paper and cardboard	(a) hazardous portion of wastes from wood processing and the production of panels and furniture (b) hazardous portion of wastes from wood preservation (c) hazardous portion of wastes from pulp, paper and cardboard production and processing
3. Wastes from the leather, fur and textile industries	(a) hazardous portion of wastes from the leather and fur industry (b) hazardous portion of wastes from the textile industry
4. Wastes from petroleum refining, natural gas purification and pyrolytic treatment of coal	(a) wastes from petroleum refining (b) wastes from the pyrolytic treatment of coal (c) wastes from natural gas purification and transportation

INDUSTRIAL GROUP	WASTE FRACTIONS
5. Wastes from inorganic chemical processes	(a) wastes from the manufacture, formulation, supply and use (MFSU) of acids (b) wastes from the MFSU of bases (c) wastes from the MFSU of salts and their solutions and metallic oxides (d) metal-containing wastes (e) wastes from the MFSU of sulphur chemicals, sulphur chemical processes and desulphurisation processes (f) wastes from the MFSU of halogens and halogen chemical processes (g) wastes from the MFSU of silicon and silicon derivatives (h) wastes from the MFSU of phosphorous chemicals and phosphorous chemical processes (i) wastes from the MFSU of nitrogen chemicals, nitrogen chemical processes and fertiliser manufacture (j) wastes from the manufacture of inorganic pigments (k) other wastes from inorganic chemical processes
6. Wastes from organic chemical processes	(a) wastes from the manufacture, formulation, supply and use (MFSU) of basic organic chemicals (b) wastes from the MFSU of plastics, synthetic rubber and man-made fibres (c) wastes from the MFSU of organic dyes and pigments (d) wastes from the MFSU of organic plant protection products, wood preserving agents and other biocides (e) wastes from the MFSU of pharmaceuticals (f) wastes from the MFSU of fats, grease, soaps, detergents, disinfectants and cosmetics (g) other wastes from the MFSU of fine chemicals and chemical products

INDUSTRIAL GROUP	WASTE FRACTIONS
7. Wastes from thermal processes	(a) hazardous portion of wastes from power stations and other combustion plants (b) hazardous portion of wastes from the iron and steel industry (c) wastes from aluminium thermal metallurgy (d) wastes from lead thermal metallurgy (e) wastes from zinc thermal metallurgy (f) wastes from copper thermal metallurgy (g) wastes from silver, gold and platinum thermal metallurgy (h) wastes from other non-ferrous thermal metallurgy (i) hazardous portion of wastes from casting of ferrous pieces (j) hazardous portion of wastes from casting of non-ferrous pieces (k) hazardous portion of wastes from manufacture of glass and glass products (l) hazardous portion of wastes from manufacture of ceramic goods, bricks, tiles and construction products (m) hazardous portion of wastes from manufacture of cement, lime and plaster and articles and products made from them
8. Waste from the photographic industry	(a) hazardous portion of waste from the photographic industry
9. Wastes from the manufacture, formulation, supply and use (MFSU) of coatings (paints, varnishes and vitreous enamels), adhesives, sealants and printing inks	(a) wastes from MFSU and removal of paint and varnish (b) wastes from MFSU of other coatings (including ceramic materials) (c) wastes from MFSU of printing inks (d) wastes from MFSU of adhesives and sealants (including waterproofing products)

INDUSTRIAL GROUP	WASTE FRACTIONS
10. Wastes from chemical surface treatment and coating of metals and other materials; non-ferrous hydrometallurgy	(a) wastes from chemical surface treatment and coating of metals and other materials (for example galvanic processes, zinc coating processes, pickling processes, etching, phosphating, alkaline degreasing, anodising) (b) wastes from non-ferrous hydrometallurgical processes (c) wastes from sludges and solids from tempering processes (d) wastes from hot galvanising processes
11. Wastes from shaping and physical and mechanical surface treatment of metals and plastics	(a) hazardous portion of wastes from shaping and physical and mechanical surface treatment of metals and plastics (b) wastes from water and steam degreasing processes
12. Oil wastes and wastes of liquid fuels (except edible oils)	(a) waste hydraulic oils (b) waste engine, gear and lubricating oils (c) waste insulating and heat transmission oils (d) oil/water separator contents (e) wastes of liquid fuels (f) hazardous portion of other oil wastes
13. Waste organic solvents, refrigerants and propellants	(a) waste organic solvents, refrigerants and foam/aerosol propellants

INDUSTRIAL GROUP	WASTE FRACTIONS
14. Other wastes not specified in the list	(a) hazardous portion of wastes from end-of-life vehicles from different means of transport (including off-road machinery) and wastes from dismantling of end-of-life vehicles and vehicle maintenance (b) hazardous portion of wastes from electrical and electronic equipment (c) hazardous portion of wastes from off-specification batches and unused products (d) wastes from discarded gases in pressure containers and discarded chemicals (e) wastes from discarded batteries and accumulators (f) wastes from transport tank, storage tank and barrel cleaning (g) spent catalysts wastes (h) oxidising substances wastes (i) aqueous liquid wastes destined for off-site treatment (j) waste linings and refractories
15. Construction wastes	(a) wastes from bituminous mixtures, coal tar and tarred products (b) discarded metals (including their alloys) (c) waste soil (including excavated soil from contaminated sites), stones and dredging spoil (d) wastes from insulation materials and asbestos-containing construction materials (e) wastes from gypsum-based construction material (f) wastes from other construction and demolition [wastes]
16. Wastes from human or animal health care and/or related research (except kitchen and restaurant wastes not arising from immediate health care)	(a) wastes from natal care, diagnosis, treatment or prevention of disease in humans (b) wastes from research, diagnosis, treatment or prevention of disease involving animals

INDUSTRIAL GROUP	WASTE FRACTIONS
17. Wastes from waste management facilities	(a) hazardous portion of wastes from incineration or pyrolysis of waste (b) hazardous portion of wastes from physico/chemical treatments of waste (c) hazardous portion of stabilised/solidified wastes (d) hazardous portion of wastes from aerobic treatment of solid wastes (e) hazardous portion of wastes from anaerobic treatment of waste (f) landfill leachate wastes (g) wastes from shredding of metal-containing wastes (h) wastes from oil regeneration (i) wastes from soil remediation

1 Introduction

Aurecon were appointed in March 2018 by the Witzenberg Municipality (WM) to conduct the annual external permit compliance audit of the Op-die-berg Waste Disposal Site as required by permit number No. 16/2/7/H200/D100/Z2/P325 (11 November 1998) issued by the Department of Water Affairs and Forestry (DWAF) in terms Section 20 of the Environmental Conservation Act, 1989 (Act 73 of 1989).

The site was inspected and verified against the specific permit conditions by Mr. Shaun Devine of Aurecon on 19 April 2018. The weather on the day was cloudy and foggy. The audit was done in the presence of Mr Johnny Jacobs of the WM where the operation and maintenance of the site was discussed.

2 Site details

Op-die-Berg Landfill site is located approximately 5 km south of Die Dorp Op Die Berg town, on the R303.

Figure 1 Site location

3 Audit checklist

The site was audited against the conditions contained within the permit.

PERMIT CONDITION	*PREVIOUS RESULT*	2018 RESULT	COMMENTS
1. LOCATION			
1.1 This Permit authorises the establishment, further development and operation of a waste disposal site on Portion I of the farm Kleinvlei No 209, (hereinafter referred to as 'E the Site") according to the report 108/599 by BKS Consulting Engineers, dated February 1998 (hereinafter referred to as "the Report"), submitted by the Permit Holder	*2*	**n/a**	The site has been established.
1.2 The location of the Site shall be according to the co-ordinates indicated on the permit application form, submitted by the Permit Holder.	*n/a*	**n/a**	Permit application form not available
2. PERMISSIBLE WASTE			
2.1 The Site may be used for the disposal of all waste types, excluding those listed in Annexure I and excluding those where specific control has been 'established in terms of the Nuclear Energy Act 1993 (Act 1 of 1 993). Waste types controlled in terms of the Minerals Act}. 9.1991 (Act 50 of 1991) and the Electricity Act, 1987 (Act 4.1 987) s are also excluded from disposal on the Site unless has been obtained from the Regional Director.	*2*	**2**	Only garden waste and builder's rubble being disposed of on site.
2.2 The Permit Holder shall take all reasonable steps to ensure that -			
2.2.1 No organic or inorganic element or compound which may have a definite acute or chronic negative effect on human or animal health and/or the environment, due to its toxic, physical, chemical or persistent characteristics and which corresponds with the UNEP definition of hazardous waste be disposed of on the Site;	*2*	**2**	None noted during inspection
2.2.2 No medical waste be disposed on the Site; and	*2*	**2**	None noted during inspection
2.2.3 No scheduled pharmaceutical products registered in terms of the Medicines and Related Substances Control Act, 1965 (Act 101 of 1965) or associated containers be disposed of on the Site.	*2*	**2**	None noted during inspection
3. CONSTRUCTION			
3.1 The Site or any portion thereof may only be used for the disposal of permissible waste if the Site or any such portion has been constructed or developed according to condition 3 of this Permit.	*2*	**2**	
3.2 Construction and further development within the Site shall be carried out under the supervision of a suitably qualified person proposed by the Permit Holder and approved by the Regional Director.	*2*	**n/a**	
3.3 After construction of the Site or further development within the Site, the Permit Holder shall notify the Regional Director thereof and the person referred to in condition 3.2 shall submit a certificate or alternatively a letter to the Regional Director that the construction of the Site or further development within the Site, as proposed by the Permit Holder and approved by the Regional Director, is In accordance with recognised civil engineering practice before disposal may commence on the Site. The completed construction works of the Site shall be inspected by an official of the Department: and the person referred to in condition 3.2. If the Regional Director is satisfied with the construction of the Site or any further development within the Site and has given written permission, the Permit Holder may use the Site or any further development within the Site for the disposal of waste,	*2*	**n/a**	
3.4 The Permit Holder shall take all reasonable steps, such as suitable zoning and/or written agreements with adjacent landowners, to establish and maintain an unbuilt area or "buffer zone" of 200 metres between the Site and the nearest residential and/or light industrial areas during the operative life of the Site. Heavy industries or industries which may create nuisance conditions may permitted within the buffer zone in terms of the appropriate	*2*	**2**	No development within the buffer
3.5 Works shall be constructed and maintained on a continuous basis by the Permit Holder to divert and drain from the Site in a legal manner, all runoff water arising on land adjacent to the Site, which could be expected as a result of the estimated maximum precipitation during a period of 24 hours with an average frequency	*2*	**2**	

of once in fifty years (hereinafter referred to as the “estimated maximum precipitation"). Such works shall, under the said rainfall event, maintain a freeboard of half a metre			
3.6 Works shall be constructed and maintained on a continuous basis by the Permit Holder to divert and drain from the working 'face of the Site, all runoff water arising on the Site, which could be expected as a result of the estimated maximum precipitation and to prevent such runoff water from coming into contact with leachate from the Site. Such works shall, under the said rainfall event, maintain a freeboard of half a metre	*1*	**1**	No internal stormwater drains are present. The method of disposal is by trenching, therefore water coming into contact with the waste will be contained within the disposal trenches.
3.7 Runoff water referred to in condition 3.6 shall comply with the quality requirements of the General Standard, prescribed in terms of section 21 (1) (a) of the Water Act, 1956 as published in Government Notice 991 of 18 May 1 984, or with such quality requirements as may from time to time be determined by the Minister and shall be drained from the Site in a legal	*n/a*	**n/a**	There is no contaminated runoff water
3.8 Runoff water referred to in condition 3.6 which does not comply with the quality requirements applicable in terms of condition 3.7 and all leachate shall, by means of works which shall be constructed and maintained on a continuous basis by the Permit Holder-			
3.81 Be treated to comply with the aforementioned standard and discharged in a legal manner; and/or,	*n/a*	**n/a**	
3.8.2 With the written approval of the Regional Director be evaporated in dams and/or be evaporated by spraying over those portions of the Site which comply with the requirements set in terms of condition 3.1	*2*	**2**	Contaminated runoff is contained within the disposal trenches where it evaporates
3.9 Works constructed in compliance with condition 3.8 shall be of such a capacity as to accommodate all runoff and leachate which could be expected as a result of the estimated maximum precipitation. Such works shall, under the said rainfall event, maintain a freeboard of half a metre.	*1*	**1**	Trenches are not specifically sized to contain the maximum rainfall event
3.10 The Site shall be constructed in accordance with recognised civil engineering practice to ensure that it remains stable	*2*	**2**	No unstable slopes observed
3.11 The maximum height of the Site above ground level shall not exceed 0, 5 metres.	*2*	**2**	
3.12 The slope of the sides of the shall be constructed in such a manner that little or no erosion occurs	*2*	**2**	No erosion observed
3.13 The Permit Holder shall make adequate sanitation facilities on the Site	*0*	**0**	No sanitation facilities onsite, although it must be noted that there no full-time staff on site and the site is only operated intermittently
4. ACCESS CONTROL			
4.1 Weatherproof, durable and legible notices in at least three official languages applicable in the area, shall be displayed at each entrance to the Site. These notices shall prohibit unauthorised entry and state the hours of operation, the name, address and telephone number of the Permit Holder and the person responsible for the operation of the Site.	*2*	**2**	Compliant
4.2 The Site shall be fenced and/or secured to reasonably prevent unauthorised entry.	*2*	**2**	Compliant
4.3 The Permit Holder shall take all reasonable steps to maintain service roads in a condition which ensures unimpeded access to the Site for vehicles transporting waste and to keep the roads free of waste	*2*	**2**	Compliant
4.4 The Permit Holder shall ensure that all entrance gates are manned during the hours of operation and locked outside the hours of operation.	*2*	**2**	The gates is manned when the site is open, the rest of the time the gate is locked.
4.5 The Permit Holder shall ensure effective access control.	*2*	**2**	Compliant
4.6 The Permit Holder shall take all reasonable steps to prevent the disposal of waste on the Site for which the Site has not been approved.	*2*	**2**	None noted during inspection.
5. OPERATION			

5.1 Waste disposal and operation shall be done according to the relevant minimum requirements, Operational Report: no 108/599 dated February 1998, the conditions of this Permit and any other written instruction by the Department.	*2*	**2**	Compliant
5.2 Waste disposed of on the Site shall be compacted and covered on a daily basis with a minimum of 150 millimetres of soil or other material approved by the Regional Director.	*0*	**0**	Daily compaction doesn't take place. The quantity of exposed waste in the trenches is minimal and it is covered when the trench is full, as per ordinary trench operational requirements.
5.3 The Permit Holder shall take all reasonable steps to ensure that the Site is operated in a manner which shall prevent the creation of nuisance conditions or health hazards.	*2*	**2**	None noted.
5.4 Waste disposed of on the Site may not be reclaimed.	*2*	**2**	No reclaimers present on site.
6. RECORDING			
6.1 The Permit Holder shall keep a record of and update all the information referred to in Annexure II on an annual basis	*2*	**1**	Annexure II hasn't been completed, although IPWIS report is submitted monthly (only 3 months provided), see Appendix
7. REPORTING			
7.1 The information required in terms 6.1. shall be submitted to the Regional Director within a period of one year from the date of issuing of this Permit and annually thereafter	*2*	**2**	The information is submitted on an annual basis
8. REHABILITATION AND CLOSURE OF THE SITE			
8.1 The Permit Holder shall, at least 60 days prior to the intended closure of the Site, notify the Regional Director by registered mail of such closure and submit final rehabilitation plans for his approval	*n/a*	*n/a*	The site is still operational
8.2 Immediately following the cessation of operations with the intention to close the Site, the surface of the Site shall be covered in such a way that:			
8.2.1 The formation of pools due to rain is prevented	*n/a*	*n/a*	The site is still operational
8.2.2 Free surface runoff of rain—water is ensured; and	*n/a*	*n/a*	The site is still operational
8.2.3 No objects or materials which may hamper the rehabilitation of the Site are present	*n/a*	*n/a*	The site is still operational
8.3 The Permit Holder shall rehabilitate the Site in accordance with a rehabilitation plan, which shall be submitted by the Permit Holder and which shall be to the satisfaction of the Regional Director.	*n/a*	*n/a*	The site is still operational
9. LEASING AND ALIENATION OF THE SITE			
9.1 Should the Permit Holder want to alienate or lease the Site, he shall notify the Regional Director in writing of such an intention at least 60 days prior to the said transaction.	*n/a*	*n/a*	The site is still operational
10. GENERAL			
10.1 This Permit shall not be transferable.	*n/a*	*n/a*	The site is still operational
10.2 This Permit shall not be construed as exempting the Permit Holder from compliance with the provisions of the Health Act, 1977 (Act 63 of 1977), the Water Act, 1956 (Act 54 of 1956) or any other applicable act, Ordinance, regulation or by- law.	*n/a*	*n/a*	The site is still operational

4 Compliance rating

The audit was scored according to the following values in the table below:

Table 1 Audit scoring values

Description	Score
N/A	-
Non-Compliant	0
Partially Compliant	1
Complaint	2

* Not counted in the scoring

Overall, of the 40 permit conditions, only 26 were applicable and audited. Therefore the maximum score achievable is 52. The results of this audit are an overall score of 45, broken-down as detailed below:

26	86.5%	5
PERMIT CONDITIONS AUDITED	OVERALL SCORE	ACTIONS REQUIRED

This score can be compared to previous external audit scores as illustrated below:

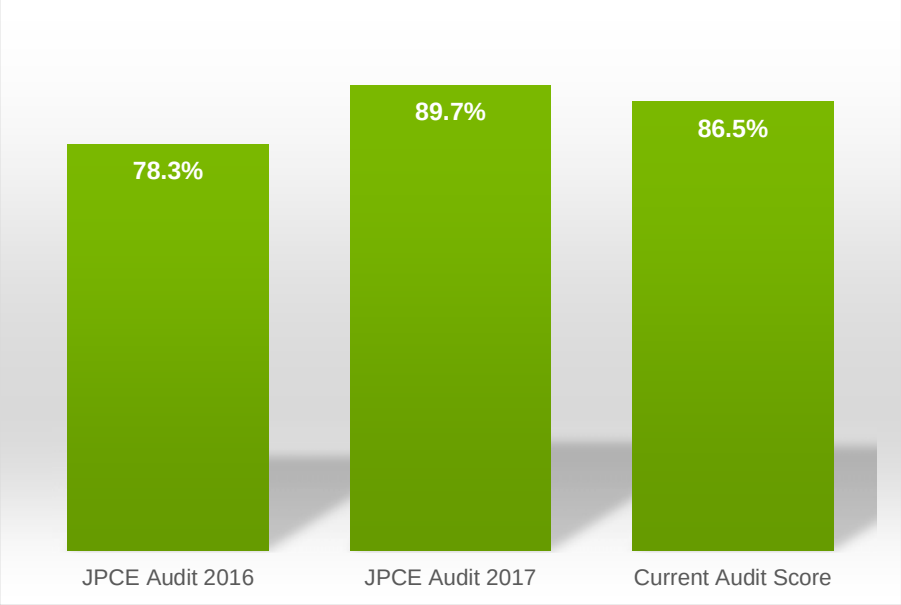

Figure 2 Comparison of previous audit scores

This can be broken down further into the permit heading titles to see which categories need attention. Anything above 85% is considered acceptable (green), between 65-84% requires attention (amber) while anything below 65% requires urgent attention and immediate action (red).

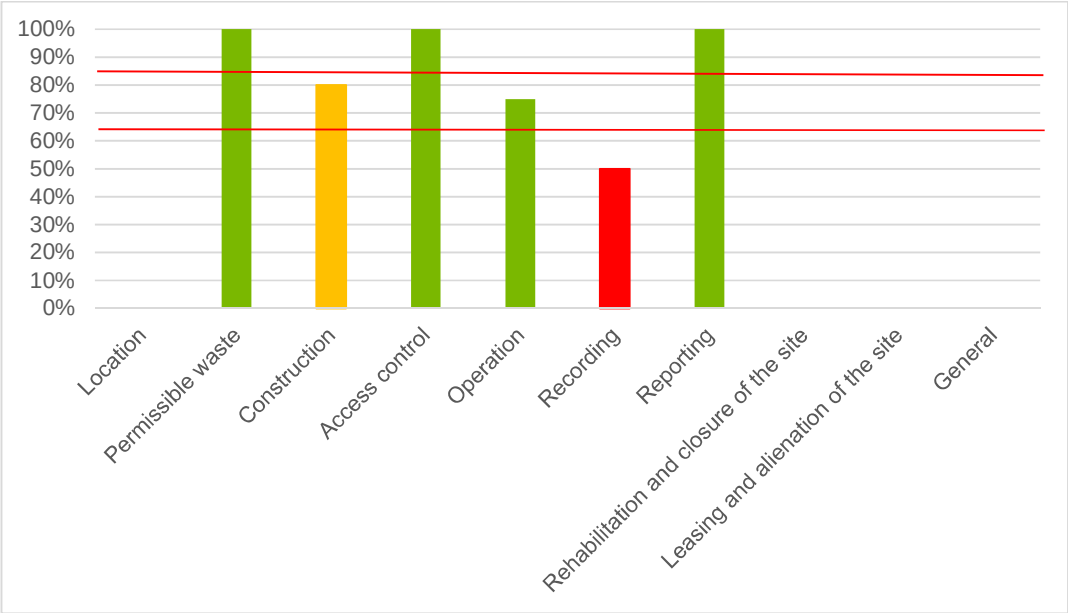

Figure 3 Main audit heading scores

5 Site inspection

5.1 Access control

The access control measures in place meet the permit conditions. The entire site is fenced with a diamond mesh fence (1.8m high). There are two gated access points, one, immediately off the road (waist height) while the other one is at the landfill site itself (1.8m high). There is no manned access control as the site is only opened by the supervisor when waste is being deposited at the site, all other times it is closed. There are no buildings on site. The access road is good condition which allows unimpeded access to the site. The site also has a notice board in three languages.

5.2 Operation and maintenance

The site is operated in the 'trenching method' where no compaction is done or daily cover applied. When the trench is full, it is covered and a new trench dug. Generally, the site is well operated, with no waste stockpiled outside of the trenches. The site is not visible from the road or any neighbours.

5.3 Documentation

There is no weighbridge present on site however a record is kept of the type of waste and size of vehicle entering the site; this is submitted monthly to iPWIS. There is no formal incidents and complaints register.

As per Clause 6 and 7, the annual submission of Annexure II of the permit, which contains the tonnages received at the site for the previous year, is contained in Appendix C B of this document. It must be noted that only three months of data were available.

5.4 Landfill plant and equipment

There is no landfill plant or equipment on site. It is understood a TLB is brought in when trenches need to be closed.

6 Previous audit reports

Two external audits were previously completed.

- April 2016 - JPCE audit
- April 2017- JPCE audit

The previous external audits have been plotted on a graph against the current audit findings to better analyse trends in permit compliance improvements/decline. Where data is missing it means that condition was not audited at the time.

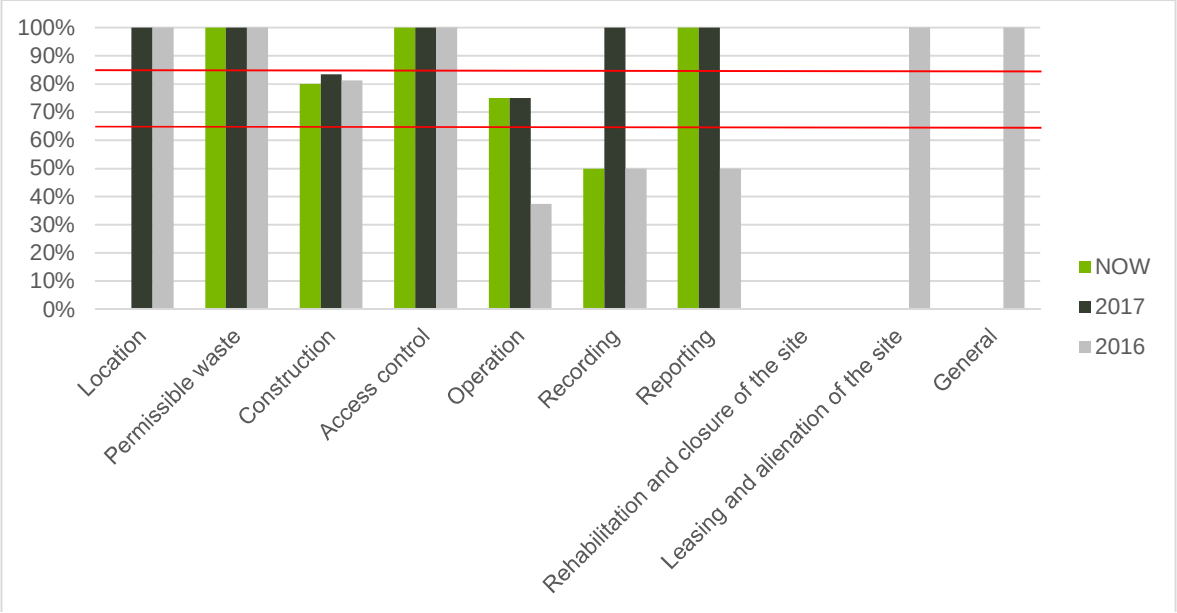

Figure 4 Audit trends

6.1 Repeat audit findings

The following permit conditions continue to be raised in repeat audits as non-compliant:

- Construction – No sanitation facilities on site
- Operation – No compaction and daily cover

6.2 Improvement measures noted

The site is only operated on an *adhoc* basis, no significant changes to the operation of the site have occurred since the previous audit.

7 Recommendations

Table 2 Recommendations

Clause	Action	Cost estimate	Due date
3.6	Ensure the disposal trenches are deep enough to contain both waste and maintain a freeboard of 0.5m	R -	Before the next rainy season
3.9	Ensure the disposal trenches are deep enough to contain both waste and maintain a freeboard of 0.5m		Before the next rainy season

3.13	Since the site is only operated on an adhoc basis and not for a full day, the requirement for sanitation facilities is realistically not required, therefore this will be a repeat audit finding unless the Permit is amended (which is unrealistic for such a minor item). Therefore DEADP should be made aware that this will be a repeat audit finding.	R -	Before the next external audit
5.2	Due to the method of disposal, this will be a repeat audit finding, DEADP should be made aware of this	R -	Before the next external audit
6.1	Annexure II of the Permit must be filled out on an annual basis	R -	Annually

8 Conclusions

Overall, the Op-die-Berg Waste Disposal Facility appears to be a well-run operation in terms of waste management. Waste is disposed of in a controlled and responsible manner.

Minimal quantities of builder's waste and garden waste is received at the site, which is only operated on an *adhoc* basis, when not in use, the facility is closed to the public. All residential waste being collected by the Witzenburg Municipality and disposed of at the Tulbagh Waste Disposal Facility.

CLASS: G:C:B+

WASTE DISPOSAL SITE: OP-DIE-BERG WASTE DISPOSAL SITE

LOCATION: PORTION I OF THE FARM KLEINVLEI NO 209

PERMIT HOLDER: BREEDE RIVER DISTRICT COUNCIL

ADDRESS: P.O. BOX 91, WORCESTER, 6849.

PERMIT IN TERMS OF SECTION 20 OF THE ENVIRONMENT CONSERVATION ACT, 1989 (ACT 73 OF 1989)

By virtue of the powers delegated to me by the Minister of Water Affairs and Forestry (hereinafter referred to as "the Minister"), I, Barbara Gay Schreiner, in my capacity as Chief Director: Water Use and Conservation in the Department of Water Affairs and Forestry (hereinafter referred to as "the Department"), hereby, in terms of section 20(1) of the Environment Conservation Act, 1989 (Act 73 of 1989), authorise the abovementioned Permit Holder to establish, further develop and operate the abovementioned waste disposal site, subject to the conditions specified herein.

PERMIT CONDITIONS

In this Permit, "Regional Director" means the Regional Director: Western Cape of the Department who may be contacted at the address below:

Regional Director: Western Cape
Department of Water Affairs and Forestry
Private Bag X16
SANLAMHOF
7532

1. **LOCATION**

1.1 This Permit authorises the establishment, further development and operation of a waste disposal site on Portion I of the farm Kleinvlei No 209, (hereinafter referred to as "the Site") according to the report 108/599 by BKS Consulting Engineers, dated February 1998 (hereinafter referred to as "the Report"), submitted by the Permit Holder.

The location of the Site shall be according to the co-ordinates indicated on the permit application form, submitted by the Permit Holder.

2. PERMISSIBLE WASTE

2.1 The Site may be used for the disposal of all waste types, excluding those listed in Annexure I and excluding those where specific control has been established in terms of the Nuclear Energy Act, 1993 (Act 131 of 1993). Waste types controlled in terms of the Minerals Act, 1991 (Act 50 of 1991) and the Electricity Act, 1987 (Act 41 of 1987) are also excluded from disposal on the Site unless written permission has been obtained from the Regional Director.

2.2 The Permit Holder shall take all reasonable steps to ensure that -

2.2.1 no organic or inorganic element or compound which may have a definite acute or chronic negative effect on human or animal health and/or the environment, due to its toxic, physical, chemical or persistent characteristics and which corresponds with the UNEP definition of hazardous waste be disposed of on the Site;

2.2.2 no medical waste be disposed of on the Site; and

2.2.3 no scheduled pharmaceutical products registered in terms of the Medicines and Related Substances Control Act, 1965 (Act 101 of 1965) or associated containers be disposed of on the Site.

3. CONSTRUCTION

3.1 The Site or any portion thereof may only be used for the disposal of permissible waste if the Site or any such portion has been constructed or developed according to condition 3 of this Permit.

3.2 Construction and further development within the Site shall be carried out under the supervision of a suitably qualified person proposed by the Permit Holder and approved by the Regional Director.

3.3 After construction of the Site or further development within the Site, the Permit Holder shall notify the Regional Director thereof and the person referred to in condition 3.2 shall submit a certificate or alternatively a letter to the Regional Director that the construction of the Site or further development within the Site, as proposed by the Permit Holder and approved by the Regional Director, is in accordance with recognised civil engineering practice before disposal may commence on the Site. The completed construction works of the Site shall be inspected by an official of the Department and the person referred to in condition 3.2. If the Regional Director is satisfied with the construction of

the Site or any further development within the Site and has given written permission, the Permit Holder may use the Site or any further development within the Site for the disposal of waste.

3.4 The Permit Holder shall take all reasonable steps, such as suitable zoning and/or written agreements with adjacent landowners, to establish and maintain an unbuilt area or "buffer zone" of 200 metres between the Site and the nearest residential and/or light industrial areas during the operative life of the Site. Heavy industries or industries which may create nuisance conditions may be permitted within the buffer zone in terms of the appropriate legislation.

3.5 Works shall be constructed and maintained on a continuous basis by the Permit Holder to divert and drain from the Site in a legal manner, all runoff water arising on land adjacent to the Site, which could be expected as a result of the estimated maximum precipitation during a period of 24 hours with an average frequency of once in fifty years (hereinafter referred to as the "estimated maximum precipitation"). Such works shall, under the said rainfall event, maintain a freeboard of half a metre.

3.6 Works shall be constructed and maintained on a continuous basis by the Permit Holder to divert and drain from the working face of the Site, all runoff water arising on the Site, which could be expected as a result of the estimated maximum precipitation and to prevent such runoff water from coming into contact with leachate from the Site. Such works shall, under the said rainfall event, maintain a freeboard of half a metre.

3.7 Runoff water referred to in condition 3.6 shall comply with the quality requirements of the General Standard, prescribed in terms of section 21(1)(a) of the Water Act, 1956 as published in Government Notice 991 of 18 May 1984, or with such quality requirements as may from time to time be determined by the Minister and shall be drained from the Site in a legal manner.

3.8 Runoff water referred to in condition 3.6 which does not comply with the quality requirements applicable in terms of condition 3.7 and all leachate shall, by means of works which shall be constructed and maintained on a continuous basis by the Permit Holder -

3.8.1 be treated to comply with the aforementioned standard and discharged in a legal manner; and/or,

3.8.2 with the written approval of the Regional Director be evaporated in dams and/or be evaporated by spraying over those portions of the Site which comply with the requirements set in terms of condition 3.1.

3.9 Works constructed in compliance with condition 3.8 shall be of such a capacity as to accommodate all runoff and leachate which could be expected as a result of the estimated maximum

precipitation. Such works shall, under the said rainfall event, maintain a freeboard of half a metre.

3.10 The Site shall be constructed in accordance with recognised civil engineering practice to ensure that it remains stable.

3.11 The maximum height of the Site above ground level shall not exceed 0,5 metres.

3.12 The slope of the sides of the Site shall be constructed in such a manner that little or no erosion occurs.

3.13 The Permit Holder shall make provision for adequate sanitation facilities on the Site.

4. ACCESS CONTROL

4.1 Weatherproof, durable and legible notices in at least three official languages applicable in the area, shall be displayed at each entrance to the Site. These notices shall prohibit unauthorised entry and state the hours of operation, the name, address and telephone number of the Permit Holder and the person responsible for the operation of the Site.

4.2 The Site shall be fenced and/or secured to reasonably prevent unauthorised entry.

4.3 The Permit Holder shall take all reasonable steps to maintain service roads in a condition which ensures unimpeded access to the Site for vehicles transporting waste and to keep the roads free of waste.

4.4 The Permit Holder shall ensure that all entrance gates are manned during the hours of operation and locked outside the hours of operation.

4.5 The Permit Holder shall ensure effective access control.

4.6 The Permit Holder shall take all reasonable steps to prevent the disposal of waste on the Site for which the Site has not been approved.

5. OPERATION

5.1 Waste disposal and operation shall be done according to the relevant minimum requirements, Operational Report no 108/599 dated February 1998, the conditions of this Permit and any other written instruction by the Department.

5.2 Waste disposed of on the Site shall be compacted and covered on a daily basis with a minimum of 150 millimetres of soil or other material approved by the Regional Director.

5.3 The Permit Holder shall take all reasonable steps to ensure that the Site is operated in a manner which shall prevent the creation of nuisance conditions or health hazards.

5.4 Waste disposed of on the Site may not be reclaimed.

6. RECORDING

6.1 The Permit Holder shall keep a record of and update all the information referred to in Annexure II on an annual basis.

7. REPORTING

7.1 The information required in terms of condition 6.1 shall be submitted to the Regional Director within a period of one year from the date of issuing of this Permit and annually thereafter.

8. REHABILITATION AND CLOSURE OF THE SITE

8.1 The Permit Holder shall, at least 60 days prior to the intended closure of the Site, notify the Regional Director by registered mail of such closure and submit final rehabilitation plans for his approval.

8.2 Immediately following the cessation of operations with the intention to close the Site, the surface of the Site shall be covered in such a way that –

8.2.1 the formation of pools due to rain is prevented;

8.2.2 free surface runoff of rain-water is ensured; and

8.2.3 no objects or materials which may hamper the rehabilitation of the Site are present.

8.3 The Permit Holder shall rehabilitate the Site in accordance with a rehabilitation plan, which shall be submitted by the Permit Holder and which shall be to the satisfaction of the Regional Director.

9. LEASING AND ALIENATION OF THE SITE

9.1 Should the Permit Holder want to alienate or lease the Site, he shall notify the Regional Director in writing of such an intention at least 60 days prior to the said transaction.

10. GENERAL

10.1 This Permit shall not be transferable.

10.2 This Permit shall not be construed as exempting the Permit Holder from compliance with the provisions of the Health Act, 1977 (Act 63 of 1977), the Water Act, 1956 (Act 54 of 1956) or any other applicable act, ordinance, regulation or by-law.

CHIEF DIRECTOR: WATER USE AND CONSERVATION
p.p. MINISTER OF WATER AFFAIRS AND FORESTRY

DATE: 11.12.96

ANNEXURE I

WASTE WHICH SHALL NOT BE ACCEPTED ON THE SITE

1. Waste considered to be dangerous by virtue of their fire hazard. That is all waste with a closed cup flashpoint < 61°C.

2. Any waste with a substance which is a Group A and/or Group B carcinogen. Group A carcinogens have been clinically and epidemiologically proven in humans. Group B carcinogens have been proven without doubt in laboratory animals.

3. Any waste with a substance at a concentration greater than 1% which is a Group C and/or Group D carcinogen. Group C carcinogens have shown limited evidence in animals. Group D carcinogen – the available data is inadequate and doubtful.

4. Any waste with a substance which is a Mutagen.

5. Any infectious waste, unless it has been incinerated at 800°C or higher for at least 1 second. Infectious waste is waste which is generated during the diagnosis, treatment or immunisation of humans or animals; in the research pertaining to this; in the manufacturing or testing of biological agents -including blood, blood products and contaminated blood products, cultures, pathological wastes, sharps, human and animal anatomical wastes and isolation waste that contain or may contain infectious substances.

6. Any waste with a substance with a LD_{50} for acute oral toxicity smaller and equals to 5000 mg/kg. The LD_{50} for acute oral toxicity shall be as defined in SABS 0228:1995.

7. Any waste with a substance with a LD_{50} for acute dermal toxicity smaller and equals to 2000 mg/kg. The LD_{50} for acute toxicity on dermal toxicity shall be as defined in SABS 0228:1995.

8. Any waste with a substance with a LC_{50} for acute toxicity on inhalation smaller and equals to 10mg/l. The LC_{50} for acute toxicity on inhalation shall be as defined in SABS 0228:1995.

9. Any waste with a substance with a LC_{50} (96hr) for acute ecotoxicity smaller and equals to 1000 mg/l.

10. All waste with a pH less than 6 or greater than 12.

11. All material which falls in Class 1 (explosives), Class 2 (compressed gases) and Class 7 (radioactive materials), as specified in SABS 0228:1995.

12. Any waste which is difficult to analyse and classify.

13. Any complexes of heavy metal cations, paints and paint sludges, or laboratory chemicals.

ANNEXURE II

TABLE 1 AUDIT SCORING VALUES 5
TABLE 2 AUDIT RESULTS FROM 29 MARCH 2019 10
TABLE 3 SUMMARY OF REPEAT FINDINGS FROM PREVIOUS AUDITS AND CURRENT AUDIT 27
TABLE 4 IMPROVEMENT MEASURES FROM PREVIOUS AUDIT FINDINGS 30

1 Introduction

Aurecon was appointed in March 2019 by the Witzenberg Municipality (WM) to conduct the bi-annual external licence compliance audit of the Tulbagh Waste Disposal Facility (WDF) as required by the variation licence number No. 19/2/5/4/B5/14/WL0056/15 (15 July 2014) issued by the Western Cape Department of Environmental Affairs and Development Planning (DEADP) in terms of the National Environmental Management: Waste Act, 2008 (Act No.59 of 2008)(NEMWA). See **Appendix B** for the Waste Management Licence (WML).

The original permit (16/2/7/G100/D6/Z1/P305) was issued on July 1998 and has been superseded by the variation licence. The licence issued was appealed by the public and the WM is currently undergoing a Basic Assessment amendment process to update the licence (if authorised). Until such time as the new licence has been issued, compliance to the existing licence should be monitored. Previous external audits done at the WDF are summarised below:

ECA Section 20 Permit audits (Ref no: 16/2/7/G100/D6/Z1):

13 October 2015 – DEA&DP

Variation licence audits (Ref no: 19/2/5/4/B5/14/WL0056/16):

4 Oct 2017 - DEA&DP

19 April 2018 – Aurecon 18 October 2018 - DEA&DP

The site inspection for the external audit and verification was conducted by Ms. Jeanne-Louise Wiese of Aurecon on 29 March 2019. The criteria used for the audit was the specific variation license conditions, licence No. 19/2/5/4/B5/14/WL0056/15 . The weather on the day was clear and warm.

2 Site details

The Tulbagh WDF is located approximately 2 km north west of the centre of the town Tulbagh, on Drostdy Avenue (off Waveren road). Please refer to **Figure 1** below for a locality map.

3 Compliance rating

The audit was scored according to the following values in the table below:

Table 1 Audit scoring values

Description	Score
N/A	-
Non-Compliant	0
Partially Compliant	1
Complaint	2

* Not scored

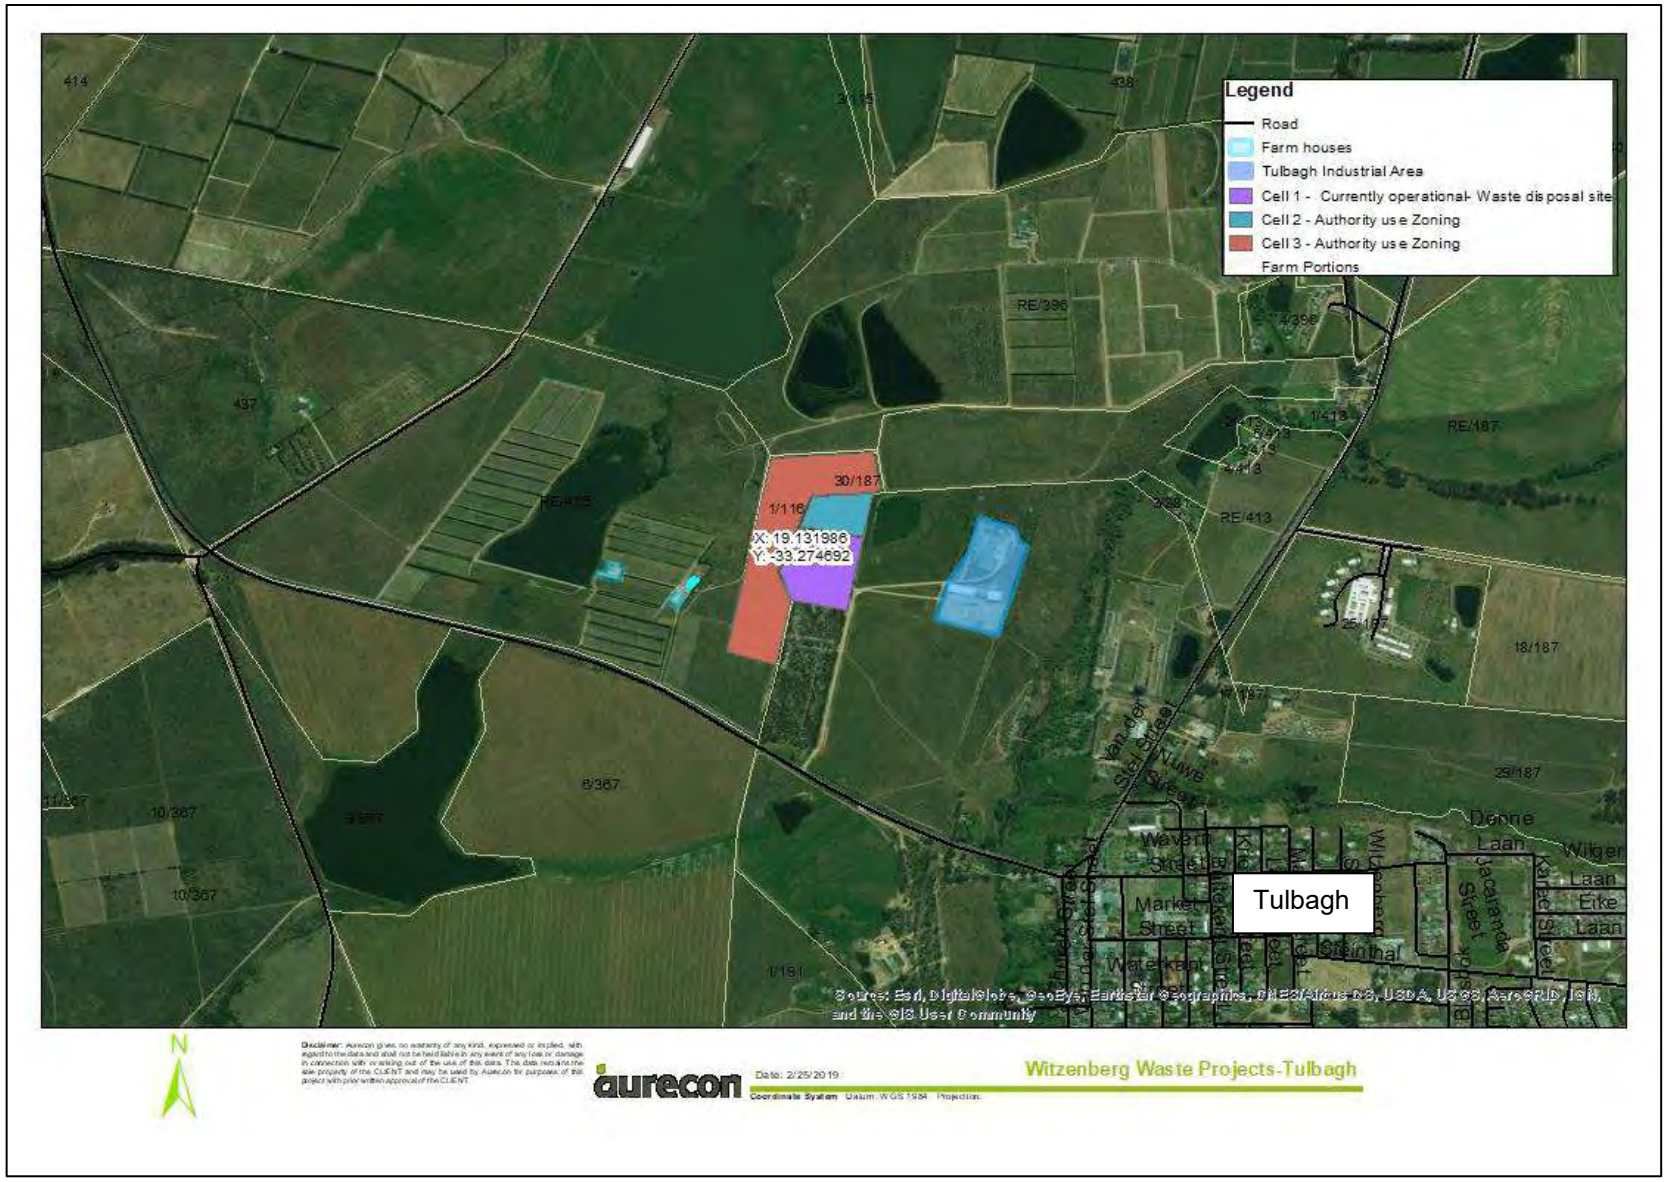

Figure 1 Site location

Overall, of the 135 permit conditions, only 92 were applicable and audited. Therefore, the maximum score achievable is 184. The results of this audit are an overall score of 159, broken-down as detailed below:

92	85.87%	23
PERMIT CONDITIONS AUDITED	OVERALL SCORE	NON-COMPLIANCES

This score can be compared to previous external audit scores as illustrated below.

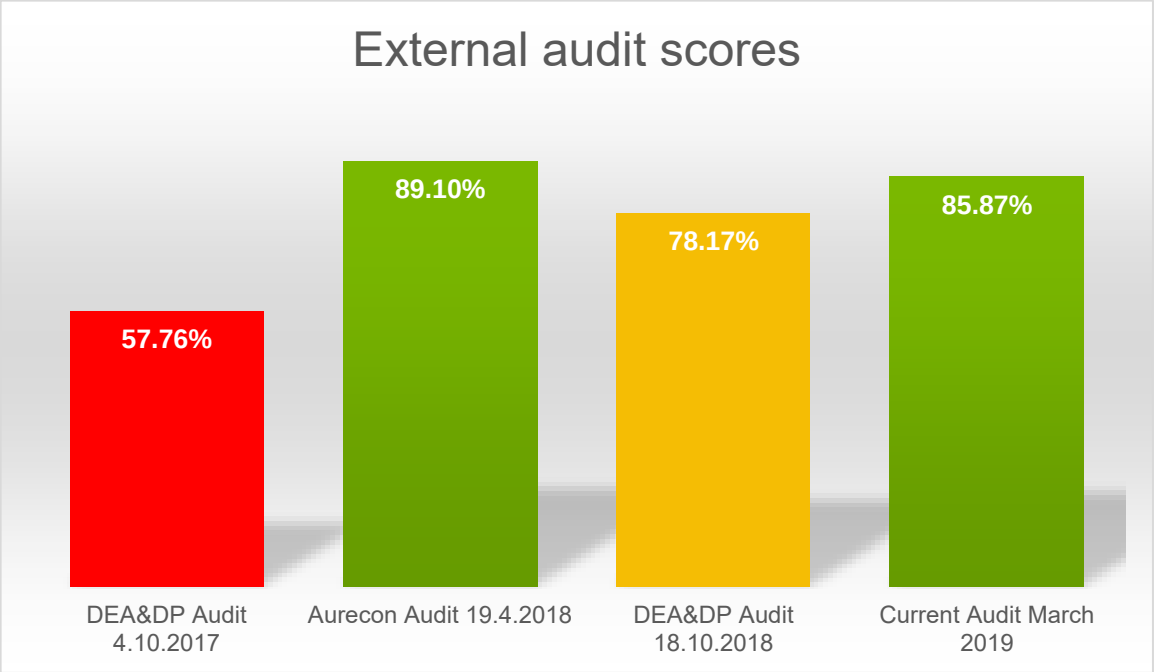

Figure 2 External audit scores

This can be broken down further into the permit heading titles to see which categories need attention. Anything above 85% is considered acceptable (green), between 65-84% requires attention (amber) while anything below 65% requires urgent attention and immediate action (red).

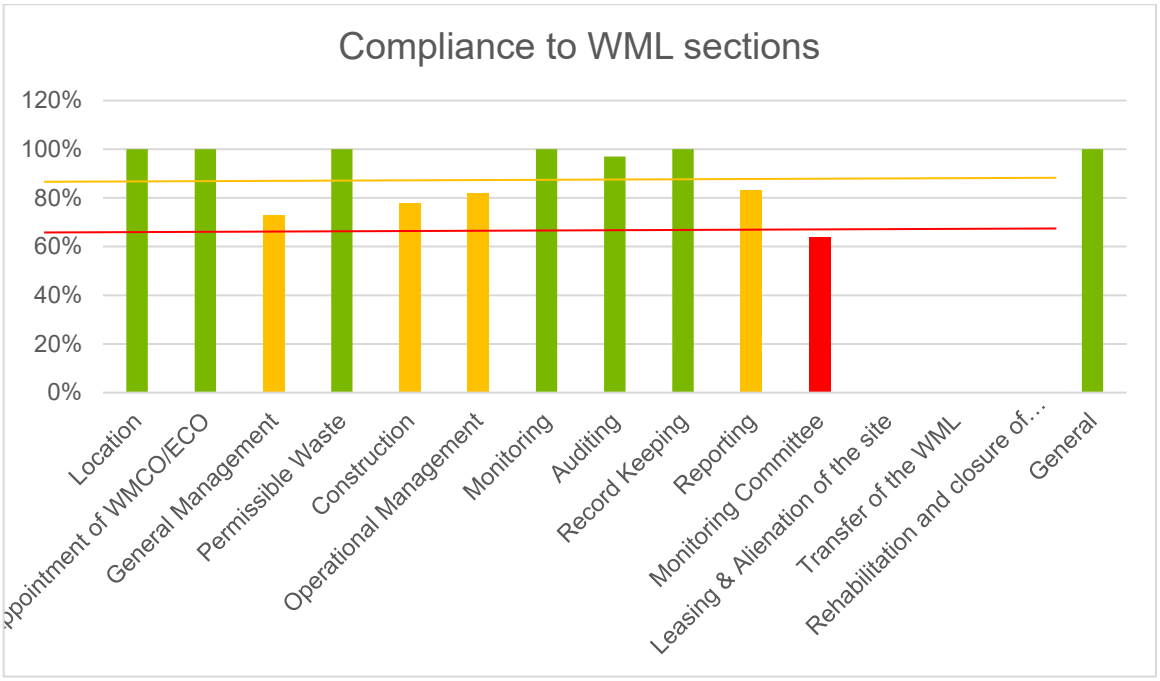

Figure 3 Compliance audit scores per section of the WML

4 Site inspection

4.1 Access control

The access control measures are in place meet the permit conditions. The entire site is fenced with a diamond mesh fence (1.8m high). There is a manned and gated access point. The access road is good condition which allows unimpeded access to the site. The site also has a notice board in three languages.

4.2 Operation and maintenance

Figure 2 above indicates a steady improvement in operational management of the Tulbagh WDF. Some of the most important improvements made include stormwater containment collection on site, groundwater monitoring, leachate monitoring and waste recycling on site. The auditor is however of the opinion that there is not sufficient cover material available for effective daily covering of waste since the eastern and northern sides of the WDF has large amounts of exposed waste, which should have been covered and revegetated by this stage. (Refer to **Figure 1**). All disposal is taking place outside of the current operational cell. There is also inadequate collection of wind-blown litter on the adjacent properties, especially east and north of the WDF (including the dam to the east).

There is a small recycling operation on the site, which is run by a private business to provide employment opportunities for people with disabilities.

The landfill supervisor and personnel have undergone appropriate training in “Waste Awareness” which is accredited by the Institute of Waste Management of South Africa (IWMSA).

4.3 Documentation

There is no weighbridge present on site however record is kept of the type of waste and size of vehicle entering the site; this is submitted monthly to iPWIS, see **Appendix D** . The WML, Operational Plan, Emergency Response Plan and complaints register is also kept on site.

4.4 Water monitoring

There are three boreholes on site (one upstream and two downstream). Samples are taken on an annual basis and were sampled on:

- 9 June 2014
- 25 September 2014
- 5 May 2015
- 16 September 2015
- 5 April 2016
- 12 June 2017
- 4 October 2018
- 1 March 2019

The water samples were tested by AL Abbott and Associates (Pty) Ltd, a SANAS accredited laboratory. Testing was done in accordance with the water quality variables listed in the Permit Annexure I and II (See attached **Appendix C**. The only variable that was not tested for was 'free and saline ammonia (NH_4-N)'. Water quality is only tested on an annual basis and not bi-annual as required by the permit (although this was done during 2014 and 2015).

On average, the results of the groundwater quality tests fall within SANS 241-1:2015 acceptable parameters, except for E.coli, Total Coliform Bacteria and Heterotrophic Plate Count. It is unlikely that these elevated results are as a result of the WDF since the site only accepts general waste. The Witzenberg Municipality should investigate the reasons for the elevated levels.

4.5 WDF plant and equipment

The WDF plant and equipment on site was observed to be in good working order and fairly adequate to undertake the daily operational tasks required. It would however be recommended to obtain a compactor instead of using the onsite excavator bucket for compacting.

5 Audit checklist

The site was audited against the conditions contained within the variation license (Ref. No: 9/2/5/4/B5/14/WL0056/16).

Table 2 Audit results from 29 March 2019

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
1. LOCATION					
1.1 This Licence authorises the Witzenberg Municipality to dispose of and recover general waste on remainder of Erf I , Portion I of the farm Middelpos No. 1 16 and Portion 30 of the farm Kruys Valley No. 187, Division of Tulbagh, Winelands District Municipality.	**2**	**n/a**	**n/a**	**2**	The site has been established on the remainder of Erf 1.
1.2 The location of the Facility must be according to co-ordinates indicated in the Waste Management Licence Application Additional Information Annexure dated March 2016,	**n/a**	**2**	**2**	**2**	The site is located at the correct co-ordinates
1.3 The surveyor General (SG21) digit codes are: C07500030000000100000 C07500030000016600001 C07500030000018700030	**2**	**n/a**	**0**	**2**	The site has been established on C07500030000000100000.
1.4 The size of the property within which the activity is undertaken is approximately 128 678 m^2. The current (Phase I) development footprint is approximately 29 624m^2.	**n/a**	**n/a**	**1**	**2**	The phase1 development (Cell 1) covers approximately 30 000m^2. There is however dumping taking place on Cell 2 (Refer to **Figure 1** above). The total area of disturbance amounts to approximately 47 428m^2. It does however still fall within the permitted footprint of 128678m^2
1.5 The Licence Holder shall within a period of 60 days from the date of issuing of this Licence, apply for the rezoning of all the licenced land for waste disposal purposes. Should the Licence Holder be unsuccessful in rezoning the Facility for waste disposal purposes within a period of (two) years from the date of issuing of this Licence, a written motivation shall be provided to the Director defining the reasons why the application for rezoning failed. The Director shall then take an appropriate decision regarding the future of the Facility	**n/a**	**n/a**	**2**	**2**	Rezoning is not required since the site is located on land zoned for “Authority use” which includes waste disposal activities.

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
1.6 The Licence Holder shall take all reasonable steps, such as buying out land or acquiring servitudes, to prevent the development of further residential and / or light industrial areas closer to the Facility. Heavy industries or industries which may create nuisance conditions may be permitted within the buffer zone in terms of the appropriate legislation.	**2**	**2**	**n/a**	**2**	No development within buffer area (Cell 3). Refer to **Figure 1**.
2. APPOINTMENT OF WASTE MANAGEMENT CONTROL OFFICER / ENVIRONMENTAL CONTROL OFFICER					
2.1 Waste Management Control Officer (WMCO) or Environmental Control Officer (ECO) must be appointed, who will monitor and ensure compliance and the correct implementation of all mitigation measures and provisions as stipulated in the Licence and Environmental Management Programme (EMP). The WMCO/ ECO must-	**2**	**2**	**2**	**2**	Mr Johnny Jacobs of the WM is the WMCO.
2.1.1 Report any non-compliance with any Licence conditions or requirements or provisions of NEM: WA to the Licensing Authority through means reasonably available.	**1**	**n/a**	**n/a**	**2**	Previous audit reports submitted to DEA&DP (See **Appendix E – Proof of audit submission to DEA&DP**)
2.1.2 Monitor any future construction activities and ensure that the construction plans are in accordance with the approved engineering design.	**1**	**n/a**	**1**	**2**	Construction activities are monitored. Awaiting decision on current BAR amendment process for license variation to expand operations from Cell 1 to Cell 2. This process involves professional engineering designs for the expansion.
2.2 The duties and responsibility of the WMCO/ ECO should not be seen as exempting the Licence Holder from any other legal obligation in terms of the NEM:WA	**n/a**	**n/a**	**n/a**	**2**	Currently undergoing BAR amendment process to authorise the expansion of the facility and ensure compliance and feasibility of license conditions.
3. GENERAL MANAGEMENT					
3.1 The EMP, submitted as part of the final BAR, is hereby approved and must be implemented together with all the conditions of this Licence	**0**	**n/a**	**1**	**1**	An effort is made to implement the license conditions and a copy is retained on site, including the Operational plan compiled by JPCE (EMP). There was however only evidence of site supervisor obtaining environmental training but not the rest of the staff.
3.2 A copy of this Licence, the EMP and the Operational Plan must be kept at the Facility where the activity will be undertaken. These documents must be produced to any authorised official of the Department who requests to see them and must be made available for inspection by any employee or agent of the holder of the Licence who works or undertakes work at the Facility	**2**	**1**	**2**	**1**	The WML and Operational Plan is available on site. There was however no copy of the EMP.

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
3.3 The Facility must be managed by fit and proper persons who are competent in respect of the responsibilities to be undertaken by them.	1	2	2	2	Managed by a competent person (Mr. Johnny Jacobs)
3.4 The Licence Holder shall remain responsible for the Facility, and/or any of its impacts on the environment	n/a	n/a	n/a	2	The License Holder is the Witzenberg Municipality and they take full responsibility for the impacts on the environment by applying for a variation license application to authorise the expansion of the WDF.
3.5 The Licence Holder must notify the Director immediately of events or incidents that may cause significant environmental damage or breach the requirements of the Licence, EMP or Operational Plan.	n/a	2	n/a	n/a	There was no evidence of any incidents on site to be reported.
3.6 Waste should be managed in such a way as not to cause any nuisance conditions to the surrounding area.	1	2	1	0	The surrounding area is littered with wind-blown waste from the WDF. Measures should be implemented to undertake regular clean-ups around the WDF on adjacent properties and the dam to the east. **Refer to Appendix A for site photographs of the litter.**
3.7 Staff should receive a basic level of environmental awareness training, and be trained on the identification and proper handling of waste	2	2	2	2	Staff have undergone environmental awareness training through the LGSET during 2018.
3.8 An Emergency Response Plan (ERP) must be developed in accordance to the EMP, and all staff must be trained in the implementation thereof. The ERP should be regularly updated and must include fire evacuations, injury on duty and accidents caused by unexpected hazardous waste ending up in the Facility	0	1	2	2	A copy of Emergency Response Plan was kept on site together with the License conditions and Operational Plan (JPCE, 2015).
3.9 All fires at the Facility must be treated as a potential emergency and dealt with accordingly i.e. the Licence Holder must develop and implement a routine fire procedure to extinguish any fires present on the Facility as soon as possible, even after normal working hours (refer to EMP).	0	2	2	n/a	No fires recorded or present on site.
3.10 The Facility must comply with the Provincial Noise Control Regulations P.N. 200/2013 as promulgated under ECA	n/a	2	n/a	2	No noise complaints received, the site had operational vehicles on site during the audit but for a rural area it should not be considered a nuisance.
3.11. The presence of any nuisance conditions must be monitored and measures must be undertaken to rectify the presence of each nuisance condition	1	2	1	0	There are fly traps installed around the site. The surrounding area is littered with wind-blown waste from the WDF. Measures should be implemented to undertake regular clean-ups around the WDF on adjacent properties and the dam to the east. **Refer to Appendix A for site photographs of the litter.**

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
3.12 The Licence Holder must minimise the proliferation of vermin at the Facility by implementing appropriate measures	2	2	2	2	No vermin noted during inspection
3.13 In order to prevent nuisance conditions, pollution and/or littering incidents, the Licence Holder must ensure that all waste storage containers are not overfilled and must be accessible	0	2	2	2	Only two bins kept on site, both are managed well
3.14 Any complaint from the public must be attended to by the Licence Holder, who must take all reasonable and practical steps to alleviate the cause of the complaint within a reasonable timeframe to the satisfaction of the Department and record it in terms of Condition 9.	2	2	2	2	Complaint register kept on site. No complaints recorded.
3.15 Duty of care should be exercised in accordance with section 28 of the National Environmental Management Act (Act 107 of 1998) (NEMA), to prevent pollution and environmental degradation.	2	n/a	2	1	Duty of care is exercised by improving on waste covering, construction of a stormwater containment pond below the WDF, regular litter clean-up and recycling of waste by disabled personnel. It should however be noted that the surrounding landscape is littered with wind-blown waste and clean-up can be improved on, as well as daily compacting and covering of waste.
4. PERMISSIBLE WASTE					
4.1 Any portion of the Facility as demarcated in Condition 1.2, may be used for the disposing of, recovery and sorting, of general waste. Only waste that is classified as general waste according to the NEM:WA or any current and future Norms and Standards developed by the Department is permitted	2	2	2	2	Only general waste was noted on the day of the inspection. All disposing, and sorting is done within the site boundary.
4.2 No hazardous waste is permitted to be disposed of at the Facility. If more than 80m 3 of hazardous waste is going to be stored at the Facility. registration in terms of the relevant National Norms and Standards for the Storage of Waste (GN No. 926) must be done.	2	2	2	2	No hazardous or health care risk waste was observed on site at the time of the audit. All loads are checked by site supervisor before dumping takes place.
4.3 The Licence Holder must prevent the acceptance of any waste not authorised at the Facility.	2	2	2	2	No unauthorised waste was noted at the time of the audit. All waste vehicles entering the site are checked by the site supervisor at the gate.
4.4 All waste loads must be checked at the gate according to the EMP to prevent the disposal of waste not permitted by this Licence.	2	2	2	2	At the time of the audit checking of all loads entering the site was observed
5. CONSTRUCTION					
5.1 Administration and General					

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
5.1.1 This Licence must be made binding to the main contractor as well as individual contractors and should be included in tender documentation for the construction contract	n/a	n/a	n/a	n/a	Noted. No construction activities are currently taking place.
5.1.2 The Facility construction must be carried out under the supervision of a WMCO/ ECO who must submit a declaration to the Director upon completion that all possible mitigation measures have been put in place and highlight likely deficiencies before commencement of the listed activities.	n/a	n/a	n/a	n/a	No construction activities taking place
5.1.3 Should any archaeological artefacts be exposed during excavation, the construction in the vicinity of the finding must be stopped. Under no circumstances shall any artefacts be destroyed. Such an archaeological site must be marked and fenced off, and South African Heritage Resource Agency must be contacted within 48 hours	n/a	n/a	n/a	n/a	Noted. This condition would be valid for any new development or excavation on Cell 2. At the time of the audit there was only disposal taking place on Cell 1.
5.1.4 Construction of the Facility must be according the EMP, Operational Plan and Drawing Al 99/901, and compliant with recognized civil engineering standards.	1	n/a	n/a	n/a	
5.1.5 The Licence Holder must conduct a topographic survey of the waste body within 3 (three) months of the date of this Licence and thereafter every 2 (two) years to determine the contours of the waste body and calculate the available airspace, side slopes and final height of the Facility and submit the contours and calculations to the Director within 3 (three) months of the survey. These surveys must confirm that the waste body is constructed according to the Operational Plan and Drawing A 1 99/901	0	2	2	2	A survey was undertaken in October 2018. The previous survey was done at the time of the permit amendment in July 2016.
5.2 Waste Disposal Infrastructure					
5.2.1 The footprint of the waste body of Phase I, as described in the Operational Plan may not exceed the outline as indicated in Drawing A 1 99/901	2	n/a	2	2	The footprint of Phase 1 as indicated in the Operational Plan has not been exceeded since this footprint extends across Cell 1 and Cell 2..
5.2.2 The design and construction of any further phases within the licenced boundaries must be lined with a containment barrier for a Class B waste disposal facility as prescribed in GN No. R. 636, or an alternative design authorised by the Director in consultation with the Provincial Head	n/a	n/a	n/a	2	No construction activities taking place on Cell 3.
5.2.3 A two-way access road must be constructed with material that is suitable for road building. This access road must also be maintained to facilitate easy access to the Facility and the active cells	2	2	2	2	The road is constructed of wearing course gravel and suitable to access the site. The site ramp onto the working area of the WDF is compacted gravel.
5.2.4. The Licence Holder must ensure that the maximum height of the waste body does not exceed 175 metres above mean sea level (mamsl).	n/a	n/a	2	2	From the latest survey data (Oct 2018) it shows that the WDF does not exceed 175m AMSL.

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
5.2.5 The side slope of the waste body, above ground, may not be steeper than a 1 vertical: 4 height gradient and maintained in such a manner that erosion is prevented.	0	1	0	0	From the latest survey data (Oct 2018) it shows that the WDF is in some places steeper than 1:4. The Witzenberg Municipality is currently undertaking a design process for expansion of the WDF which would include plans to limit side slopes to no steeper than 1:3.
5.2.6 A special waste cell must be constructed and be accessible to handle general waste in prolonged periods in inclement weather conditions, if required.	1	n/a	2	n/a	Site inspected before the wet season, no wet weather cell in place or required at this time
5.2.7 An outer perimeter lift berm must be constructed on the existing waste body according to the Operational Plan.	1	2	0	2	In place
5.2.8 Daily cell-building in the construction of the waste area or lifts must be implemented according to the Operational Plan, to ensure that the working face is kept to a minimum, available airspace is optimised, and nuisance conditions are minimised.	0	2	1	2	In place
5.2.9 Daily compaction of the waste using the 'ramp method' must be implemented, while 'end tipping' is prohibited	0	2	1	1	At the time of the audit an excavator was busy compacting the waste using the lift bucket (it should be noted that this is not preferred practice and that a formal compactor should be used). There were no signs of end-tipping across the boundaries of the site. There is however no covering of waste on the northern sides, but this does not seem to be recent end-tipping.
5.2.10 A stockpile of acceptable daily cover material to cover the compacted waste with a 150mm thick layer, over a two-week period, must be maintained at all times.	1	2	0	0	Sufficient material does not appear to be available for daily covering, as large areas of waste were exposed at the time of the audit. The stockpile available would not be sufficient as cover for the exposed area. all.
5.2.11 The Licence Holder shall make provision for adequate sanitation facilities for staff on the Facility	2	2	2	2	Compliant. Adequate sanitation is available on site
5.3 Storm water Management					
5.3.1 A storm water management system must be constructed to divert all runoff water, arising from adjacent land or areas of the Facility not used for the management of waste, around the Facility or waste body. This storm water system must have the capacity to maintain a freeboard of a half a metre in the event of a maximum precipitation during a period of 24 (twenty-four) hours with an average frequency of once in fifty (1:50) years.	0	1	0	1	There is an upstream diversion berm, although it is informal and was not likely designed for the storm event Stormwater is being managed in accordance with the current operational plan

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
5.3.2 A collection toe drain around the perimeter of the waste body must be installed to collect any potentially contaminated runoff water and leachate, if any, from the waste body and drain this runoff into an appropriately lined containment pond. This runoff water system must have the capacity to maintain a freeboard of a half a metre in the event of a maximum precipitation during a period of 24 (twenty-four) hours with an average frequency of once in fifty years and must be lined to prevent pollution to groundwater	0	1	1	1	There is a toe drain that does direct runoff to a "containment pond", which is not lined or sized. A Stormwater Management Plan has been drafted as part of the license variation process and should be implemented to ensure proper stormwater control on site.
5.3.3 Runoff water that is released into the environment must comply with the quality requirements of the General and Special Standards, as published in Government Notice 991 of 18 May 1984, or with such quality requirements as may from time to time be determined by the Provincial Head and shall be drained from the Facility in a legal manner.	n/a	n/a	n/a	2	All run-off water from the site is directed to the "containment pond" by means of an earth channel on the norther boundary of the site. At the time of the audit there was no evidence of any water being released into the environment. Water sampling was also initiated for the leachate in the "containment pond" during March 2019. **Please refer to Appendix F for the sampling report.**
5.3.4 Runoff water that does not comply with the quality requirements applicable in terms of Condition 5.3.3 and all sporadic leachate from the Facility must be contained and evaporated in lined containment ponds	n/a	0	n/a	1	The "containment pond" is not lined, however the water is not discharged to the environment and the sampling results do not contain to any elements of concern at this stage. More sampling should be done to conduct trend analysis. **Please refer to Appendix F for the sampling report.**
5.3.5 All areas where waste is temporary stored and handled, excluding the disposal area, must be designed and managed so that no contaminants can escape into the environment. All runoff, if any, must be prevented from entering local watercourses.	1	2	1	2	There are no temporary stockpiles of waste
6. OPERATIONAL MANAGEMENT					
6.1 Site security and access control					
6.1.1 The Licence Holder must prevent unauthorised access to the Facility, by having the Facility enclosed with an adequate fence and gate of 1.8m height and providing effective accesses control.	2	1	2	2	The entire site is fenced with access control at the gate. **Refer to Appendix A for photographs of the site fencing and access gate.**
6.1.2 Weatherproof, durable and legible notices must be displayed at each entrance in at least 2 (two) official languages applicable to the area. These notices must prohibit unauthorised entry, state the hours of operation, include the types of waste permissible, the name, address and telephone number of the Licence Holder and the person responsible for the operation of the Facility.	2	2	2	2	Compliant, sign in 3 languages
6.1.3 The Licence Holder must provide access control during operational hours and must ensure that the gate is locked outside operational hours.	2	2	2	2	Gate is manned during operational hours and locked after hours

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
6.2 Impact Management					
6.2.1 The operational activities of the Facility shall be according to the Operational Plan	**0**	**n/a**	**2**	**2**	The Operational Plan is available on site and implementation is driven by the Witzenberg Municipality, even though some operational conditions are being updated in the current license variation process.
6.2.2 Windblown litter must be prevented as far as practically possible and contained on-site with moveable fences. All windblown litter caught on any fences or blown off-site must be removed and disposed of on a daily basis	**0**	**2**	**2**	**0**	The surrounding area is littered with wind-blown waste from the WDF. Measures should be implemented to undertake regular clean-ups around the WDF on adjacent properties and the dam to the east. **Refer to Appendix A for site photographs of the litter.**
6.2.3 Any portion of the Facility as demarcated in Condition 1.2 may be used to recover waste, however, no informal recovery or picking of waste at the Facility is permitted and the recovery activity shall not interfere with the daily operational activities of the Facility.	**2**	**2**	**2**	**2**	There is a small formal area for recycling, it does not interfere with the daily operations
6.2.4 Waste must be compacted and covered daily with 150mm of suitable cover material and areas that will be left for a period longer than one year must be covered with 300mm compacted suitable cover material.	**0**	**2**	**2**	**0**	At the time of the audit an excavator was busy compacting the waste using the lift bucket, which is not the preferred method for compacting. At the time of the audit it did not appear that sufficient cover material is available for daily covering, since large areas of waste is still left exposed across the site and the stockpile available did not appear sufficient to cover it all.
6.2.5 Occupational health and safety risks to all staff and visitors must be identified and mitigated by providing appropriate personal protective equipment and ensuring that these are utilised on the Facility.	**2**	**2**	**2**	**2**	All staff have adequate PPE
6.2.6 Invasive alien vegetation must be controlled and removed annually.	**n/a**	**n/a**	**n/a**	**n/a**	None noted during inspection, besides the eucalyptus trees to the south of the site.
6.2.7 Dust emissions must be mitigated by dust suppression methods such as the wetting of access roads, minimising earth moving operations during windy conditions and speed limiting.	**1**	**2**	**0**	**1**	It was noted that dust suppression is taking place regularly, however on the time of the audit there was excessive dust from operational vehicles and no suppression was taking place. **Refer to Appendix A for site photographs of the dust generated.**
6.2.8 The burning of waste at the Facility is prohibited.	**1**	**2**	**2**	**2**	At the time of the audit no evidence of waste burning was observed
6.2.9 Containers, skips or bins must be clearly marked to indicate the different waste types to be collected	**n/a**	**2**	**2**	**2**	Skips are clearly marked
7. MONITORING					
7.1 Water Monitoring					

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
7.1.1 Ground Water Monitoring network					
7.1.1.1 The Licence Holder must establish and maintain a monitoring borehole network to the satisfaction of the Director and the Provincial Head.	**2**	**2**	**2**	**2**	There are 3 boreholes located on site
7.1.1.2 Monitoring boreholes shall be equipped with lockable caps. The Director and the Provincial Head reserve the right to take water samples at any time and to analyse these samples or have them analysed. The Licence Holder must ensure that all monitoring sites are adequately protected from vandalism and are kept in an acceptable operational condition	**2**	**2**	**2**	**2**	There are lockable caps installed
7.1.2 Background Groundwater monitoring:					
7.1.2.1 Samples from an upstream borehole where the groundwater in the borehole is at an expected higher hydraulic pressure level than the hydraulic pressure level of the groundwater under the waste body shall be considered as background monitoring. Background groundwater monitoring shall be conducted during each monitoring occasion in terms of Conditions 7. l .4 and 7	**2**	**1**	**2**	**2**	Boreholes are tested once a year.
7.1.3 Surface Water Monitoring					
7.1.3.1 Surface water monitoring must be performed in the runoff water containment pond prior to contemplating the following activities: releasing this water into the environment or using this water for irrigation or dust suppression. These activities may only take place once the Director and the Provincial Head have evaluated these monitoring results and have authorised the Licence Holder to proceed with these activities.	**n/a**	**n/a**	**n/a**	**2**	All run-off water from the site is directed to the "containment pond" by means of an earth channel on the norther boundary of the site. Water sampling was also initiated for the leachate in the "containment pond" during March 2019. **Please refer to Appendix F for the sampling report.**
7.1.4 Detection Monitoring:					
7.1.4.1 Monitoring for groundwater quality must be conducted bi-annually, once in the winter and once in the summer, or such frequency as may be determined by the Director and the Provincial Head, for the water quality variables listed in paragraph (a) of Annexure ll and annually, in winter, for the water quality variables listed in paragraph (b) of Annexure ll.	**2**	**1**	**1**	**1**	Boreholes are tested twice in a financial year, however during the years 2017-2018 there were no bi-annual testing done.
7.1.5 Method of Analysis					
7.1.5.1 The Licence Holder shall carry out all tests in accordance with methods prescribed by and obtainable from the South African Bureau of Standards (SABS), referred to in the Standards Act, 1 982 (Act 30 of 1 982), to analyse the samples taken under the monitoring programmes specified in Condition 7.	**n/a**	**2**	**2**	**2**	Compliant Water analysis conducted by AL Abbott,a SANAS accredited lab and SANS standards used.

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
7.1.5.2 The Licence Holder shall only use another method of analysis if written proof that the method is at least equivalent to the SABS method, is submitted to the Director and the Provincial Head	**n/a**	**n/a**	**n/a**	**n/a**	noted
7.2 Investigative Monitoring					
7.2.1 If, in the opinion of the Director and the Provincial Head, a water quality variable listed under the detection monitoring programme, as referred to in Condition 7. I .4, shows an increasing trend, the Licence Holder shall initiate a monthly monitoring programme for the water quality variables listed in Annexure I.	**n/a**	**n/a**	**n/a**	**n/a**	
7.2.2 Should the Director suspect that the Facility may be generating significant amounts of landfill gas, the Licence Holder shall implement landfill gas monitoring as prescribed by the Director.	**n/a**	**n/a**	**n/a**	**n/a**	
7.3 Further Investigation					
7.3.1 If, in the opinion of the Director and the Provincial Head, groundwater and/or surface water pollution have occurred or may possibly occur, the Licence Holder shall conduct the necessary investigations and implement additional monitoring and rehabilitation measures which shall be to the satisfaction of the Director and the Provincial Head	**n/a**	**n/a**	**n/a**	**n/a**	
7.3.2 If, in the opinion of the Director, environmental pollution. nuisances or health risks may be or are occurring at the Facility, the Licence Holder must initiate an investigation into the cause of the problem or suspected problem. Such investigation must include the monitoring of the relevant environmental pollution. nuisance and health risk variables, at those monitoring points and at such frequency as will be determined in consultation with the Director. Should the investigation reveal any unacceptable levels of pollution, the Licence Holder must submit a report with mitigation measures to the satisfaction of the Director.	**n/a**	**n/a**	**n/a**	**n/a**	
7.4 Post Closure Monitoring					
7.4.1 Groundwater and landfill gas, if required, monitoring by the Licence Holder, in accordance with Conditions 7. 1 or 7.2.2, shall continue upon closure of the Facility and be maintained for a period of 30 (thirty) years, or such lesser period as may be determined by the Director and the Provincial Head	**n/a**	**n/a**	**n/a**	**n/a**	Site is still operational.
8. AUDITING					
8.1 Internal Audits					

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
8.1.1 Internal audits, including compliance to the Licence conditions, general Facility operations, complaints, responses and the records kept in terms of Condition 9, must be conducted quarterly by the Licence Holder and on each audit occasion an official report must be compiled by the relevant internal auditor to report the findings of the audits, which must be submitted to the Director according to Condition 10.10 and which must be made available to the external auditor specified in Condition 8.2.1. The internal audits must be compiled in the format required by the Department.	2	0	2	1	An internal audit was undertaken on 12 March 2019 by Mr. Johnny Jacobs of the Witzenberg Municipality. It should however be ensured that quarterly internal audits are undertaken.
8.2 External Audits					
8.2.1 The Licence Holder must appoint an independent external auditor to audit the Facility bi-annually (twice a year) and this auditor must compile an audit report documenting the findings of the audit, which must be submitted by the Licence Holder to the Director according to Condition 10.10.	2	0	2	2	External audits undertaken by DEA&DP and Aurecon during 2017 and 2018.
8.2.2 The Audit report must:					
a. Specifically, state whether conditions of this Licence are adhered to;	2	2	2	2	This audit report addresses this requirement
b. Include trend graphs and an interpretation of all available data and test results regarding the operation of the Facility and all its impacts on the environment;	0	2	0	2	This audit report addresses this requirement. Refer to **Appendix F**
c. Include the findings of the internal audit reports required in Condition 8.1.1.	2	n/a	0	1	One internal report's findings are included in this report (dated 12 March 2019)
d. Make recommendations on partial and noncompliance and how to improve the management of the Facility;	1	2	2	2	This audit report addresses this requirement
e. Specify target dates for the implementation of the recommendations to achieve compliance; and	0	2	2	2	This audit report addresses this requirement
f. Specify whether corrective action which was taken for the previous audit's non- conformities was adequate.	0	n/a	0	2	This audit report addresses this requirement
8.2.3 The external audit report must be submitted to the Director within 30 (thirty) days from the date on which the external auditor finalised the report and according to Condition 10.10.	n/a	n/a	n/a	1	Proof was submitted of an external audit report submitted to DEA&DP on 11 June 2018. All outstanding external audit reports, including this one, should also be submitted to the DEA&DP.
8.3 Departmental Audits and Inspections					

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
8.3.1 The Department reserves the right to audit or inspect the Facility without prior notification at any time and frequency as may be determined by the Director.	n/a	n/a	n/a	2	Two (2) previous external audits have been undertaken by DEA&DP and findings are summarised herein.
8.3.2 The findings of these audits or inspections must be made available to the Licence Holder within 60 (sixty) days of the end of the audit or inspection. Information from the audits must be treated in accordance with the Promotion of Access to Information Act, 2000 (Act No. 2 of 2000).	n/a	n/a	n/a	2	Findings of the audit reports were made available to the Witzenberg Municipality and the findings thereof is summarised in this report.
8.3.3 The Licence Holder must make any records or documentation available to the Director upon request, as well as any other information the Director may require.	2	n/a	2	2	All documents were made available during the audits.
9. RECORD KEEPING					
9.1 the Licence Holder must keep records of all monitoring results, nuisances and complaints at the Facility.	2	2	2	2	A register is kept on site
9.2 Accurate records of waste volumes or masses received and recovered must be kept at the Facility and reported to the Department as per Condition 10.7.	2	2	2	2	Reported on iPWIS
9.3 All records required or resulting from activities required by this Licence must:					
9.3.1 Be legible;	2	2	2	2	Compliant
9.3.2 Be made available and should form part of any audit report;	2	2	2	2	Compliant and presented in the Appendix to this report
9.3.3 If amended, be amended in such a way that the original and any subsequent amendments remain legible and are easily retrievable;	2	2	2	2	Compliant
9.3.4 Be retained in accordance with documented procedures which are approved by the Department; and	2	n/a	2	2	Compliant
9.3.5 Be made available upon the request of the Director.	2	n/a	2	2	Compliant
9.4 The Licence Holder shall record all borehole data and chemical analysis as required in Condition 7.1.	1	2	1	2	Borehole testing recorded and supplied to the auditor
10. REPORTING					
10.1 The Licence Holder must, within 24 (twenty-four) hours, notify the Director of the occurrence or detection of any incident on the Facility which has the potential to cause, or has caused any pollution	2	2	n/a	n/a	No recent incidents to be reported.

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
10.2 The Licence Holder must, within 14 (fourteen) days, or as specified by the Director from the occurrence or detection of any incident referred to in Condition 10.1, submit an action plan, which must include a detailed time schedule, and resource allocation signed off by management, to the satisfaction of the Director of measures taken to: a. Correct the impact resulting from the incident; b. Prevent the incident from causing any further impact; and c. Prevent a recurrence of a similar incident.	**n/a**	**n/a**	**n/a**	**n/a**	No incidents recorded.
10.3 In the event that measures have not been implemented within 21 (twenty-one) days of the incident, to address impacts caused by the incident referred to in Condition 10.1, or measures which have been implemented are inadequate, the Director may implement the necessary measures at the cost and risk of the Licence Holder.	**n/a**	**n/a**	**n/a**	**n/a**	
10.4 The Licence Holder must keep and maintain an incident and complaints register, which must be kept at the Facility and be made available at the request of the Director.	**2**	**2**	**2**	**2**	A register is kept on site
10.5 The Department must be notified within 7 (seven) days of any changes to the management of the Facility including the name of the incoming person together with evidence that such person has the required technical competence.	**n/a**	**n/a**	**n/a**	**n/a**	No changes to the management of the facility have been made
10.6 The Department must be notified within 14 (fourteen) days of the following changes:					
10.6.1 Licence Holder's trading name, registered name or registered office address;	**n/a**	**n/a**	**n/a**	**n/a**	
10.6.2 Particulars of the Licence Holder's ultimate holding company (including details of an ultimate holding where a Licence Holder has become a subsidiary): and	**n/a**	**n/a**	**n/a**	**n/a**	
10.6.3 Steps taken with a view to the Licence Holder going into bankruptcy, entering into composition or arrangement with creditors.	**n/a**	**n/a**	**n/a**	**n/a**	
10.7 The Licence Holder must register and report all waste volumes or masses received, recovered, disposed of or stored to the Department's Integrated Pollutant and Waste Information System (IPWIS) URL: http://ipwis.pgwc.gov.za/ipwis3/public, as required by the Department.	**2**	**2**	**2**	**2**	Compliant, see **Appendix D** of this report
10.8 The Department must be notified without delay in the case of the following:					

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
10.8.1 Any malfunction, breakdown of failure of equipment or techniques, accident or fugitive emission which has caused, is causing or may cause significant pollution;	**n/a**	**n/a**	**n/a**	**n/a**	
10.8.2 The breach of conditions of this Licence: and	**n/a**	**n/a**	**n/a**	**1**	Previous audit reports submitted to DEA&DP (See **Appendix E – Proof of audit submission to DEA&DP**). It is however not clear if any other non-compliances to license conditions have been reported to DEA&DP.
10.8.3 Any significant adverse environmental and health effects.	**n/a**	**n/a**	**n/a**	**n/a**	
10.9 Prior written notification must be given to the Director of the following events and within the specified timeframes:					
10.9.1 As soon as practicable prior to the permanent cessation of any operational activities;	**n/a**	**n/a**	**n/a**	**n/a**	
10.9.2 Full or partial cessation of the operational activities for a period likely to exceed 3 (three) months: and	**n/a**	**n/a**	**n/a**	**n/a**	
10.9.3 Full or partial resumption of the operation of all or part of the activities after a cessation notified under (b) above.	**n/a**	**n/a**	**n/a**	**n/a**	
10.10 The information required in terms of Conditions 7 must be reported to the Director in the format specified in Conditions 8.1 and 8.2, where applicable, within a period of 30 (thirty) days following the analysis of the samples. The information must also be included in a trend report, which must contain a graphical presentation of all results obtained previously at any specific point, as well as an interpretation and discussion of the results of each monitoring occasion.	**0**	**n/a**	**1**	**n/a**	
11. MONITORING COMMITTEE					
11.1 The Licence Holder must take all reasonable steps to establish and ensure the continued functioning of the Tulbagh Waste Disposal Facility for the normal operative lifetime of the Facility and for the closure of the Facility, as determined by the Director	**0**	**2**	**n/a**	**2**	The auditor believes that reasonable steps have been taken to ensure the continued functioning of the WDF in applying for a license variation, including a rehabilitation plan included in the EMP.
11.2 The Monitoring Committee must be established and must formulate a terms of reference and code of conduct, to the satisfaction of the Director, under which the Committee can operate.	**n/a**	**2**	**1**	**1**	A monitoring committee has been established but have not had their first meeting yet due to an outstanding court ruling at the time. The committee invitation was advertised. **See Appendix G for details.**
11.3 The Residents Monitoring Committee (RMC) shall be representative of relevant interested and affected persons and may consist of at least the following persons: -					

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
11.3.1 Representative(s) of the Witzenberg Municipality	n/a	n/a	n/a	2	Mr. Joseph Barnard
11.3. 2 Representative(s) this Department;	n/a	n/a	n/a	1	It was noted that authorities are included but no proof was supplied.
11.3.3 Representative(s) of the Department of Water and Sanitation: and	n/a	n/a	n/a	1	It was noted that authorities are included but no proof was supplied.
11.3.4 At least I (one) person/party, or their representatives elected by the residents.	n/a	n/a	n/a	2	Mr. Neville Dorrington
11.4 The RMC shall meet at least once every 6 (six) months and not later than 30 (thirty) days after the external audit report specified in condition 8.2.	n/a	2	n/a	0	No meeting held to date
11.5 The Licence Holder must keep minutes of all meetings of the RMC and distribute these minutes to all members of the RCM within 30 (thirty) days after the meeting.	n/a	n/a	n/a	n/a	A monitoring committee has been established but have not had any meetings to date, due to outstanding decisions on WDF expansion and appeal processes.
12. LEASING AND ALIENATION OF THE SITE					
12.1 Should the Licence Holder want to alienate or lease the Facility, he/she must notify the Director in writing of such an intention at least 120 (one hundred and twenty) days prior to the said transaction. Should the approval be granted, the subsequent Licence Holder shall remain liable to compliance with all Licence conditions	n/a	n/a	n/a	n/a	
13. TRANSFER OF THE WASTE MANAGEMENT LICENSE					
13.1 Should the Licence Holder want to alienate or lease the Facility, he/she must notify the Director in writing of such an intention at least 120 (one hundred and twenty) days prior to the said transaction. Should the approval be granted, the subsequent Licence Holder shall remain liable to compliance with all Licence conditions	n/a	n/a	n/a	n/a	
13.2 Any subsequent Licence Holder shall be bound by the conditions of this Licence.	n/a	n/a	n/a	n/a	
14. REHABILITATION AND CLOSURE OF THE FACILITY					
14.1 In accordance with Government Notice No. 921 of 29 November 2013 or any amendments thereto, a waste management licence is required for the decommissioning of a facility. The Licence Holder must therefore submit a waste management licence application should he {she intends to decommission the Facility.	n/a	n/a	n/a	n/a	The site is still in operation

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
14.2 Immediately following the cessation of operations with the intention to close the Facility, the surface of the Facility shall be covered in such a way that-					
14.2.1 The formation of pools due to rain is prevented;	**n/a**	**n/a**	**n/a**	**n/a**	The site is still in operation
14.2.2 Free surface runoff of rainwater is ensured; and	**n/a**	**n/a**	**n/a**	**n/a**	The site is still in operation
14.2.3 No objects or materials which may hamper the remediation of the Facility are present.	**n/a**	**n/a**	**n/a**	**n/a**	The site is still in operation
14.3 The Licence Holder must rehabilitate the Facility or any portion thereof, in accordance with a closure report and rehabilitation plan, which must be submitted to the Department for approval at least one year prior to the intended closure of the Facility, or any portion thereof.	**n/a**	**n/a**	**n/a**	**n/a**	The site is still in operation
14.4 The Licence Holder shall remain responsible for the Facility, and/or any of its impacts on the environment, after operations on the Facility have ceased.	**n/a**	**n/a**	**n/a**	**n/a**	The site is still in operation
15. GENERAL					
15.1 This Licence is valid until the waste disposal airspace capacity, according to the Operational Plan, has been reached and confirmed by calculations in terms of Condition 5.1.5. The Licence may be reviewed at any time within the lifetime of this Licence. Based on the results of the review, especially compliance to Licence conditions or recommendations from the audit reports and or changing legislation, the Licence can be varied or withdrawn or the validity thereof be extended.	**n/a**	**n/a**	**n/a**	**2**	The License Holder is the Witzenberg Municipality and they take full responsibility for the impacts on the environment by applying for a variation license application to authorise the expansion of the WDF.
15.2 This Licence shall not be transferable unless such transfer is subject to Condition 13 above.	**n/a**	**n/a**	**n/a**	**n/a**	noted
15.3 This Licence shall not be construed as exempting the Licence Holder from compliance with the provisions of any National and Provincial Legislation and relevant Ordinance, Regulation, By-laws and relevant National Norms and Standards	**n/a**	**n/a**	**n/a**	**n/a**	noted
15.4 The Licence Holder must in writing, within 14 (fourteen) days of the date of this decision on the application, in accordance with regulation 4(2) of GN No. R.982 of 4 December 2014, ensure that: -					
15.4.1 All registered interested and affected parties are provided with access to the decision and reasons for such decision; and	**2**	**n/a**	**2**	**2**	This was undertaken as part of the authorisation process for the issued WML.

PERMIT CONDITION	AUDIT SCORE 4.10.2017 (DEA&DP)	AUDIT SCORE 19.4.2018 (Aurecon)	AUDIT SCORE 18.10.2018 (DEA&DP)	AUDIT SCORE 29.3.2019	COMMENTS
15.4.2 The attention of all registered interested and affected parties is drawn to the fact that an appeal may be lodged against the decision in terms of the National Appeals Regulations of 201 4, if such appeal is available in the circumstances of the decision.	2	n/a	2	2	This was undertaken as part of the authorisation process for the issued WML.
15.5 Transgression of any condition of this Licence could result in the suspension of the Licence by this Department	n/a	n/a	n/a	n/a	noted
15.6 Non-compliance with a condition of this Licence may result in criminal prosecution or other actions provided for in section 67 (I) of the NEM: WA.	n/a	n/a	n/a	n/a	noted
15. 7 In terms of sections 28 and 30 of the NEMA, and sections 19 and 20 of the National Water Act, 1998 (Act No. 36 of 1 998), any costs incurred to remedy environmental damage must be borne by the person responsible for the damage. It is therefore imperative that the Licence Holder reads through and understand the legislative requirements pertaining to the project. It is the Licence Holder's responsibility to take reasonable measures which include informing and educating contractors and employees about environmental risks of their work and training them to operate in an environmentally acceptable manner.	n/a	n/a	n/a	2	Site personnel receive training on environmental and waste related matters. A license variation process is underway to ensure legal compliance and feasible operation of the WDF into the future. Regular audits are undertaken to measure compliance.

6 Previous audit reports

Previous external audits done at the WDF is summarised below:

ECA Section 20 Permit audits (Ref no: 16/2/7/G100/D6/Z1):

13 October 2015 – DEA&DP audit

Variation license audits (Ref no: 19/2/5/4/B5/14/WL0056/16):

4 Oct 2017 - DEA&DP audit

19 April 2018 – Aurecon audit

18 October 2018 - DEA&DP audit

See **Figure 2** above for comparative scores from previous audits.

6.1 Repeat audit findings

The following summarises the repeat audit findings found in **Table 3** below with recommendations for improvements:

- The was no evidence submitted of EMP training for personnel although it was mentioned that the site supervisor has received such training;
- Wind-blown litter seems to be a problem at the site as litter was visible in adjacent properties, especially to the north and east of the site, including the dam to the east.
- The sidewalls of the WDF body seems to be steeper than stipulated in the licence in a number of places. The auditor is under the assumption that the new engineering designs submitted as part of the license variation process limits side slopes to 1:3.
- The auditor is of the opinion that there is inadequate cover material available for daily covering of the waste volumes that are received at the WDF.
- There is no formal upstream diversion berm to prevent stormwater being contaminated on site. This should be formalised.
- Stormwater channels should be constructed around the WDF in accordance with the Stormwater Management Plan compiled by Aurecon to comply with the license variation process.
- Leachate sampling at the "containment pond" should be done on a bi-annual basis, together with the borehole sampling.
- Dust suppression should be undertaken more frequently to avoid nuisance dust such as what was observed on site on the day of the audit;
- Internal audits should be conducted, of which no evidence was provided.
- The monitoring committee should be formally established and meetings to commence, even though a license variation process is in progress to address any immediate matters of concern.

Table 3 Summary of repeat findings from previous audits and current audit

PERMIT CONDITION	AUDIT SCORE 4.10.2017	AUDIT SCORE 19.4.2018	AUDIT SCORE 18.10.2018	AUDIT SCORE 29.3.2019	COMMENTS
3.1 The EMP, submitted as part of the final BAR, is hereby approved and must be implemented together with all the conditions of this Licence	0	n/a	1	1	An effort is made to implement the license conditions and a copy is retained on site, including the Operational plan compiled by JPCE. The EMP was however not on site and no evidence could be found of staff training on EMP compliance.

PERMIT CONDITION	AUDIT SCORE 4.10.2017	AUDIT SCORE 19.4.2018	AUDIT SCORE 18.10.2018	AUDIT SCORE 29.3.2019	COMMENTS
3.6 Waste should be managed in such a way as not to cause any nuisance conditions to the surrounding area.	1	2	1	0	The surrounding area is littered with wind-blown waste from the WDF. Measures should be implemented to undertake regular clean-ups around the WDF on adjacent properties and the dam to the east. **Refer to Appendix A for site photographs of the litter.**
3.11. The presence of any nuisance conditions must be monitored and measures must be undertaken to rectify the presence of each nuisance condition	1	2	1	0	There are fly traps installed around the site. The surrounding area is littered with wind-blown waste from the WDF. Measures should be implemented to undertake regular clean-ups around the WDF on adjacent properties and the dam to the east. **Refer to Appendix A for site photographs of the litter.**
5.2.5 The side slope of the waste body, above ground, may not be steeper than a 1 vertical: 4 height gradient and maintained in such a manner that erosion is prevented.	0	1	0	0	From the latest survey data (Oct 2018) it shows that the WDF are in some places steeper than 1:4. The Witzenberg Municipality is currently undertaking a design process for expansion of the WDF which would include plans to limit side slopes to no steeper than 1:3.
5.2.10 A stockpile of acceptable daily cover material to cover the compacted waste with a 150mm thick layer, over a two-week period, must be maintained at all times.	1	2	0	0	The auditor is of the opinion that not sufficient cover material is available for daily covering, since a lot of waste is still left exposed across the site and the stockpile available was not big enough to cover it all.
5.3.1 A storm water management system must be constructed to divert all runoff water, arising from adjacent land or areas of the Facility not used for the management of waste, around the Facility or waste body. This storm water system must have the capacity to maintain a freeboard of a half a metre in the event of a maximum precipitation during a period of 24 (twenty-four) hours with an average frequency of once in fifty (1:50) years.	0	1	0	1	There is an upstream diversion berm, although it is informal and was not likely designed for the storm event
5.3.2 A collection toe drain around the perimeter of the waste body must be installed to collect any potentially contaminated runoff water and leachate, if any, from the waste body and drain this runoff into an appropriately lined containment pond. This runoff water system must have the capacity to maintain a freeboard of a half a metre in the event of a maximum precipitation during a period of 24 (twenty-four) hours with an average frequency of once in fifty years and must be lined to prevent pollution to groundwater	0	1	1	1	There is a toe drain that does direct runoff to a “containment pond”, which is not lined or sized. A Stormwater Management Plan has been drafted as part of the license variation process and should be implemented to ensure proper stormwater control on site.

PERMIT CONDITION	AUDIT SCORE 4.10.2017	AUDIT SCORE 19.4.2018	AUDIT SCORE 18.10.2018	AUDIT SCORE 29.3.2019	COMMENTS
5.3.4 Runoff water that does not comply with the quality requirements applicable in terms of Condition 5.3.3 and all sporadic leachate from the Facility must be contained and evaporated in lined containment ponds	n/a	0	n/a	1	The "containment pond" is not lined, however the water is not discharged to the environment and the sampling results do not refer to any elements of concern at this stage. More sampling should be done to obtain a trend analysis. **Please refer to Appendix F for the sampling results.**
6.2.2 Windblown litter must be prevented as far as practically possible and contained on-site with moveable fences. All windblown litter caught on any fences or blown off-site must be removed and disposed of on a daily basis	0	2	2	0	The surrounding area is littered with wind-blown waste from the WDF. Measures should be implemented to undertake regular clean-ups around the WDF on adjacent properties and the dam to the east. **Refer to Appendix A for site photographs of the litter.**
6.2.4 Waste must be compacted and covered daily with 150mm of suitable cover material and areas that will be left for a period longer than one year must be covered with 300mm compacted suitable cover material.	0	2	2	0	At the time of the audit an excavator was busy compacting the waste using the lift bucket, which is not the preferred method for compacting. At the time of the audit it did not appear that sufficient cover material is available for daily covering, since large areas of waste is still left exposed across the site and the stockpile available did not appear sufficient to cover it all.
6.2.7 Dust emissions must be mitigated by dust suppression methods such as the wetting of access roads, minimising earth moving operations during windy conditions and speed limiting.	1	2	0	1	It was noted that dust suppression is taking place regularly, however on the time of the audit there was excessive dust from operational vehicles and no suppression was taking place. **Refer to Appendix A for site photographs of the dust generated.**
8.1.1 Internal audits, including compliance to the Licence conditions, general Facility operations, complaints, responses and the records kept in terms of Condition 9, must be conducted quarterly by the Licence Holder and on each audit occasion an official report must be compiled by the relevant internal auditor to report the findings of the audits, which must be submitted to the Director according to Condition 10.10 and which must be made available to the external auditor specified in Condition 8.2.1. The internal audits must be compiled in the format required by the Department.	2	0	2	0	To date, no internal audits have been done according to the new DEADP audit format
8.2.2 Include the findings of the internal audit reports required in Condition 8.1.1.	2	n/a	0	0	No internal audits are included in this report
11.4 The RMC shall meet at least once every 6 (six) months and not later than 30 (thirty) days after the external audit report specified in condition 8.2.	n/a	2	n/a	0	No meeting held to date

6.2 Improvement measures noted

The following summarised the improvement measures found in **Table 4** below:

- There are no copies on site of the approved EMP;
- No fires were experienced on site and there is no record or evidence of recent fires;
- Recycling and other bins on site are clearly marked and available;
- A survey was undertaken during October 2018.
- End tipping seems to have improved since there was no new evidence of end tipping at the time of the audit;
- Cell building is undertaken daily in accordance with the current approved Operational Plan. This however should be adjusted if the variation license is authorised.
- External audits are undertaken bi-annually;
- The audit report layout is updated to speak to the license conditions;
- A license variation process is being undertaken to authorise the expansion of the WDF and ensure feasible operational conditions are implemented and improvement of the site conditions are encouraged.
- Compaction on site should be undertaken daily and should be improved by making use of a compactor, instead of using an excavator bucket.

Table 4 Improvement measures from previous audit findings

PERMIT CONDITION	AUDIT SCORE 4.10.2017	AUDIT SCORE 19.4.2018	AUDIT SCORE 18.10.2018	AUDIT SCORE 29.3.2019	COMMENTS
1.3 The surveyor General (SG21) digit codes are: C07500030000000100000 C07500030000016600001 C07500030000018700030	2	n/a	0	2	The site has been established on C07500030000000100000.
3.8 An Emergency Response Plan (ERP) must be developed in accordance to the EMP, and all staff must be trained in the implementation thereof. The ERP should be regularly updated and must include fire evacuations, injury on duty and accidents caused by unexpected hazardous waste ending up in the Facility	0	1	2	2	A copy of Emergency Response Plan was kept on site together with the License conditions and Operational Plan.
3.9 All fires at the Facility must be treated as a potential emergency and dealt with accordingly i.e. the Licence Holder must develop and implement a routine fire procedure to extinguish any fires present on the Facility as soon as possible, even after normal working hours (refer to EMP).	0	2	2	n/a	No fires recorded or present on site.
3.13 In order to prevent nuisance conditions, pollution and/or littering incidents, the Licence Holder must ensure that all waste storage containers are not overfilled and must be accessible	0	2	2	2	Only two bins kept on site, both are managed well
5.1.5 The Licence Holder must conduct a topographic survey of the waste body within 3 (three) months of the date of this Licence and thereafter every 2 (two) years to determine the contours of the waste body and calculate the available airspace, side slopes and final height of the Facility and submit the contours and calculations to the Director within 3 (three) months of the survey. These surveys must confirm that the waste body is constructed according to the Operational Plan and Drawing A 1 99/901	0	2	2	2	A survey was undertaken during October 2018. Last survey was done at the time of the permit amendment in July 2016.

PERMIT CONDITION	AUDIT SCORE 4.10.2017	AUDIT SCORE 19.4.2018	AUDIT SCORE 18.10.2018	AUDIT SCORE 29.3.2019	COMMENTS
5.2.7 An outer perimeter lift berm must be constructed on the existing waste body according to the Operational Plan.	1	2	0	2	In place
5.2.8 Daily cell-building in the construction of the waste area or lifts must be implemented according to the Operational Plan, to ensure that the working face is kept to a minimum, available airspace is optimised, and nuisance conditions are minimised.	0	2	1	2	In place
5.2.9 Daily compaction of the waste using the 'ramp method' must be implemented, while 'end tipping' is prohibited	0	2	1	1	At the time of the audit an excavator was busy compacting the waste using the lift bucket (it should be noted that this is not preferred practice and that a formal compactor should be used). There were no signs of end-tipping across the boundaries of the site. There is however no covering of waste on the northern sides, but this does not seem to be recent end-tipping.
6.2.1 The operational activities of the Facility shall be according to the Operational Plan	0	n/a	2	2	The Operational Plan is available on site and implementation is driven by the Witzenberg Municipality, even though some operational conditions are being updated in the current license variation process.
8.2.1 The Licence Holder must appoint an independent external auditor to audit the Facility bi-annually (twice a year) and this auditor must compile an audit report documenting the findings of the audit, which must be submitted by the Licence Holder to the Director according to Condition 10.10.	2	0	2	2	External audits undertaken by DEA&DP and Aurecon during 2017 and 2018.
8.2.2.b Include trend graphs and an interpretation of all available data and test results regarding the operation of the Facility and all its impacts on the environment;	0	2	0	2	This audit report addresses this requirement
8.2.2.e Specify target dates for the implementation of the recommendations to achieve compliance; and	0	2	2	2	This audit report addresses this requirement
8.2.2.f Specify whether corrective action which was taken for the previous audit's non- conformities was adequate.	0	n/a	0	2	This audit report addresses this requirement
11.1 The Licence Holder must take all reasonable steps to establish and ensure the continued functioning of the Tulbagh Waste Disposal Facility for the normal operative lifetime of the Facility and for the closure of the Facility, as determined by the Director	0	2	n/a	2	The auditor believes that reasonable steps have been taken to ensure the continued functioning of the WDF in applying for a license variation, including a rehabilitation plan included in the EMP.

7 Conclusions

The Tulbagh WDF is located in a rural setting just outside of the town of Tulbagh, which has very high cultural and tourism value because of the areas rich history and wine farms. It is therefore very important that a facility such as the Tulbagh WDF is run in accordance with the approved management plans and licenses. The Witzenberg Municipality is responsible for the operational management and implementation of the license / permit conditions and would need to plan from a budgeting perspective to ensure compliance the conditions stated above. Overall, the Tulbagh WDF is currently operated well, with the exception of sufficient waste cover and litter control around the facility, which causes a concern.

The auditor would recommend regular internal audits in order for the operational personnel to understand and be aware of the license conditions and ensure that planning incorporates these conditions. The license variation process should also focus on feasible implementation of mitigation measures to ensure implementable actions are authorised.

The Witzenberg Municipality should ensure that the Monitoring Committee is formally established, and meetings are held to address any immediate issues of concern, until such time as the DEA&DP has made a decision on the variation license application.

For Attention: Johnny Jacobs

WASTE MANAGEMENT VARIATION LICENCE IN TERMS OF THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT NO. 59 OF 2008) AND THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 FOR THE TULBAGH WASTE DISPOSAL FACILITY ON REMAINDER OF ERF 1, PORTION 1 OF THE FARM MIDDELPOS NO.116 AND PORTION 30 OF THE FARM KRUYS VALLEY NO. 187, DIVISION OF TULBAGH

With reference to the application for the above-mentioned, find below the outcome with respect to this application.

WASTE MANAGEMENT VARIATION LICENCE

A. DECISION

I, Eddie Hanekom, in my capacity as the Director: Waste Management of the Department of Environmental Affairs and Development Planning (hereinafter referred to as "the Department"), in terms of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) (NEM:WA) as amended, read with the Environmental Impact Assessment (EIA) Regulations promulgated in terms of Government Notice (GN) No. R. 982 of 4 December 2014, hereby **grant** the variation of the Permit 16/2/7/G100/D6/Z1/P305, issued 31 July 1998 and issue this Waste Management Variation Licence (hereafter referred to as "the Licence") to the above-mentioned Licence Holder, to dispose of and recover general waste at the Tulbagh Waste Disposal Facility (hereafter referred to as "the Facility") on remainder of Erf 1, Portion 1 of the farm Middelpos No. 116 and Portion 30 of the farm Kruys Valley No. 187, Division of Tulbagh. This Licence replaces of the Permit 16/2/7/G100/D6/Z1/P305.

The Waste Management Permit is varied with the following substantive variations:

1. The maximum height of the facility has been extended from natural ground level to 175m above mean sea level.

5th Floor, 3 Dorp Street, Cape Town, 8001
Tel.: (021) 483 3009 Fax: (021) 483 4425
Private Bag X9086, Cape Town, 8000
www.westerncape.gov.za

2. No incinerator will have to be constructed at the Facility.
3. The Permit that was issued in terms of section 20 of the Environment Conservation Act, 1989 (Act No. 73 of 1989) (ECA) by the Department of Water Affairs and Forestry (DWAF) (now known as the Department of Water and Sanitation (DWS)), is herewith issued as a Waste Management Variation Licence in terms of NEM:WA by the Department.

Other non-substantive variations include more detailed Licence conditions as set out in Section C below and specific operational procedures according to: -

1. The *Environmental Management Programme for the Tulbagh Waste Disposal Facility: Variation Licence*, dated March 2016, by Resource Management Services (hereafter referred to as "the EMP");
2. The *Operation, Management and Rehabilitation Plan for Tulbagh Waste Disposal Site*, dated June 2015, by Jan Palm Consulting Engineers cc (hereafter referred to as "the Operational Plan"); and
3. The *Drawing A199/901*, dated August 2015 by Jan Palm Consulting Engineers cc (hereafter referred to as "Drawing A199/901").

The reasons for the decision are provided for in Appendix 1.

B.

Description of the activity

The existing waste disposal facility at Tulbagh was issued with a Permit No. 16/2/7/G100/D6/Z1/P305 issued on 31 July 1998, in terms of section 20 of ECA, by the DWAF (now known as DWS), for the disposal and recovery of general waste at a class **G: S: B-** site.

An application was submitted together with a final BAR, dated March 2016, to vary this Permit, as some of the Permit conditions were no longer applicable.

The variation was considered to be substantive and therefore the basic assessment included a public participation process as required in the Environmental Impact Assessment (EIA) Regulations of 2014.

This Licence allows the continued disposal of general waste on the current waste body footprint and requires that any further development of new waste disposal cells, within the originally permitted area, to be lined with a Class B containment barrier, according to the GN No. 635 - NEM:WA National Norms and Standards for Disposal of Waste to Landfill, of 23 August 2013.

The following activities have been identified in terms of the NEM:WA List of Waste Management Activities that have, or are likely to have, a detrimental effect on the environment, published in GN No. 921 – Category B, and are hereby authorised:

4 (8): The disposal of general waste to land covering an area in excess of 200m^2 and with a totally capacity exceeding 25 000 tons; and

4 (10): The construction of facilities for activities listed in Category B of this Schedule (not in isolation to associated activity).

The continued disposal of waste at a facility will require the applicant to register and report on the Departments Integrated Pollutant and Waste Information System (IPWIS) as per Condition 10.7 of this Licence.

In this Licence, "Director" means the Director: Waste Management of the Western Cape Department of Environmental Affairs and Development Planning, who may be contacted at the address below:

Director: Waste Management

Department of Environmental Affairs and Development Planning

Private Bag X9086

CAPE TOWN

8000

In this Licence, "Provincial Head" means the Provincial Head of the Department of Water and Sanitation: Western Cape Provincial Operations who may be contacted at the address below:

Provincial Head: Western Cape Provincial Operations

Department of Water and Sanitation

Private Bag X16

SANLAMHOF

7532

The Witzenberg Municipality appointed the following Independent Environmental Assessment Practitioner (EAP) to administer the application for a waste management Variation Licence:

Larry Eichstadt

Resource Management Services

PO Box 4296 E-mail: Larry@rmsenviro.co.za

DURBANVILLE Tel.: (021) 975 7396

7551 Fax: (021) 975 1373

The granting of this Waste Management Variation Licence is subject to compliance with the conditions set out in Section C below.

C. LICENCE CONDITIONS

LICENCE NUMBER:	19/2/5/4/B5/14/WL0056/15 (FORMALLY PERMIT NO. 16/2/7/7/G100/D6/Z1/P305)
WASTE APPLICATION:	VARIATION OF THE WASTE MANAGEMENT PERMIT ISSUED FOR THE OPERATION OF THE TULBAGH WASTE DISPOSAL FACILITY, WITZENBERG MUNICIPALITY, CAPE WINELANDS DISTRICT MUNICIPALITY
CLASSIFICATION:	G: 5: B (CLASS B)
LOCATION:	REMAINDER OF ERF 1, PORTION 1 OF THE FARM MIDDELPOS NO. 116 AND PORTION 30 OF THE FARM KRUYS VALLEY NO. 187, DIVISION OF TULBAGH
LICENCE HOLDER:	WITZENBERG MUNICIPALITY
CONTACT PERSON(S):	JOHNNY JACOBS
ADDRESS:	PO BOX 44, CERES, 6835

1. LOCATION

1.1 This Licence authorises the Witzenberg Municipality to dispose of and recover general waste on remainder of Erf 1, Portion 1 of the farm Middelpos No. 116 and Portion 30 of the farm Kruys Valley No. 187, Division of Tulbagh, Winelands District Municipality.

1.2 The location of the Facility must be according to co-ordinates indicated in the Waste Management Licence Application Additional Information Annexure dated March 2016, and the points indicted on Figure 1 of the Site Layout locality map in the Final BAR, received by the Department on 18 March 2016, which is defined as follows:

Corner point	Latitude (S)	Longitude (E)
A	33° 16' 20.34"	19° 07' 52.06"
B	33° 16' 19.78"	19° 08' 01.66"
C	33° 16' 23.64"	19° 08' 02.42"
D	33° 16' 23.70"	19° 08' 01.45"
E	33° 16' 34.14"	19° 07' 59.06"
F	33° 16' 33.33"	19° 07' 54.52"
G	33° 16' 38.92"	19° 07' 52.84"
H	33° 16' 37.76"	19° 07' 48.43"

Location of property on which the entrance gate to the Facility is situated:

Latitude (S)	Longitude (E)
33° 16' 32.27"	19° 07' 59.58"

1.3 The Surveyor General (SG21) digit codes are:
C0750003000000100000
C0750003000001660000
C0750003000018700030

1.4 The size of the property within which the activity is undertaken is approximately 128 678m². The current (Phase 1) development footprint is approximately 29 624m².

1.5 The Licence Holder shall within a period of 60 days from the date of issuing of this Licence, apply for the rezoning of all the licenced land for waste disposal purposes. Should the Licence Holder be unsuccessful in rezoning the Facility for waste disposal purposes within a period of (two) years from the date of issuing of this Licence, a written motivation shall be provided to the Director defining the reasons why the application for rezoning failed. The Director shall then take an appropriate decision regarding the future of the Facility.

1.6 The Licence Holder shall take all reasonable steps, such as buying out land or acquiring servitudes, to prevent the development of further residential and / or light industrial areas closer to the Facility. Heavy industries or industries which may create nuisance conditions may be permitted within the buffer zone in terms of the appropriate legislation.

2. APPOINTMENT OF WASTE MANAGEMENT CONTROL OFFICER/ ENVIRONMENTAL CONTROL OFFICER

2.1 A Waste Management Control Officer (WMCO) or Environmental Control Officer (ECO) must be appointed, who will monitor and ensure compliance and the correct implementation of all mitigation measures and provisions as stipulated in the Licence and Environmental Management Programme (EMP). The WMCO / ECO must:

2.1.1 Report any non-compliance with any Licence conditions or requirements or provisions of NEM: WA to the Licensing Authority through means reasonably available.

2.1.2 Monitor any future construction activities and ensure that the construction plans are in accordance with the approved engineering design.

2.2 The duties and responsibility of the WMCO/ ECO should not be seen as exempting the Licence Holder from any other legal obligation in terms of the NEM:WA.

3. GENERAL MANAGEMENT

3.1 The EMP, submitted as part of the final BAR, is hereby approved and must be implemented together with all the conditions of this Licence.

3.2 A copy of this Licence, the EMP and the Operational Plan must be kept at the Facility where the activity will be undertaken. These documents must be produced to any authorised official of the Department who requests to see them and must be made available for inspection by any employee or agent of the holder of the Licence who works or undertakes work at the Facility.

3.3 The Facility must be managed by fit and proper persons who are competent in respect of the responsibilities to be undertaken by them.

3.4 The Licence Holder shall remain responsible for the Facility, and/or any of its impacts on the environment.

3.5 The Licence Holder must notify the Director immediately of events or incidents that may cause significant environmental damage or breach the requirements of the Licence, EMP or Operational Plan.

3.6 Waste should be managed in such a way as not to cause any nuisance conditions to the surrounding area.

3.7 Staff should receive a basic level of environmental awareness training, and be trained on the identification and proper handling of waste.

3.8 An Emergency Response Plan (ERP) must be developed in accordance to the EMP, and all staff must be trained in the implementation thereof. The ERP should be regularly updated and must include fire evacuations, injury on duty and accidents caused by unexpected hazardous waste ending up in the Facility.

3.9 All fires at the Facility must be treated as a potential emergency and dealt with accordingly i.e. the Licence Holder must develop and implement a routine fire procedure to extinguish any fires present on the Facility as soon as possible, even after normal working hours (refer to EMP).

3.10 The Facility must comply with the Provincial Noise Control Regulations P.N. 200/2013 as promulgated under ECA.

3.11 The presence of any nuisance conditions must be monitored and measures must be undertaken to rectify the presence of each nuisance condition.

3.12 The Licence Holder must minimise the proliferation of vermin at the Facility by implementing appropriate measures.

3.13 In order to prevent nuisance conditions, pollution and/or littering incidents, the Licence Holder must ensure that all waste storage containers are not overfilled and must be accessible.

3.14 Any complaint from the public must be attended to by the Licence Holder, who must take all reasonable and practical steps to alleviate the cause of the complaint within a reasonable timeframe to the satisfaction of the Department and record it in terms of Condition 9.

3.15 Duty of care should be exercised in accordance with section 28 of the National Environmental Management Act (Act 107 of 1998) (NEMA), to prevent pollution and environmental degradation.

4. PERMISSIBLE WASTE

4.1 Any portion of the Facility as demarcated in Condition 1.2, may be used for the disposing of, recovery and sorting, of general waste. Only waste that is classified as general waste according to the NEM:WA or any current and future Norms and Standards developed by the Department is permitted.

4.2 No hazardous waste is permitted to be disposed of at the Facility. If more than 80m³ of hazardous waste is going to be stored at the Facility, registration in terms of the relevant National Norms and Standards for the Storage of Waste (GN No. 926) must be done.

4.3 The Licence Holder must prevent the acceptance of any waste not authorised at the Facility.

4.4 All waste loads must be checked at the gate according to the EMP to prevent the disposal of waste not permitted by this Licence.

5. CONSTRUCTION

5.1 Administration and General

5.1.1 This Licence must be made binding to the main contractor as well as individual contractors and should be included in tender documentation for the construction contract.

5.1.2 The Facility construction must be carried out under the supervision of a WMCO/ ECO who must submit a declaration to the Director upon completion that all possible mitigation measures have been put in place and highlight likely deficiencies before commencement of the listed activities.

5.1.3 Should any archaeological artefacts be exposed during excavation, the construction in the vicinity of the finding must be stopped. Under no circumstances shall any artefacts be destroyed. Such an archaeological site must be marked and fenced off, and South African Heritage Resource Agency must be contacted within 48 hours.

5.1.4 Construction of the Facility must be according the EMP, Operational Plan and Drawing A199/901, and compliant with recognized civil engineering standards.

5.1.5 The Licence Holder must conduct a topographic survey of the waste body within 3 (three) months of the date of this Licence and thereafter every 2 (two) years to determine the contours of the waste body and calculate the available airspace, side slopes and final height of the Facility and submit the contours and calculations to the Director within 3 (three) months of the survey. These surveys must confirm that the waste body is constructed according to the Operational Plan and Drawing A199/901.

5.2 Waste Disposal Infrastructure

5.2.1 The footprint of the waste body of Phase 1, as described in the Operational Plan may not exceed the outline as indicated in Drawing A199/901.

5.2.2 The design and construction of any further phases within the licenced boundaries must be lined with a containment barrier for a Class B waste disposal facility as prescribed in GN No. R. 636, or an alternative design authorised by the Director in consultation with the Provincial Head.

5.2.3 A two-way access road must be constructed with material that is suitable for road building. This access road must also be maintained to facilitate easy access to the Facility and the active cells.

5.2.4 The Licence Holder must ensure that the maximum height of the waste body does not exceed 175 metres above mean sea level (mamsl).

5.2.5 The side slope of the waste body, above ground, may not be steeper than a 1 vertical: 4 height gradient and maintained in such a manner that erosion is prevented.

5.2.6 A special waste cell must be constructed and be accessible to handle general waste in prolonged periods in inclement weather conditions, if required.

5.2.7 An outer perimeter lift berm must be constructed on the existing waste body according to the Operational Plan.

5.2.8 Daily cell-building in the construction of the waste area or lifts must be implemented according to the Operational Plan, to ensure that the working face is kept to a minimum, available airspace is optimised and nuisance conditions are minimised.

5.2.9 Daily compaction of the waste using the 'ramp method' must be implemented, while 'end tipping' is prohibited.

5.2.10 A stockpile of acceptable daily cover material to cover the compacted waste with a 150mm thick layer, over a two week period, must be maintained at all times.

5.2.11 The Licence Holder shall make provision for adequate sanitation facilities for staff on the Facility.

5.3 Stormwater Management

5.3.1 A stormwater management system must be constructed to divert all runoff water, arising from adjacent land or areas of the Facility not used for the management of waste, around the Facility or waste body. This stormwater system must have the capacity to maintain a freeboard of a half a metre in the event of a maximum precipitation during a period of 24 (twenty four) hours with an average frequency of once in fifty (1:50) years.

5.3.2 A collection toe drain around the perimeter of the waste body must be installed to collect any potentially contaminated runoff water and leachate, if any, from the waste body and drain this runoff into an appropriately lined containment pond. This runoff water system must have the capacity to maintain a freeboard of a half a metre in the event of a maximum precipitation during a period of 24 (twenty four) hours with an average frequency of once in fifty years and must be lined to prevent pollution to groundwater.

5.3.3 Runoff water that is released into the environment must comply with the quality requirements of the General and Special Standards, as published in Government Notice 991 of 18 May 1984, or with such quality requirements as may from time to time be determined by the Provincial Head and shall be drained from the Facility in a legal manner.

5.3.4 Runoff water that does not comply with the quality requirements applicable in terms of Condition 5.3.3 and all sporadic leachate from the Facility must be contained and evaporated in lined containment ponds.

5.3.5 All areas where waste is temporary stored and handled, excluding the disposal area, must be designed and managed so that no contaminants can escape into the environment. All runoff, if any, must be prevented from entering local watercourses.

6. OPERATIONAL MANAGEMENT

6.1 Site security and access control

6.1.1 The Licence Holder must prevent unauthorised access to the Facility, by having the Facility enclosed with an adequate fence and gate of 1.8m height and providing effective accesses control.

6.1.2 Weatherproof, durable and legible notices must be displayed at each entrance in at least 2 (two) official languages applicable to the area. These notices must prohibit unauthorised entry, state the hours of operation, include the types of waste permissible, the name, address and telephone number of the Licence Holder and the person responsible for the operation of the Facility.

6.1.3 The Licence Holder must provide access control during operational hours and must ensure that the gate is locked outside operational hours.

6.2 Impact management

6.2.1 The operational activities of the Facility shall be according to the Operational Plan.

6.2.2 Windblown litter must be prevented as far as practically possible and contained on-site with moveable fences. All windblown litter caught on any fences or blown off-site must be removed and disposed of on a daily basis.

6.2.3 Any portion of the Facility as demarcated in Condition 1.2 may be used to recover waste, however, no informal recovery or picking of waste at the Facility is permitted and the recovery activity shall not interfere with the daily operational activities of the Facility.

6.2.4 Waste must be compacted and covered daily with 150mm of suitable cover material and areas that will be left for a period longer than one year must be covered with 300mm compacted suitable cover material.

6.2.5 Occupational health and safety risks to all staff and visitors must be identified and mitigated by providing appropriate personal protective equipment and ensuring that these are utilised on the Facility.

6.2.6 Invasive alien vegetation must be controlled and removed annually.

6.2.7 Dust emissions must be mitigated by dust suppression methods such as the wetting of access roads, minimising earth moving operations during windy conditions and speed limiting.

6.2.8 The burning of waste at the Facility is prohibited.

6.2.9 Containers, skips or bins must be clearly marked to indicate the different waste types to be collected.

7. MONITORING

7.1 Water Monitoring

7.1.1 Groundwater monitoring network:

7.1.1.1 The Licence Holder must establish and maintain a monitoring borehole network to the satisfaction of the Director and the Provincial Head.

7.1.1.2 Monitoring boreholes shall be equipped with lockable caps. The Director and the Provincial Head reserve the right to take water samples at any time and to analyse these samples or have them analysed. The Licence Holder must ensure that all monitoring sites are adequately protected from vandalism and are kept in an acceptable operational condition.

7.1.2 Background groundwater monitoring:

7.1.2.1 Samples from an upstream borehole where the groundwater in the borehole is at an expected higher hydraulic pressure level than the hydraulic pressure level of the groundwater under the waste body shall be considered as background monitoring. Background groundwater monitoring shall be conducted during each monitoring occasion in terms of Conditions 7.1.4 and 7.2.1 for water quality variables listed in Annexure I. Background water sampling must be used to establish a water quality baseline against which the downstream groundwater samples must be compared.

7.1.3 Surface water monitoring:

7.1.3.1 Surface water monitoring must be performed in the runoff water containment pond prior to contemplating the following activities: releasing this water into the environment or using this water for irrigation or dust suppression. These activities may only take place once the Director and the Provincial Head have evaluated these monitoring results and have authorised the Licence Holder to proceed with these activities.

7.1.4 Detection monitoring:

7.1.4.1 Monitoring for groundwater quality must be conducted bi-annually, once in the winter and once in the summer, or such frequency as may be determined by the Director and the Provincial Head, for the water quality variables listed in paragraph (a) of Annexure II and annually, in winter, for the water quality variables listed in paragraph (b) of Annexure II.

7.1.5 Method of analysis:

7.1.5.1 The Licence Holder shall carry out all tests in accordance with methods prescribed by and obtainable from the South African Bureau of Standards (SABS), referred to in the Standards Act, 1982 (Act 30 of 1982), to analyse the samples taken under the monitoring programmes specified in Condition 7.

7.1.5.2 The Licence Holder shall only use another method of analysis if written proof that the method is at least equivalent to the SABS method, is submitted to the Director and the Provincial Head.

7.2 Investigative Monitoring

7.2.1 If, in the opinion of the Director and the Provincial Head, a water quality variable listed under the detection monitoring programme, as referred to in Condition 7.1.4, shows an increasing trend, the Licence Holder shall initiate a monthly monitoring programme for the water quality variables listed in Annexure I.

7.2.2 Should the Director suspect that the Facility may be generating significant amounts of landfill gas, the Licence Holder shall implement landfill gas monitoring as prescribed by the Director.

7.3 Further Investigations

7.3.1 If, in the opinion of the Director and the Provincial Head, groundwater and/or surface water pollution have occurred or may possibly occur, the Licence Holder shall conduct the necessary investigations and implement additional monitoring and rehabilitation measures which shall be to the satisfaction of the Director and the Provincial Head.

7.3.2 If, in the opinion of the Director, environmental pollution, nuisances or health risks may be or are occurring at the Facility, the Licence Holder must initiate an investigation into the cause of the problem or suspected problem. Such investigation must include the monitoring of the relevant environmental pollution, nuisance and health risk variables, at those monitoring points and at such frequency as will be determined in consultation with the Director. Should the investigation reveal any unacceptable levels of pollution, the Licence Holder must submit a report with mitigation measures to the satisfaction of the Director.

7.4 Post-closure Monitoring

7.4.1 Groundwater and landfill gas, if required, monitoring by the Licence Holder, in accordance with Conditions 7.1 or 7.2.2, shall continue upon closure of the Facility and be maintained for a period of 30 (thirty) years, or such lesser period as may be determined by the Director and the Provincial Head.

8. AUDITING

8.1 Internal audits

8.1.1 Internal audits, including compliance to the Licence conditions, general Facility operations, complaints, responses and the records kept in terms of Condition 9, must be conducted quarterly by the Licence Holder and on each audit occasion an official report must be compiled by the relevant internal auditor to report the findings of the audits, which must be submitted to the Director according to Condition 10.10 and which must be made available to the external auditor specified in Condition 8.2.1. The internal audits must be compiled in the format required by the Department

8.2 External audits

8.2.1 The Licence Holder must appoint an independent external auditor to audit the Facility bi-annually (twice a year) and this auditor must compile an audit report documenting the findings of the audit, which must be submitted by the Licence Holder to the Director according to Condition 10.10.

8.2.2 The audit report must:

(a) Specifically state whether conditions of this Licence are adhered to;

(b) Include trend graphs and an interpretation of all available data and test results regarding the operation of the Facility and all its impacts on the environment;

(c) Include the findings of the internal audit reports required in Condition 8.1.1;

(d) Make recommendations on partial and non-compliances and how to improve the management of the Facility;

(e) Specify target dates for the implementation of the recommendations to achieve compliance; and

(f) Specify whether corrective action which was taken for the previous audit's non conformities was adequate.

8.2.3 The external audit report must be submitted to the Director within 30 (thirty) days from the date on which the external auditor finalised the report and according to Condition 10.10.

8.3 Departmental audits and inspections

8.3.1 The Department reserves the right to audit or inspect the Facility without prior notification at any time and frequency as may be determined by the Director.

8.3.2 The findings of these audits or inspections must be made available to the Licence Holder within 60 (sixty) days of the end of the audit or inspection. Information from the audits must be treated in accordance with the Promotion of Access to Information Act, 2000 (Act No. 2 of 2000).

8.3.3 The Licence Holder must make any records or documentation available to the Director upon request, as well as any other information the Director may require.

9. RECORD KEEPING

9.1 The Licence Holder must keep records of all monitoring results, nuisances and complaints at the Facility.

9.2 Accurate records of waste volumes or masses received and recovered must be kept at the Facility and reported to the Department as per Condition 10.7.

9.3 All records required or resulting from activities required by this Licence must:

(a) Be legible;

(b) Be made available and should form part of any audit report;

(c) If amended, be amended in such a way that the original and any subsequent amendments remain legible and are easily retrievable;

(d) Be retained in accordance with documented procedures which are approved by the Department; and

(e) Be made available upon the request of the Director.

9.4 The Licence Holder shall record all borehole data and chemical analysis as required in Condition 7.1.

10. REPORTING

10.1 The Licence Holder must, within 24 (twenty four) hours, notify the Director of the occurrence or detection of any incident on the Facility which has the potential to cause, or has caused any pollution.

10.2 The Licence Holder must, within 14 (fourteen) days, or as specified by the Director from the occurrence or detection of any incident referred to in Condition 10.1, submit an action plan, which must include a detailed time schedule, and resource allocation signed off by management, to the satisfaction of the Director of measures taken to:

(a) Correct the impact resulting from the incident;

(b) Prevent the incident from causing any further impact; and

(c) Prevent a recurrence of a similar incident.

10.3 In the event that measures have not been implemented within 21(twenty one) days of the incident to address impacts caused by the incident referred to in Condition 10.1, or measures which have been implemented are inadequate, the Director may implement the necessary measures at the cost and risk of the Licence Holder.

10.4 The Licence Holder must keep and maintain an incident and complaints register, which must be kept at the Facility and be made available at the request of the Director.

10.5 The Department must be notified within 7 (seven) days of any changes to the management of the Facility including the name of the incoming person together with evidence that such person has the required technical competence.

10.6 The Department must be notified within 14 (fourteen) days of the following changes:

(a) Licence Holder's trading name, registered name or registered office address;

(b) Particulars of the Licence Holder's ultimate holding company (including details of an ultimate holding where a Licence Holder has become a subsidiary); and

(c) Steps taken with a view to the Licence Holder going into bankruptcy, entering into composition or arrangement with creditors.

10.7 The Licence Holder must register and report all waste volumes or masses received, recovered, disposed of or stored to the Department's Integrated Pollutant and Waste Information System (IPWIS) URL: http://ipwis.pgwc.gov.za/ipwis3/public, as required by the Department.

10.8 The Department must be notified without delay in the case of the following:

(a) Any malfunction, breakdown of failure of equipment or techniques, accident or fugitive emission which has caused, is causing or may cause significant pollution;

(b) The breach of conditions of this Licence; and

(c) Any significant adverse environmental and health effects.

10.9 Prior written notification must be given to the Director of the following events and within the specified timeframes:

(a) As soon as practicable prior to the permanent cessation of any operational activities;

(b) Full or partial cessation of the operational activities for a period likely to exceed 3 (three) months; and

(c) Full or partial resumption of the operation of all or part of the activities after a cessation notified under (b) above.

10.10 The information required in terms of Conditions 7 must be reported to the Director in the format specified in Conditions 8.1 and 8.2, where applicable, within a period of 30 (thirty) days following the analysis of the samples. The information must also be included in a trend report, which must contain a graphical presentation of all results obtained previously at any specific point, as well as an interpretation and discussion of the results of each monitoring occasion.

11. MONITORING COMMITTEE

11.1 The Licence Holder must take all reasonable steps to establish and ensure the continued functioning of the Tulbagh Waste Disposal Facility for the normal operative lifetime of the Facility and for the closure of the Facility, as determined by the Director.

11.2 The Monitoring Committee must be established and must formulate a terms of reference and code of conduct, to the satisfaction of the Director, under which the Committee can operate.

11.3 The Residents Monitoring Committee (RMC) shall be representative of relevant interested and affected persons and may consist of at least the following persons:-

a) representative(s) of the Witzenberg Municipality
b) representative(s) this Department;
c) representative(s) of the Department of Water and Sanitation; and
d) at least 1 (one) person/party, or their representatives elected by the local residents.

11.4 The RMC shall meet at least once every 6 (six) months and not later than 30 (thirty) days after the external audit report specified in condition 8.2.

11.5 The Licence Holder must keep minutes of all meetings of the RMC and distribute these minutes to all members of the RCM within 30 (thirty) days after the meeting.

12. LEASING AND ALIENATION OF THE SITE

12.1 Should the Licence Holder want to alienate or lease the Facility, he/she must notify the Director in writing of such an intention at least 120 (one hundred and twenty) days prior to the said transaction. Should the approval be granted, the subsequent Licence Holder shall remain liable to compliance with all Licence conditions.

13. TRANSFER OF THE WASTE MANAGEMENT LICENCE

13.1 Should the Licence Holder want to transfer holdership of this Licence, he/she must apply in terms of section 52 of the NEM:WA, 2008.

13.2 Any subsequent Licence Holder shall be bound by the conditions of this Licence.

14. REHABILITATION AND CLOSURE OF THE FACILITY

14.1 In accordance with Government Notice No. 921 of 29 November 2013 or any amendments thereto, a waste management licence is required for the decommissioning of a facility. The Licence Holder must therefore submit a waste management licence application should he /she intend to decommission the Facility.

14.2 Immediately following the cessation of operations with the intention to close the Facility, the surface of the Facility shall be covered in such a way that-

14.2.1 The formation of pools due to rain is prevented;

14.2.2 Free surface runoff of rainwater is ensured; and

14.2.3 No objects or materials which may hamper the remediation of the Facility are present.

14.3 The Licence Holder must rehabilitate the Facility or any portion thereof, in accordance with a closure report and rehabilitation plan, which must be submitted to the Department for approval at least one year prior to the intended closure of the Facility, or any portion thereof.

14.4 The Licence Holder shall remain responsible for the Facility, and/or any of its impacts on the environment, after operations on the Facility have ceased.

15. GENERAL

15.1 This Licence is valid until the waste disposal airspace capacity, according to the Operational Plan, has been reached and confirmed by calculations in terms of Condition 5.1.5. The Licence may be reviewed at any time within the lifetime of this Licence. Based on the results of the review, especially compliance to Licence conditions or recommendations from the audit reports and or changing legislation, the Licence can be varied or withdrawn or the validity thereof be extended.

15.2 This Licence shall not be transferable unless such transfer is subject to Condition 13 above.

15.3 This Licence shall not be construed as exempting the Licence Holder from compliance with the provisions of any National and Provincial Legislation and relevant Ordinance, Regulation, By-laws and relevant National Norms and Standards.

15.4 The Licence Holder must in writing, within 14 (fourteen) days of the date of this decision on the application, in accordance with regulation 4(2) of GN No. R.982 of 4 December 2014, ensure that:-

(a) all registered interested and affected parties are provided with access to the decision and reasons for such decision; and

(b) the attention of all registered interested and affected parties is drawn to the fact that an appeal may be lodged against the decision in terms of the National Appeals Regulations of 2014, if such appeal is available in the circumstances of the decision.

15.5 Transgression of any condition of this Licence could result in the suspension of the Licence by this Department.

15.6 Non-compliance with a condition of this Licence may result in criminal prosecution or other actions provided for in section 67(1) of the NEM:WA.

15.7 In terms of sections 28 and 30 of the NEMA, and sections 19 and 20 of the National Water Act, 1998 (Act No. 36 of 1998), any costs incurred to remedy environmental damage must be borne by the person responsible for the damage. It is therefore imperative that the Licence Holder reads through and understand the legislative requirements pertaining to the project. It is the Licence Holder's responsibility to take reasonable measures which include informing and educating contractors and employees about environmental risks of their work and training them to operate in an environmentally acceptable manner.

D. APPEALS

Appeals must comply with the provisions contained in the National Appeal Regulations, 2014.

1. An appellant (if the applicant) must –

1.1. Submit an appeal in accordance with Regulation 4 to the appeal administrator and a copy of the appeal to any registered interested and affected parties (I&Aps), any Organ of State with interest in the matter and the decision maker within 20 (twenty) calendar days from the date the applicant was notified by the Department of this decision;

2. An appellant (if NOT the applicant) must –

2.1. Submit an appeal in accordance with Regulation 4 to the appeal administrator, and a copy of the appeal to the applicant, any registered I&AP, any Organ of State with interest in the matter and the decision maker within 20 (twenty) calendar days from the date the applicant notified the registered I&APs of the this decision;

3. The applicant (if not the appellant), the decision-maker, I&AP and Organ of State must submit their responding statements, if any, to the appeal authority and the appellant within 20 (twenty) calendar days from the date of receipt of the appeal submission.

4. This appeal and responding statement must be submitted to the address listed below:

By post:	Western Cape Ministry of Local Government, Environmental Affairs and Development Planning Private Bag X9186 CAPE TOWN 8000
By facsimile:	(021) 483 4174; or
By hand:	Attention: Mr J. de Villiers Room 809, 8th Floor Utilitas Building, 1 Dorp Street, Cape Town, 8001

Note: You are also requested to submit an electronic copy (Microsoft Word format) of the appeal and any supporting documents to the Appeal Administrator to the address listed above and/ or via e-mail to Jaap.DeVilliers@westerncape.gov.za.

5. A prescribed appeal form as well as assistance regarding the appeal processes is obtainable from the office of the Minister at: Tel. (021) 483 3721. E-mail Jaap.DeVilliers@westerncape.gov.za or URL http://www.westerncape.gov.za/eadp.

E. DISCLAIMER

The Western Cape Government, the Local Authority, committees or any other public authority or organisation appointed in terms of the conditions of the Licence shall not be responsible for any damages or losses suffered by the holder, developer or his/her successor in any instance where construction or operation subsequent to construction is temporarily or permanently stopped for reasons of non-compliance with the conditions as set out herein or any other subsequent document or legal action emanating from this decision.

Your interest in the future of our environment is greatly appreciated.

Yours faithfully

EDDIE HANEKOM

APPENDIX 1

REASONS FOR THE DECISION

The motivation for a variation of the Permit, as well as factors affecting the broader development were considered to ensure the effective implementation of this Licence are explained below.

The following information was available to the Department, which was taken into account in the Department's consideration of the application;

(a) The conditions of the Permit No. 16/2//7/G100/D6/Z1/P305 issued on 31 July 1998, in terms of section 20 of ECA, issued by the DWAF (now known as the DWS), for the disposal and recovery of general waste at a class **G: S: B** site;

(b) The final Basic Assessment Report (BAR), dated March 2016, by Resource Management Services;

(c) A Public Participation Report appended to the BAR;

(d) A Visual Impact Assessment Report, dated March 2016, by Antoinette de Beer, appended to the BAR;

(e) An Environmental Management Programme (EMP), dated March 2016, by Resource Management Services, appended to the BAR;

(f) Drawing A199/901, dated August 2015, by Jan Palm Consulting Engineers cc, appended to the BAR;

(g) An Operation, Management and Rehabilitation Plan, dated June 2015, by Jan Palm Consulting Engineers cc, appended to the BAR;

(h) Waste Management Licence Application Additional Information Annexure; and

(i) The objectives and requirements of relevant legislation, policies and guidelines, including Section 2 of the NEMA.

A summary of the issues, which, in the Department's view were most significant, are set out below.

Alternatives

The following alternative was considered:

Various final height proposals as investigated in the Visual Impact Assessment Report.

Environment

The Facility is currently permitted to dispose of and recover waste at this Facility, and is therefore located on an already disturbed area. The vegetation within the permitted area does not contain enough habitats or vegetation of environmental significance and is considered a low sensitive ecosystem.

Need and Desirability

The Witzenberg Municipality currently utilises this waste disposal facility for the disposal of general waste generated in Tulbagh and temporarily of waste generated in Wolseley. A different regional waste disposal facility is being investigated, however, until such a facility becomes available, the Tulbagh waste management facility remains the best viable option to serve the Municipality at large.

The Facility is remotely located with only a few residential houses in close proximity. Thus with improved operations, as specified in the Variation Licence, this Facility should have minimal environmental impacts.

Public Participation Process

The Public Participation Process in terms of the 2014 NEMA EIA Regulation GN R 982 comprised of the following:

- The identification of interested and affected persons (IAPs);
- Advertisements were placed in the "Witzenberg Herald" and "Die Burger" newspapers on 1 December 2015, notification by e-mail to neighbouring landowners and stakeholders, and a poster was placed at the entrance of the Tulbagh Waste Disposal Facility, advertising the availability of the Draft Basic Assessment Report (draft BAR) and the opportunity to register as an IAP;
- A special meeting was held with a neighbouring land owner and this Department on 22 January 2016;
- The draft BAR was made available on the Resource Management Services' website, a hard copy placed in the Tulbagh Public Library and copies were submitted to the relevant State Departments and Authorities for comment; and
- Issues and concerns raised by the IAPs were included with responses in a Final BAR.

Authorities Consulted:

The authorities consulted include the following:

- Department of Environmental Affairs and Development Planning;
- Department of Water and Sanitation;
- Department of Health;
- Breede Overberg Catchment Management Agency;
- Cape Winelands District Municipality; and
- Witzenberg Local Municipality

Issues, concerns and comments provided by the IAPs and responses in the Final BAR have been considered in the evaluation of this application. No fundamental objections to the variation of the Permit for the operation of this Facility were received from the authorities. In addition to the two substantive variations, specific non-substantive construction and operating conditions were added to the Variation Licence to enforce improved operation of the Facility thereby aiming to reduce the major nuisance conditions that received the most concern by the IAPs.

Appendix C
Permit Annexure I & II

ANNEXURE I

WATER QUALITY VARIABLES REQUIRED FOR BACKGROUND MONITORING AND INVESTIGATIVE MONITORING: CONDITIONS 7.1.2.1 AND 7.2.1

Alkalinity (P.Alk)

Calcium (Ca)

Chromium (hexavalent) ($Cr6^+$)

Chromium (Total) (Cr)

Chemical oxygen demand (COD)

Cyanide (CN)

Mercury (Hg)

Lead (Pb)

Nitrate (as N) (NO_3-N)

Phenolic compounds (Phen)

Potassium (K)

Total dissolved solids (TDS)

Free & saline ammonia as N (NH_4-N)

Boron (B)

Magnesium (Mg)

Cadmium (Cd)

Chloride (Cl)

Fluoride (F)

pH

Sodium (Na)

Electrical conductivity (EC)

Sulphate (SO_4)

ANNEXURE II

WATER QUALITY VARIABLES REQUIRED FOR BACKGROUND MONITORING AND DETECTION MONITORING: CONDITIONS 7.1.2.1 AND 7.1.4.1

Bi-annually for:

- Alkalinity (P.Alk)
- Chemical oxygen demand (COD)
- pH
- Total dissolved solids (TDS)
- Chlorides (Cl)
- Nitrate (NO_3-N)
- Potassium (K)

Annually for:

- Electrical conductivity (EC)
- Calcium (Ca)
- Magnesium (Mg)
- Sodium (Na)
- Sulphate (SO_4)
- Fluoride (F)

RE: ACKNOWLEDGEMENT OF RECEIPT AND COMMENT ON THE EXTERNAL COMPLIANCE AUDIT REPORT OF THE OPERATIONAL TULBAGH WASTE DISPOSAL FACILITY (WDF), ON REMAINDER OF ERF 1, PORTION 1 OF THE FARM MIDDELPOS NO.116 AND PORTION 30 OF THE FARM KRUYS VALLEY NO. 187, DIVISION OF TULBAGH.

1. This letter serves as an acknowledgement of receipt of the above-mentioned external compliance audit report dated 3 May 2018, as received electronically by the Department of Environmental Affairs and Development Planning, Sub-Directorate: Waste Management Licensing (hereafter refer to as 'the Department') on 11 June 2018.
2. The Department has reviewed the report and has the following comments:
   - 2.1 The overall score obtained by the Facility in the external audit report is satisfactory.
   - 2.2 The Department supports the actions included on page 17 of the external audit report.
   - 2.3 Please provide the rationale in the comment column, for which compliance levels were determined for each waste management licence condition. The following comments (on compliance status) column must be completed by the external auditor viz. Monitoring Committee: 11.1 etc.
   - 2.4 If there is evidence that any Permit condition has become non-applicable, the Permit Holder may apply for a variation to the relevant Licence condition.
   - 2.5 The progress in addressing non-compliances identified in the external audit report will be comparatively assessed in the next internal, external and/or Departmental audit.
3. The Department reserves the right to comment and request further information based on the information received.

Please contact Muneeb Baderoon if you have any enquiries.

Yours faithfully,

AUGUST HOON
ACTING DIRECTOR: WASTE MANAGEMENT

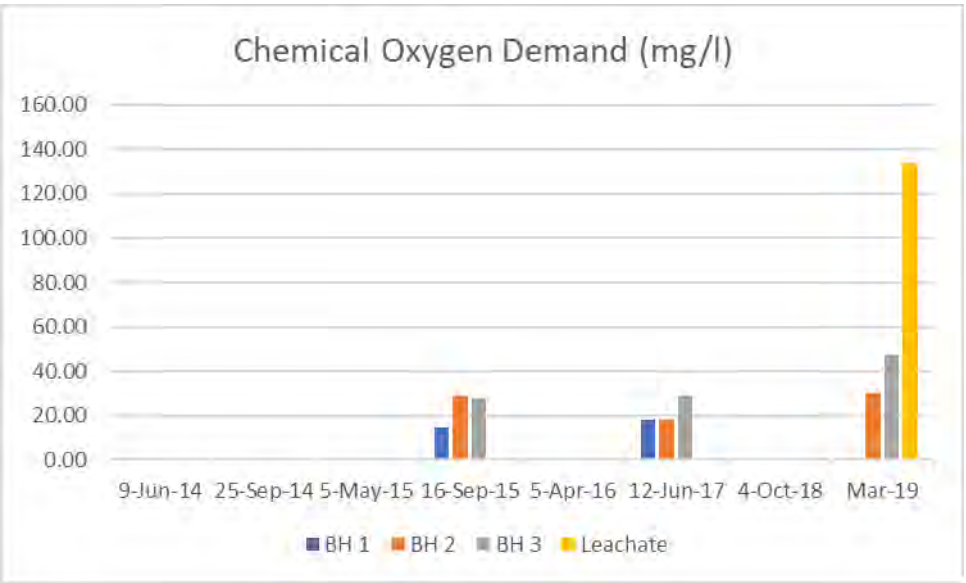
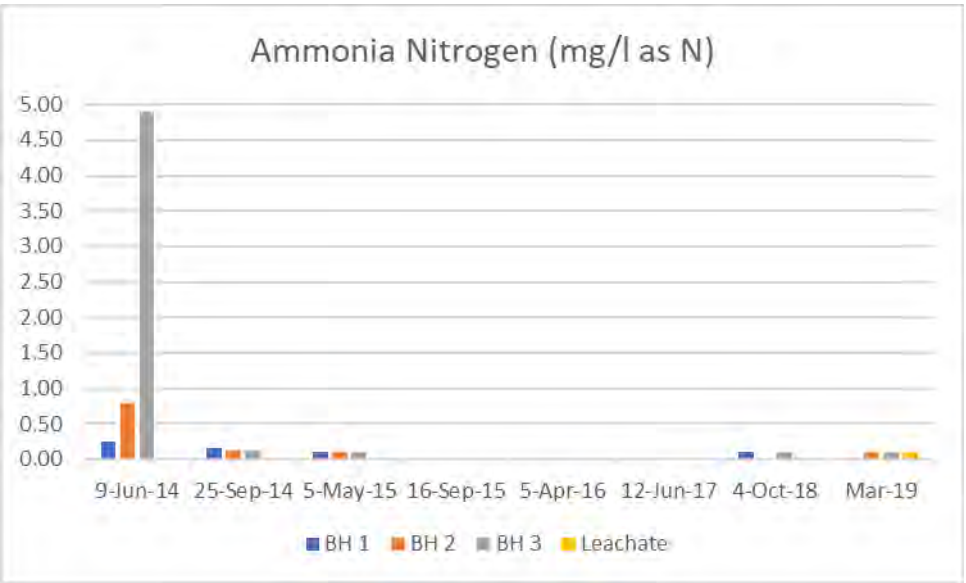
Appendix F
Groundwater & Leachate trend graphs

All monitoring data from June 2014 up to March 2019 was analysed by groundwater specialists at Aurecon and has been summarised in Table 4, Table 5 and Table 6 below. The leachate water sampling data is summarised in Table 7 below.

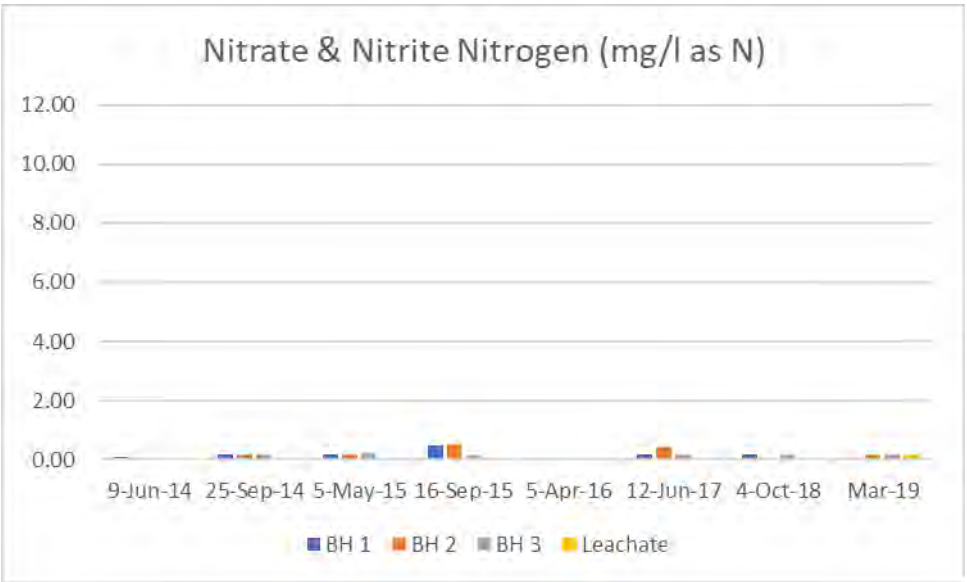
The parameters that are found to be most important for groundwater contamination detection are the Chemical Oxygen Demand (COD), Ammonia, Nitrite and Nitrate levels, Phenols, Dissolved Organic Carbon, Ortho Phosphates, and all heavy metals of all samples. Figure 8 to Figure 20 below display graphs comparing the results of the samples taken from BH1, BH2 and BH3 during 2014 through to 2019 for the indicated parameters. The graphs also include measurements for March 2019 at the detention pond, to indicate water quality of the leachate collected in this pond. In these figures the red line indicates the SANS 241-1: 2015 standard, a blue line indicates the Blue Drop Standard and a yellow line indicate chronic/acute health limits (SANS 241 and Blue Drop Standards).



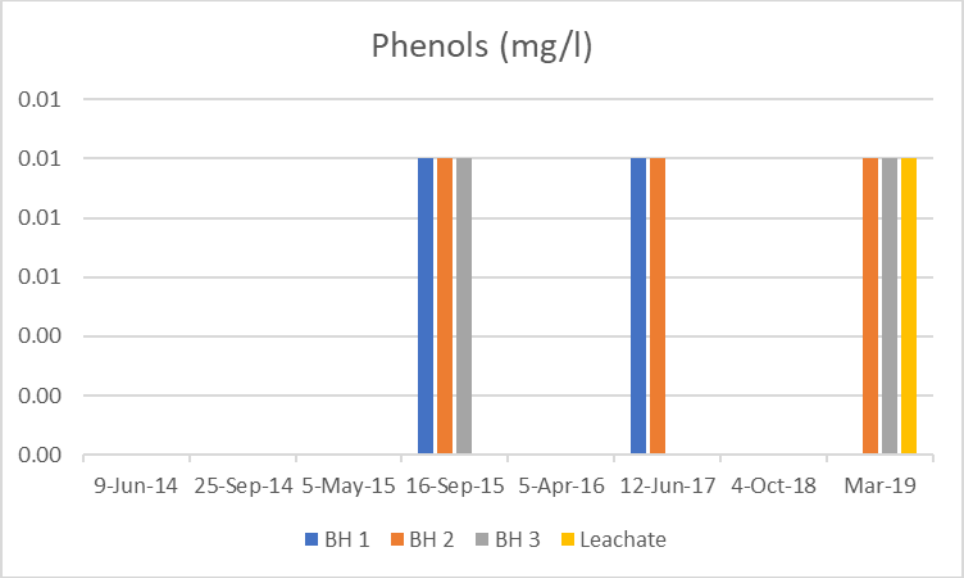
Graph 1: Graph comparing Ammonia Nitrogen of each Borehole sample analysed.



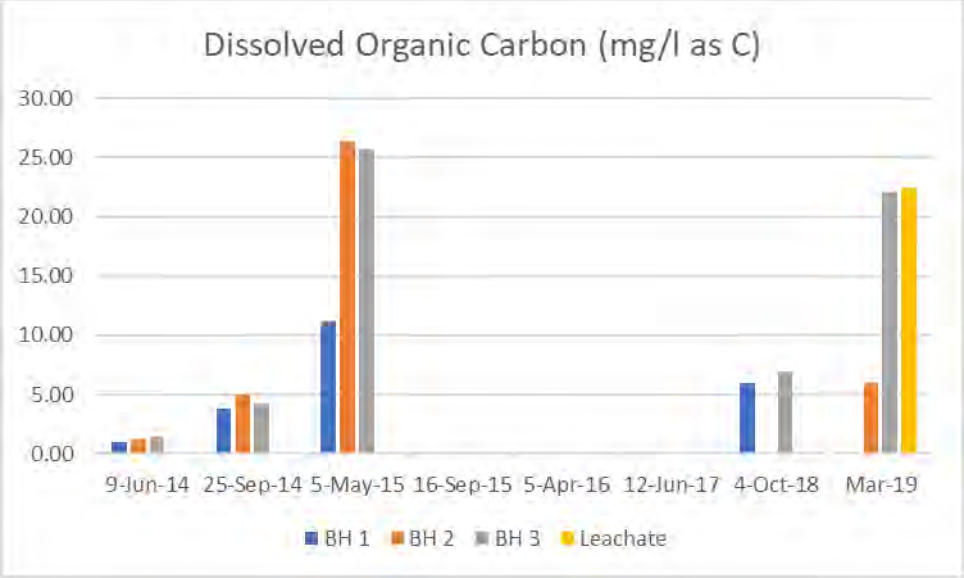
Graph 2: Graph comparing COD of each Borehole sample analysed.



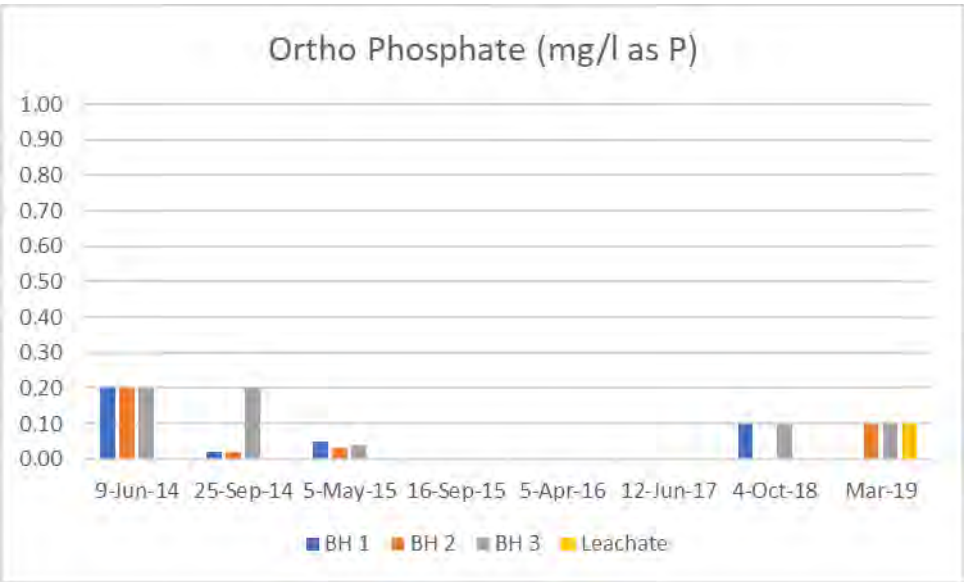
Graph 3: Graph comparing Nitrate and Nitrite of each Borehole sample analysed.



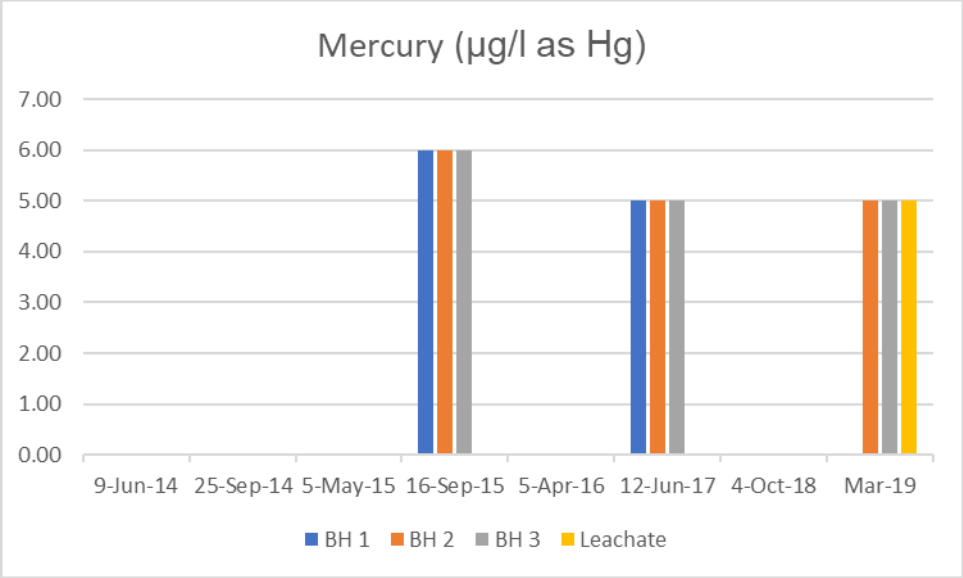
Graph 4: Graph comparing Phenols of each Borehole sample analysed.



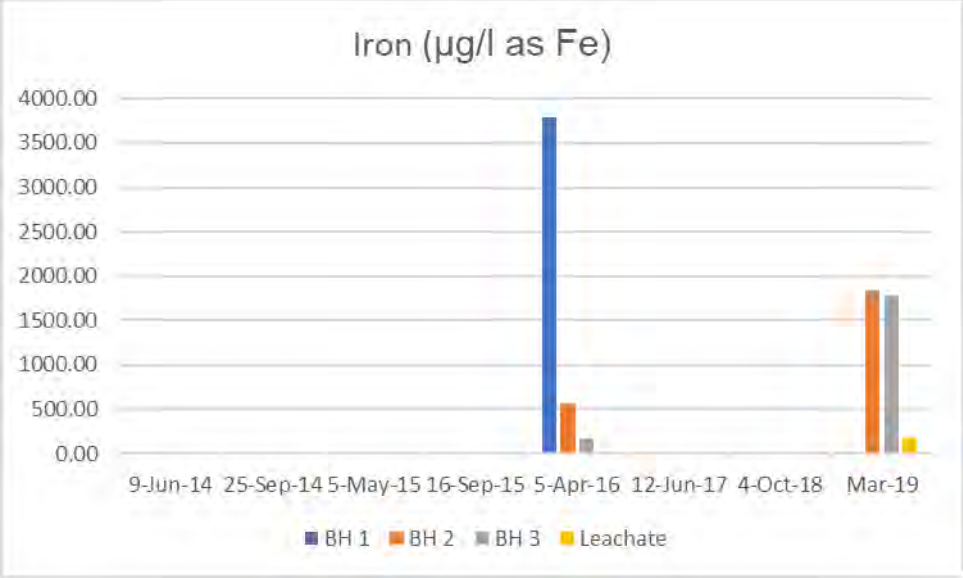
Graph 5: Graph comparing DOC of each Borehole sample analysed.



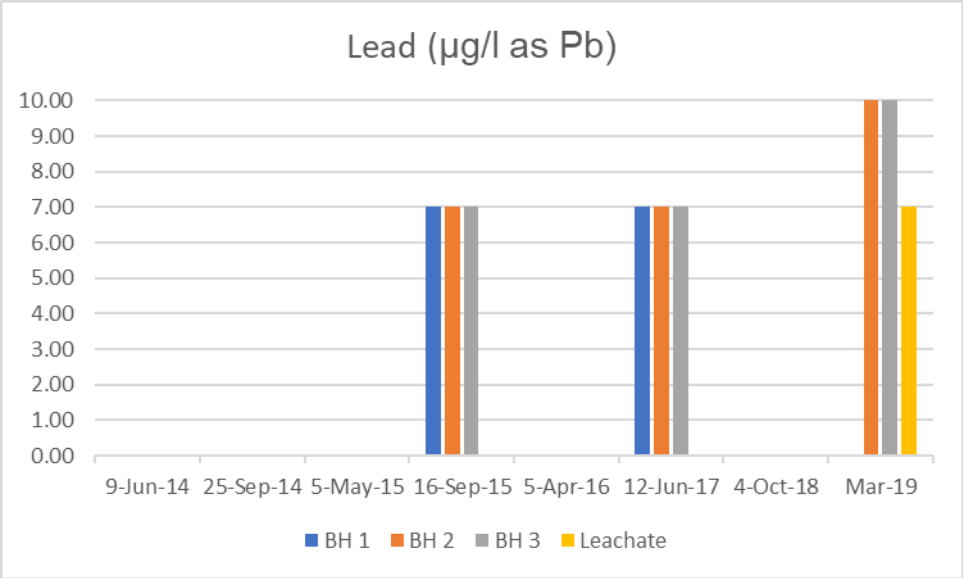
Graph 6: Graph comparing Ortho Phosphate of each Borehole sample analysed.



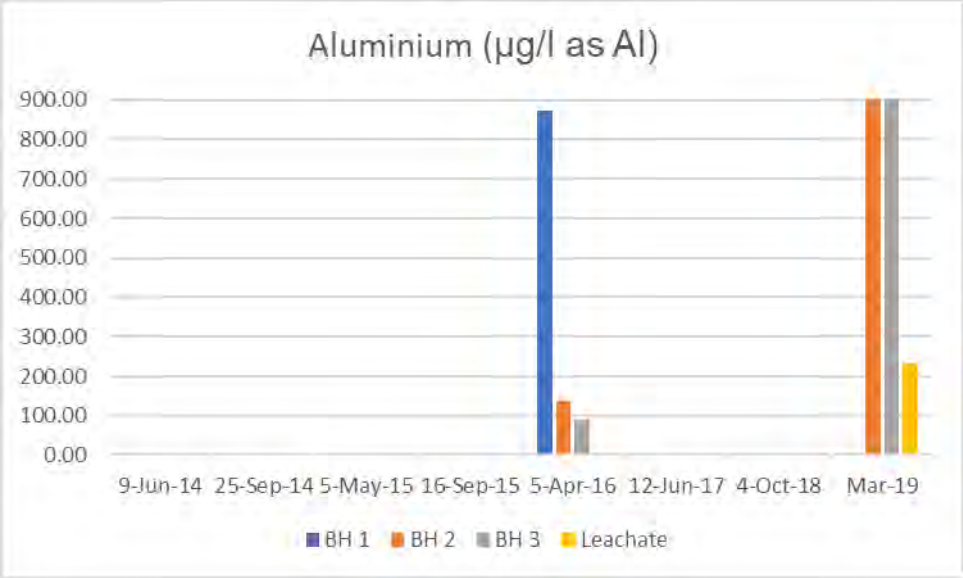
Graph 7: Graph comparing Mercury of each Borehole sample analysed.



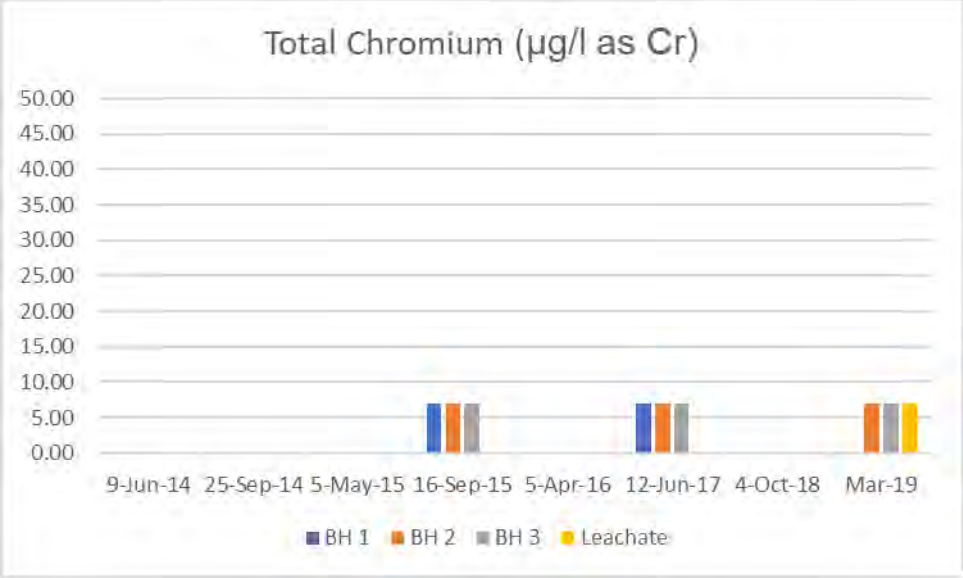
Graph 8: Graph comparing Iron of each Borehole sample analysed.



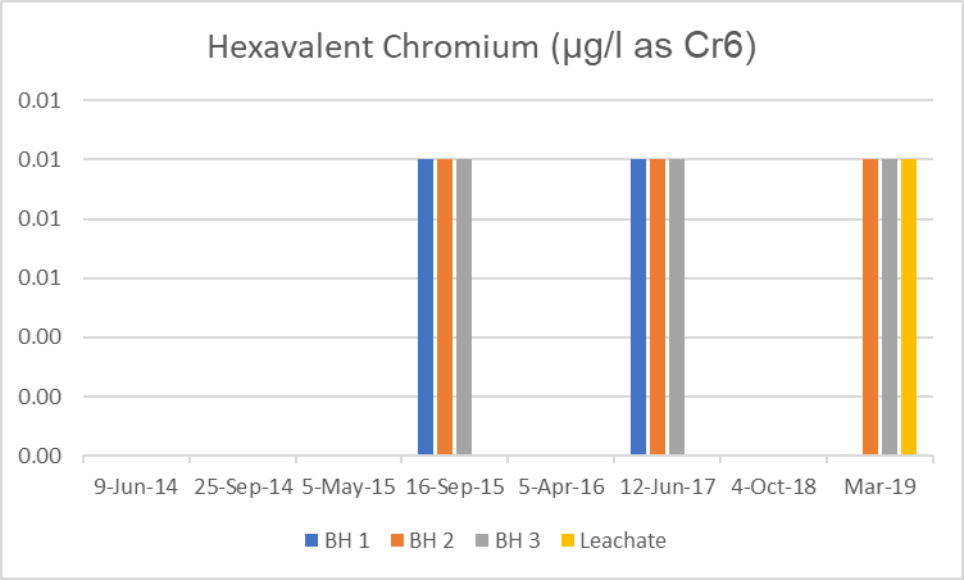
Graph 9: Graph comparing Lead of each Borehole sample analysed.



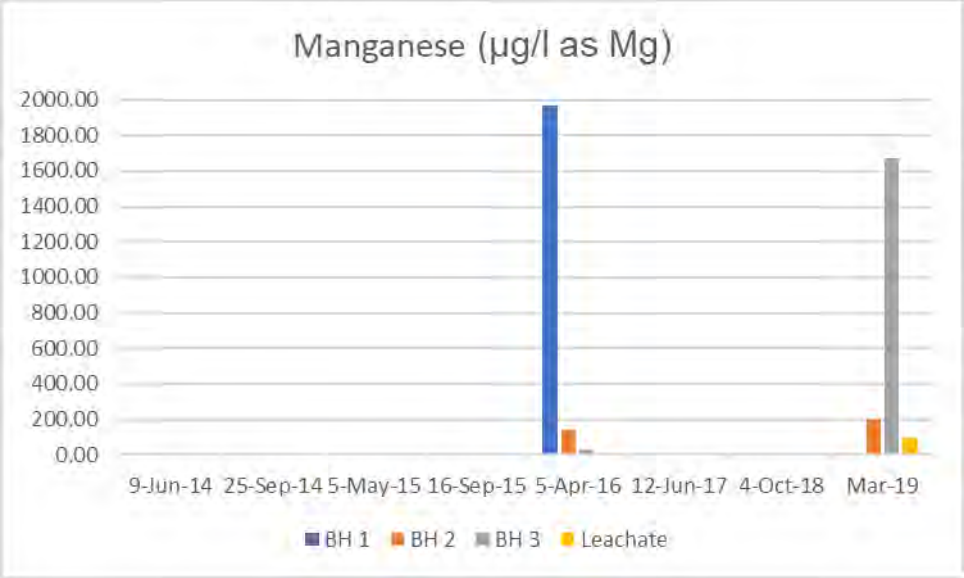
Graph 10: Graph comparing Aluminium of each Borehole sample analysed.



Graph 11: Graph comparing Total Chromium of each Borehole sample analysed



Graph 12: Graph comparing Hexavalent Chromium of each Borehole sample analysed.



Graph 13: Graph comparing Manganese of each Borehole sample analysed.

To sum up the 2014 to 2019 available groundwater and leachate monitoring data, the water quality results do not show any trend of groundwater pollution emanating from the WDF.

Appendix G
Monitoring Committee Information

WITZENBERG
Municipality • Munisipaliteit • UMasipala Wase

NOMINATIONS ARE HEREBY INVITED FROM RESIDENTS OF THE LOCAL COMMUNITY TO SERVE ON THE RESIDENTS MONITORING COMMITTEE (RMC) OF THE TULBAGH WASTE DISPOSAL FACILITY

Objectives of the RMC

As part of Permit number 19/2/5/4/B5/14/WLWO56/15 issued by the Department of Environmental Affairs and Planning (DEADP) the permit holder must take all reasonable steps to maintain and ensure the continued functioning of the RMC for the normal operative lifetime of the Site and for a period of at least two years after the closure of the Site, or such longer period as may be determined by the Provincial Department of Environmental Affairs and Development Planning (DEADP).

Enabling the community to effectively participate in and monitor the operation, rehabilitation, closure and ongoing monitoring of the Site.

Discussing and addressing the concerns of the community regarding the Site, especially those people living in the immediate vicinity.

Membership

One person/party, or their representatives elected by the local residents.

Meetings

A minimum of two meetings must be held per year.

Accountability, responsibility and liability of members

All members must act in a responsible manner and are accountable to society at large.

As the RMC is a monitoring committee and not a management committee, it is not legally responsible for the operations or the consequences resulting from the operations of the Site. Final accountability and responsibility for the Site lies with the Permit Holder.

Costs

Voluntary members of the RMC will not receive payment for their services on the RMC.

How to nominate a resident

If you would like to nominate a resident for the above RMC, please contact Johny Jacobs together with the below reference number, the name of the nominated resident, contact details (preferred method of notification, e.g. email address or fax number)

Contact: Johnny Jacobs • Tel: 023 316 1854 • Fax: 023 312 3472

E-mail: jjacobs@witzenberg.gov.za

Postal Address: PO Box 44, Ceres, 6835.

The nominations closes on 21 December 2017.

D NASSON

Sir

NOMINATION TO SERVE ON RESIDENTS MONITORING COMMITTEE OF THE TULBAGH WASTE DISPOSAL FACILITY

I refer to our advert dated 30 November 2017, for nominations to serve on the residents monitoring committee.

It gives me pleasure to inform you that you have been appointed to serve on the residents monitoring committee.

We will make contact with you regarding the establishment of the resident monitoring committee.

Yours faithfully

D NASSON
MUNICIPAL MANAGER

Your reference: **DEPARTMENT COMMENTS ON THE INTEGRATED WASTE MANAGEMENT PLAN (IWMP) STATUS QUO REPORT FOR THE WITZENBERG LOCAL MUNICIPALITY (WLM)**

Attention: Mr A. Hoon

Dear Sir,

RE: DEPARTMENT COMMENTS ON THE INTEGRATED WASTE MANAGEMENT PLAN (IWMP) STATUS QUO REPORT FOR THE WITZENBERG LOCAL MUNICIPALITY (WLM)

Allow us to express our appreciation for the quick response and valuable contributions made by your department in the process of finalising the WLM IWMP. This letter therefore serves to respond to the comments provided to Delta Built Environment Consultants (Delta BEC) by the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP).

The table below provides the comments made on the WLM IWMP Status Quo report by the DEA&DP, followed by Delta BEC's response to each comment. All comments have been incorporated into the Draft IWMP.

COMMENTS:

Waste Management Planning								
Status Quo								
	Pages	Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	Delta BEC response
Background	P.15, 1st paragraph	X				Refers to Draft NWMS A detailed background is provided with a clear purpose, scope and approach used to develop the IWMP.	The NWMS has been finalized	NWMS 2020 updated in the Draft WLM IWMP.
	Page 111 of 76, 1st bullet,2nd sentence					Western Cape Integrated Waste Management Plan: The sentence reads "The CWDM`s goals and targets …	This plan is the Witzenberg IWM, and not that of the CWDM. Please amend	Error corrected in Draft IWMP report
	Page 4 of 76, 1st bullet,2nd sentence					The plan indicated that the CWDM goals and targets will be aligned to that of the 2nd generation WCIWMP. It should refer to the "Witzenberg Municipality" as indicated above	It is important that the targets and goals also be aligned to the approved NWMS goals, objectives and targets recently approved by DEFF in September 2020 as	Noted. Goals and targets were developed to be in-line with NWMS 2020.

							the DEA&DP will be reviewing the 2nd generation IWMP to align with those as set-out within the NWMS	
	Page V11 of 76, 1st paragraph, 4th sentence					The sentence reads "Compass is licenced to transport ..".	The sentence should read as "Compass is licensed to transport..".	Section updated
						The sentence reads "Compass is licensed to transport, treat and dispose of infectious HCRW, sharps HCRW, anatomical HCRW and expired pharmaceutical **HCRW".**	Please note that Compass is not allowed to treat and disposed anatomical and pharmaceutical waste. Please obtain their licence to ensure the content is captured correct.	Confirmed with Compass that they are licensed to: Transport all medical waste streams (Sharps, Infectious, Anatomical, Pharmaceutical and Cytotoxic) and permitted to treat Sharps and Infectious via Autoclave.
						The sentence reads "Anatomical HCRW and pharmaceutical HCRW is sent to a third party (BCL) for treatment	Please note that this statement is correct and the above sentence must be amended accordingly. According to the licence conditions these types of waste should not be on the company's	Noted.

							premises if they not allowed to treat them.	
	Page VII of 76, 4th paragraph, 3rd sentence					The sentence reads "The WLM have four WWTW plants and all sewage sludges is currently disposed at the landfill sites"	Please clarify the statement. Do they dispose or stockpile this on the landfill sites? Please not that this waste stream is regarded as hazardous waste until analyse and proven otherwise.	Noted that sewage sludge is hazardous. Goal added to manage and dispose sewage sludge correctly
	Page XIV of 88, Abbreviations					NWMS: (Draft, 2019)	Please amend as the NWMS was approved in September 2020	Amended to NWMS 2020
	Page 15, 1st paragraph, 1st sentence					The sentence still refers to Draft NWMS (2019)	The NWMS has been finalized	Amended to NWMS 2020
	Page18, 3.1.3 District Municipalities, 1st paragraph, 3rd sentence					The sentence reads: "However, when the need arises for a regional site, the district can perform this function.	It is important rather to refer to regional co-operation instead of regionalism as this concept is sometimes not feasible. So regional co-operation can be between two district municipalities, depending on	Noted and amended to: "However, when the need arises for a regional site, district municipalities can co-operation roles."

							how financial feasible the process will be.	
	Page 18 of 76, 3.1.4 Local Government, 1st paragraph, 1st sentence					The sentence reads "The NEM: WA 59/2008) …. for the provisioning of waste collection services, including collection, **storage & disposal"**	It is important that without **"transport"** this service cannot be rendered. This equates to approximately 70% of the overall waste management services delivered.	Noted and amended to include the transportation.
	Page 23 of 76, National Organic Waste Composting Strategy: Draft Strategy Report & Guideline (February 2013)					Refer to the diversion of organics from landfill sites	Check if this section referring to as a Draft Strategy	Updated to: National Environmental Management: Waste Act, 2008 (act no: 59 of 2008); Draft National Norms and Standards for Organic Waste Composting (4 September 2019)
	Page 26, Western Cape IWMP, 1st paragraph					It is indicated that "The CWDM`s goals and targets will be developed in line with the 4 goals from the WCIWMP"	It should be noted that these goals will be revised to align with the recently approved NWMS (September 2020) by DEFF. It is recommended that this be done to ensure alignment, as the	Goals and targets developed in line with NWMS 2020 and WCIWMP 2017 - 2022.

							DEA&DP be reviewing the 2nd generation IWMP to align with approved NWMS.	
						It is indicated that "The CWDM`s goals and targets will be developed in line with the 4 goals from the WCIWMP"	Please amend the sentence as it should read "The Witzenberg Municipality`s goals and targets will be developed in line with the 4 goals from the WCIWMP" Please amend this also in the Langeberg IWMP	Noted and amended.
	Page 28 of 76, WLM By-Laws (2020)						Please provide clarification if this by-law was developed in 2020 and if so has it been aligned with the NE:WA	Noted and added in draft IWMP.
	Page 33 of 76, Free Basic Service					It has been indicated that indigent services are provided to communities within the LLM	Please indicate the criteria used to determine "indigent" and do council compile a reference list of these communities. Please clarify.	Updated sentence to read: "Indigent households (a family earning a combined income of less than R3 200 per month) qualify for free basic water, electricity, sanitation and waste removal services."

							Which part of the community are regarded as **"indigent"?**	
	Page 34 of 76, Operational & Capital Expenditure						Please provide a detailed breakdown of the financial expenditure	Section will be added once available
	Page 35-38 of 76, Current Tariff Structure (2020/21)						Please indicate if the municipal tariff is cost reflective, if not, so how is the % increase determined on a yearly basis. Please indicate what is the % increase for the various type of services rendered within the WLM	The yearly increase in cost for the services is 1.06% as calculated and approved by the WLM financial department.
	Page 41 of 76, Table 4-7					Questionnaires submitted to generators within the WLM jurisdiction	A concerted effort must be made to ensure that these generators complete the questionnaires for submission to the consultants. The responses are unacceptable. I	Noted

							suggest that alternative methods be used to obtain the information from the generators. Please included these in the report	
	Page 42, Health Care Risk Waste, 2nd paragraph, 5th sentence					The sentence reads "Compass is licensed to transport, treat and dispose of infectious HCRW, sharps HCRW, anatomical HCRW and expired pharmaceutical HCRW. Anatomical HCRW and pharmaceutical HCRW is sent to a third party (BCL Medical Waste) for treatment by means of incineration. Schedule 0-4 pharmaceutical HCRW is treated and disposed of at the Vissershok hazardous waste landfill".	Please note that these service providers are not allowed to transport either Anatomical HCRW and pharmaceutical HCRW if their operating licenses do not specify this. Please obtain clarification from the service provider. Please indicate if the resultant material is going to the Vissershok (Private) Hazardous Waste Landfill of that of City of Cape Town as previously indicated.	Updated to read: "Compass is licenced to transport infectious HCRW, sharps HCRW, anatomical HCRW and expired pharmaceutical HCRW. Compass reports all HCRW collected, treated and disposed of on IPWIS. Compass is permitted to treat sharps and infectious HCRW via Autoclave." Landfill updated as Vissershok Hazardous Waste Landfill.

	Page 43, Table 4:9, HCRW quantities provided by Compass					The note page 43 indicate that only November & December 2019 data was obtained from the service provider "Compass"	Please elaborate on this. Was Compass only appointed from November 2019 onwards to provide a service?	Yes. Updated to indicate that Compass only started collecting HCRW in November 2019.
	Page 44 of 76, Abattoirs					Data missioning	Please capture the data in the updated SQ Report	As indicated in the report. There are no abattoirs in WLM.
	Page 44 of 76, Sewage sludge, table 4-10: WWTW Sludge quantities					Its indicated that the sewage sludge is disposed on the landfill sites	Please note that these disposal sites may not be suitable to accept sewage sludges from the WWTWs. Please clarify if these sludges were analysed and the results find suitable for disposal at the landfill sites	Added as a goal and target to ensure for safe disposal of sewage sludge to a hazardous landfill site.
	Page 52, Formal Residential Houses, 2nd paragraph					The sentence reads: "The green (garden refuse) bags are collected from households or skips and transported to the Prince Albert Hamlet site for disposal"	Please note that the disposal of garden refuse is limit in terms of the Waste Classification and Management Regulations	Noted. Added in the goals and targets that composting should commence at the PAH landfill site to ensure that organic/garden waste is not disposed on the landfill.

	Page 53, Farms, 1st paragraph					The sentence reads "Most farmers reportedly making use of the nearest landfill site or own onsite refuse dumps"	It is important that the municipality address this matter with farmers, with own onsite refuse dumps and the fact that the waste is normally burned. This matter should be included as a concern and attended to.	Noted. Added in the goals and a target for the WLM
	Page 55 of 76, Ceres Landfill Site					The landfill site is considered legally closed and the waste body is capped"	Is the facility monitored ito the closure permit conditions?	Yes, information added on monitoring
	Page 59 of 76, Waste Management Infrastructure					The SQR refer to a study conducted by Aurecon in 2020.	Please look at the report developed by DEA&DP in 2016 wrt integrated waste management infrastructure and compare the recommendations of these with each other.	Noted
	Page 60 of 76, Waste Minimisation Initiatives					The study conducted by WAAI within a specific area	Please indicate the selected area,	Indicated in report as follow: "An area in Tulbagh was selected by the WLM for the pilot project"
Public Participation			X			No information is provided.	During the development and	Public participation will take place once

							implementation of the IWMP, consultation will be required. The process of consultation should be included. Two levels of consultation need to be undertaken: - Consultation with Authorities (local, district, provincial). - Public and other interested and affected parties (I&APs). (a) Process to include notifications (i.e. newsletters, public notices, website, public announcements, etc.) and comments received from Stakeholders. (b) Proof of public participation (i.e. newsletters, attendance registers, etc.).	the Draft IWMP is developed. The Public will be notified that the Draft IWMP is out for commenting and where the document can be found. A period of one month will be allowed for commenting on the Draft IWMP. Proof of the advertisement, comments by the public and amendments to the Draft IWMP report will be included in the Final IWMP.

Strategic linkages		X				The report provides linkages with the national, provincial and regional strategies and plans.		Noted.
Geographical area, geo-physical and geo-hydrological conditions				X		The status quo report provides a clear description of the locality and a map of the geographical area but does not provide the geo-physical and geo-hydrological conditions.	The following needs to be included for the Witzenberg Municipality: • Roads infrastructure, wards under the municipality and where possible a map depicting areas described under this section. • Geophysical and Hydrogeological information for the area	Added to background. Section 1.1
Legislative requirements				X		Reference is only made to the state of CWDM by-laws. The status of Witzenberg waste management by-laws have not been indicated	Update section on by-laws to include status of Witzenberg Municipality's waste management by-	WLM by-laws included in section 3.2.3.4.

						The report provides an overview of the relevant legislation and policies.	laws and alignment to the Waste Act	
Demographic profile		X				The report provides the current and projected population, income distribution, education profile, economy and employment.		Noted.
Services and delivery		X				The report provides detailed information on waste collection services including services to the indigent.	Provide Total number of households and indigent households and actual number of households and indigent households with percentages being serviced	Section 4.1.5.1.1 provides the number of households and percentages. Section 4.1.5.1.2 provides the number of Indigent households.
Waste generation and composition		X				The report provides current waste generated as well as estimates for future generation. It also provides information on other waste types		Noted

						generated within the Municipality as well as quantities for HCRW.		
Organisational structure and staff capacity				X		The report does not indicate that a waste management officer has been designated but an organogram and vacancies has been included in the report.	Municipality to indicate whether a WMO has been designated.	Added as: "The current (2020) Waste Management Officer for the WLM is Mr. Johnny Jacobs."
Waste management cost and financing				X		The report provides the budget for the 2020/2021 financial year, the tariff structure and the budget for free basic services.	The operational and capital expenditure to be submitted once available as indicated in the report.	Noted.

Waste Management Licensing								
Status Quo								
.Waste Management Facilities	Operational sites: Tulbagh, Prince Alfred Hamlet and Op-die-Berg							
		Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	Delta BEC Response
	Names:	X						
	GIS location:		X					
	License details License/permit no., Description of activities Location(coordinates)		X			License details License/permit no., Description of activities Location(coordinates) to be included in report.	This needs to be addressed and taken into account in the report	Summary tables included to ensure information is easily found in the report
	Is the Waste Management control officer mentioned?		X			The name of the Waste Manager is in the document, but not called the Waste Management control officer	This needs to be addressed and taken into account in the report	Noted and added to report
	General management of the site (windblown litter; storm water, access control, compaction, water quality monitoring etc)		X			Prince Alfred Hamlet (operational) and Wolseley (not operational) did not have good general management during 2020 audits.	This needs to be addressed and taken into account in the report	Noted.

	Are complaints from the public addressed?				N/A	Department not notified of complaints.	This needs to be addressed and taken into account in the report	Noted.
	Remaining airspace (m^3):		X			Airspace not stated in the Document.	This needs to be addressed and taken into account in the report	Summary tables included to ensure information is easily found in the report
	Lifespan (years):			mentioned		Lifespan not stated in the Document. The Ceres landfill site was issued with a closure permit on 8 July 2003. The landfill site is considered legally closed and the waste body is capped. Prince Alfred Hamlet landfill site (Operational) landfill site will reach its capacity by 2025, Op-die-berg landfill site (Operational) Op-die-berg landfill site will reach its capacity by 2021, assuming that the deposition rates remain unchanged Tulbagh landfill site (Operational) This matter is still under an appeal decision so	The facilities in this region are either near capacity of have reached the capacity. The regional solution needs to be taken into account as the Tulbagh site is still under appeal and have been limited to disposal on the historic area only. The agreements and court disputes need to still be finalized. The Witzenberg District still need to commission the Waste Transfer station in Ceres	Noted. Tulbagh airspace calculation removed.

						the estimate of 2065 is not applicable		
	Informal salvaging:		X			Informal salvaging not addressed in the Document.	This needs to be addressed and taken into account in the report	Addressed in report – only taking place at the PAH landfill site: "Currently (2020) there are informal recycling activities on site"
	Internal audits (frequency; level of compliance; identification of main issues):		X			Note mentioned	This needs to be addressed and taken into account in the report	Information incorporated into a summary table
	External audits (frequency; level of compliance; identification of main issues):		X			Not mentioned	This needs to be addressed and taken into account in the report	Information incorporated into a summary table
	Details of any compliance enforcement actions mentioned? – Current conditions (SQ) / Any improvement?	X				Not mentioned	This needs to be addressed and taken into account in the report	Information incorporated into a summary table
	Do they have an organic waste diversion strategy in place at the facility? Please specify		X			This is not mentioned in this report	An organic waste diversion plan must be submitted to the Department. Plans in this regard must be included in this report.	Information incorporated into a summary table
	Closed and decommissioned sites: Wolseley							
		Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	

	Names:	X				Ceres landfill site (Closed) Prince Alfred Hamlet landfill site (Operational) Op-die-berg landfill site (Operational) Tulbagh landfill site (Operational) Wolseley landfill site (Non-operational)		Noted
	GIS location:		X			Not mentioned in the report	This needs to be addressed and taken into account in the report	Information incorporated into a summary table
	License details:		X			Not mentioned in the report	This needs to be addressed and taken into account in the report	Information incorporated into a summary table
	Are there any illegal activities taking place?	X				Not mentioned in the report	Illegal dumping, access and large-scale buffer zone infringement.	Information incorporated into a summary table
	Internal audits (are they being done; how frequent; level of compliance; do they identify the main issues)? Action plans to improve conditions? Are they being submitted and implemented?		X			Not mentioned in the report	This needs to be addressed and taken into account in the report	Information incorporated into a summary table

	External audits (are they being done; how frequent; level of compliance; do they identify the main issues)? Action plans to improve conditions? Are they being submitted and implemented?		X			Not mentioned in the report	This needs to be addressed and taken into account in the report	Information incorporated into a summary table
	Details of any compliance enforcement actions? Action plans to improve conditions?		X			A 'Compliance and Enforcement' heading is in the Status Quo document, but enforcement is not satisfactorily addressed.	More details should be mentioned under this heading	Overall compliance section added
		Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	
Contaminated land	Name		X			Not mentioned in the report and specified	If this is applicable the details should be provided	Noted. Added sentence to indicate there is no contaminated land
	Location		X			Not mentioned in the report and specified	If this is applicable the details should be provided	Noted
		Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	
Waste related complaints (i.e. number and type).	Is there a system in place to capture waste-related complaints?		X			Not mentioned in the report and specified	The report must address capturing, addressing and reporting complaints.	Information incorporated into a summary table

	Number of complaints:		X		N/A	There does not seem to effective complaints registers in place.	The report must address capturing, addressing and reporting complaints.	Noted
	Type of complaints:		X		N/A	There does not seem to effective complaints registers in place.	The report must address capturing, addressing and reporting complaints.	Noted
		Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	
Illegal dumping and costs associated with clean-up efforts.	Names of illegal dumping sites:		X			Not mentioned	Notorious illegal dump sites must be named.	Section 5.4.3 added to the report.
	Locations:		X			Not mentioned	Locations of notorious illegal dump sites must be included.	Scattered throughout the WLM. No specific location
	Length of time in existence:		X			Not mentioned	This needs to be addressed and taken into account in the report	Noted and added
	Costs associated with clean-up efforts:		X			Not mentioned	This needs to be addressed and taken into account in the report	Noted and added

Waste Information Management:								
Status Quo								
		Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	Delta BEC Response
	Is the status of IPWIS registration for all waste management facilities accurately indicated?		X			The municipality has 3 registered waste activities that is registered on the IPWIS • Prince Alfred Hamlet Landfill • Tulbagh Landfill • Witzenberg Municipality Recovery	This needs to be addressed and taken into account in the report	Noted and added
	Is the status of IPWIS reporting for all waste management activities accurately indicated?		X			The status of reporting is not indicated, however quantities for disposal and diversion have been provided, see Page 45-47 of 76; 4.3.6.1 Current waste generation rates (IPWIS) Status of reporting: Disposal:	The author must check that the values provided in the status quo report is correct and coincides with the most current IPWIS reported values. I spot checked the data it does not correspond to the IPWIS reporting; hence I am uncertain of the source of information. Further to that the municipality only started reporting their	Quantities checked with WLM. Quantities in report as received from the WM. Table changed and updated to include 2020 information.

						• Prince Alfred Hamlet Landfill 8/11 • Tulbagh Landfill 8/11 Diversion • Witzenberg Municipality Recovery 8/11	recyclables on the IPWIS in 2020. Table 4.12 should be re-arranged to below order. The headings can still be written in full and have tonnage in brackets. The table does not allow for the typing all the info Generation = Disposal +Diversion DISPOSAL MUNICIPAL / CONSTRUCTION / ORGANIC	
	Where applicable is waste calculator (what about weighbridges?) reporting for relevant waste management facilities indicated?	X				The municipality uses the waste calculator to record their waste quantities as they do not have a weighbridge. The below quantities have been reported to the IPWIS. The period of reporting is January to November 2020 • Prince Alfred Hamlet Landfill 3730,288 T • Tulbagh Landfill 469,332 T		Noted. Quantities in report as received from the WM.

						• Witzenberg Municipality Recovery 1102,30 T		

Waste Policy and Minimisation:								
Status Quo								
	Waste Minimisation Initiatives	Yes	No	Partially provided	N/A	Comments (reasons for selection Yes/No or Partially provided)	Recommendations	Delta BEC Response
	Municipal: Type of intervention:			x		Currently only the pilot study conducted by WAAI. MRF and transfer station is in the pipeline. Currently in planning phase of implementing S@S. Under (4.6.1) It is indicated that in 2019, the Municipality implemented a Zero Waste to Landfill Pilot project which was aimed at encouraging residents to separate their waste according to the bags provided to them free-of-charge. This project was conducted in one	Table 4-15: Green bags for garden refuse are provided and separation happens at source, but it is currently being disposed of at landfill. There is great opportunity to divert this already separated material. It is recommended that the Zero Waste to Landfill Pilot project be extended and implemented in low income households and informal settlements in order to encourage residents to recycle and separate their waste.	Noted

						town and has stopped even though the Municipality plans to roll it out in all towns. The project seems to be focusing on one household group and even though it's not clearly indicated in the IWMP.		
	Location:					Witzenberg		
	Diversion figures:				x	No S@S other than the pilot project.		Added as goal and target for WLM
	Private: Type of intervention:	x				Spar has a programme ensuring its distribution plastic and cardboard is recycled.		Noted
	Location:							
	Diversion figures:	x				2019 – 19%. It is stated that recyclers that have contracts with the municipality are supposed to report recycling tonnages, so it is assumed that this is where the value comes from.		Correct.
	Status of Municipal By-law (outdated; updated; busy with review?):			x		They have a 2005 bylaw that is not aligned to NEMWA but not aligned to NEMWA.	A previous engagement led to the knowledge that they are busy with adapting the provincial model bylaw, but this is still in progress and not discussed in the report. The Municipality needs to update its by-law and	WLM have an updated Bylaw 2020.

							align it to NEM: WA (Act 59 of 2008)	
	Waste awareness and education campaigns.	x				The WLM appointed 25 waste ambassadors for environmental education and waste awareness campaigns. These waste ambassadors are employed for door-to-door waste campaigns, clean-up projects and conduct visits to schools, clinics and local residents to raise awareness.	This awareness is imported, but needs to go hand-in-hand with the service (easier to recycle if there are recycling bins). The poster is good and is hopefully followed up with details of buy-back centres, etc., to assist in actually collecting and diverting the waste.	Continuous waste awareness programmes added to the goals and targets for the WLM .
	Does the municipality have a waste awareness strategy in place?		x			It was not evident in the document.	This needs to be addressed and taken into account in the report	Noted. Waste awareness programmes added to the goals and targets for the WLM.
	Location:							
	Type of campaign:					Door-to-door, school, clinic visits, clean ups, etc.		
	Is there a list/log of the campaigns run since the last IWMP?		x			It was not evident in the document.	This needs to be addressed and taken into account in the report	Noted. Waste awareness programmes added to the goals and targets for the WLM

Should you have any concerns or queries, please do not hesitate to contact the undersigned.

Yours sincerely,

Chanté Stander

Water and Sanitation
REPUBLIC OF SOUTH AFRICA

FEASIBILITY BRIDGING STUDY FOR
BREEDE-BERG (MICHELL'S PASS) WATER TRANSFER SCHEME
BASIC INFORMATION DOCUMENT (BID)

Background

The City of Cape Town (CCT), surrounding urban centres and irrigators (farmers) are provided with water from the Western Cape Water Supply System (WCWSS). This infrastructure of dams, canals, pump stations, weirs and pipelines are owned and operated *by* both the Department of Water and Sanitation (DWS) and CCT. To meet the ever-growing water requirements of the region, the Western Cape Reconciliation Strategy Study (WCRSS) investigated a range of bulk water supply schemes to augment the WCWSS. These include options such as

- Desalination;
- Effluent treatment for re-use;
- Groundwater development; and
- Surface water augmentation options.

In 2008, the DWS commissioned pre-feasibility level investigations into the potential development of six surface water options. This study resulted in two schemes being further investigated to feasibility level. These two schemes were the:

- Berg River-Voëlvlei Augmentation scheme (BRVAS), which is currently *being implemented* by the Trans-Caledon Tunnel Authority (TCTA); and
- Breede-Berg (Michell's Pass) Transfer Scheme (BBTS), which is being further investigated by means of a Bridging Study.

For more detailed and technical information on the BBTS proposal, refer to the earlier report entitled *Pre-Feasibility and Feasibility Studies for Augmentation of the Western Cape Water Supply System by means of Further Surface Water Developments, Report No 3; Volume 2: Breede-Berg (Michell's Pass) Water Transfer Scheme*, December 2012. This is available on the DWS web site. The reports for augmentation of the WCWSS can be accessed on the DWS website

Bid Number WP 11339 titled *Appointment of Professional Service Provider for a Feasibility Bridging Study for Breede-Berg (Michell's Pass) Water Transfer Scheme (BBTS)* was issued by DWS on 2 October 2020. DWS subsequently appointed a Professional Service Provider to undertake the above-mentioned study. This study is hereafter referred to as the Bridging Study.

The proposed BBTS comprises the diversion of winter water by a new diversion weir from the upper Breede River at the same site as that of the current Artois Canal diversion and transferring the water through a new pipeline to the upper reaches of the Klein Berg River, from where the water will be conveyed via the existing Klein Berg Canal into the Voëlvlei Dam, which is in the adjacent Berg River catchment area.

Tlou Integrated Tech cc (Tlou), supported by Bigen Africa Services (Pty) Ltd (Bigen) and other sub-consultants, has been appointed as Professional Service Provider (PSP) by the DWS to undertake the BBTS Bridging Study. The Service Level Agreement (SLA) between the DWS and the PSP stipulates a contractual project commencement date of 18 August 2021 and Contract Period of 30 months. The DWS Project Manager is Mr Tony Moore, with Mr Levy Kekana of Tlou as the PSP Study Director, supported by Dr Aldu le Grange from Bigen as the PSP Study Leader.

Bridging study objectives

The objectives of the Bridging Study are:

- Review and update the hydrology (water availability) and water requirements of the Upper Breede River catchment, and as far downstream as the abstraction point for Brandvlei Dam (Worcester);
- Determine the stochastic yield of the Upper Breede River and the amount of water available for transfer to the Berg River, after providing for the environmental water requirements (EWR) in the Breede River;
- Review and update the layout, design and cost estimate of components required for the BBTS to feasibility level of detail, including provision for EWR in the Breede River and an increased abstraction rate for Brandvlei Dam;
- Undertake a public participation process to engage with water users in the Upper Breede River regarding the BBTS (noting that the transfer will not affect their allocation) and the engagement will be extended to and include farmers and other parties in the Klein Berg River catchment as well as those receiving water from the Artois Canal. The additional transfer water is intended to augment the WCWSS and not to increase the allocation to the users in the Klein Berg River catchment area.

Study area

The study area is effectively that of the upper Breede Water Management Area (WMA) and part of the Berg WMA. The layout of the WCWSS and BBTS are shown on **Figure 1** below**.**

The study team will take full cognizant of the fact that the Breede-Overberg Catchment Management Agency has set clear goals and objectives in its Catchment Management Strategy towards protection of water resources of the Breede River and limiting further development thereof.

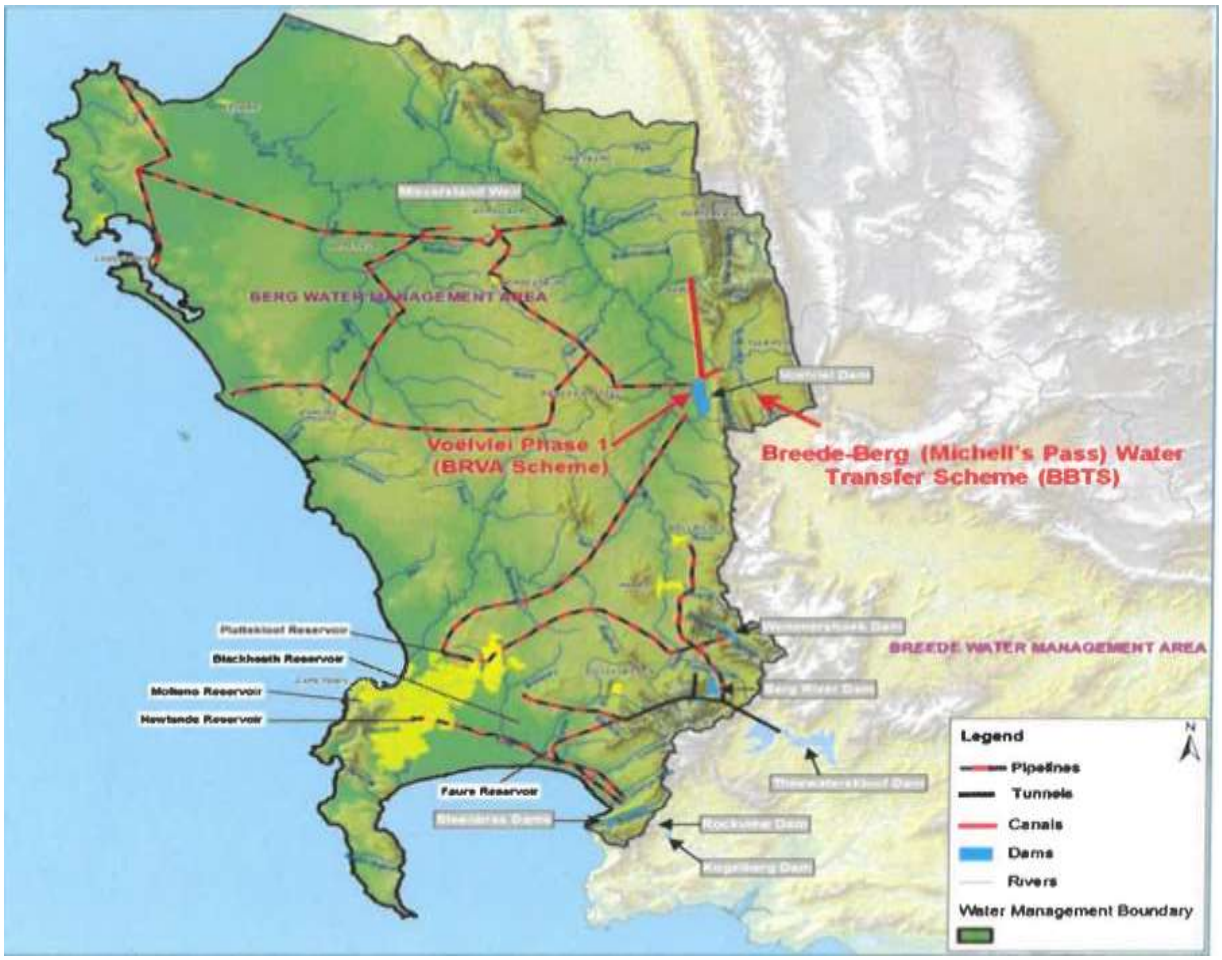

Figure 1 Layout of the WCWSS and location of the BBTS therein

The proposed general layout of the BBTS, including the route of the pipeline, is shown in **Figure 2** attached.

Two alternative schemes were considered to transfer water while also supplying the EWR in the Breede River:

Alternative A involves the diversion of surplus winter water via the proposed weir on the Upper Breede River at Michell's Pass, into a new gravity pipeline. The pipeline will transfer water into the Blousloot stream, which is a tributary of the Klein Berg River. Summer Reserve releases are proposed to be supplied from Koekedouw Dam at Ceres.

Alternative B is similar to Alternative A, but makes provision for a new storage dam on the Boontjies River, a tributary of the Klein Berg River, which allows for the storage of water for water supply to the Artois Canal irrigators and the summer Reserve flows for the upper Breede River downstream of the Michell's Pass diversion site.

Figure 2: Layout of alternatives for the Breede-Berg (Michell's Pass) Transfer Scheme

It is acknowledged that any transfer of water out of the Breede River Basin will impact on downstream water users. The yield of Brandvlei Dam would be reduced unless the capacity to pump additional water into the dam is increased. Thus, the various BBTS options to be investigated will include an allowance for maintaining the yield of Brandvlei Dam through an upgrade of the pump station at Papenkuils.

The way forward

The purpose of the Bridging Study is to thoroughly interrogate all the augmentation options and proposals. These will all be unpacked at a number of public participation meetings and engagements between stakeholders, DWS and the PSP team in the course of the study.

Stakeholder participation

Interested and Affected parties (I&AP's), who could be affected by the proposed transfer scheme or have a direct interest, are encouraged to ensure they are registered as such and encourage others to do the same.

To register, check if you are registered and for more information contact Isadore at *isadore@2trac.co.za OR jeffrey@sakaza.co.za or call 021 703 1900* during business hours.

You will then be informed of all meetings and have an opportunity to raise any query related to the Study.

Do use the opportunity afforded.

Dear Interested and Affected Party

FEASIBILITY BRIDGING STUDY FOR FOR THE PROPOSED BREEDE-BERG (MICHELL'S PASS) WATER TRANSFER SCHEME

The Directorate Water Resource Development Planning of the Department of Water and Sanitation (DWS) has commissioned the above-mentioned study to further investigate certain aspects of the feasibility study, which was completed in 2012, and to confirm the recommendations for implementation of this proposed project.

The purpose of the proposed project is to transfer surplus water from the upper Breede River to Voëlvlei Dam to augment water supply to the Western Cape Water Supply System. The main task of the Bridging Study is to update the hydrology of the upper Breede River and undertake a water resource analysis to confirm the yield available for transfer to Voëlvlei Dam, after the existing water allocations and water requirements of the Breede River have been met. The Bridging Study and proposed project are described in more detail in the Basic Information Document.

The DWS Project Manager for this Bridging Study is Mr. A J (Tony) Moore who is a Chief Engineer in the Directorate Water Resource Development Planning. His contact details are MooreT@dws.gov.za (or moore.fontein@gmail.com as he is working from home due to COVID-19 Regulations) and tel. no. 082 884 5540.

The Professional Service Provider (PSP) Tlou Integrated Tech cc was appointed to undertake this Bridging Study over a period of 30 months (18 August 2021 to 17 February 2024). Tlou Integrated Tech is supported by Bigen Africa Services (Pty) Ltd and other sub-consultants, including Sakaza Communications. Mr. Levy Kekana of Tlou is the PSP Study Director (contact details kekanasl@tlouintegratedtech.co.za). Dr. Aldu le Grange from Bigen is the PSP Study Leader. His contact details are Aldu.LeGrange@bigengroup.com and tel. no. 083 462 0817.

Another important task of the Bridging Study is Public Participation to inform stakeholders of progress with the study, as well as to discuss the findings and to obtain input from interested and affected parties. In order to initiate this task, a data base of interested and affected parties needs to be established. The details in the data base will only be utilised for this Bridging Study and will not be made available for unauthorised use.

If you wish to be included in the data base of interested and affected parties for this study, please provide your contact details (name, organization, telephone number and e-mail address) to the PSP (Sakaza Communications). If you require any further information regarding this Bridging Study, please contact the DWS Project Manager or the PSP Study Leader.

MEMORANDUM

To: Committee for Technical Services
From: Senior Manager: Electro-Technical Services
Date: 2022/07/15
Ref: 16/3/04/1

NERSA ELECTRICAL DEPARTMENT COMPLIANCE AUDIT 2020/2021

Purpose
The purpose of this report is to inform Council of the compliance audit (Part 2) by NERSA of the Electrical Department of the Municipality and to approve the CAP (Corrective Action Plan) as required to be submitted to NERSA.

Background
During September 2020, the National Energy Regulator of South Africa (NERSA) approached the Municipality to initiate a compliance audit of the Witzenberg Electrical Department via a self-assessment process since it was not possible for NERSA to conduct site inspections due to the COVID-19 pandemic restrictions.

The objective of the audit was to determine the level of compliance of the Licensee with the legal, financial and technical conditions of the electricity distribution licence.

Part 1 of the process was resolved by Council on 25 August 2021 (16/3/4/1 – 8.2.1) and the CAP approved, and since been implemented (Attached Annexure)

Part 2 of the audit entitled "Plant Condition" was received on 3 June 2022 and both the audit letter and report are attached hereto (Attached Annexures). This audit took place on 21/22 April 2021. The assessment included an inspection of substation documentation/record keeping, mini-substations, overhead lines, switching stations and any other aspects of the network (such as the stores and single line diagrams).

> It was determined that *"the Witzenberg Local Municipality did its best to manage the electricity business in an efficient and reliable manner*".

There were however a few minor instances of non-compliance that must be addressed by means of a CAP that must be submitted within 120 days to NERSA from the date of 3 June 2022.

The 'minor issues' referred to in the NERSA report are: -

a) The electricity affairs of Witzenberg Local Municipality must be ring-fenced from the other activities of the Municipality.

b) The critical vacancies should be filled.
c) The asset register should be updated to indicate all the critical attributes of the assets and be linked to GIS.
d) The municipality must eradicate the illegal structures from their network as a matter of urgency to save lives and the network.
e) All open trench covers should be closed.
f) All faded warning signs should be replaced.
g) The fire prevention equipment must be serviced and mounted as a matter of urgency.
h) The transformers and mini-substations with oil leaks must be attended to.
i) The regular inspections of the network and plant equipment should be formally recorded and filed accordingly.
j) The maintenance policy and plan must be developed.
k) All findings noted in section 6 of this report must be addressed.

These have been captured in the proposed Corrective Action Plan below, intended for submission to NERSA once approved by Council.

CORRECTIVE ACTION PLAN				
Municipality:	**Witzenberg Local Municipality**			
Date of Audit:	**21/22 April 2022**	**Date of Corrective Action Plan:**		
Non Compliances	**Corrective action planned**	**Financial Implications**	**Target date for starting of action**	**Target date for completion**
Ring fence electricity affairs	Already ring-fenced. See e-mail from CFO annexure	Comply	Comply	Comply
Fill critical vacancies	Vacancies are filled as and when vacated	N/A	Ongoing	Ongoing
Update asset register and link to GIS	Funding for Master Plan update received, includes update of Asset Register. Once received the linking to GIS will be investigated	TBD	TBD	TBD
Eradicate illegal structures from the network urgently	Revenue Enhancement Program underway – New tender on point of being awarded	Annual budget item	Ongoing	Ongoing

Open trench covers to be closed (sub stations)	Substation and protection tender awarded 1 July 2022 (3 years)	Approx. R2 mil per annum	1 July 2022	Ongoing
Replace faded warning signs (sub stations)				
Service fire prevention equipment				
Transformer and oil leaks must be attended to	Actioned as outflow of maintenance plan	Annual budget provision	Ongoing	Ongoing
Regular inspections of network and plant equipment recorded and filed				
Develop maintenance policy and plan	To be developed	Annual budget provision	Ongoing	Ongoing
Section 6 findings to be addressed	a) Abovementioned tender will address various issues. b) Remaining to be addressed via available budget and resources.	Annual budget provision	Ongoing	Ongoing

Recommendations

1. That Council notes the NERSA compliance audit outcome for the Electrical Department.

2. That the proposed Corrective Action Plan be approved by Council and submitted to NERSA.

Kind Regards

P van den Heever
Senior Manager Electro-Technical Services

Dear Mr Nasson

FINDINGS FROM THE COMPLIANCE AUDITS CONDUCTED ON THE ELECTRICITY DISTRIBUTION INDUSTRY IN 2021: WITZENBERG LOCAL MUNICIPALITY

The National Energy Regulator of South Africa (NERSA) is pleased to inform you that on 3 May 2022, the Energy Regulator noted the consolidated site inspection report on the findings from the electricity distribution industry compliance audits conducted in the 2021 calendar year.

Accompanying this letter is part 2 of the final audit report (Technical Assessment for the Witzenberg Local Municipality) and a template of a corrective action plan (CAP) to rectify the instances of non-compliance identified in the compliance audit report.

Kindly peruse the final report and indicate any issues that are regarded as confidential within 14 days of receiving this letter. Should NERSA not receive your response within the 14 days, it will be concluded that the final audit report of the Witzenberg Local Municipality does not contain any confidential information, and the consolidated site inspection report may be published on NERSA's website.

Regulator Members:
Ms Z Mpungose (Chairperson) *Adv NP Sithole (Chief Executive Officer)
*Mr N Gumede *Ms N Maseti *Mr MW Mkhize Mr FK Sibanda
*Full-Time Regulator Members

NERSA is a Regulatory Authority established in terms of the National Energy Regulator Act, 2004 (Act No 40 of 2004)

In addition, NERSA requests that you study the attached final audit report and lead your management team to draft a remedial/corrective action plan that outlines steps to be taken to rectify the instances of non-compliance identified in the final audit report within 120 days of receiving the final report. Also, it is recommended that the CAP must cover both parts 1 and 2 of the Witzenberg Local Municipality final audit report.

The electricity management team of the Witzenberg Local Municipality must submit this corrective action plan to Mr Hendrick Mokhonoana at Hendrick.mokhonoana@nersa.org.za within 120 days from the date of receipt of this letter.

For any further information, please contact Mr Zingisa Mavuso at 012 401 4617 or Zingisa.Mavuso@nersa.org.za.

Yours sincerely

Adv. Nomalanga Sithole
Chief Executive Officer

EXECUTIVE SUMMARY

In September 2020, the National Energy Regulator of South Africa (NERSA) conducted a desktop compliance audit on the Witzenberg Local Municipality ('the Licensee') to determine its level of compliance with the licence conditions, particularly the legal conditions, financial conditions and general conditions. Due to precautionary measures undertaken by NERSA in light of the COVID-19 pandemic, NERSA could not determine the Licensee's level of compliance with the technical conditions, and these were postponed to a time when the National Coronavirus Restrictions were eased.

On 20 and 21 April 2021, NERSA assessed the condition of the Witzenberg Local Municipality's distribution network equipment to determine its level of compliance with the technical conditions. The assessment included an inspection of substation documentation/record keeping, mini-substations, overhead lines, switching stations and any other aspects of the network (such as the stores and single line diagrams). The objective of the audit was to determine the level of compliance of the Licensee with the technical conditions of the electricity distribution licence.

After the compliance audit, the findings were recorded in a draft report and forwarded to the Licensee for comments. A final report will be sent to the management of the Witzenberg Local Municipality after comments have been included. The objective of the final report is to assist the Licensee in identifying possible areas for improvement and to submit a corrective action plan to NERSA.

This corrective action plan should be submitted to NERSA within 120 days of the receipt of the final report by the Licensee. NERSA will monitor the implementation of this corrective action plan by the Licensee.

The Witzenberg Local Municipality complied with some of the technical conditions of the electricity distribution licence. However, there were some instances of non-compliance that need immediate management intervention. The Licensee was well represented and the Municipality's officials accompanied the NERSA audit team to the identified intake substations, indoor switching substations, pole-mounted transformers and mini-substations within the Licensee's areas of supply.

1. INTRODUCTION

1.1. Overview

The National Energy Regulator of South Africa (NERSA) is required to monitor and assess whether the electricity suppliers comply with the conditions of their licences. Section 4(a)(vii) of the Electricity Regulation Act, 2006 (Act No. 4 of 2006) ('the Act') states that 'the Regulator must enforce performance and compliance; and take appropriate steps in the case of non-performance'. To implement this, NERSA approved a compliance monitoring framework for electricity distributors in 2011, which acts as a guide on how compliance audits and monitoring must be conducted. NERSA conducts the compliance audits on licensed electricity distributors annually.

NERSA regulates the energy industry in accordance with Government laws and policies, standards and international best practices in support of sustainable development. The organisation issues licences to electricity distributors and therefore requires audits to be conducted against key licence obligations. It is NERSA's mandate to monitor and enforce compliance with the licence conditions as per the Act. This monitoring process enforces and ensures the improvement and sustainability of the licensees for the betterment of the Electricity Supply Industry (ESI), which will lead to improved quality of supply and service to customers.

1.2. Audit Objectives

The key objectives of the compliance audit are to:

a) evaluate and review activities of the regulated entities;
b) determine the level of compliance of licensees with all the licence conditions governing their electricity business operations;
c) check the level of compliance with the quality of service and the quality of supply standards; and
d) inform the Energy Regulator of the quality of service and the quality of supply provided by the licensees across the country.

2. METHODOLOGY

After confirming the audit with the Witzenberg Local Municipality ('the Municipality' or 'the Licensee'), a meeting at the Licensee's offices was held to discuss the scope of the technical audit and the instances of non-compliance highlighted in part 1 of 2 of the final report: business assessment. Site verification was also done to compare the information provided on the audit questionnaire during the desktop audit to the status quo of the condition of the electrical assets of the Municipality.

3. LINK TO OTHER REPORTS

This report is linked to the following documents:

(a) Part 1 of 2 of the final audit report: business assessment of the Witzenberg Local Municipality
(b) Consolidated report on the findings of the electricity distribution industry compliance audits conducted in 2020.

4. NERSA AUDIT TEAM AND THE LICENSEE'S REPRESENTATIVES

The audit team members from NERSA were:

Ms Amanda Mtembu	-	Dispute Resolution Officer
Mr Gregory Hopkins	-	Compliance Engineer
Mr Thabo Manaka	-	Compliance Monitoring Technician
Mr Hendrick Mokhonoana	-	Compliance Monitoring Technician

Witzenberg Local Municipality was represented by:

Mr Pierre van den Heever	-	Head of Technical Services
Mr Daniel Greeff	-	Witzenberg Local Municipality
Mr Joseph Barnard	-	Witzenberg Local Municipality

5. BACKGROUND

During the site audit and meeting at the Licensee's offices, a factual account of what was observed was recorded and discussed.

5.1. Recommendations Highlighted in Part 1 of 2 of the Audit Report

Based on the instances of non-compliance that are highlighted in this report, NERSA recommends the following:

a) The Licensee must budget 6% for repairs and maintenance as stipulated in the NERSA tariff guideline.

b) The Municipality must make funds available to replace the aging electrical network.
c) The Licensee must initiate a preventative maintenance plan.
d) The Licensee must have a manual control centre indicating the real time status of the network components.
e) The Licensee must modify the customer invoice to indicate the applicable tariff charged.

5.2. Discussions and Plans to Address Findings on Part 1 of 2 of the Audit Report

Part 1 of the audit report should be addressed as it was communicated, the Municipality should draft a corrective action plan to address all the instances of non-compliance that were highlighted by NERSA in the final report (Part 1 or Business assessment).

This corrective action plan should be submitted to NERSA within 120 days of the receipt of the final report by the Licensee. NERSA will monitor the implementation of this corrective action plan by the Licensee.

6. AUDIT FINDINGS ON PLANT CONDITIONS

6.1. Stores

The Witzenberg Local Municipality had proper stores to keep stock. During the site inspections, NERSA noticed that the stores had sufficient critical stock. The shelves were stocked with new and redundant items such as streetlights, cable joint kits, circuit breakers, drop-out fuses, electrical cable glands, shrouds and other items. Items such as electrical distribution kiosks, MV cables, pole-mounted transformers, wooden or steel poles were also available during the site inspections. The above tallied with the information submitted to NERSA in September 2020 during the desktop audit, which states that the Municipality had sufficient critical stock for the Electrical network.

The pictures below indicate the electrical items at the electrical workshop.

Adequate spares stored on shelves inside the stores

Shelves packed with lights

Shelves packed with lights

New airdac cables

Spare mini-substations

6.2. Plant Conditions

A sample condition assessment was conducted on selected electrical assets to gain an understanding of the condition of the Licensee's assets and electrical network. The Witzenberg Local Municipality officials accompanied the NERSA

audit team to the identified intake substations, indoor switching substation, pole-mounted transformers and mini-substation within the Licensee's areas of supply.

6.2.1. Substations

The substations inspected during the audit were found to be in good condition and routine maintenance was evident. The roads leading to all the substations were well maintained. The switching substation and intake substations inspected during the audit were properly fenced. The doors at the inspected substations were locked. The warning and danger signs were mostly available and the inscriptions were legible. The general housekeeping at the substations attested to good practices.

6.2.1.1. Bon Chretien Substation Main Intake Substation

The road leading to the substation was well maintained at the time of the audit. Entry to the substation premises was controlled by locked doors. The identification signs as well as the safety and warning signs were available and mounted on the substation building outside and inside the building. The inscriptions on the signs were legible. There was dust inside the building, which attested to poor housekeeping.

The pictures below depict the condition of the substation premises.

Substation in good condition, with locked doors and legible safety signs

Inside the switch room, the lights were installed and in working condition. The visitors' log book was available. The printed single line diagrams (SLD) were available. The warning and

safety signs inside the switch room were available and the inscriptions were legible. The fire extinguishers were not serviced. The cable trench covers were available at all designated areas, however, some trenches were not properly covered.

The 11kV switchgear panels were earthed, labelled and in good condition. The status indicators were operational and clearly readable. The protection relays were also operational and in good condition.

The pictures below depict the switchgear panels' condition.

Transformer and switchgear panels were labelled and in good condition

The battery back-up system was in place and operational. The batteries were in a cabinet and were not maintained, the batteries' electrolyte levels were below minimum and covered in dust. The voltage and current indicators on the charger were operational and the charger was functional. The panels were not closed properly.

The pictures below depict the battery back-up system's condition.

The batteries' electrolyte levels were below minimum and covered in dust.

Cable trenches were not properly covered with wooden covers

6.2.1.2. Ceres Sub Station /Old Ceres Pumped Station 1952

This switching substation was in a poor condition and consisted of the old and new switchgear and control panels. The substation's doors were locked. Safety signs were visible on the inside and outside of the control room.

Ceres Switching Sub-station

The building housing the switchgear and panels was in poor condition. The switchgear was clearly labelled and the status indicators were functioning. Inside the switch rooms, the lights were installed and in working condition. The visitors' log book was available. The printed single line diagrams (SLD) were available. The warning and safety signs inside the switch room were available and the inscriptions were legible. The fire extinguishers were serviced. The cable trench covers were available at all designated areas. There was dust inside the building, which attested to poor housekeeping.

The 11kV substation consisted of the new and old switchgear panels, which were earthed, labelled and in good condition. The status indicators were operational and clearly readable. The protection relays were also operational and in good condition.

The pictures below depict the switchgear panels' condition.

The new switchgear panels were labelled and in good condition

The old switchgear panels were labelled and in good condition

The battery back-up system was in place and operational. The batteries were in a cabinet and were maintained. The batteries' electrolyte levels were above the maximum level, but covered with dust and had corrosion. The voltage and current indicators on the charger were operational and the charger was functional. The panels were closed.

The pictures below depict the battery back-up system's condition.

The batteries' electrolyte levels were at maximum, but covered with dust and had corrosion

6.2.1.3 Hugo Switching Station

This 11kV substation consisted of old electrical equipment (two switchgears, and a transformer). The 500kVA rated transformer was manufactured by Power Engineers (Pty) Ltd in 1972.

The switching station building was in good condition. Unauthorised entry to the switching station premises was controlled as the building doors were locked with proper locks. The danger and warning signs were mounted. The vegetation around the substation was well maintained.

The pictures below depict the condition inside the switch room building.

Substation's door was locked and safety signs visible

The lights inside the switch room were installed and in working condition. The two old type switchgears were operational and clearly labelled. The warning and safety signs inside the switch room were available and the inscriptions were legible. The cable trench covers were available at all designated areas, however, some trenches were not properly covered.

The fire extinguishers were available but expired. There was dust and oil spills inside the building, which attested to poor housekeeping. The transformer breather was in poor condition, as the silica gel had turned pink. The visitors' book was not available.

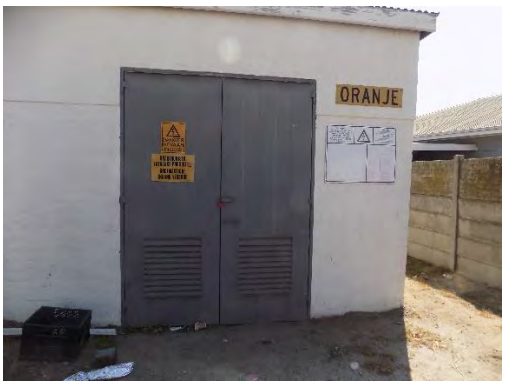
Transformer breather was in poor condition with pink silica gel and transformer covered in dirt

Old type swicthgears

6.2.1.4 Oranje Switching station

This 11kV substation was in poor condition. The substation consisted of old type switchgear and fairly new transformer. The audit team could not access the nameplate placed between the wall and transformer, as such the name of the manufacturer, rating and age are unknown.

The pictures below depict the condition inside the switch room buildings.



Substation's doors were locked, warning sings visible. Transformer in good condition

Access to the premises was properly controlled as the doors were locked with padlocks. The inscriptions on the danger and warning signs were mounted on the door outside the building and inside the building. The lights inside the switch room were installed and in working condition.

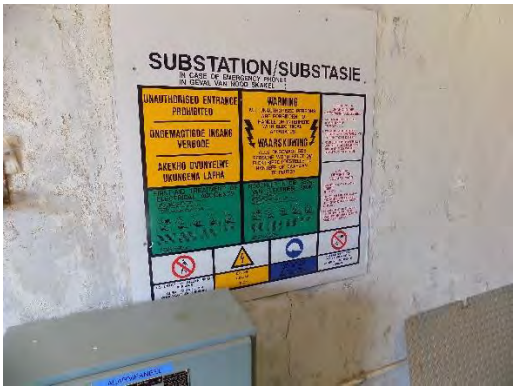
The building housing the two breakers was live chamber, exposing personnel to electrical dangers and shock. The connection between the old type breaker and other breaker was an electrical hazard. The cable connecting the two breakers was left haphazardly on the floor and not embedded in the designated cable trenches. The breaker panels were open, exposing an electrical hazard to personnel and electricity supply.

The fire extinguisher's service date expired in February 2016. There was dust inside the building, which attested to poor housekeeping. The visitors' book was not available.

Old type breaker connection with another breaker is a hazardous connection

6.2.1.5 Jacaranda Switching station

This 11kV switching substation consisted of a switchgear and DC supply. The substation was protected from unauthorised entry as its doors were locked.



Jacaranda Switching Sub-station.

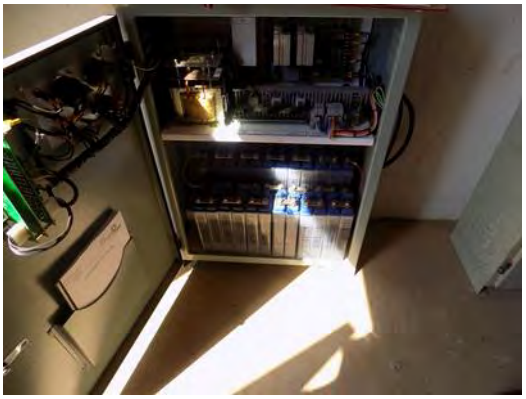
The switch room was clean and the lights were installed and in working condition. The switchgear was in fair condition, the status indicators were functioning and the labelling was visible. The cables were embedded in the designated areas. The visitors' book was available.

The pictures below depict the condition inside the switch room building.

Switchgear panels were in good condition

Cable trenches not covered

The DC supply was in place and operational. The batteries were in a cabinet and were maintained, the batteries' electrolyte levels were below maximum and covered in dust. The voltage and current indicators on the charger were operational and the charger was functional.



DC and batteries in good condition

There was dust inside the building, which attested to poor housekeeping. The fire extinguisher was not available. The cable trench covers were not installed

6.2.1.6 Wolseley Hoof Switching station

This 11kV switching substation consisted of a switchgear and DC supply. The substation was protected from unauthorised entry as the premises' door was locked. The switchgear room was clean. The switchgear was in good condition, the status indicators were functioning and the labelling was visible. The DC supply was new and batteries' electrolyte at maximum level.

The following findings were noted:

a) The warning signs were not available on the door.
b) The fire extinguisher was not available.

The warning and safety signs were not available outside the building

The substation interior, switchgear and DC supply were in good condition

6.2.1.7 Tulbagh Main Intake Substation

This 11 kV intake substation supplied electricity to the town of Tulbagh and consisted of a switchgear with a protective relay that was operational, as well as DC supply. The switchgear's status indicators were operational and clearly readable. The substation was located inside the sewage plant with fence and lockable gate. The unauthorised entry to the substation building was prevented by means of locked double doors. The warning signs were mounted on the wall at the entrance.

The following findings were noted:

a) The extinguisher was not available.
b) The cable trenches were not covered.
c) The batteries were in poor condition as terminals had corrosion and electrolyte below the maximum level.

The access to building prohibited with lockable double doors

The switchgear in good condition.

Batteries in poor condition

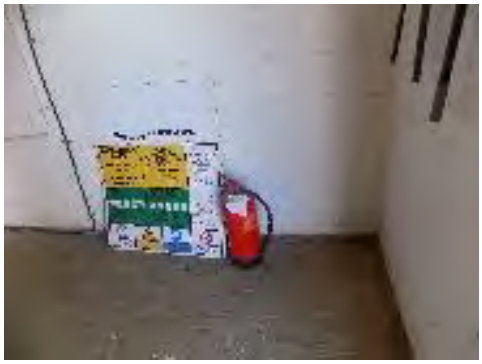
6.2.1.7 Stasie Weg Switching Substation

This 11kV switching substation was in fair condition. The substation consisted of switchgear and DC supply. The switchgear was protected with relays that were operational. The status indicators were operational and clearly readable.

The substation building interior was clean. Unauthorised entry to the switching station premises was controlled, as the doors of building were locked with proper locks. The new DC supply was in place and operational. The batteries were in a cabinet and maintained. The batteries' electrolyte levels were below maximum. The voltage and current indicators on the charger were operational and the charger was functional.

The following findings were noted:

a) The inscriptions on the danger and warning signs were not mounted on the door outside the building.
b) The cable trench covers were not installed.
b) The fire extinguisher's service date expired in June 2020.



The warning signs were not mounted on the doors and not at the designated area

Switchgear

Cable trenches not covered

New DC supply. Fire extinguisher's service date expired in June 2020

6.2.2. Mini-Substations

A sample of mini-substations was inspected at the Witzenberg Local Municipality. The majority of the mini-substation enclosures that were inspected, were in good condition. The inspected mini-substations were locked with padlocks and legible danger signs were available. The mini-substations were properly mounted on well-constructed plinths. All mini-substations inspected could be easily accessed by road.

6.2.2.1. Voortrekker Street Mini-Substation

This is a 500kVA-rated mini-substation with a transformer manufactured by JoCastro in 2015. The mini-substation enclosure was secured on a concrete plinth and rust free. Access to the mini-substation was controlled by doors that were locked with proper locks at the time of the audit. The safety and warning signs were properly mounted and their inscriptions were legible.

The pictures below depict the condition of the mini-substation.

Legible danger signs on locked mini-substation Mini-substation on a proper plinth

Both the LV and MV compartments were in good condition and the status indicators were properly functioning. The mini-substation had interconnections with other network connections.

MV and LV compartments labelled and in good condition

6.2.2.2. Bon Chretien Mini-Substation

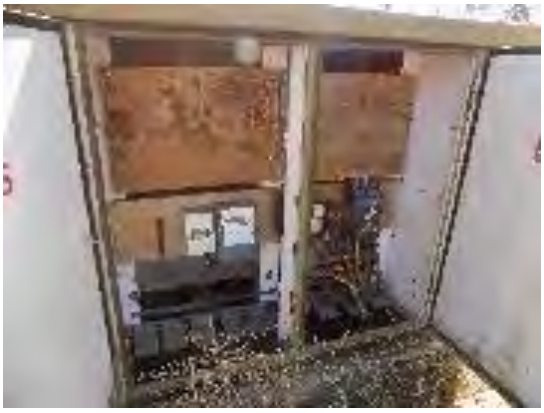
The mini-substation was secured on a concrete plinth and the doors were locked. Access to all compartments of the mini-substation was controlled with proper locks and utilisation of bolts. There were no signs of oil leaks on the mini-substation.

The rating of the mini-substation was not verified and the condition of the transformer side was not determined due to inaccessibility of the transformer compartment. The inspected compartments were in fair condition. The safety and warning signs were not visible. The vegetation around the enclosure was not properly managed.

The pictures below depict the condition of the mini-substation.

Warning and safety signs had faded.

Excessive weeds growth around enclosure



LV and HV compartments in a fair condition

6.2.2.3. Wolseley Mini-Substation

The transformer of this 315kVA-rated mini-substation was manufactured by Actom in 2010. The mini-substation was secured on a proper plinth and the enclosure was in good condition and rust free. The mini-substation doors were locked with proper locks at the time of the audit. The safety and warning signs were properly mounted and their inscriptions were legible.

The pictures below depict the condition of the mini-substation.

The 315kVA-rated transformer's compartment in good condition

LV/MV compartments. Interior with functioning status indicator

6.2.2.4. XXMini-Substation

The 315kVA-rated transformer of this mini-substation was manufactured by Power Engineers in 2012. The mini-substation's enclosure was secured on a concrete plinth and rust free. The mini-substation doors were locked at the time of the audit. The safety and warning signs were not available. The transformer's oil gauge indicated low oil level.

Warning and safety signs were not available.

Oil gauge showed low oil level

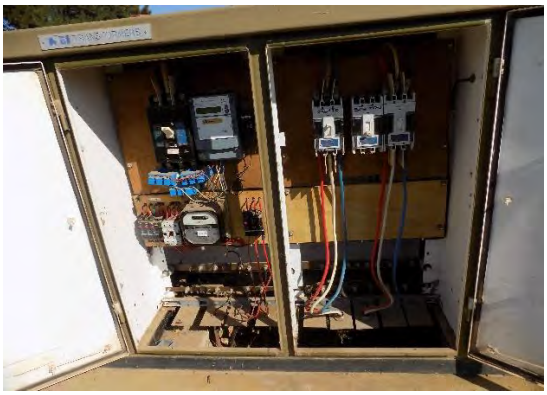
The compartments were in fair condition, with functioning status indicators

6.2.2.5. Solomon Street Mini-Substation

This 315kVA-rated mini-substation was secured on a plinth and its doors were locked. The transformer was manufactured by NEI in 1997. The transformer oil gauge showed good oil levels. The safety and warning signs were visible and the inscriptions were legible. The enclosure had rust. There were no signs of oil leaks on the mini-substation.

Warning signs visible, enclosure had rust, oil gauge indicated low oil level

Access to both the LV and HV compartments of the mini-substation was controlled through the relevant locks. The HV panel was properly labelled. The LV panel had a meter, and showed interconnections within the network.



HV and LV compartment in fair condition

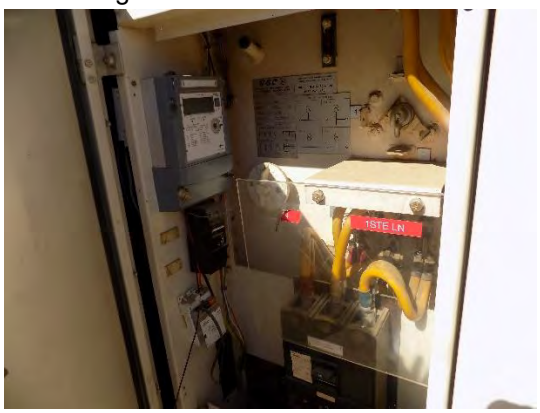
6.2.2.6. Obiqua/3rd Avenue Mini-Substation

This mini-substation had a 315 kVA-rated transformer, which was manufactured by GEC in 1989. Access to all compartments of the mini-substation were controlled through the relevant locks. The oil gauge indicated good oil level. The panels were clearly labelled and indicated where it is fed from and supplying to.

The mini-substation was secured on damaged plinth and its doors were locked. The safety and warning signs were not available. There were signs of oil leaks at the mini-substation.

The pictures below depict the condition of the 315kVA mini-substation.

Damaged plinth, warning signs were not available and signs of oil leaks



MV/LV panels labelled, functioning status indicators

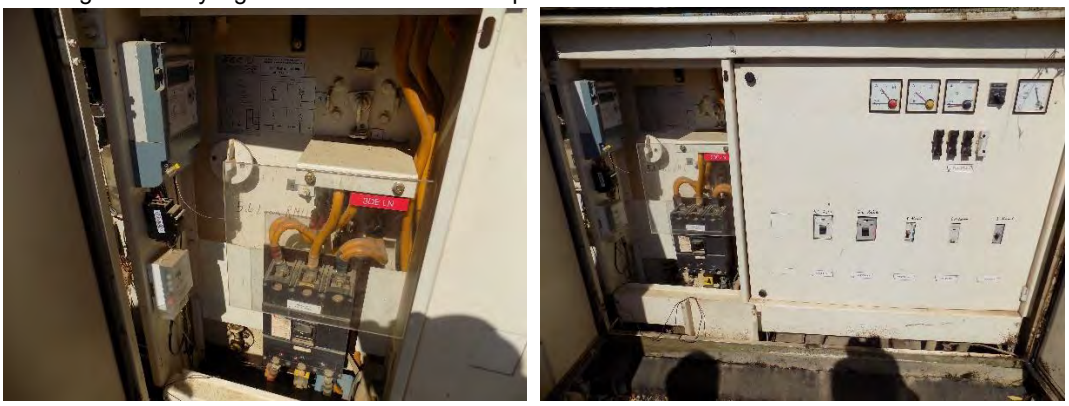
6.2.2.7. Obiqua/4th Avenue Mini-Substation

This mini-substation was part of a customer's fencing and was in poor condition. The 315kVA-rated mini-substation had a transformer that was manufactured by GEC in 1989.

Access to compartments of the mini-substation was controlled through the relevant locks. The safety and warning signs were not visible due to illegal inscriptions. The mini-substation had oil leaks.

The pictures below depict the condition of the mini-substation.

Warning and safety signs not visible. Enclosure part of customer fence



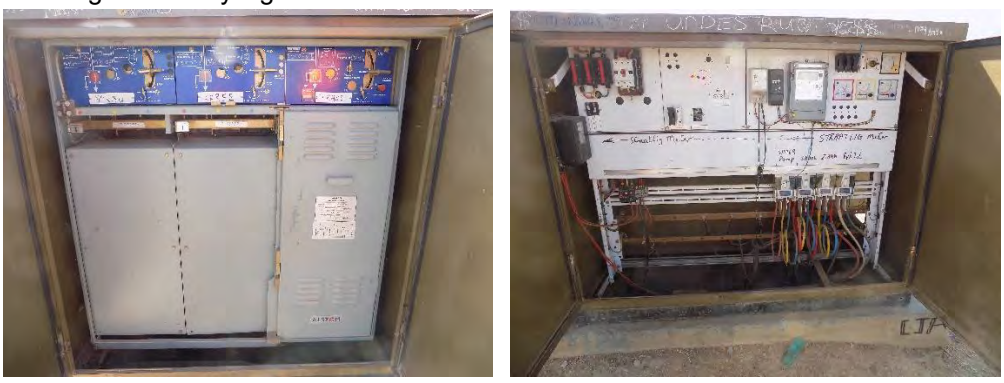
LV compartment in fair condition, with the panel labelled

6.2.2.8. Ryk Tulbagh Mini-Substation

This 315kVA-rated mini-substation had an Alstom Transformer manufactured in 2007. The enclosure had rust and dents, was secured on a concrete plinth. The enclosure had graffiti. The oil gauge indicated good oil level. The safety and warning signs were not visible.

Both the LV and MV compartments of the mini-substation were in good condition. The status indicators were in operation. The panels showed interconnections within the network.

Warning and safety signs not available and locked doors



HV and LV compartments in good condition

6.2.3. Pole-Mounted Transformers

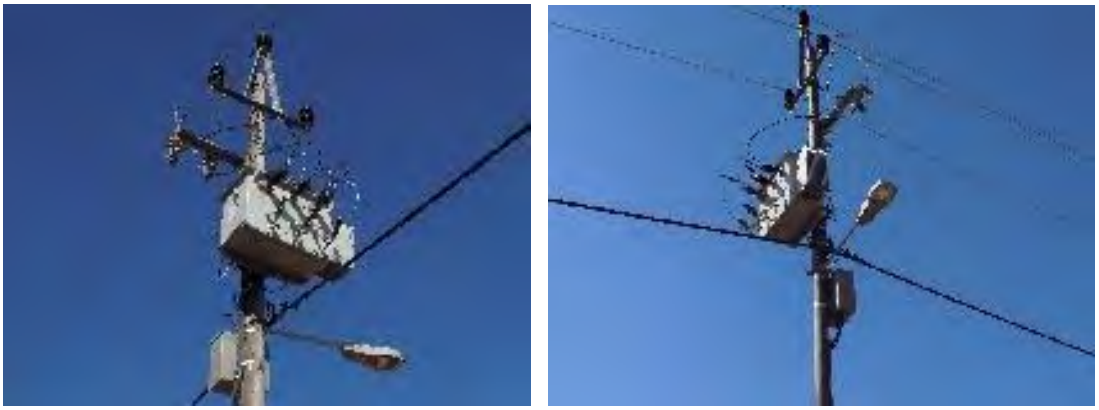
In general, the pole-mounted transformers (PMTs) of the Witzenberg Local Municipality that were inspected, were in good condition. Most transformer support structures were supported by stay wires and not leaning. The poles were treated against ageing, and anti-theft climbing equipment was installed on most transformer poles. The inspected PMT enclosures and surge arrestors were earthed, as required by statutory standards. The audit team inspected a sample of pole-mounted transformers in the industrial area, Obiqua area and Zakile/Pineville area.

6.2.3.1 Industrial area pole-mounted transformer

This is a 100kVA-rated Actom transformer installed on the 11kV overhead line, the transformer was earthed and secured on the pole structure. The pole structures were intact and not encroaching on customers' yards. Anti-theft climbing equipment

was installed on the pole structure. The drop-out fuses were in place and in good condition. The surge arrestors were also in good condition and earthed. The conductor terminations were intact and in good condition, with the jumpers and insulations properly installed.

The pictures below depict the 100kV-rated Actom transformer's condition.



Pole structure intact, transformer in good condition

6.2.3.2 Zakile/Pineville Pole-Mounted Transformer

This 200kVA-rated Electro Inductive Industries PMT was installed on the Zakile/Pineville 11kV overhead line. The transformer was earthed correctly and secured on the pole structure. The stay wires were in good condition and were not encroaching on customers' yards. Anti-theft climbing equipment was installed on the pole structure. The drop-out fuses were in place and in good condition. The surge arrestors were also in good condition and earthed. The conductor terminations were intact and in good condition, with the jumpers and insulations properly installed. There were no signs of oil leaks on the transformer.

The pictures below depict the pole-mounted transformer's condition.

Pole-mounted transformer intact, supported with staywires, anticlimbers installed

Transformer in good condition, kiosk earthed

6.2.3.2 Obiqua Pole-Mounted Transformer

This is a 200kVA-rated NEI transformer installed on the 11kV overhead line. The transformer was earthed correctly and secured on the wooden pole structure. Part of the pole structure was used as support for a customer fence. Supporting pole, stay wire and anti-theft climbing equipment were installed on the pole structure. The surge arrestors were in good condition and earthed. The conductor terminations were intact and in good condition, with the jumpers and insulations properly installed. There were signs of oil leaks on the transformer. The fuses were in poor condition.

The pictures below depict the 200kV-rated NEI pole-mounted transformer's condition.

PMT with signs of oil leaks

PMT constructed on a firm structure installed anti-theft/climbing equipment

6.2.4. Overhead lines

The sample of lines inspected was found to be in fair condition. The majority of the distribution lines were underground. The audit team inspected the overhead lines at Zakile/Pineville area.

The line span and line sags were acceptable and in good condition. The line insulators were also in good condition. The supporting poles and stay wires were clear off the road. The inspected 400V bundle line was in fair condition, however there were issues of illegal resellers in the area. The non-electrified household were not connecting directly from the municipality network/equipment, however, they were fed from the existing municipality customers.

The municipality network was heavily overloaded with illegal resellers of electricity. The electrical wires/structure were installed from one electrified customer's house to supply electricity to multiple non-electrified households for an undisclosed amount/fee.

These illegal reseller connections were an electrical hazard to the community lives and the electricity network in area. The Municipality should eradicate the illegal structures from their network as a matter urgency to save lives and the network.

The Licensee advised that a plan for new electrification was in place and the project was being implemented in phases to eradicate the illegal connections.

The pictures below depict the condition of the overhead lines and illegal connections at Zakile area.

Pictures depicting Illegal connections on the overhead lines in the Zakile area

7. CONCLUSION

The Witzenberg Local Municipality did its best to manage the electricity business in an efficient and reliable manner. It was observed that there were still some areas of concern where improvement needs to be made. The main challenges facing the Electricity Department are financial constraints to fund its maintenance programmes and the rehabilitation of the older parts of the network. The substations and mini-substations inspected during the audit consisted of fairly old equipment.

8. RECOMMENDATIONS

Based on the instances of non-compliance that are highlighted in this report, NERSA recommends the following:

a) The electricity affairs of Witzenberg Local Municipality must be ring-fenced from the other activities of the Municipality.
b) The critical vacancies should be filled.

c) The asset register should be updated to indicate all the critical attributes of the assets and be linked to GIS.
d) The municipality must eradicate the illegal structures from their network as a matter of urgency to save lives and the network.
e) All open trench covers should be closed.
f) All faded warning signs should be replaced.
g) The fire prevention equipment must be serviced and mounted as a matter of urgency.
h) The transformers and mini-substations with oil leaks must be attended to.
i) The regular inspections of the network and plant equipment should be formally recorded and filed accordingly.
j) The maintenance policy and plan must be developed.
k) All findings noted in section 6 of this report must be addressed.

9. THE WAY FORWARD

This final report is considered a true reflection of the findings of the audit that took place from 20 to 21 April 2021. The Energy Regulator instructs the management of the Witzenberg Local Municipality to draft a remedial/corrective action plan that outlines steps to be taken to rectify the instances of non-compliance identified in this report within 120 days of receipt of the final report.

Once NERSA has agreed to the CAP from the Witzenberg Local Municipality, a monitoring process will be instituted to enforce the implementation of the CAP.

All communication should be sent to the Head of the Electricity Licensing, Compliance and Dispute Resolution Department unless indicated otherwise by a formal letter signed by the Head of Department.

To: Pierre Van Den Heever
Subject: RE: NERSA Audit CAP - Electricity Ring-fencing

Good day Pierre

The revenue and expenditure of electricity are ring-fenced in that the transaction are budgeted and recorded in dedicated votes. A separate function has been created in the financial records of terms of the MSCOA regulations. The surplus and or deficit for the electricity section is however not recorded in a dedicated accumulated surplus/deficit account but is included in the total accumulated surplus/deficit account of the municipality.

The electricity section has its own items on the municipal budget and the assets of the electricity department is mark as such in the municipal asset register.

Subject: NERSA Audit CAP - Electricity Ring-fencing

Hi Cobus

As discussed recently, I have to report back to NERSA on their recent audit. Part of the required feedback is the **status of the 'ring-fencing of the electricity affairs'**.

Please could you comment on this so that I can provide feedback to NERSA (via Council item)

WITZENBERG

MUNISIPALITEIT UMASIPALA MUNICIPALITY

- MEMORANDUM -

AAN / TO: Director Technical Services

VAN / FROM: Senior Manager: Streets and Stormwater

DATUM / DATE: 21 February 2023

VERW. / REF.: 16/P

LOCAL INTEGRATED TRANSPORT PLAN 2022 – 2027 - WITZENBERG MUNICIPALITY

1. Purpose

That the Committee for Technical Service together with Council consider to grant approval for the adoption of the Witzenberg Local Integrated Transport Plan 2022-2027. *Please follow the link for the full document: \\poseidon1\Documents\Integrated Development Planning\Integrated Transport Plan\ITP 2022 - 2027*

2. Background

The Witzenberg Local Integrated Transport Plan (LITP) was prepared as part of the review of the Cape Winelands District (CWD) Integrated Transport Plan (DITP) for 2022 - 2027.

As per Section 36 of the National Land Transport Act (Act 5 of 2009) all Planning Authorities must prepare an Integrated Transport Plan (ITP) for their area for a five-year period. These ITPs need to be overhauled every five years and updated annually. The Integrated Transport Plans for the Cape Winelands District have been prepared to meet the minimum requirements for preparing an Integrated Transport Plan as published by the Department of Transport (Notice No 881, July 2016).

As part of the previous update of the Cape Winelands District Integrated Transport Plan (2014/15), the planning authorities for each of the local municipalities were re-categorised. The Witzenberg Local Municipality (WLM), through the previous update process, was classified as a Level 3 Planning Authority, which requires that a Local Integrated Transport Plan be prepared.

This report comprises the 5-year review of the Witzenberg Local Integrated Transport Plan, as part of the review of the Cape Winelands District Integrated Transport Plan.

3. Executive Summary

The Witzenberg Local Municipality have had two excellent documents completed for it in the recent past, namely the Roads Master Plan (March 2020) and the Operating Licence Strategy (August 2020). With the upgrade of the IDP (March 2022) and the Spatial Development Framework (April 2022) there was excellent recent information with which to compile this LITP to a very high standard.

The Roads Master Plan did not only provide the costing of required road projects and road maintenance actions, but also provided information of NMT projects and certain public transport projects.

The Witzenberg area has been experiencing urban development growth in the recent years. It is essential that all development planning be guided by a predetermined Roads Master Plan. The urban areas to be evaluated in the Roads Master Plan are Bella Vista, Ceres, Nduli, Op-die-Berg, Prince Alfred Hamlet, Tulbagh and Wolseley.

The Vision for Witzenberg LM Roads Master Plan was formulated to be "To provide a safe, reliable, effective and efficient road and transport system to serve the public of Witzenberg Municipality".

Due to the extent which the Roads Master Plan for Witzenberg must cover- with limited funding- the methodology would be to take information from existing sector plans and update only the information on which the capacity analysis of the roads will be based. This will ensure that all the road-related information is reported in one document where a more integrated approach is taken.

The Witzenberg Integrated Development Plan for 2019-2020 indicates that 56.6% of the population are low income earners (R1 – R50 514 per annum) with 6.4% of the 56.6% receiving no income. 38.0% of the population are middle income earners (R50 515 – R404 111 per annum) and the remaining 5.4% are the high-income earners, earning more than R404 112 per annum.

The service levels maintained in the Witzenberg LM is very positive. The main challenge is the ingress of people from outside the area that keeps the housing need constant. Housing currently have a high priority in Witzenberg LM.

In summary, the progress made in the development of "new areas" as earmarked in the 2012 SDF is slow. The focus is understandably on housing settlements as this is often where political pressure is focused.

The municipal road network is in good condition, 59% of road network being in a very good to good condition, 30% being in fair condition with 11% being poor and very poor. Out of the 204.8km of road, 91% is black top roads, 2% is block paved and 7% is gravel roads. The proposed maintenance cost over 2-3years is R42.4 mil.

Five bridges and 3 major culverts were assessed as part of the RRAMS project. The maintenance cost of these structures without professional fees were estimated to be R1.59 mil.

Traffic counts were done on 108 intersections. The AM & PM peak hours were extracted, and operational analysis were done for the current scenario and geometry. Only six intersections operated with an approach lower than LOS D.

A formal request was sent to WCG to obtain accident data within the Witzenberg LM area to identify hazardous locations. The request was denied. Potentially dangerous intersections on Vos Street (R303) and Voortrekker Street (R46) were identified by others and further investigated.

Minibus taxis is the main source of public transport within Witzenberg LM, in the absence of a public bus service. There is a need to consolidate the various taxi ranks in Ceres.

A host of new pedestrian walkways were identified as well as the required maintenance on existing facilities. In the town of Ceres, kerbs at pedestrian crossings must be dropped to improve universal access.

Precinct planning were previously done in Ceres and Tulbagh. A variety of projects were proposed to connect nodes with general beautifying of the area, improve vehicular, pedestrian and cycle movements. The proposed cost for Ceres was R56 mil and R7.2 mil for Tulbagh.

New spatial plans from the 2020 SDF were used to assess new roads to be developed. Various new bridge connections were also identified in Ceres and Tulbagh.

The six intersections which previously exceeded LOS D, were further analysed at a 3.7% traffic growth over the next 5years. Some proposal is made in terms of the upgrading of these intersections. An additional two intersections in Nduli which did not exceed the LOS D were also analysed with a growth of 3.7% over the next 5 years, as these intersections are expected to see a rapid growth in traffic volumes upon completion of the Vredebes development.

The site for the new taxi rank has been identified and should be pursued within the short to medium term. Negotiations with the property owner must precede any formal planning.

Pedestrian and cycle facilities should be a requirement up to Class 4 roads which are generally bus or taxi routes. Class 5 roads may however be fitted with walkways or cycling lanes, if it serves public land-uses like schools, hospitals or community buildings.

Freight routes and by-pass routes were identified by previous studies. The initial survey, planning and environmental approvals should be sought in the short to medium term.

Mention is made of a Petroport truck stop facility outside Ceres. This would give the trucks a place to overnight and eliminate the current illegal parking within the Witzenberg LM towns.

Master Planning is key to provide long term steering of projects, with the SDF and IDP planning for a shorter term. Municipal Grants like MIG is key to the sustainability of municipal projects. Developer contributions should be used to augment the bulk infrastructure where required. Tariffs are not applicable to roads and transport.

The Witzenberg LM is geared to use and project manage consultants with internal staff concentrating on smaller capital projects and operational projects. Community Participation projects needs a champion within the municipality to drive it and the handling of labour related issues as they arise. It also requires full time supervision to guide low skilled labour.

Risk Management needs to be made part of the management processes. Officials in Witzenberg, like most others in the transportation field handle problems and challenges as it arises. The provincial roads and some bridges were identified as critical assets.

The strategy for prioritising projects would be;

- All maintenance and repair actions should happen over the short and medium term;
- All small to medium size capital projects should happen over the short and medium term;
- All project likely to fall outside of this scope should happen over the long term;
- The initial work for the long-term projects (survey, planning and environmental), should be done over the short to medium term;

It can be expected that projects will be shifted forward or backwards as priorities change. These priorities are often influenced by political influences as pressure mounts from communities. It could also be that co-funding becomes available or some developments are happening faster than expected.

The OLS document (August 2020) includes the following recommendations:

- The Provincial Regulatory Entity maintains a database of all current Operating Licences. Municipalities do not currently have access to this database. Regular engagement between Municipalities and the PRE is necessary to discuss the outcome of Operating Licence applications. This will ensure that all parties are informed about the status of OLs applications.
- Regular surveys should be conducted to establish the current situation in terms of supply and demand, verify the vehicles currently in operation and identify vehicles operating without Operating Licences. NPR cameras at key point could be put up to collect data on an ongoing basis.

- Surveys should be conducted during the picking season, when minibus taxis experience peak demand, and also during the off season. To avoid an oversupply of OLs, OLs should be issued based on the demand during the off season. During the picking season additional temporary licences could be issued to supplement the existing operating licences and accommodate the increased demand.
- A strategy should be developed to rationalise all existing OLs and manage the approval of OLs.
- Before issuing new OLs, the OLs of routes which are over supplied with public transport trips should be reassigned to routes which are undersupplied in terms of public transport trips.
- Operating Licences not brought into use within 90 days of approval or Operating Licences not used for a period longer than 180 days should be cancelled.
- No new Operating Licences should be approved on routes where there is an oversupply of public transport trips.
- Businesses should be made aware of the Operating Licence system and be encouraged to only use licenced vehicles for staff transport.
- Vehicles without Operating Licences should be subject to law enforcement as a matter of course. Operators without OLs should be encouraged to apply for OLs on routes where a demand for additional trips has been identified. A regularly-updated database which provides easy access for enforcement of OLS information and route descriptions should be established.
- When considering the impact that a development will have on the transport network, Traffic Impact Assessments should investigate the number of public transport trips a development will generate and address the provision of public transport in the area. This will help the Planning Authority to identify new routes and possible OL requirements.

4. Recommendation

- *That the Committee for Technical Services adopts the Witzenberg Local Integrated Transport Plan 2022-2027.*

- *That the Committee for Technical Services refers the Witzenberg Local Integrated Transport Plan 2022-2027 to Council for adoption.*

Yours sincerely,

E. LINTNAAR

The information within this document is and shall remain the property of: Cape Winelands District Municipality.

Executive Summary

The Witzenberg Local Municipality have had two excellent documents completed for it in the recent past, namely the Roads Master Plan (March 2020) and the Operating Licence Strategy (August 2020). With the upgrade of the IDP (March 2022) and the Spatial Development Framework (April 2022) there was excellent recent information with which to compile this LITP to a very high standard.

The Roads Master Plan did not only provide the costing of required road projects and road maintenance actions, but also provided information of NMT projects and certain public transport projects

The Witzenberg area has been experiencing urban development growth in the recent years. It is essential that all development planning be guided by a predetermined Roads Master Plan. The urban areas to be evaluated in the Roads Master Plan are Bella Vista, Ceres, Nduli, Op-die-Berg, Prince Alfred Hamlet, Tulbagh and Wolseley.

The Vision for Witzenberg LM Roads Master Plan was formulated to be "To provide a safe, reliable, effective and efficient road and transport system to serve the public of Witzenberg Municipality".

Due to the extent which the Roads Master Plan for Witzenberg must cover- with limited funding- the methodology would be to take information from existing sector plans and update only the information on which the capacity analysis of the roads will be based. This will ensure that all the road-related information is reported in one document where a more integrated approach is taken.

The Witzenberg Integrated Development Plan for 2019-2020 indicates that 56.6% of the population are low income earners (R1 – R50 514 per annum) with 6.4% of the 56.6% receiving no income. 38.0% of the population are middle income earners (R50 515 – R404 111 per annum) and the remaining 5.4% are the high-income earners,earning more than R404 112 per annum.

The service levels maintained in the Witzenberg LM is very positive. The main challenge is the ingress of people from outside the area that keeps the housing need constant. Housing currently have a high priority in WitzenbergLM.

In summary, the progress made in the development of "new areas" as earmarked in the 2012 SDF is slow. The focus is understandably on housing settlements as this is often where political pressure is focussed.

The municipal road network is in good condition, 59% of road network being in a very good to good condition,30% being in fair condition with 11% being poor and very poor. Out of the 204.8km of road, 91% is black top roads, 2% is block paved and 7% is gravel roads. The proposed maintenance cost over 2-3years is R42.4 mil.

Five bridges and 3 major culverts were assessed as part of the RRAMS project. The maintenance cost of these structures without professional fees were estimated to be R1.59 mil.

Traffic counts were done on 108 intersections. The AM & PM peak hours were extracted, and operational analysis were done for the current scenario and geometry. Only six intersections operated with an approachlower than LOS D.

A formal request was sent to WCG to obtain accident data within the Witzenberg LM area to identify hazardous locations. The request was denied. Potentially dangerous intersections on Vos Street (R303) and Voortrekker Street (R46) were identified by others and further investigated.

Minibus taxis is the main source of public transport within Witzenberg LM, in the absence of a public bus service.There is a need to consolidate the various taxi ranks in Ceres.

A host of new pedestrian walkways were identified as well as the required maintenance on existing facilities. Inthe town of Ceres, kerbs at pedestrian crossings must be dropped to improve universal access.

Precinct planning were previously done in Ceres and Tulbagh. A variety of projects were proposed to connect nodes with general beautifying of the area, improve vehicular, pedestrian and cycle movements. The proposedcost for Ceres was R56 mil and R7.2 mil for Tulbagh.

New spatial plans from the 2020 SDF were used to assess new roads to be developed. Various new bridge connections were also identified in Ceres and Tulbagh.

The six intersections which previously exceeded LOS D, were further analysed at a 3.7% traffic growth over the next 5

years. Some proposal is made in terms of the upgrading of these intersections. An additional two intersections in Nduli which did not exceed the LOS D were also analysed with a growth of 3.7% over the next 5years, as these intersections are expected to see a rapid growth in traffic volumes upon completion of the Vredebes development.

The site for the new taxi rank has been identified and should be pursued within the short to medium term. Negotiations with the property owner must precede any formal planning.

Pedestrian and cycle facilities should be a requirement up to Class 4 roads which are generally bus or taxi routes. Class 5 roads may however be fitted with walkways or cycling lanes, if it serves public land-uses like schools, hospitals or community buildings.

Freight routes and by-pass routes were identified by previous studies. The initial survey, planning and environmental approvals should be sought in the short to medium term.

Mention is made of a Petroport truck stop facility outside Ceres. This would give the trucks a place to overnight and eliminate the current illegal parking within the Witzenberg LM towns.

Master Planning is key to provide long term steering of projects, with the SDF and IDP planning for a shorter term.Municipal Grants like MIG is key to the sustainability of municipal projects. Developer contributions should be usedto augment the bulk infrastructure where required. Tariffs are not applicable to roads and transport.

The Witzenberg LM is geared to use and project manage consultants with internal staff concentrating on smaller capital projects and operational projects. Community Participation projects needs a champion within the municipality to drive it and the handling of labour related issues as they arise. It also requires full time supervisionto guide low skilled labour.

Risk Management needs to be made part of the management processes. Officials in Witzenberg, like most othersin the transportation field handle problems and challenges as it arises. The provincial roads and some bridges wereidentified as critical assets.

The strategy for prioritising projects would be;

- All maintenance and repair actions should happen over the short and medium term;
- All small to medium size capital projects should happen over the short and medium term;
- All project likely to fall outside of this scope should happen over the long term;
- The initial work for the long-term projects (survey, planning and environmental), should be done over theshort to medium term;

It can be expected that projects will be shifted forward or backwards as priorities change. These priorities are ofteninfluenced by political influences as pressure mounts from communities. It could also be that co-funding becomes available or some developments are happening faster than expected.

The OLS document (August 2020) Includes the following recommendations:

- The Provincial Regulatory Entity maintains a database of all current Operating Licences. Municipalities do not currently have access to this database. Regular engagement between Municipalities and the PRE is necessary to discuss the outcome of Operating Licence applications. This will ensure that all parties are informed about the status of OLs applications.
- Regular surveys should be conducted to establish the current situation in terms of supply and demand, verify the vehicles currently in operation and identify vehicles operating without Operating Licences. NPR cameras at key point could be put up to collect data on an ongoing basis.
- Surveys should be conducted during the picking season, when minibus taxis experience peak demand, and also during the off season. To avoid an oversupply of OLs, OLs should be issued based on the demand during the off season. During the picking season additional temporary licences could be issued to supplement the existing operating licences and accommodate the increased demand.
- A strategy should be developed to rationalise all existing OLs and manage the approval of OLs.
- Before issuing new OLs, the OLs of routes which are over supplied with public transport trips should be reassigned to routes which are undersupplied in terms of public transport trips.
- Operating Licences not brought into use within 90 days of approval or Operating Licences not used for a period longer than 180 days should be cancelled.

- No new Operating Licences should be approved on routes where there is an oversupply of public transport trips.
- Businesses should be made aware of the Operating Licence system and be encouraged to only use licenced vehicles for staff transport.
- Vehicles without Operating Licences should be subject to law enforcement as a matter of course. Operators without OLs should be encouraged to apply for OLs on routes where a demand for additional trips has been identified. A regularly-updated database which provides easy access for enforcement of OLS information and route descriptions should be established.
- When considering the impact that a development will have on the transport network, Traffic Impact Assessments should investigate the number of public transport trips a development will generate and address the provision of public transport in the area. This will help the Planning Authority to identify new routes and possible OL requirements.

1 Chapter 1: Introduction

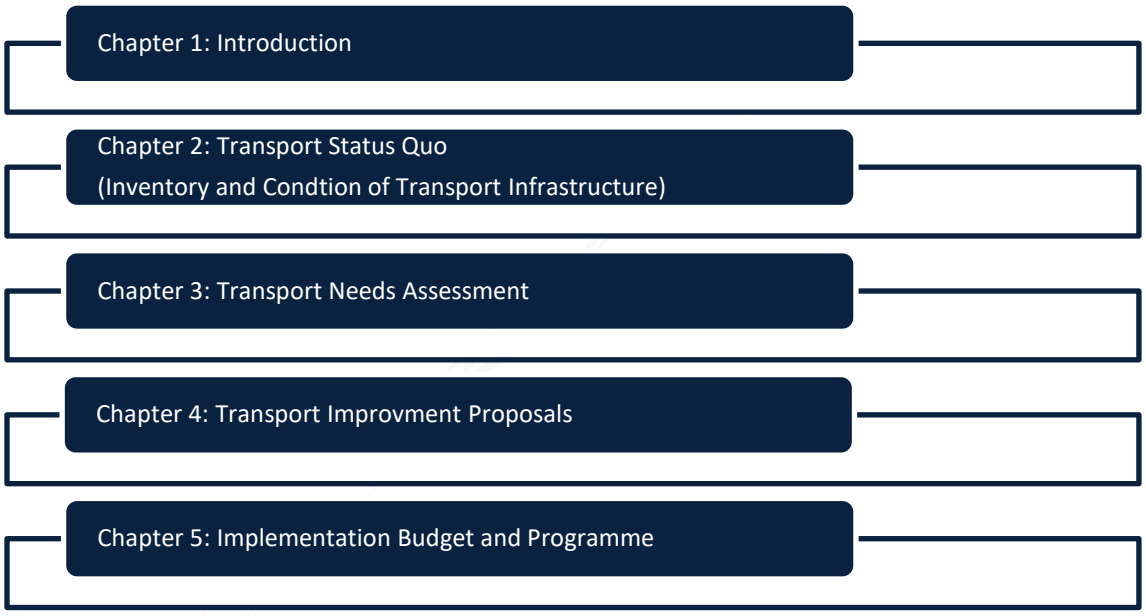
The Witzenberg Local Integrated Transport Plan (LITP) was prepared as part of the review of the Cape Winelands District (CWD) Integrated Transport Plan (DITP) for 2022 - 2027.

As per Section 36 of the National Land Transport Act (Act 5 of 2009) all Planning Authorities must prepare an Integrated Transport Plan (ITP) for their area for a five-year period. These ITPs need to be overhauled every five years and updated annually. The Integrated Transport Plans for the Cape Winelands District have been prepared to meet the minimum requirements for preparing an Integrated Transport Plan as published by the Department of Transport (Notice No 881, July 2016).

As part of the previous update of the Cape Winelands District Integrated Transport Plan (2014/15), the planning authorities for each of the local municipalities were re-categorised. The Witzenberg Local Municipality (WLM), through the previous update process, was classified as a Level 3 Planning Authority, which requires that a Local Integrated Transport Plan be prepared.

This report comprises the 5-year review of the Witzenberg Local Integrated Transport Plan, as part of the review of the Cape Winelands District Integrated Transport Plan.

The LITP comprises of the chapters as documented in the minimum requirements for preparing an Integrated Transport Plan, as published by the Department of Transport (Notice No 881, July 2016).



The Transport Register (TR), Operating Licence Plan (OLP) and Public Transport Plan were undertaken in 2021 as a separate project and have been included in this version of the WLM LITP, as two additional chapters.

1.1 Study Area

The Witzenberg Local Municipality (LM), founded in 2000, is classified as a Category B- municipality and is responsible for basic service provision to the demarcated municipal area that includes the towns of Ceres, Tulbagh, Prince Alfred's Hamlet, Wolseley and Op-die-Berg. The rural areas within the municipal boundary are Ceres Valley, Koue Bokkeveld, Achter-Witzenberg and the northern portion of the Breede River Valley Area.

Located in the picturesque and fertile Breede Valley, Witzenberg is best known for its fruit and wine products. The region is also well-known for producing other agriculture-linked products such as olives and grain, as well as for producing beef and pork products. Horse and cattle stud farms are also found within the municipal area.

Below is a map of the local Municipal area:

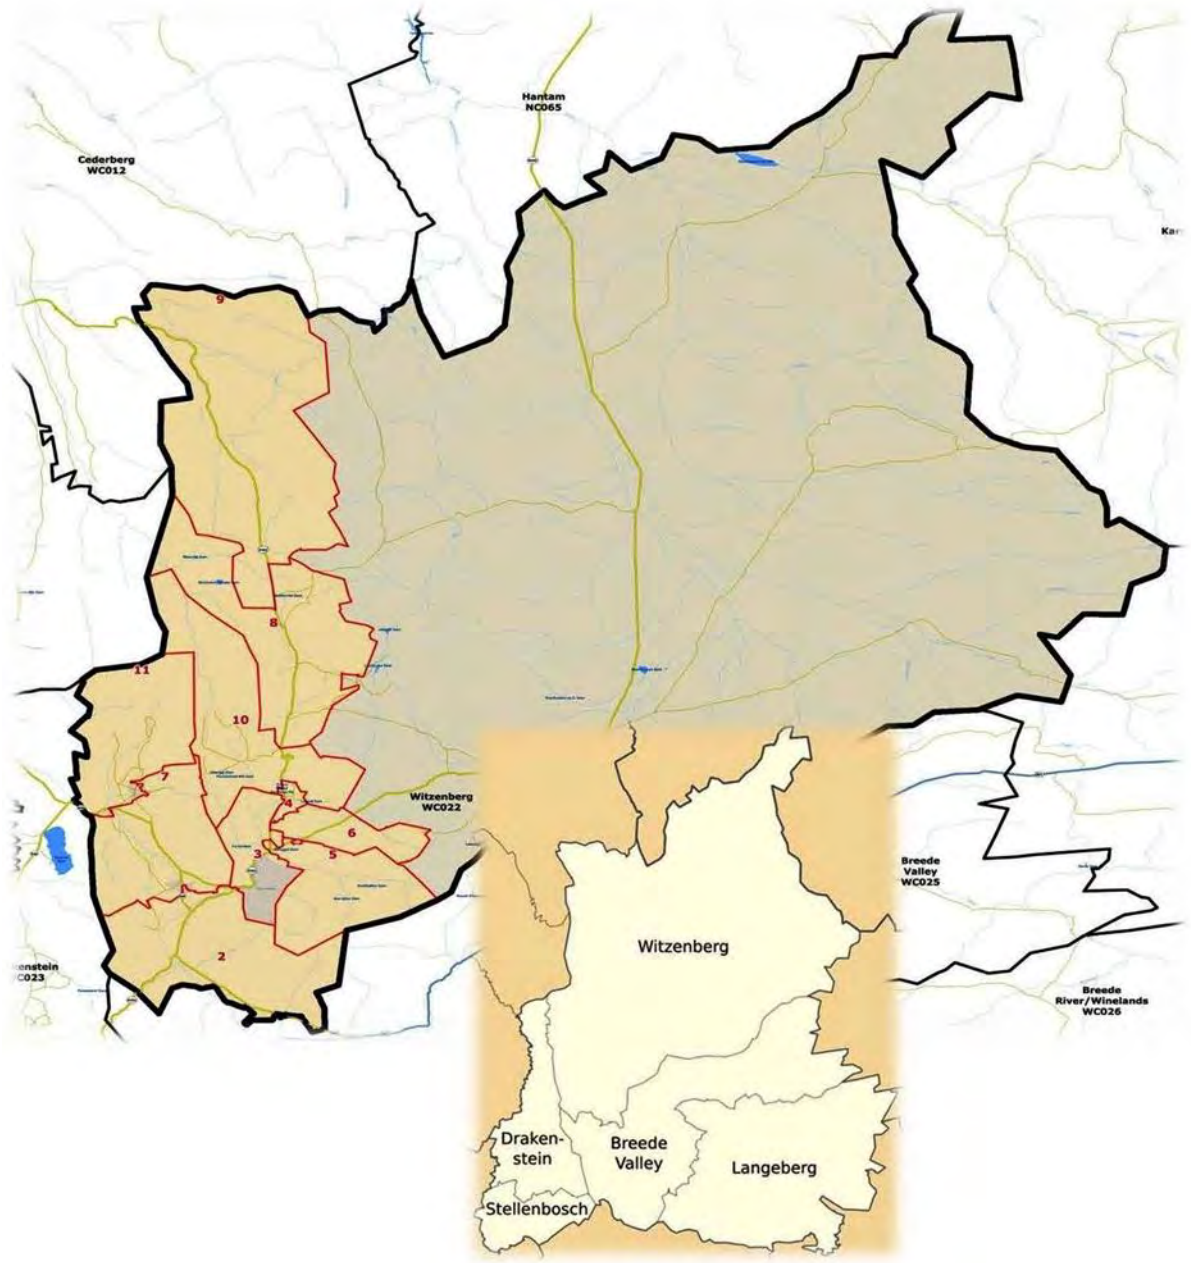


Figure 1-1: Witzenberg Local Municipality

1.1.1 Population and Households

With a population of 142 466 in 2019, Witzenberg is the second lowest populated municipal area in the CWD. This total is expected to growth to 153 987 by 2023, equating to an average annual growth rate of 2.0 per cent. The number of households are 32 005.

1.1.2 Economic Contribution and growth

The demand for transport is derived from the need to access social and economic activity, therefore it is important to consider economic and sector growth when preparing transport plans.

1.2 Purpose of the Integrated Transport Plan

The compilation of an Integrated Transport Plan forms part of the legislated development planning process. This allows for transport planning to be strategic in nature and focused on the desired outcomes, as derived from national, provincial and local transport policy. It takes into consideration all modes of transportation and infrastructure in the planning and aims to address concerns, gaps and areas of development for the period of implementation of the ITP. The inter-relationship between plans and frameworks with the national, provincial and local context is presented in Figure 1-.

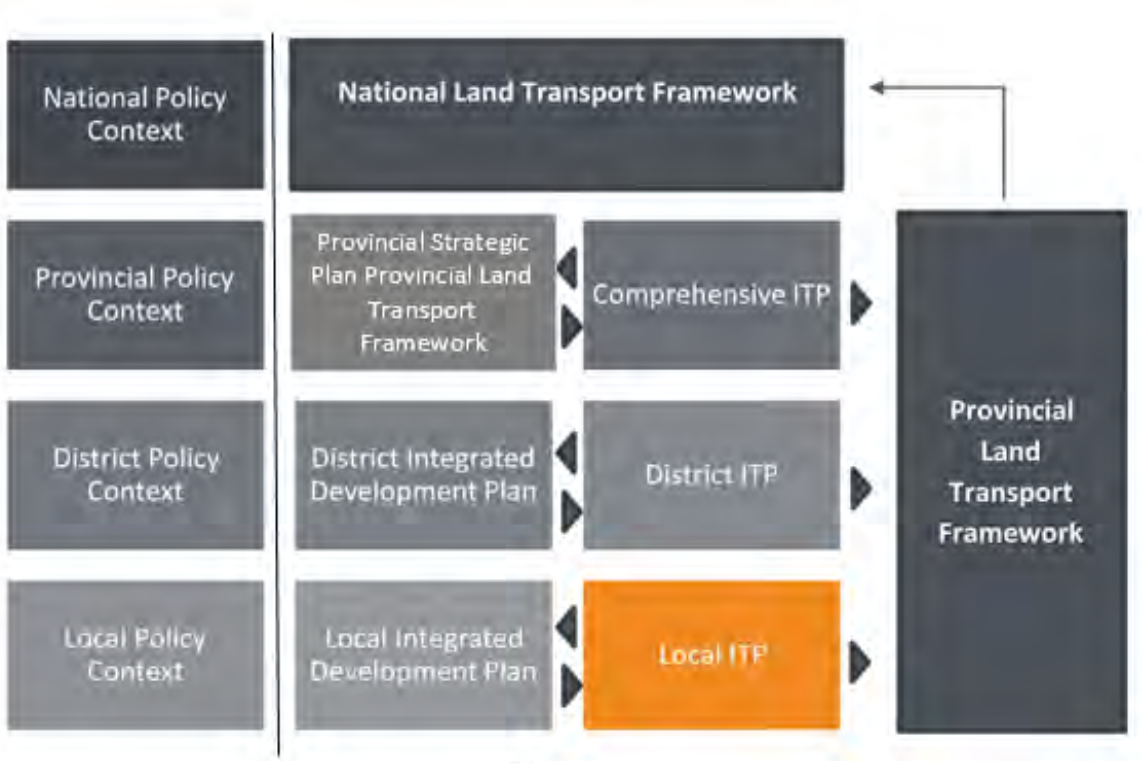

Figure 1-2: Inter-relationship between Transport Plan and Frameworks

Essentially, the ITP is a sector plan that takes into account the plans made in the Integrated Development Plan (IDP) on a local level and feeds into the Provincial Land Transport Framework (PLTF), which ultimately forms part of the National Land Transport Framework (NLTF). The development of this ITP also takes into consideration the Spatial Development Framework (SDF).

1.3 Status of the Plan

Integrated Transport Plans are prepared for a five-year period and updates of selected aspects of the plan should be undertaken on an annual basis with a specific focus on programmes and budgets. The annual updating must include the following aspects:

- Update the TR if any significant new data collection occurs, including the transportation GIS.
- Describe progress of the implementation of the ITP.
- Document which contracts have been awarded and which have expired and any changes or additions to the proposed contracted services network.
- The database of the operating licences, where municipalities has established such, should be updated on an ongoing basis, as per the OLs are awarded, lapsed or are renewed.
- Revised and updating projects, programmes and budgets in chapter 5, so that a three-year period ahead is maintained, along with a detailed programme and budget for the next financial year.

The frequencies of the required plans are shown below in Table 1-1.

Table 1-1: Plan Required Frequencies

Plan	Frequency		Comments
	PREPARATION	UPDATE	
1. Comprehensive ITP (CITP) and District ITP (DITP)	Total overhaul every 5th year	Annual update of selected aspects, in synchronisation with the IDP.	Update to focus on action programme and budget. Prerogative of PA to do more comprehensive update.
2. Local Integrated Transport Plan (LITP)	Prepare every five years, as input to new DITP in the case of local authorities that fall within a district municipality	Update the budget and programme for the following year annually, in synchronisation with the IDP.	
3. Transport Register (forms part of ITP)	Total overhaul every 5th year	Update the TR if any significant new data collection occurs. GIS, databases and information systems to be updated on an ongoing basis, as and when new information is collected.	Update to concentrate on gaps and information of poor quality. The TR was not updated as part of this LITP re-write.
4. Public Transport Plan (forms part of ITP)	Total overhaul every 5th year	Report annually on contracts that have been awarded or which have expired and any changes or additions to the proposed contracted services network. Database of operating licences should be updated on an ongoing basis as OLs are awarded, lapse, or are renewed.	

2 Chapter 2: Transport Status Quo

The Minimum requirements for preparing a LITP guides that the Transport Status Quo Chapter should consist of:

- An inventory of the roads which are the responsibility of the local municipality, including their condition; and
- An inventory of public transport facilities which are the responsibility of the local municipality, including their condition (this inventory may be taken over from the Transport Register (TR) prepared by the district municipality within whose area the local municipality is situated).

2.1 Demographics and Economic Activity

With a population of 142 466 in 2019, Witzenberg is the second lowest populated municipal area in the CWD. This total is expected to growth to 156 671 by 2023, equating to an average annual growth rate of 2.0 per cent. The estimated population growth rate of Witzenberg is slightly below that of the CWD at 1.6 per cent. The Western Cape average annual growth rate is 1.8 per cent across the same period.

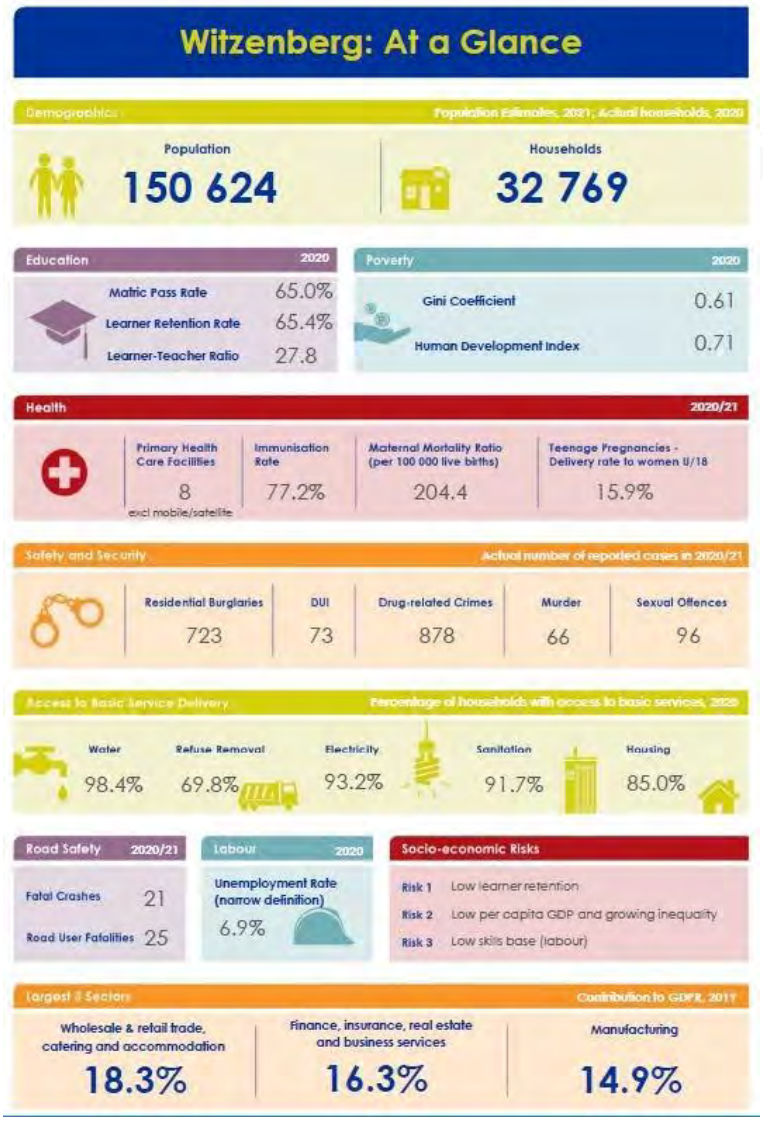
Table 2-1: Witzenberg Age Distribution

Witzenberg: Age Cohorts, 2019 – 2025				
Year	**Children 0 – 14 Years**	**Working Age16 – 65 Years**	**Aged 65+**	**Dependency Ratio**
2020	35 675	105 751	6 512	39.9
2023	36 881	114 707	7 129	38.4
2026	38 178	118 966	7 835	38.7
Growth	+1.1%	+2.0%	+3.1%	-

Source: IDP

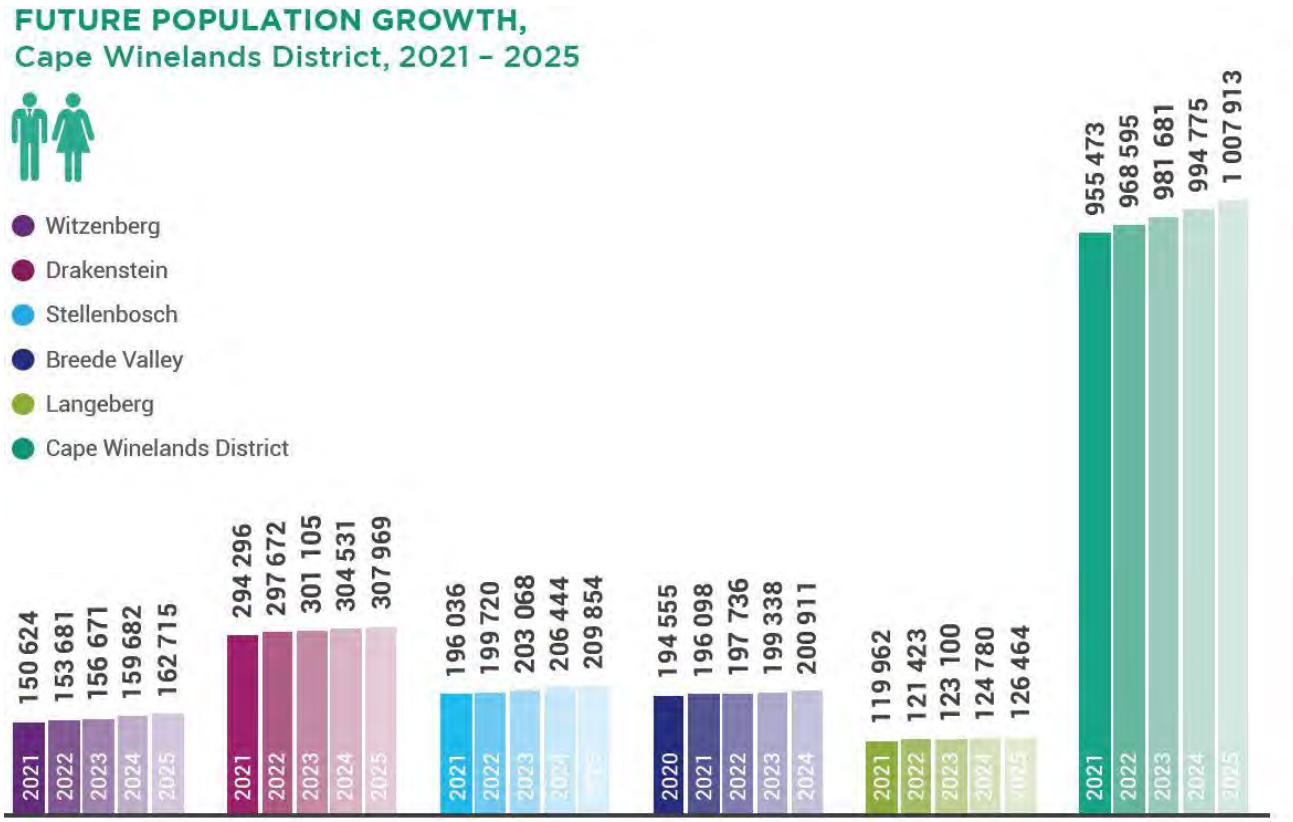
Between 2020 and 2026, the largest population growth will be recorded in the 65+ aged cohort, which will grow at an annual average rate of 3.1 per cent. The dependency ratio decreases towards 2023 and increases slightly towards 2026.

The following is a summary of the Witzenberg demographics:



Source: IDP 2022-2023. (From Provincial Treasury)

In the 2021 Municipal Economic Review and Outlook a set of population growth figures have been published for all the local municipalities in the Cape Winelands District Municipality. These are shown below:



Source: Western Cape Government PPU, 2021. Provincial, District and local municipality population estimates by sex and age (2002 – 2036) based on Stats SA mid-year population estimate (MYPE) series 2021 and 2020

The Witzenberg economy is essentially agriculture based, with the towns being "agricultural service centres", with some agri-processing related to wine, fruit, vegetables and other niche products. The region is also well-known for its fruit and wine products, as well as producing other agriculturally linked products, such as olive and grain producing areas, beef and pork products. Horse and cattle stud farms are also found within the municipality.

The other major economic driver in the area is the Tourism Sector and the municipality has undertaken a number of initiatives which should come to fruition over the next five years, including:

- The Tourism Industry has recorded a very strong growth and has become an important element of the local economy. Key tourism activities include: wine tasting, 4x4 routes, hiking, game reserves, camping, horse riding, fishing, annual community festivals, snow in Ceres during the winter months, agricultural tourism attractions, fruit tours, San cave, museums and historic buildings.
- Witzenberg Tourism caters for Cape Town and other Western Cape day and weekend tourists, as well as up-country seasonal tourists.
- The strengthening and partnering with national, provincial and district municipality tourist initiatives.
- The finalisation and completion of the National Road Corridor through Witzenberg.
- The finalisation and completion of the Ceres Golf Estate Project.
- The strengthening of international twinning and partnership agreements (Belgium).

2.2 Public Transport

2.2.1 Mini-bus Taxi

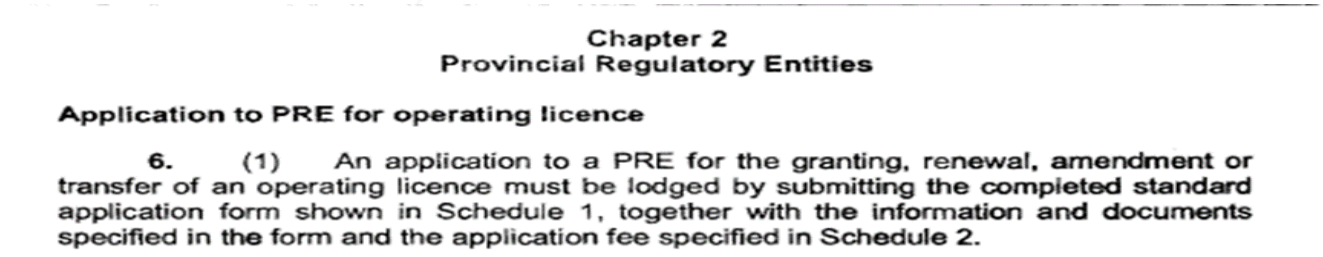
2.2.1.1 Listing of all ranking facilities for road-based transport

Formal taxi facilities have specific infrastructure such as ablution facilties, shelters that have been constructed. Informal facilities include areas that are used by public transport without any kind of "betterment" or surfaced parking areas that have been constructed but not specifically as a taxi rank. There are 7 formal ranks in Witzenberg Local Municipality. With four of ranks located in Ceres, one in Tulbagh, Prince Alfred Hamlet, and Wolseley respectively as shown in Table 2-2.

Table 2-2: Listing of all Taxi facilities (as per Table 1 in minimum req)

No	Town	Facility Name	Physical Location		Type of Service	No. of bays
1	Ceres	Vos Street	33°21'43.93"S	19°18'35.33"E	Commuter	25 (estimated)
2	Ceres	Vos Street On-street	33°22'2.73"S	19°18'38.30"E	Commuter	3
3	Ceres	Ceres Nduli Formal taxi rank	33°22'5.05"S	19°18'50.63"E	Commuter	32
4	Ceres	Nduli Taxi Rank	33°21'20.20"S	19°20'37.36"E	Commuter	14
5	Tulbagh	Van Der Stel On-Street Parking	33°17'0.79"S	19° 8'20.38"E	Commuter	3
6	Prince Alfred Hamlet	Prince Alfred Hamlet Taxi Rank	33°17'36.71"S	19°19'38.17"E	Commuter	5
7	Wolseley	Wolseley Taxi Rank	33°24'48.67"S	19°11'52.60"E	Commuter	5 (Assumed)

In accordance to NLTA, 2009(Act No.5 of 2009), an application has to be done before granting, renewal, amendment of transfer of an operating license Figure 2-1.



Chapter 2
Provincial Regulatory Entities

Application to PRE for operating licence

6. (1) An application to a PRE for the granting, renewal, amendment or transfer of an operating licence must be lodged by submitting the completed standard application form shown in Schedule 1, together with the information and documents specified in the form and the application fee specified in Schedule 2.

Figure 2-1: PRE snip

As highlighted, in the minimum requirements for the preparation of intergrated Transport Plans, 2016. Route description should be the same as in operating licenses and the descriptions in OLS should mirror these descriptions.

Table 2-3: Route Descriptions (Table 2 as per minimum req)

2.2.1.3 Rank utilisation of loading facilities

The highest utilasation is at highest on first Thursday, Friday, and Saturday of the month. For Witzenberg Local Municipality towns. The data obtained is shown in **Table 2-**5.

Table 2-5: Rank utilisation of loading/holding facilities (Table 6 as per minimum requirement)(This is also a list of all the ranking facilities in the municipality at the time of compiling the TR.)

Town	Facility Name				No Of Bays	Utilisation			% Utilisation
	Facility Name	Mode	Type Of Service	Loading/Holding Area		Days Of Max Utilisation	Max No Of Vehicles	Time Of Max Utilisation

2.2.1.4 Service Capacity and Capacity Utilization of Routes

Table 2-6 lists the routes per town, and describes them according to the following criteria:

- Origin and destination;
- Route Code;
- Period of highest utilization;
- No. of depatures during the period;
- Total capacity of departing vehicles;
- No. of passengers utilizing this service, during the period; and
- Utilisation of available seats, in a percentage value.

The following conclusion can be drawn drawn from the utilisation:

- Some routes were utilized at 100% according to the use of the route in different times.

Table 2-6: Service Capacity and Capacity Utilisation of Routes (Table 5 as per minimum req)

2.2.1.5 Description of Facilities

The location of all rank facilities within Witzenberg Local Municipality are shown in **Figure 2-2**.

Figure 2-2: Taxi ranking facilities in Witzenberg

- Op-die-Berg Informal Taxi Rank

Op-die-Berg does not have formal taxi rank, they use the existing parking as the taxi pick up spot. The area is unsurfaced, there are no demarcated bays or the infrastructure for the taxi facilitie, also there is no ablutions and electricity.

Table 2-7: Description of facility (Op-die-Berg)

FACILITY NAME	TOWN	STATUS		FACILITY TYPE			ON/OFF STREET	PAVING (YES/NO)	FACILITY CODE	ELECTRICITY (YES/NO)	ROOF STRUCTURE (YES/NO)	ABLUTION FACILITIES (YES/NO)	OFFICES (YES/NO)
		FORMAL	INFORMAL	TERMINUS FOR BUSSES	RANK FOR MINI-BUS TAXIS	HOLDING AREA							
Op-die-Berg Rank			x	No	Yes	Yes	Off Street	No	-	No	No	No	No

- Prince Alfred's Hamlet Taxi Rank

There is only one ranking facility at Prince Alfred's Hamlet town. The facility is a formal taxi rank that is located on church street and Voortrekker Road. The rank is in a good condition and well maintained.

Table 2-8: Description of facility (Prince Alfred)

FACILITY NAME	TOWN	STATUS		FACILITY TYPE			ON/OFF STREET	PAVING (YES/NO)	FACILITY CODE	ELECTRICITY (YES/NO)	ROOF STRUCTURE (YES/NO)	ABLUTION FACILITIES (YES/NO)	OFFICES (YES/NO)

Vos Street Informal Rank	Ceres		x	No	Yes	Yes	Off Street	Yes	-	Yes	No	Yes	No
Vos Street on Street Rank	Ceres		x	No	Yes	No	on street	Yes	-	No	No	No	No

- Wolseley

There is no formal ranking facility in Wolseley. They use existing municipal parking lot located on corner Eeufees Street and Voortrekker Street as a rank facility.

Table 2-10: Description of facility (Wolseley)

FACILITY NAME	TOWN	STATUS		FACILITY TYPE			ON/OFF STREET	PAVING (YES/NO)	FACILITY CODE	ELECTRICITY (YES/NO)	ROOF STRUCTURE (YES/NO)	ABLUTION FACILITIES (YES/NO)	OFFICES (YES/NO)
		FORMAL	INFORMAL	TERMINUS FOR BUSSES	RANK FOR MINI-BUS TAXIS	HOLDING AREA							
Wolseley Taxi Rank	Wolseley		x	No	Yes	Yes	Off Street	Yes	-	No	No	No	No

- Tulbagh

Tulbagh does not have a formal ranking facility. They use on-street parking that is located on Van Der Stel Street in front of Spar which in only used by minibus taxi.

Table 2-11: Description of facilities (Tulbagh)

FACILITY NAME	TOWN	STATUS		FACILITY TYPE			ON/OFF STREET	PAVING (YES/NO)	FACILITY CODE	ELECTRICITY (YES/NO)	ROOF STRUCTURE (YES/NO)	ABLUTION FACILITIES (YES/NO)	OFFICES (YES/NO)

Van Der Stel on-street Rank	Tulbagh		x	No	Yes	Yes	On-Street	Yes	-	No	No	No	No

2.2.2 Cordon Counts

To understand the travel characteristics of the travel patterns and traffic volumes in the municipality, cordon surveys were conducted at multiple locations in different towns as specified in the tender document. The surveys are done to obtain information on the trips originating outside, within and passing through the municipality study area by counting all vehicles and pedestrians passing at a point during the day.

2.3 Commuter Rail

Currently Metrorail (a division of PRASA) provides limited commuter rail services through a portion of the Witzenberg L0cal Municipality, namely the Cape Town – Wellington – Worcester service. See **Error! Reference source not found.** showing a s chematic of the rail line and the respective rail stations. Stations within Witzenberg includes: Tulbagh Road, Artois, Wolseley, Romans River, Bree River and Botha. (Although called commuter rail, it is generally speaking too far for such a service and the correct description is regional rail services.)

Figure 2-7: Rail line and stations in Witzenberg LM

The table shows the timetables for the Worcester-Wellington-Cape Town Service in both directions. The rail stations provide access to the City of Cape Town, Drakenstein and Worcester. Three scheduled train services are provided per direction i.e. weekday service (trains 3510/3531), Saturdays (trains 3508/3523) and Sundays (trains 3506/3521). The travel time is extremely long, longer than via private vehicle or MBT. Average travel time between Wolseley and Cape Town via regional rail is approximately 2.5 – 3.0 hours.

Although rail offers accessibility to other municipalities, the number of trains available are limited and there is limited integration between rail and MBTs. The locations of MBT ranks are not in close proximity to the existing rail station. There has been an overall decline in rail across the country and Witzenberg will need to initiate talks with PRASA to get clarity on the intended plans for a rail service in this area. Continuing and improving the rail services needs to be lobbied.

Figure 2-8: New PRASA Rolling Stock

In the very near future the new PRASA rolling stock will be introduced in the Western Cape and this will allow new regional rail service opportunities, because of its higher speeds and acceleration/ deceleration capabilities. Something like an express Worcester- Paarl- Bellville- Cape Town service could drastically reduce the existing trip times, which is provided below:

Table 2-16: Timetables for the Worcester-Wellington-Cape Town Service and Return Direction

2.4 Roads and Traffic

The Witzenberg Local Municipality has recently completed (June 2020) a Roads Master Plan that has also included a NMT section and information on the minibus-taxi facility requirements in the municipality. From this excellent document most of the information provided below has been sourced or has been adapted for the LITP:

2.4.1 Provincial road network within the municipality

The Provincial Roads form the backbone of the transportation system in the Witzenberg Municipality. The road network through Witzenberg Municipality consists of about 1 970 kilometres of provincial roads. Major provincial roads include MR310 (R301) from Ceres, past Op-die-berg towards Citrusdal, TR22/1 and TR22/2 (R46), and MR302 (R43). Provincial roads are classified into four categories according to function, and include trunk roads, main roads, divisional roads and minor roads. Trunk roads and main roads link larger towns and provide access to bordering districts. Divisional roads link rural areas to trunk and main roads, while minor roads provide local access. The table below provides a summary of the extent of the major road network.

Table 2-17: Road Network in the Witzenberg Municipality

Municipality	Functional Road Type					
	National	Trunk	Main	Divisional	Minor	Total
Witzenberg (km)	00.0	104.13	329.26	471.78	979.29	1884.46

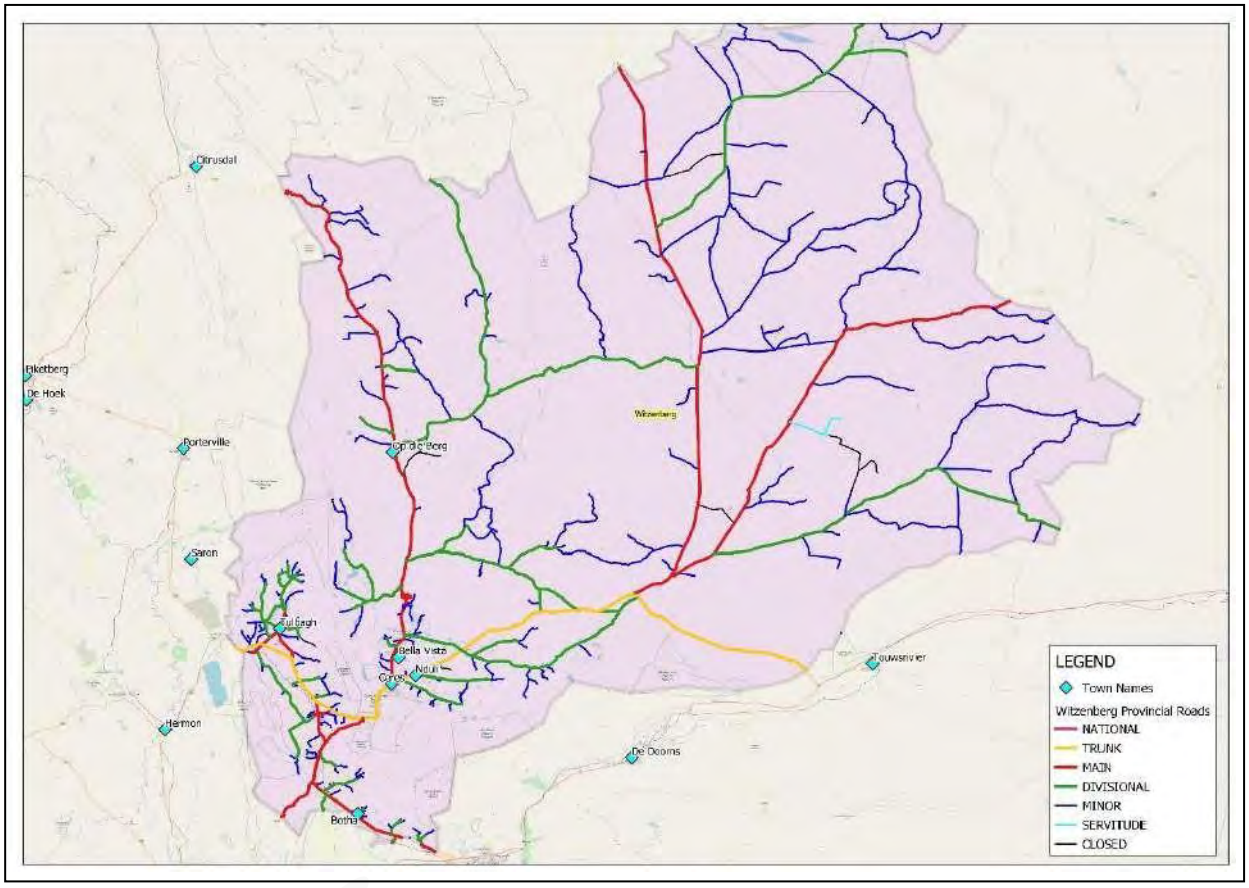

Figure 2-9: Provincial Road Network

2.4.2 Municipal Road Network

The municipal road network is mainly made up of Class 4 (Collectors) and Class 5 (Access Roads). The roads lengths were recorded per surface type, reflected in the table below. It shows that roughly 91% of the roads are covered with bituminous surfaces, 2% has a block paving surface and 7% are gravel road..

Table 2-18: Municipal Road Network

	Road Length (km)					
	Paved Flex	Paved Block	Paved Concrete	Gravel	Earth	Grand Total
Bella Vista	29.2	0.0	0.0	3.3	0.0	32.5
Ceres	55.6	0.3	0.0	1.0	0.0	56.9
Nduli	12.7	0.3	0.0	0.0	0.0	13.0
Op-die-berg	2.4	3.0	0.0	1.4	0.0	6.8
Prince Alfred Hamlet	19.0	0.1	0.0	3.3	0.0	22.4
Tulbagh	29.3	0.7	0.0	3.3	0.0	33.4
Wolseley	38.1	0.0	0.0	1.8	0.0	39.9
Total	**186.3**	**4.3**	**0.0**	**14.2**	**0.0**	**204.8**

2.4.3 Road Maintenance and upgrading needs

2.4.3.1 Condition of the Municipal Road Network (See section 4.3 for the methodology)

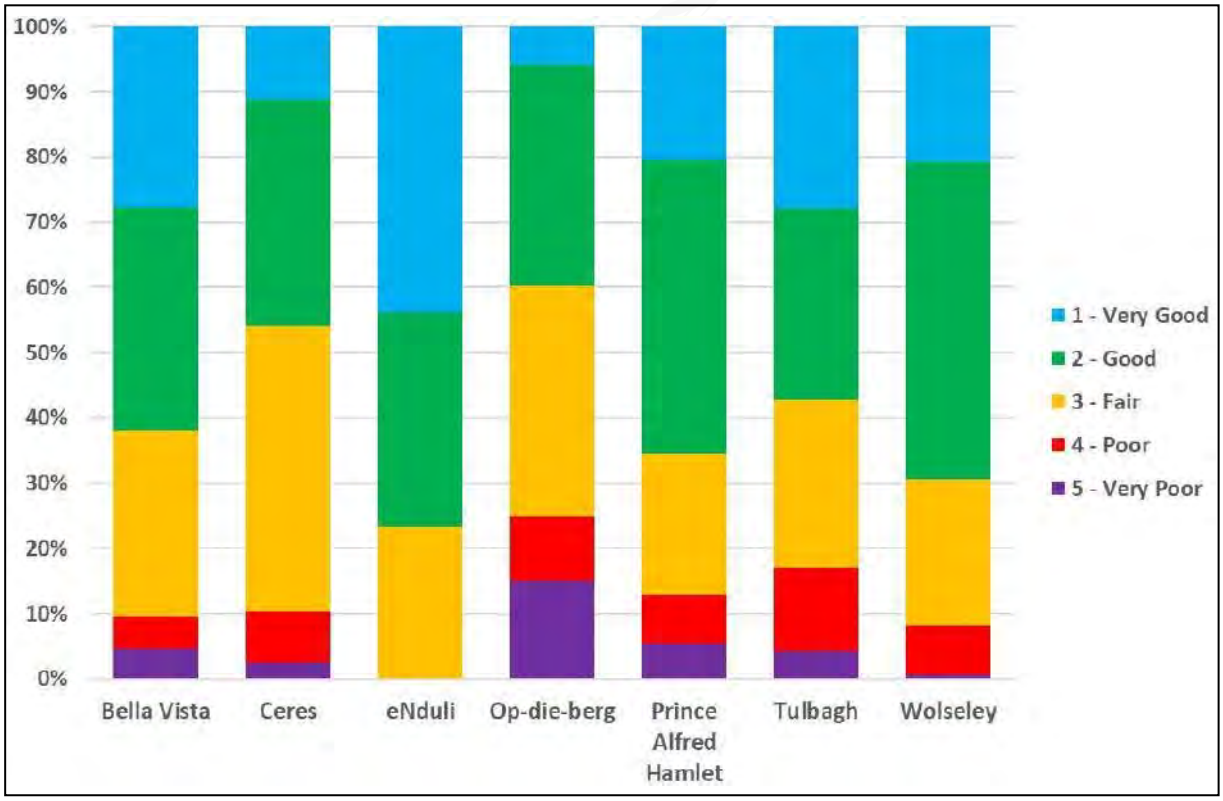

Figure 2-10: Municipal Road Network Conditions (Source: Witzenberg Road Master Plan)

2.4.3.2 The Road Maintenance Strategy

The following road maintenance strategy is defined in the Road Master Plan (2020):

Rejuvenation of old road surfaces is a high priority and treatment with diluted emulsion should receive a high priority. Thereafter, the roads in better condition should be patched and resurfaced with slurry to obtain a uniform texture and improve riding quality. Where the surface texture is already uniform a single seal can be applied. The surfacing on the higher order roads can be improved using micro-paving or thicker asphalt where required. This must be preceded with crack sealing and patching as well as investigations to ensure that the pavement has enough structural capacity to carry the traffic loads when it has an asphalt surface. Where access roads are excessively deformed or potholed, the existing pavement can be ripped up and recompacted as a subbase and a new block pavement constructed. The portion of unpaved roads requiring paving needs to be identified and attended to in a prioritised manner.

2.4.3.3 Proposed Road Maintenance Cost

The proposed maintenance cost was obtained by formalising a treatment strategy for the existing condition of municipal roads. The table below indicates the cost of the proposed maintenance, regarded that this proposed strategy is followed:

Table 2-19: Road Maintenance Cost

Local Municipality / Town	Maintenance Cost (Millions)								
	Diluted emulsion, minor patching and crack seal	Micro Paving ≥15mm	Slurry seal preceded with DE and crack sealing	Slurry seal preceded with DE and patching	Asphalt 25mm	Rehab	Replace with Block Paving	Block Reinstatement	Total
Witzenberg	R 10.1	R 5.5	R 2.4	R 5.9	R 1.7	R 6.4	R 10.3	R 0.0	R 42.4

Op-die-berg	R 0.2	R 0.3	R 0.1	R 0.0	R 0.1	R 0.0	R 0.0	R 0.0	R 0.7
Prince Alfred Hamlet	R 0.9	R 0.3	R 0.1	R 0.5	R 0.3	R 0.5	R 0.1	R 0.0	R 2.7
Tulbagh	R 1.6	R 0.6	R 0.4	R 1.0	R 0.3	R 2.5	R 3.6	R 0.0	R 10.0
Wolseley	R 2.3	R 1.6	R 0.6	R 1.3	R 0.2	R 0.3	R 1.4	R 0.0	R 7.8

The quantum identified for road surfacing rejuvenation, reseals and overlays is some R25m. Should the budget of R19m be allocated based on 2.5% of asset replacement and an amount of some R14m be allocated to periodic surfacing maintenance (rejuvenation and resealing), all the required maintenance treatments will be achieved over 2 to 3 years.

2.5 Freight Transport

2.5.1 Provincial Freight Strategy

The Western Cape Government of Transport and Public Works completed a Provincial Freight Strategy in January 2019. The 7 strategic focus areas in the plan are documented as below:

- Strategic Focus Areas 1: Freight, Planning, Coordination and Institutional Arrangements
- Strategic Focus Area 2: Freight Demand Management
- Strategic Focus Area 3: Modal Rebalancing
- Strategic Focus Area 4: Freight Infrastructure Capacity and Condition
- Strategic Focus Area 5: Freight Traffic Management
- Strategic Focus Area 6: Technology and Innovation
- Strategic Focus Area 7: Freight Data and Information Management

These strategic focus areas will lead to efficient movement of freight through the province and should be considered when looking at freight movement interventions at a local municipal level.

2.5.2 Regional Freight Context

The road network serving the Cape Winelands District includes National, Provincial and Municipal roads.

The N1 passes through Cape Winelands and links it to Cape Town in the west and the hinterland in the east.

The N2 lies just south of Cape Winelands and links it to Cape Town and to the Garden Route / East London, etc while the N7 is located to the west of the district.

Provincial roads are classified according to function as trunk roads, main roads, divisional roads and minor roads. Trunk and main roads link larger towns within the Cape Winelands and the Cape Winelands to adjacent districts. Divisional roads link rural areas to trunk roads and main roads. Minor roads provide local access within towns and rural areas. The R60, a trunk road, links Worcester to Robertson and provides access to the N2.

The R43 (south of the N1), also a trunk road, links Worcester to Villiersdorp and the N2.

The R45 links Paarl to Malmesbury, while the R44 links Wellington to Gouda and Porterville. Most of the road network in the southern portion of the Cape Winelands is paved.

The Provincial traffic data and NATMAP shows that the N1 carries most of the heavy vehicle traffic in the Cape Winelands area. The R60, R301 (between Paarl and Wellington) and the R44 also carry significant volumes of heavy vehicles. The 2005 Cape Winelands District ITP listed the freight routes in order of tonnage per route as shown in the table on the next page:

Table 2-20: Freight Routes

Route	Location	Annual Tonnes (M)
R43	Worcester – Villiersdorp	1.1
R44	Gouda	1.3
R45	Paarl – Malmesbury	1.5
R103	Du Toits Kloof Pass	1.6
R303	Prince Alfred Hamlet	2.5
R46	Ceres-East	2.6
R43	Worcester – Wolseley	2.9
R301	Paarl – Wellington	3.6
R60	Worcester	4.7
N1	Huguenot Tunnel Toll	11.7

2.5.3 Local Freight Context

The Witzenberg Local Municipality comprises the Warm and Koue Bokkeveld with the towns of Ceres, Prince Alfred Hamlet and Op-die-Berg to the east of the Witzenberg mountains and the Tulbagh valley with the towns of Tulbagh and Wolseley to the west of the Witzenberg mountains. Ceres is the seat of local government and lead town in terms of economic activity. According to the SDF, Ceres and Wolseley, will be the focus of growth for the municipality in the foreseeable future.

The economy of the Witzenberg local municipality is comparatively small in relation to the other local municipalities in the Cape Winelands and it is dominated by the agricultural sector. As a result, the local economy is vulnerable to external forces impacting on agriculture such as unseasonal weather patterns and fluctuations in international markets.

The major role players in the Witzenberg economy are all directly involved in the agricultural sector such as the Du Toit Group, Môrester Estate, Witzenberg Properties, Laastedrif, Erfdeel, ZZ2, Donkerbos, Helpmekaar, Langrivier and the Goosen and Carstens Farms who are major fruit and vegetables producers in the Koue Bokkeveld, Warm Bokkeveld, and Bo-Swaarmoed areas; Ceres Fruit Juices and Ceres Fruit Processors, who process fruit and vegetables at their plants in Ceres, and Ceres Fruit Growers, who pack, store and distribute fruit and vegetables. In the Tulbagh valley the economy is more diversified and major role players are private and co-operative wine cellars, with fruit production in the Winterhoek area. Other freight generators include Ceres Spring Water, bottled outside Ceres.

2.5.3.1 Ceres

The current freight routes through Ceres are the R46 and R303 (Towards Prince Alfred Hamlet). The Annual Average Daily Traffic in 2004 for heavy vehicles using these routes through Ceres is between 501 and 1000, with an estimated growth of 3% to between 1001 and 2500 by the year 2031. Most of this freight is generated by the agriculture industry of Ceres and the surrounding towns within the Witzenberg Municipality. Ceres currently has 4 agri-proccessing facilities including Ceres Fruit Processors/Juices. There is also a proposal for a Agri- Park to be developed.

It was previously reported that trucks would use the open parking space next to the Traffic Department in Voortrekker Street for overnight parking. WLM has since posted signage prohibiting this, with traffic officials patrolling the area to successfully discourage truck drivers from overnighting in the town. This however does not disqualify the need for an overnight facility for long distance trucks. The WLM is in discussion with a farmer who is willing to avail a piece of land on the corner of the R46 and Voortrekker Street in Wolseley, to possibly provide such a facility in future.

Figure 2-11: Truck exiting agri- processing plant in Ceres

Figure 2-12: Truck moving down the main road in Ceres.

2.5.3.2 Tulbagh

Previously the freight route through Tulbagh was the R46 (Which becomes Van Der Stel Street in Tulbagh). The Annual Average Daily Traffic in 2004 for heavy vehicles using this route through Tulbagh is between 0 and 500, with no estimated growth to the year 2031. Most of this freight is generated by the agriculture and wine industry of Tulbagh. It currently has 1 agri-proccessing facility and approximately 17 wine cellars including Del Monte which produces canned products such as peas and apricots.

More recently the Western Road link was constructed to give access to the industrial area and alleviate the truck movements from entering the town of Tulbagh. There are however no recent AADT figures available for this Western Road link.

2.5.4 Freight Route Conditional Assessment

It is essential that the condition of the roads on which freight is transported is kept in a good state of repair given the importance of transportation in the value chain. A road in good condition enables:

- Vehicles to operate at their desired speed so that travel times are predictable.
- Goods to be transported without damage that would reduce selling price (e.g. fruit) or breakages.
- Vehicle maintenance costs to be minimised (especially tyre wear) and downtime for repairs reduced.

The road authority for the existing road network that is used to transport freight is a combination of the Provincial Government: Western Cape and the relevant Local Municipality.

The general freight network comprises a primary strategic road network which can be broadly stated to be the R44 / R46 loop linking Somerset West – Klapmuts – Wellington – Tulbagh – Ceres – Touwsrivier, the R60 linking Worcester (N1) – Robertson – Ashton – Swellendam (N2) and the R43 (Wolseley – Worcester). The primary network is supported by a secondary network comprising R44 (Gouda – Saron), R303 (Ceres – Citrusdal) and R43 (Worcester – Caledon).

The roads forming these two networks are constructed from asphalt surfaced pavements that were generally built between 1955 and 1970 with the oldest being reported to have been built in 1935. All the roads have been resealed at least once in their life. Roads that do not form part of the strategic freight network are a mixture of asphalt and gravel construction.

The roads in the primary network are classified as Class 2 roads except for the R43 (Worcester – R301) which is Class 3. They are predominantly two-lane rural cross-sections with a nominal lane width of 3.4 m and 1.5 m shoulders. The roads in the secondary network are generally Class 3 roads. There are some short sections of dual carriageway within the networks especially through towns (e.g. Robertson).

The Visual Condition Index (VCI) gives a good indication of the condition of a road based upon a non- destructive inspection of its surface and its distress features. The VCI's reported within the Province's RNIS database indicate that the R60 is assessed to be in a good condition (where data exists), R44 / R46 loop to vary from fair to good whilst the R43 (Worcester – R301) is reported as being only fair. In contrast, the roads that form the secondary network are on the lower extreme of fair tending towards a poor condition.

2.6 Non-Motorised Public Transport

2.6.1 Background

In the recently completed Witzenberg Road Master Plan, a section of the study was dedicated to non- motorised transport (NMT) and this information is provided here:

Non-Motorised Transport (NMT) is defined as all means of transport which does not require or rely on a motor or engine for movement. This includes modes of transport such as walking, cycling, animal-drawn carts, skating, rollerblading and even wheelchair travel. The benefits of improving the NMT facilities within the Municipal area includes, but is not limited to the following:

- Improved health and fitness;
- Increased liveability;
- Environmental benefit as it reduces carbon emissions and air pollution; and
- Safe mobility of residents whether it be for part of a trip or a full trip.

In the Witzenberg area, walking and cycling are the main modes of NMT, especially within the lower income residential areas. Residents walk or cycle great lengths to either school, work or to a city centre for weekly shopping, therefore the need to provide suitable NMT facilities for the specific needs of these communities. The Witzenberg Integrated Development Plan (IDP) 2018-2019 mentions that the average walking trip time (one-way) is 28 minutes, with Nduli, Wolseley and Bella Vista residents walking 30 minutes or more to work.

The high percentage of residents making use of NMT as a means of daily transport to education facilities and places of employment warrants the need to invest in adequate NMT facilities. . By improving the NMT facilities, more residents who use public transport or private vehicles might be encouraged to use NMT as their primary mode of transport as well.

2.6.2 NMT Status Quo

2.6.2.1 Bella Vista

Bella Vista is a small Township situated approximately 5km North of Ceres. Residents from this Community frequent Ceres town for work, school, shopping and the like. There is a mini-bus taxi service which operates daily between Bella Vista and Ceres, many residents prefer to use NMT as a mode of transport between the two towns due to various reasons, especially as

some cannot afford to use the minibus taxi every day. The R303, commonly known as Vos Street is the main road which joins the two towns, and it has a surfaced pathway situated at ±3m offset along the road, which is used as a shared facility between pedestrians and cyclists. Figure 2-13 below shows the designated NMT sidewalk along the R303. The entire distance between Ceres and Bella Vista is serviced with street lighting, improving the safety of pedestrians and cyclists. The sidewalk should be regularly maintained, as overgrown vegetation reduces the width of the surfaced sidewalk.

Figure 2-13: Sidewalk between Ceres and Bella Vista

Bella Vista being a small community, residents prefer to use NMT as their primary mode of transport while commuting in and around the area. Entrance into Bella Vista is gained via either Panorama Road or Buiten Street which are class 4 collector roads. Both these roads have paved sidewalks for NMT movement.

2.6.2.2 Ceres

Ceres being the biggest Town in WLM, it is regarded as the main economic hub of the Witzenberg municipal area. The Town has the highest NMT movements, especially on weekends, as the residents of neighbouring towns travel to Ceres for weekly shopping and other amenities. The town centre is situated along Voortrekker Street, which is classified as a Class 2 arterial road. Safe pedestrian sidewalks exist along this road, as well as on Vos Street, which is a Class 3 distributer road in Ceres. It should however be noted that although adequate sidewalks exist along the higher order roads, a common occurrence is that the width of the sidewalk is taken up by either trees or road signs. See Figure 2-14.

Figure 2-14: Sidewalks along Voortrekker Street

Pedestrians, cyclists and wheelchair bound commuters can easily cross the higher order intersections in the town, as there are dropped kerbs on the sidewalks and islands. Wheelchair bound commuters will however have difficulty moving easily all the way down Voortrekker road, as not all the lower order intersections have dropped kerbs. This is a common occurrence throughout the town, Figure 2-15 shows one such occurrence where the intersection has painted pedestrian crossing lines, but no dropped kerb.

Figure 2-15: Voortrekker and Munnik Street Intersection

There are painted cycling lanes in some residential parts of Ceres, however, in areas where there are none, cyclists will either use the sidewalks as a shared facility with pedestrians, or cycle in the roadway with motorists. The residential streets in Ceres where cyclists are frequently spotted are wider than normal, averaging at 10.3m. This makes it safe for cyclists to ride in the roadway without getting in the way of moving vehicles.

The pedestrian crossing in Voortrekker Street at Charlie Hofmeyr High School has been flagged as an unsafe crossing. The crossing is un-signalised, with only the pedestrian painting across the road. It has been observed that motorists rarely stop to give pedestrians an opportunity to cross the road safely. Students are often found taking a chance by running across the road.

2.6.2.3 Nduli

Nduli is a small low-income community just ±3km East of Ceres. Given the income group, there is very low car ownership in Nduli, resulting in NMT being the dominant mode of transport for everyday commute. The R46 has a 2.7m wide sidewalk between Ceres and Nduli, where pedestrians and cyclists are continuously seen making use of this sidewalk to and from Ceres. The sidewalk has overhead lighting for the entire length between Ceres and Nduli and is protected by guardrail for the first ±890m from Ceres.

Figure 2-16: R46 sidewalk between Ceres and Nduli

The existing surfaced sidewalk stretches from Ceres and ends at the very first entrance into Nduli (Chris Hani Avenue). Figure 17 shows how the sidewalk surface deteriorates as it approaches Chris Hani Drive, and eventually starts blending in with the gravel shoulder. It has previously been discussed that continuity of the sidewalk is essential, as the journey for many people continues far beyond where the sidewalk currently ends. The new housing development under construction opposite Nduli along the R46 will also require the sidewalk to be extended.

Figure 2-17: Sidewalk along R46 at Nduli

Chris Hani Drive is a class 4 collector road within Nduli and has surfaced sidewalks on either side of road, whereas Eluxolweni Avenue, which later becomes 2nd Street is also classified as a class 4 collector road, but does not have any surfaced sidewalks.

2.6.2.4 Op-die-Berg

Op-die-Berg is a low-income settlement situated approximately 44km North of Ceres and ±34km North of Prince Alfred Hamlet. With a small population in the region of 1500 people, the town does not have much shopping stores and other amenities. Residents of this town generally travel to either Prince Alfred Hamlet or Ceres for weekly shopping, but because of the distance and mountainous terrain, this is usually done by means of public transport instead of NMT. Very little NMT movement is observed along the R303 at Op-die-Berg.

NMT is however the preferred mode of transport by residents for travel in and around the town. This is especially true for children walking to and from school along Kerk Street. A surfaced walkway exists at the southern end of Kerk Street which leads through an open field towards the schools situated along the R303. Although a portion of Kerk Street does have a paved sidewalk, it does not extend to where the abovementioned "school walkway" starts. Figure 2-18 shows school kids who've used the walkway through the open field and now walking in the roadway down Kerk Street.

Figure 2-18: Pedestrians in Op-die-Berg

2.6.2.5 Prince Alfred Hamlet

Situated ±10km North of Ceres, Prince Alfred Hamlet is home to over 6000 people. The town is divided into two income groups which is separated by the R303, commonly known as Voortrekker Road in the town. The provision of sidewalks along Voortrekker Road is satisfactory, allowing commuters to walk out of the way of moving vehicles.

Although Prince Alfred Hamlet is situated quite a distance from Bella Vista and Ceres, the surfaced sidewalk along the R303 allows for persons who wants to walk or cycle this long distance to do so safely on a designated path. The sidewalk however does not have any overhead lighting.

Pedestrians are seen walking (Figure 2-19) along the Class 4 collector roads in Prince Alfred Hamlet towards Voortrekker Road or other parts of the town, but the provision of surfaced sidewalks along these roads are not continuous, specifically along Waboom Avenue.

Figure 2-19: Waboom Avenue pedestrian movement

2.6.2.6 Tulbagh

Tulbagh is located approximately 17km North of Wolseley and 30km north-west of Ceres. It is one of the bigger towns in Witzenberg and Van Der Stel Street is the main road in the town where most of the NMT traffic will be experienced on any given day. Van Der Stel Street has a designated sidewalk on the eastern side of the roadway, which separates NMT movements from moving vehicles. The western side of the main road does not have a formalised sidewalk, resulting in pedestrians walking between parked cars or wherever they find a gap. An open stormwater channel also exists on the western side of Van Der Stel Street, making it a safety hazard for NMT movement. There is only one painted pedestrian crossing across Van Der Stel Street at the Spar, however, many pedestrians are seen crossing at various positions where no pedestrian crossings are available. This is unsafe, as there are motorists who travel this road at high speeds, due to the excessive width and lack of traffic calming measures. See Figure 2-20.

Figure 2-20: Van der Stel Street in Tulbagh

There is a fair amount of class 4 collector roads throughout the residential area with regular NMT movement, however, the surfaced sidewalks are inconsistent along these roads. The class 4 roads connecting to Van Der Stel Street has surfaced sidewalks for the first portion of the road and it later diminishes into gravel sidewalks. Other frequently used class 4 roads such as Steinthal Street (Figure 2-21) has high NMT volumes and is also part of the mini-bus taxi route. The gravel shoulder along the road is used as both an NMT sidewalk and a stopping area for mini-bus taxis. This makes it unsafe for NMT movement. The same is true for Obiqua- and Olifant Street.

Figure 2-21: Steinthal Street with gravel shoulders

2.6.2.7 Wolesley

Wolesley is a small town situated approximately 16km south-west of Ceres. Most shops, banks and other places of interest are positioned along Voortrekker- and Eeufees Streets. Both roads have ample sidewalks on either side of the roadway, which is used as a shared facility between pedestrians and cyclists.

The provision of surfaced sidewalks long the class 4 collector roads are inconsistent in the town. The highest NMT movements originates from the lower income settlements of the Wolseley, which is situated to the far South and West of the town centre. With very few roads directly connecting these settlements to the centre of the town, NMT movements are predominantly across fields, which shortens the distance travelled. The desire lines can be seen from aerial footage as shown in Figure 2- 22 below. The desire lines cross large areas of open field, with bushes along the way making it unsafe for obvious reasons. In respect to the above, a formal pedestrian walkway, which is frequently used for NMT movement to and from the settlement to the west of Voortrekker Street has been provided. The walkway is situated alongside the cemetery and has overhead lighting, which contributes to the safety of the facility.

Figure 2-22: Pedestrian Desire Lines

The desire lines referred to above crosses the railway line at various positions, all of which are level crossings. It was noted that the railway line is under the authority of Transnet, but the line is currently not used for the transportation of Freight. The railway line is however used for tourism by Ceres Rail Company. The steam train travels at low speeds, and it is accompanied by flagmen who goes ahead of the train and cautions pedestrians at all level crossings.

2.7 Learner Transport

The Western Cape Education Department (WCED) provides learner transport. A summary of the service is tabulated below:

WCED Admin	Total Return Distance (KM)
Witzenberg Local Municipality	1296
Devolved	
Witzenberg Local Municipality	211,2
All Learner	
Witzenberg Local Municipality	1507,2
WCED Admin	**Total number of Benefiting Schools**
Witzenberg Local Municipality	56
Devolved	**Total number of Benefiting Schools**
Witzenberg Local Municipality	5
All Learner Routes	**Total number of Benefiting Schools**
Witzenberg Local Municipality	61
All Leaners	**Total number of Approved Mainstream Learners**
Witzenberg Local Municipality	2363

2.8 Transport for Tourism

Figure 2-23: An excursion train of Ceres Rail on the route between Ceres and Wolesley

Ceres Rail operate primarily scheduled excursion trains as day trips. The scheduled trips that it currently operates is from the Cape Town Waterfront to the Elgin Railway Market over St Lowry s' Pass. Some of the other trips that it offered previously was Ceres to Cape Town or Ceres to Wolesley. Part of Ceres Rail Company's mission is to help preserve and promote South African Rail Heritage , which involves restoring and refurbishing old locomotives and coaches. The company also offer charter trips for company events and other corporate functions.

On Wednesday the 2nd of June 2021, Ceres Rail Company in conjunction with Transnet Freight Rail relaunched the freight service on the Wolesley- Ceres – Prince Alfred Hamlet branch line. The 26 km long branch line is rated to handle loads at a maximum of 16 tons per axle. The core freight at present is fruit, exported in refrigerated containers (reefers) and frozen fruit concentrate. The line moves mainly containerised traffic and contributes to the migration of rail friendly traffic from road to rail.

Unfortunately, the dilapidated station buildings do not help the rail tourism sector at all and a redress of these facilities are very much required. Only then, can the potential of utilising rail to transport tourists to weddings and other events and linking to the local catering and B&B's be considered.

Figure 2-24: Ceres Rail can boast of beautifully restored 19D and 19B steam engines.

2.9 Air Travel

There are no airports or municipal landing strips in the Witzenberg Municipality.

3 Chapter 3: Transport Needs Assessment

3.1 IDP Identified Transport Needs

In the current IDP of the Witzenberg Local Municipaity the following references have been included as to transport needs and these have been included in the LITP to align these documents:

3.1.1 Transport Management and Road Maintenance

3.1.1.1 Integrated Transport Planning

This transport field is responsible for transport planning, road planning, traffic engineering and implementation of the Integrated Transport Plan (ITP) with the streets and stormwater infrastructure that include the upgrade, rehabilitation and maintenance of road infrastructure, stormwater drainage and the adequacy of traffic signage and road markings and public transport infrastructure.

The Witzenberg Local Integrated Transport Plan 2010-2015 was adopted on 14 December 2010, with the Witzenberg Local Integrated Transport Plan (LITP) 2016-2021 prepared as part of the review of the Cape Winelands District Integrated Transport Plan (DITP) 2016- 2021. (This new LITP will obviously replace the previous plans mentioned here.)

3.1.1.2 Roads Master Planning

A new Roads Master Plan was approved by Council in February 2021.

The Witzenberg area has been experiencing urban development growth in the recent years. It is essential that all development planning be guided by a predetermined Roads Master Plan.

The Vision for Witzenberg LM Roads Master Plan was formulated to be “To provide a safe, reliable, effective and efficient road and transport system to serve the public of Witzenberg Municipality”.

The municipal road network is in good condition, 59% of road network being in a very good to good condition, 30% being in fair condition with 11% being poor and very poor. Out of the 204.8km of road, 91% is black top roads, 2% is block paved and 7% is gravel roads. The proposed maintenance cost over 2-3years is R42.4 mil.

Five bridges and 3 major culverts were assessed as part of the RRAMS project. The maintenance cost of these structures without professional fees were estimated to be R1.59 mil.

Traffic counts were done on 108 intersections. The AM & PM peak hours were extracted, and operational analysis were done for the current scenario and geometry. Only six intersections operated with an approach lower than LOS D.

Potentially dangerous intersections on Vos Street (R303) and Voortrekker Street (R46) were identified by others and further investigated.

Minibus taxis is the main source of public transport within Witzenberg LM, in the absence of a public bus service. There is a need to consolidate the various taxi ranks in Ceres.

A host of new pedestrian walkways were identified as well as the required maintenance on existing facilities. In the town of Ceres, kerbs at pedestrian crossings must be dropped to improve universal access.

New spatial plans from the 2020 SDF were used to assess new roads to be developed. Various new bridge connections were also identified in Ceres and Tulbagh.

The six intersections which previously exceeded LOS D, were further analysed at a 3.7% traffic growth over the next 5 years. Some proposal is made in terms of the upgrading of these intersections. An additional two intersections in Nduli which did not exceed the LOS D were also analysed with a growth of 3.7% over the next 5 years, as these intersections are expected to see a rapid growth in traffic volumes upon completion of the Vredebes development.

The site for the new taxi rank has been identified and should be pursued within the short to medium term. Negotiations with the property owner must precede any formal planning.

Pedestrian and cycle facilities should be a requirement up to Class 4 roads which are generally bus or taxi routes. Class 5 roads may however be fitted with walkways or cycling lanes, if it serves public land- uses like schools, hospitals or community buildings.

Freight routes and by-pass routes were identified by previous studies. The initial survey, planning and environmental approvals should be sought in the short to medium term. Mention is made of a Petroport truck stop facility outside Ceres. This would give the trucks a place to overnight and eliminate the current illegal parking within the Witzenberg LM towns.

Master Planning is key to provide long term steering of projects, with the SDF and IDP planning for a shorter term. Municipal Grants like MIG is key to the sustainability of municipal projects. Developer contributions should be used to augment the bulk infrastructure where required.

The strategy for prioritising projects would be;

- All maintenance and repair actions should happen over the short and medium term;
- All small to medium size capital projects should happen over the short and medium term;
- All project likely to fall outside of this scope should happen over the long term;
- The initial work for the long-term projects (survey, planning and environmental), should be done over the short to medium term.

3.1.2 Housing Developments within the Witzenberg Local Municipality

The following maps indicate the locations and extent of the proposed housing developments planned in the Witzenberg Local Municipality as detailed in the SDF:

The western portion of the Witzenberg Municipality is characterised by an agrarian landscape with a cluster of urban settlements located adjacent to the main transportation routes (the southern portion falls within the Breede River Valley Major Regional Development Corridor as per the Western Cape PSDF). The eastern part of the Municipal area is a typical Karoo landscape, characterised by undeveloped natural veld, mostly used for extensive agriculture.

Ceres, Tulbagh and Wolseley, all settlements located in the northern settlement cluster, have relatively broad economic bases primarily based on agriculture, with agri-processing, retail and financial services, tourism and transport as supporting driving forces. This area is however faced with a stagnant population and the need and demand for improved residential infrastructure facilities.

According to the 2010-Town Study the Witzenberg Municipality has a low development potential with medium social needs. It has a low performance in the economic, infrastructure and institutional indexes, while the physical environment index's performance was of medium standard. This current situation could be problematic since most of the settlements located in the Municipality have medium to high social needs. It is unlikely that a municipality with low development potential will be able to address the social needs of the settlements without some form of intervention from provincial government or partnerships with the public sector.

Current challenges facing the Witzenberg Municipality are likely to remain, if not increase in severity. Even with the best of intentions, the local authority will not be able to address the issues of poverty, unemployment, etc. given its own staff and resource limitations.

To ensure sustainability of the urban environment, it is important that development should enhance the quality of life in the communities. Requirements for sustainable urban development include the following:

- Integrate urban and rural planning (align urban land-use planning with bioregional planning principles).
- Contain urban sprawl (urban sprawl implies higher per capita cost of providing essential services and loss of valuable agricultural or natural land).

- Restore and maintain specific character (urban areas must reflect the historical character of the area and its people and unique local land-uses).

Public land within Witzenberg is a primary resource with unrealised value and this value should be unlocked in a sustainable manner. Such public land inter alia holds the key to achieving the vision, goals and objectives set for Witzenberg as it relates to social integration and eradication of poverty and inequality. Public land is categorized into the following three categories:

- Vacant: Properties which have not been subject to any form of infrastructural development.
- Partially Developed: Properties which have been partially subjected to either informal or formal development or infrastructural development and investment below ground level (e.g. service infrastructure).
- In-Process: Properties which are in the process of being developed and/or in terms of which a rezoning application has been submitted and/or approved.

The public land in the Municipality comprises a significant number of portions and subdivisions most of which fall into the category of vacant. The largest singular unit of public land is the municipal commonage. This land has been subdivided and re-subdivided into a plethora of portions, the majority of which is vacant, while several portions have been categorized as Partially Developed and In-Process. The images below show the division of land within the municipality; blue areas represent vacant land, yellow areas represent partially developed and magenta represents in process:

Figure 3-1: Ceres & Nduli

Figure 3-2: Bella Vista

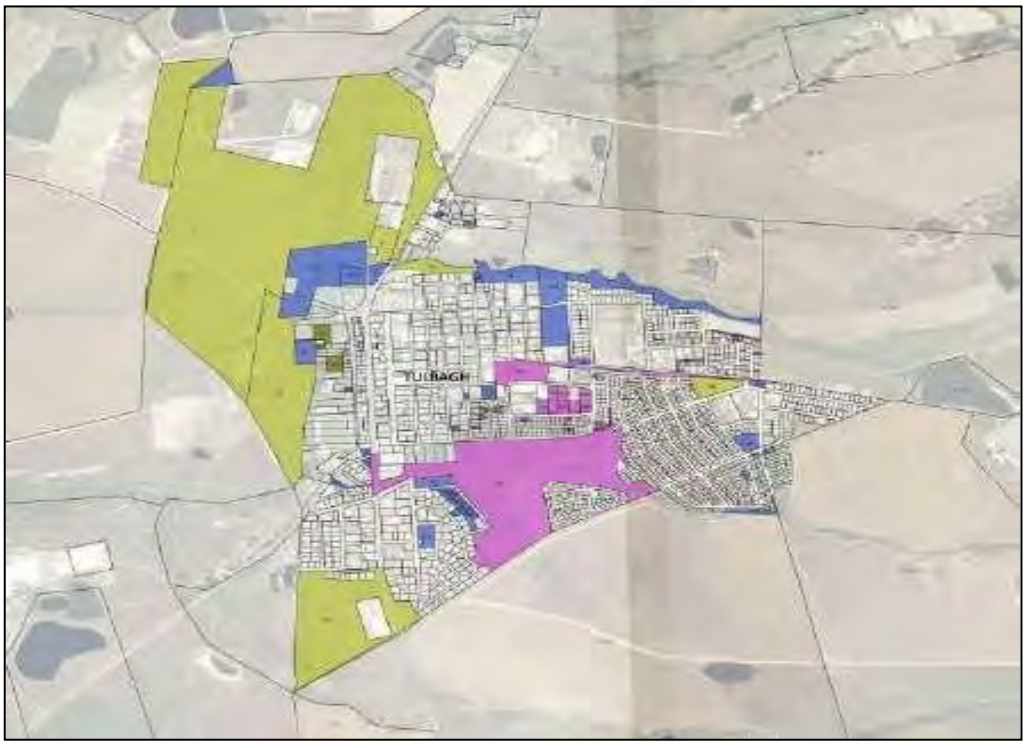

Figure 3-3: Tulbagh

Figure 3-4: Wolesley

Figure 3-5: Prince Alfred Hamlet

Figure 3-6: Op-die-Berg

The following maps indicate the locations and extent of the proposed housing developments planned in the Witzenberg Local Municipality as detailed in the new MSDF (April 2020):

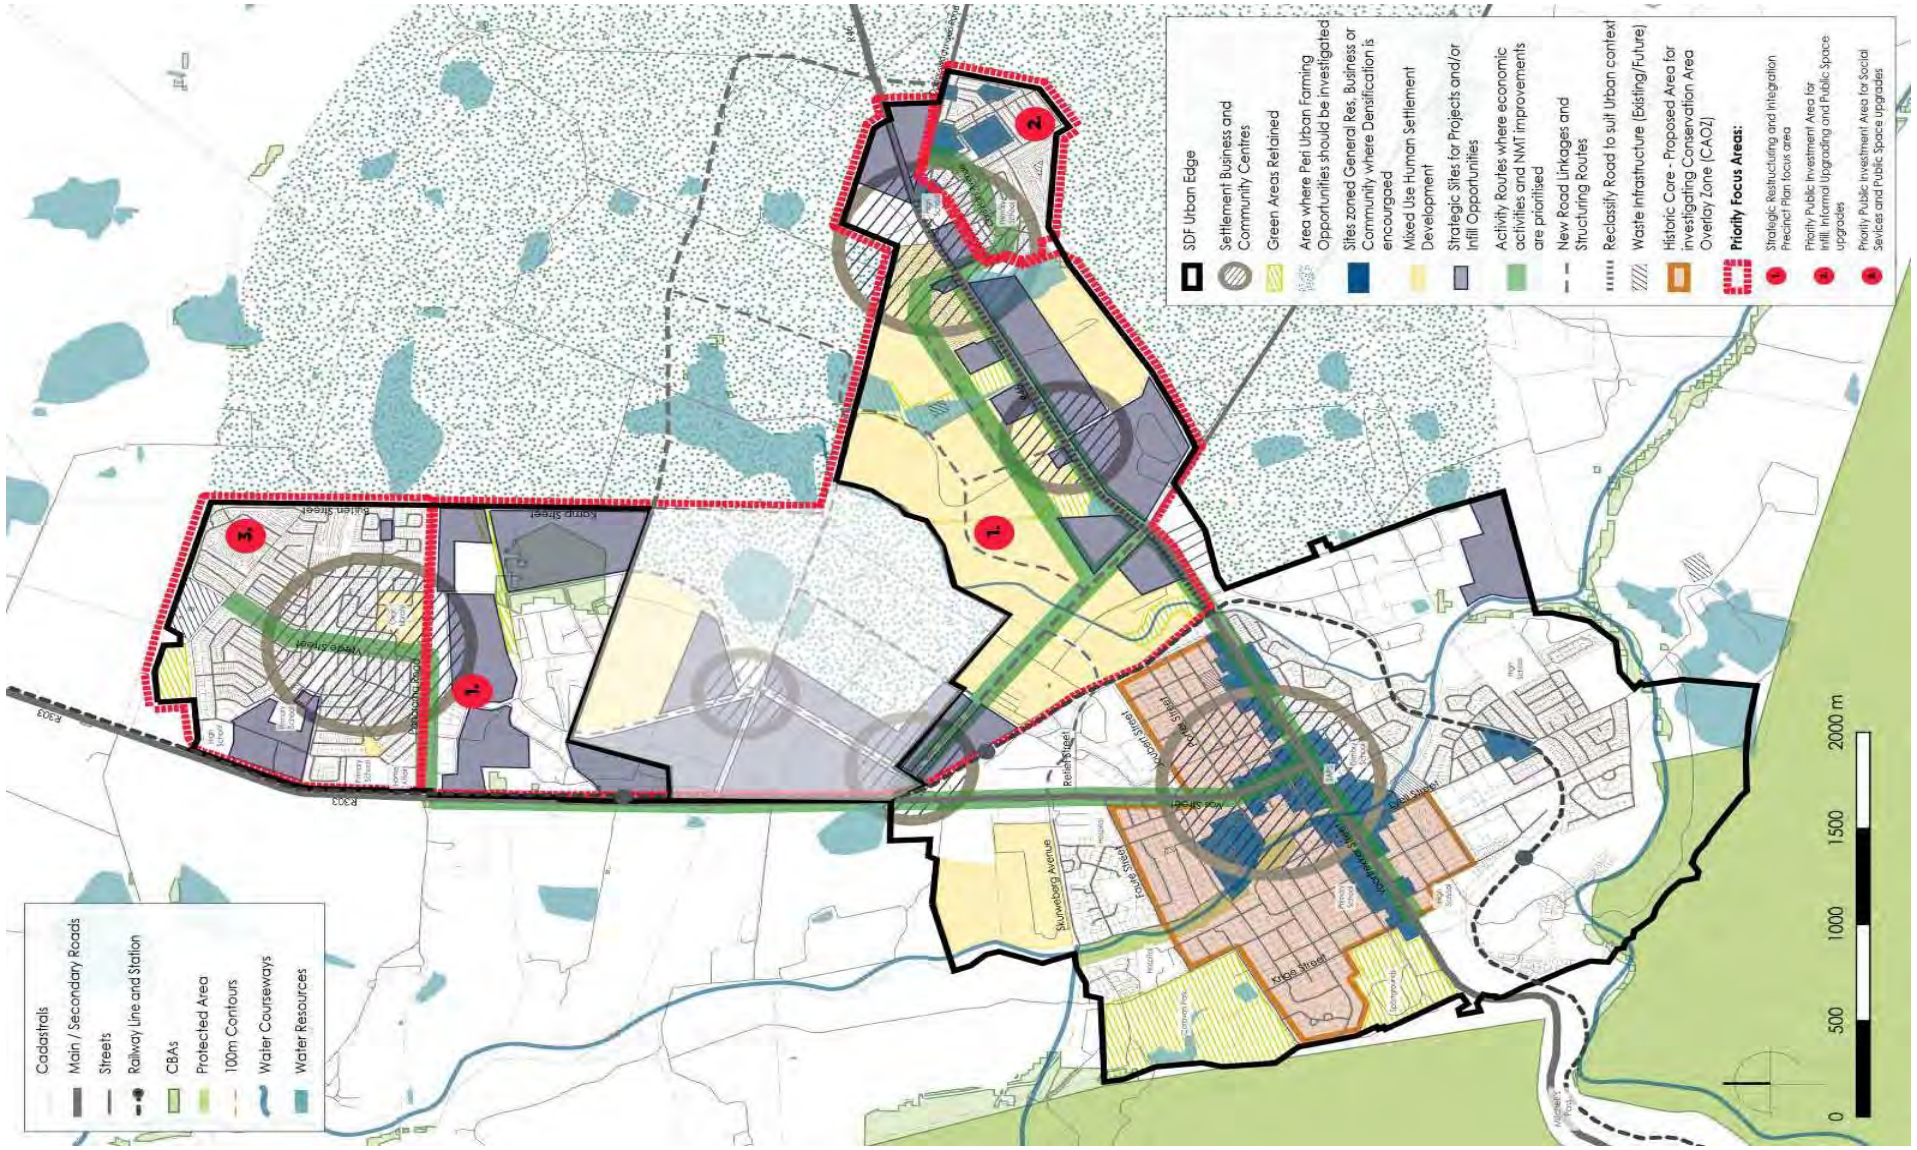

Figure 3-7: Ceres Development Framework

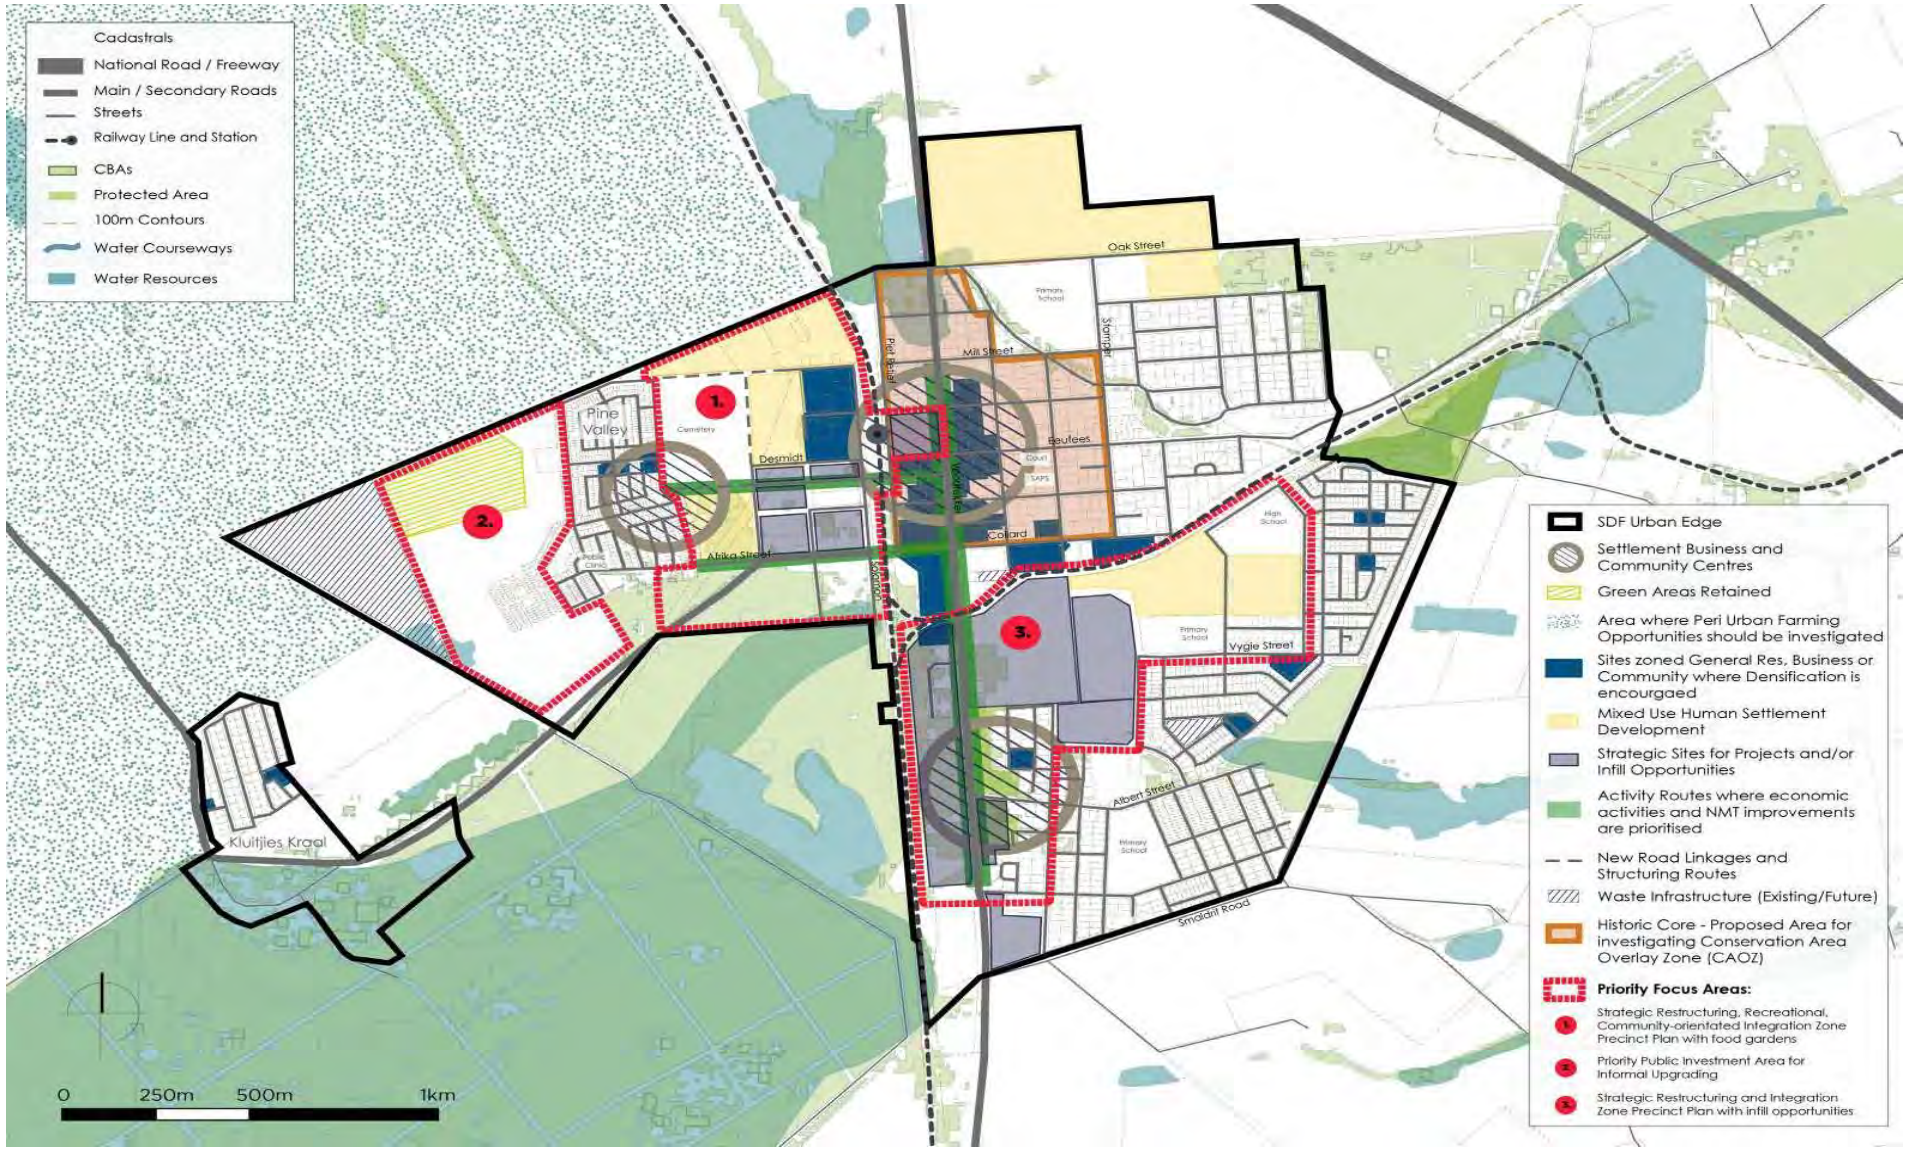

Figure 3-8: Wolesley Development Framework

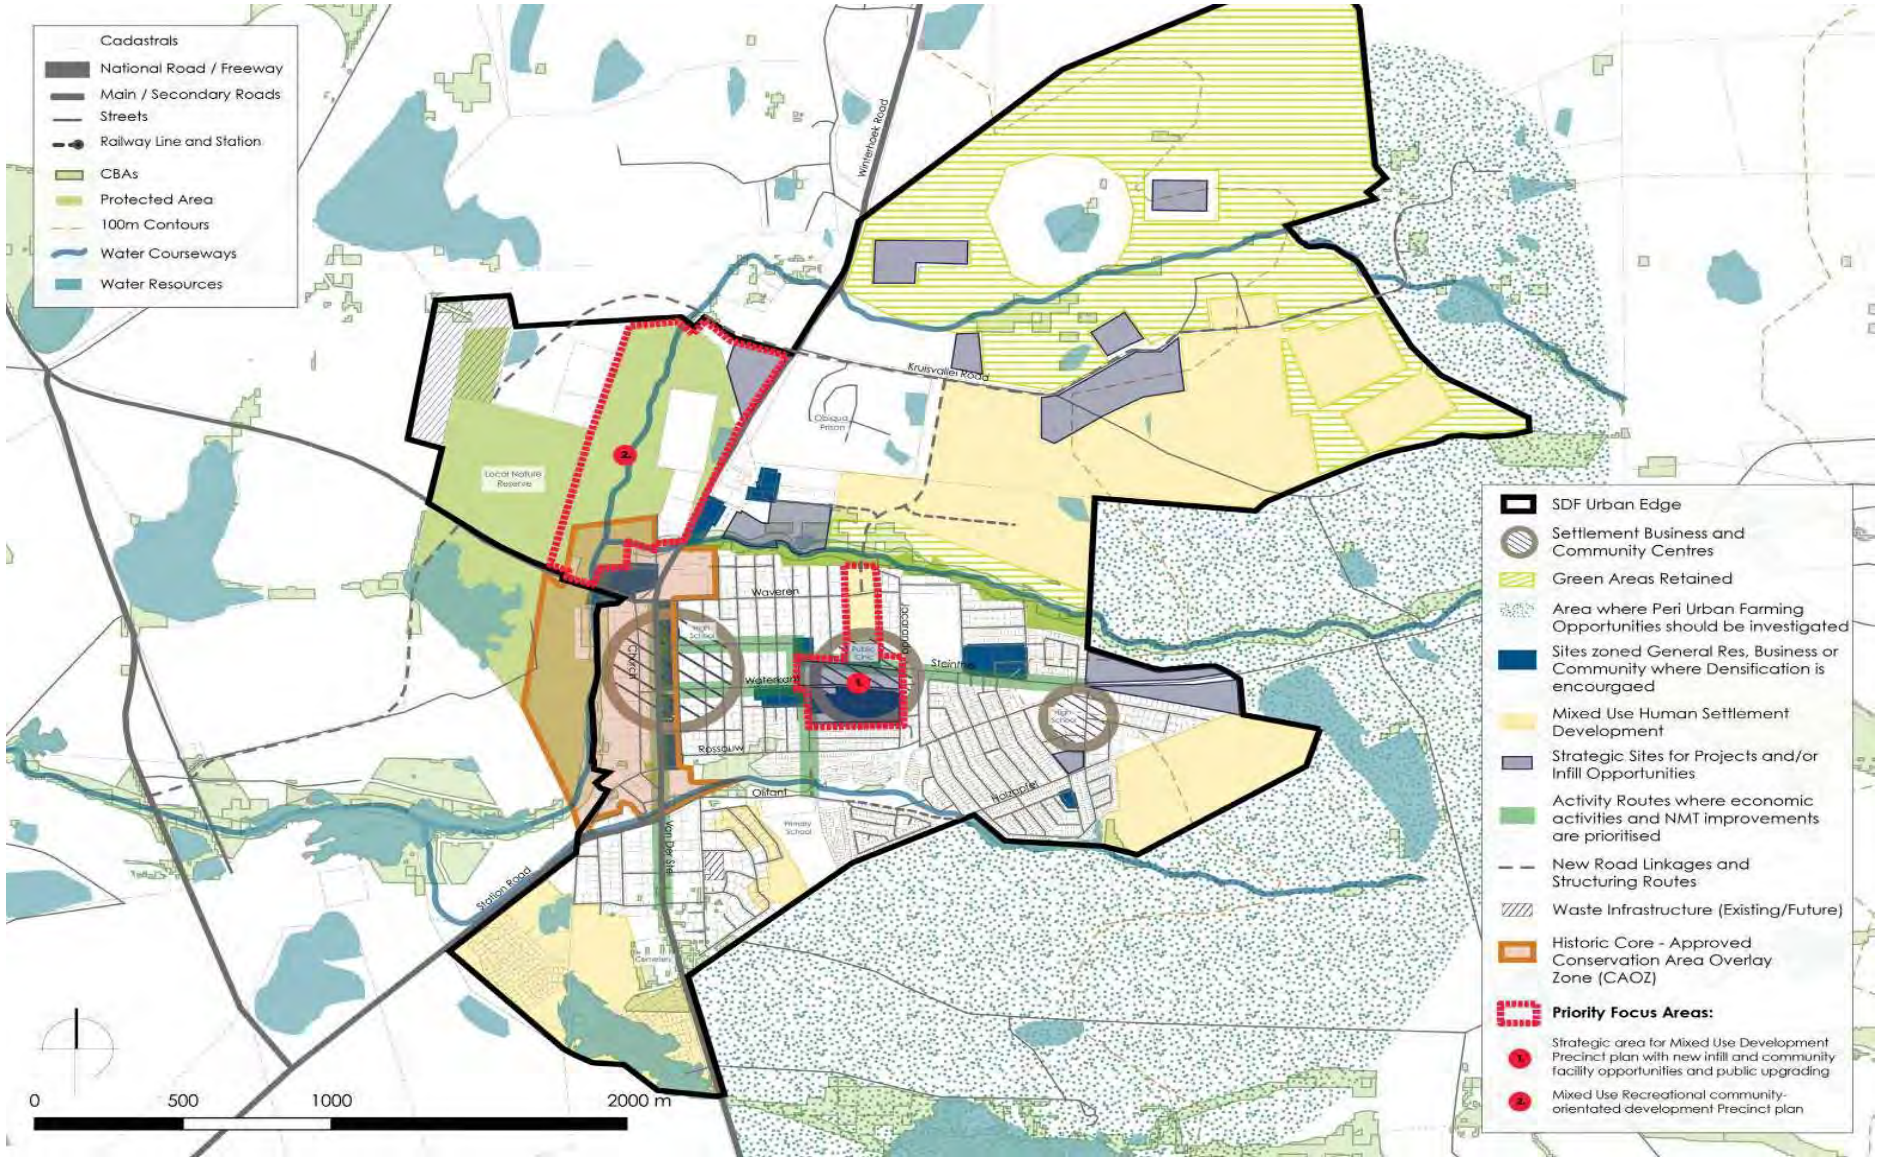

Figure 3-9: Tulbagh Development Framework

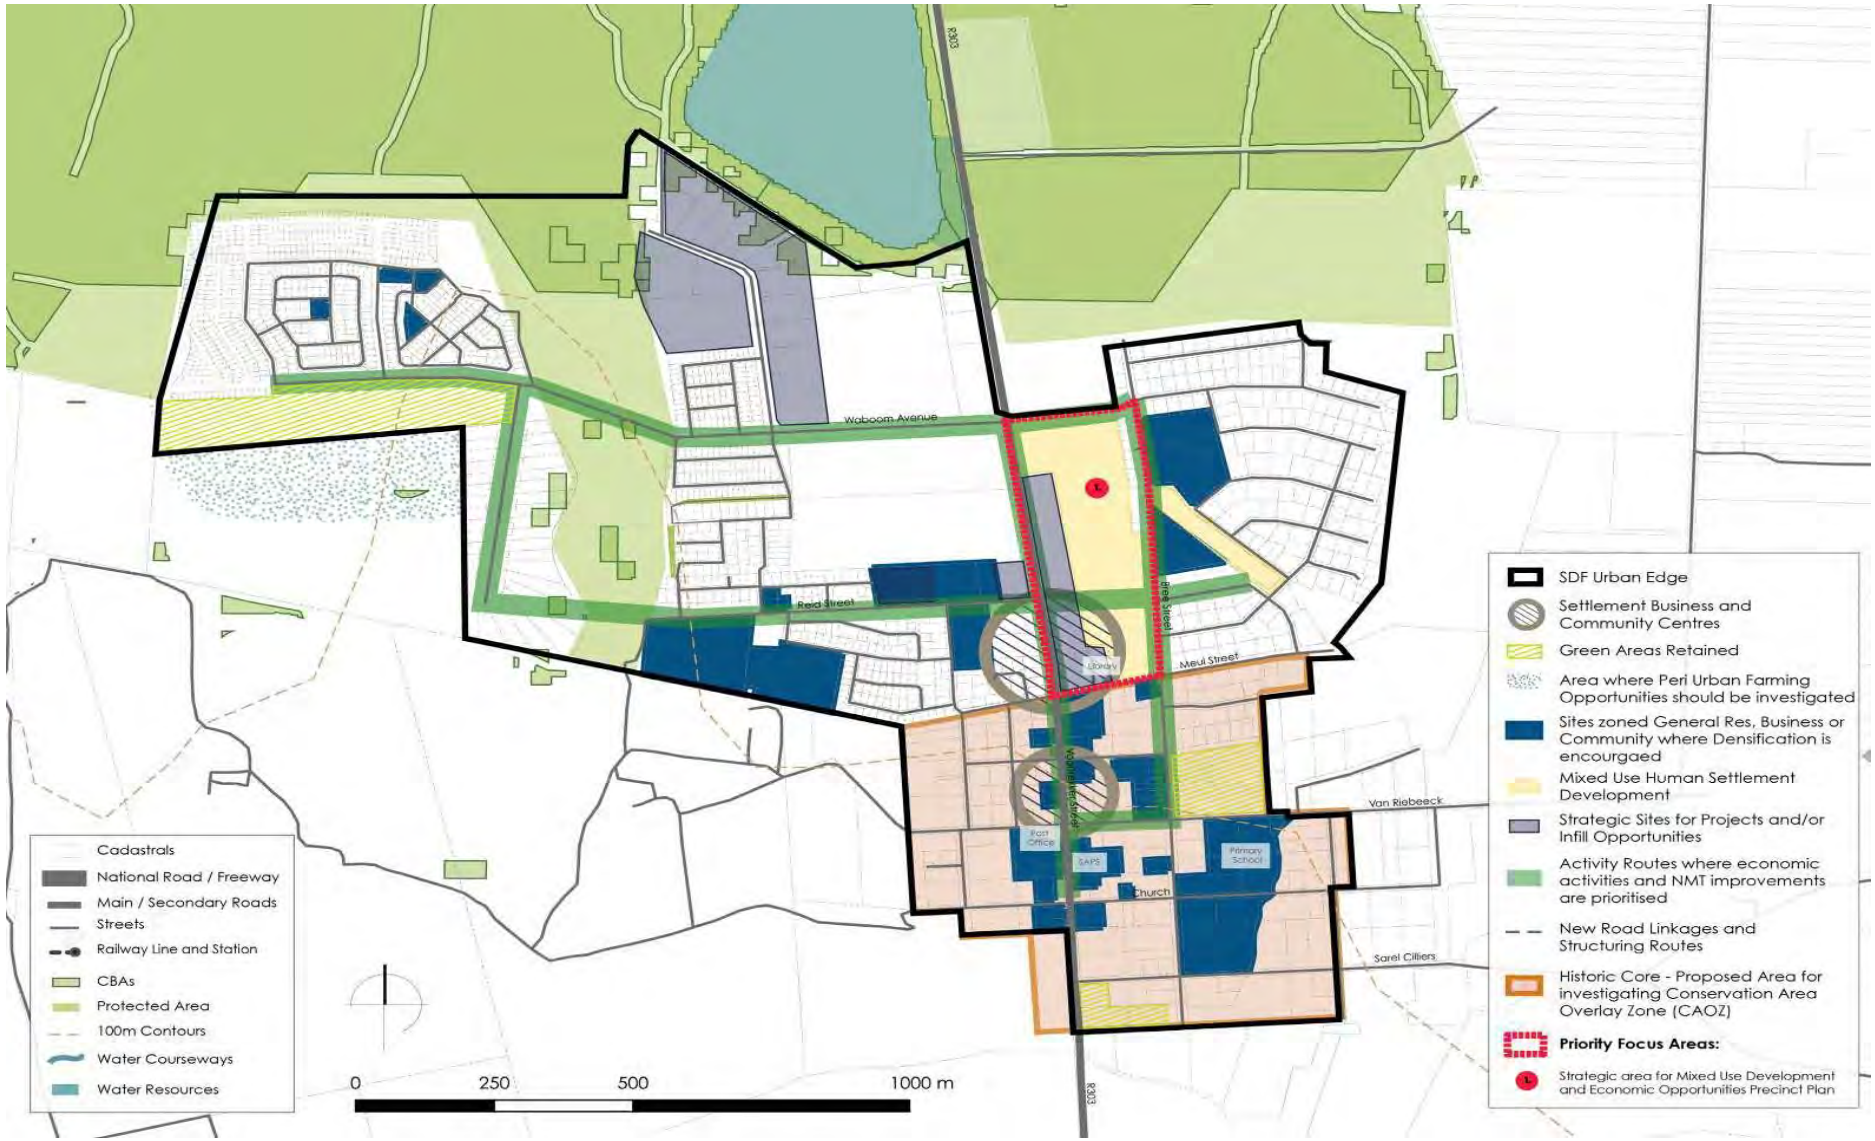

Figure 3-10: Prince Alfred Hamlet Development Framework

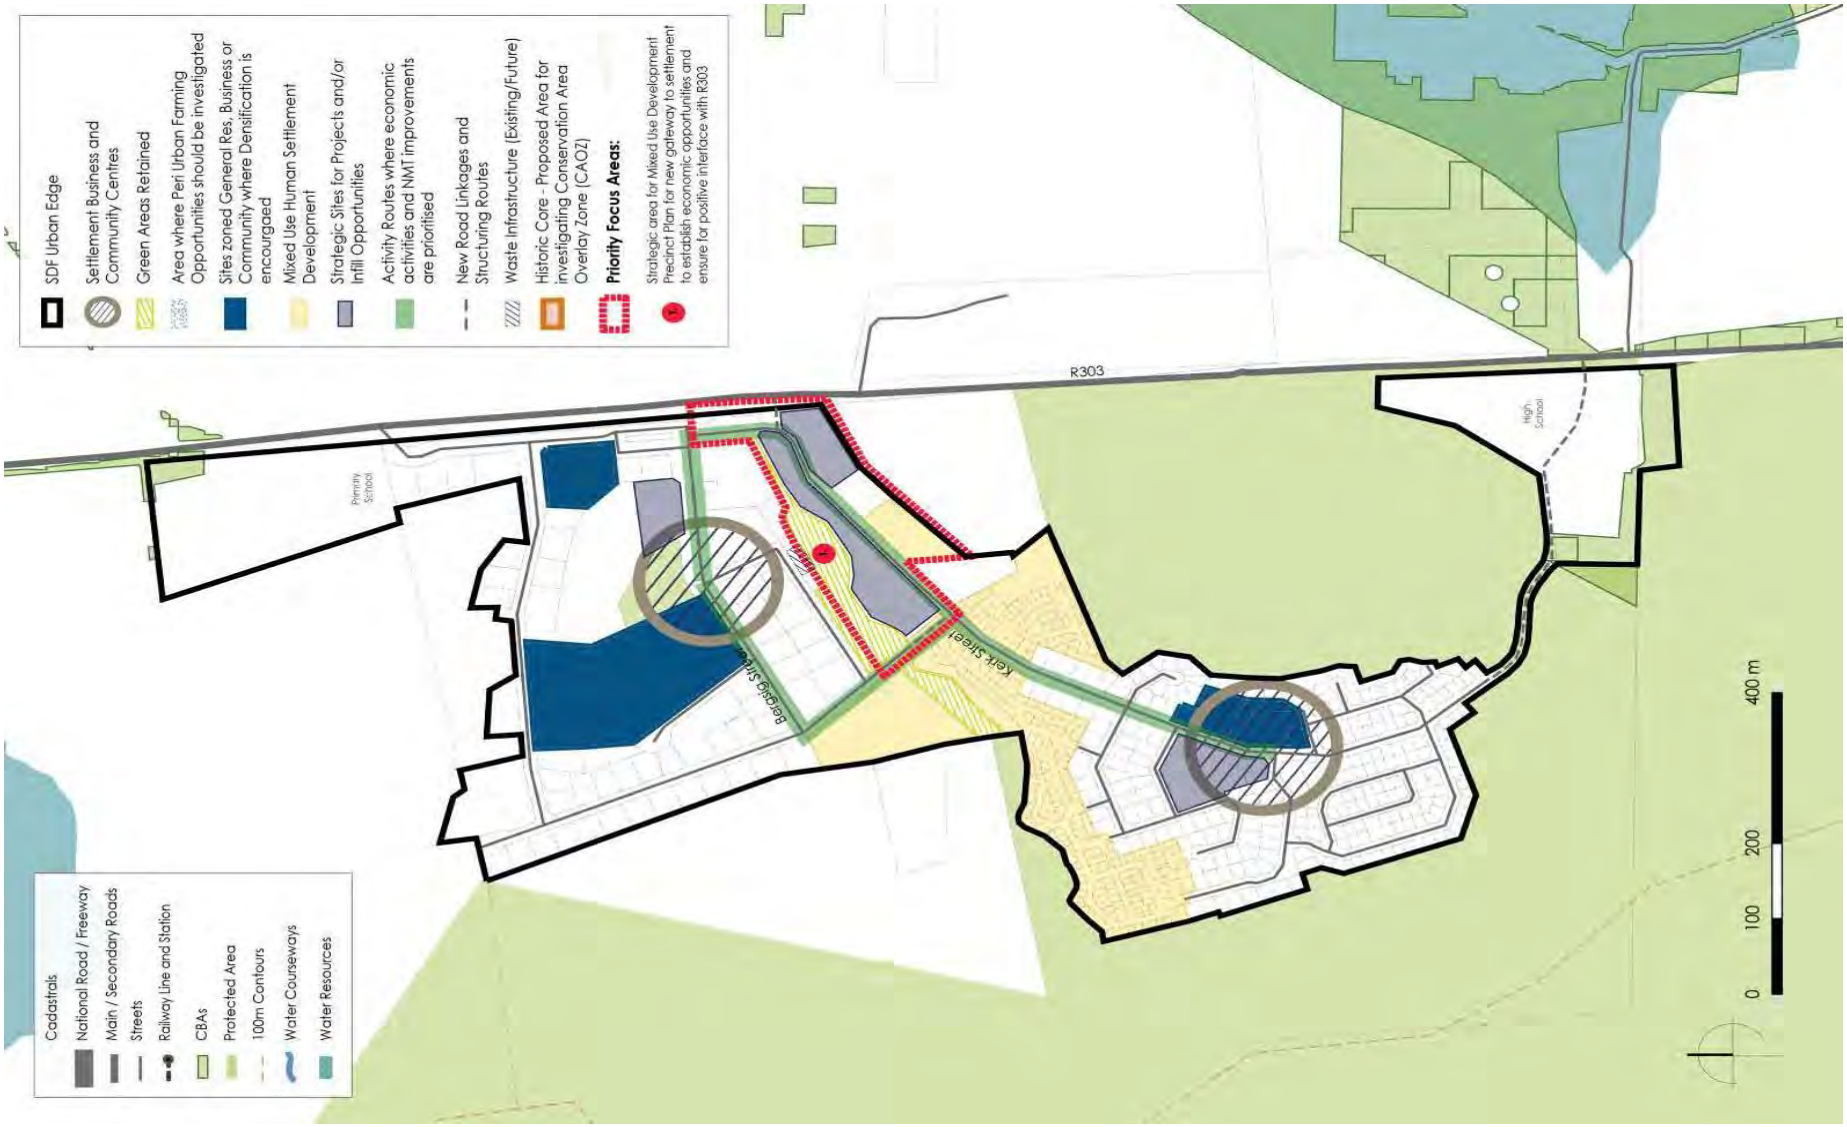

Figure 3-11: Op-die-Berg Development Framework

The road and transport implications of the proposed developments are summarised below:

- Ceres: Three areas are envisaged for concerted, priority intervention:
  - The areas between Ceres, Bella Vista, Vredebes, and Nduli earmarked for strategic restructuring, integration and significant future development.
  - Ongoing informal settlement upgrading in Nduli, including the upgrade of public space and increased commercial opportunity on the R46.
  - The upgrading of public space in Bella Vista.

- Ceres: The most critical new routes are envisaged in the area between Ceres, Bella Vista, Vredebes, and Nduli. These routes should integrate the area with surrounding opportunity and enable maximum exposure of the area for settlement and economic development. Activity routes carry the most significant movement of vehicles and people and should be prioritised for the intensification of economic opportunity, NMT improvements, and landscaping. The R303 and R46 are the most significant routes, with the opportunity to establish new activity routes linking communities and activity in the area between Ceres, Bella Vista, Vredebes, and Nduli. R303 and R46 are currently prioritised for NMT improvements.

- Wolesley: Three areas are envisaged for concerted, priority intervention:
  - The area south of the rail line in the vicinity of Voortrekker Road contains substantial tracks of well-located underdeveloped and undeveloped land.
  - Strategic infill in the area between Pine Valley to the west and the rail line to the east.
  - Upgrading and infill development in Pine Valley.

- Wolesley: Strategic crossings of the railway line must be investigated to improve pedestrian permeability and access through the town. New routes are identified around the areas identified for strategic infill and development to create more accessible movement patterns. Activity routes carry the most significant movement of vehicles and people and should be prioritised for the intensification of economic opportunity, NMT improvements, and landscaping. The most significant route requiring reinforcement with development is the connection between Pine Valley and Voortrekker Road.

- Tulbagh: The area envisaged for concerted, priority intervention is situated north of the river and town's current built edge. Opportunity for further housing and mixed-use development exists, with due consideration to making a positive edge to built development and sensitive river edge.

- Tulbagh: Routes to be emphasised for upgrading are Market Street, Waterkant Street and Steinthal Street, all linked to Van der Stel/ Church Street.

- Prince Alfred Hamlet: The area envisaged for concerted, priority intervention is bounden by Voortrekker Road, Mill Street, Bree Street, and Olienhout Avenue possible expanded to include the area bounded by Voortrekker Road north of Olienhout Street. Locationally, it is ideally situated for higher density housing and associated public facilities.

- Prince Alfred Hamlet: Should the area bounded by Voortrekker Road, Mill Street, Bree Street, and Olienhout Avenue be developed, consideration should be given to linking Reif Street and Hugo Street. The most important streets remain Voortrekker Road and Olienhout Avenue.

- Op-die-Berg: The area between Kerk Street and development to the north could be explored in more detailed planning.

It is very important to take cognisance of these developments in the LITP as new urban areas must be integrated with the existing roads network and new public transport infrastructure and operations need to be planned and budgeted for.

3.1.3 Economic Sectors linking into community development

3.1.3.1 Local economic development/ business sector

	SECTOR	GDPR: Trend 2015 – 2019	GDPR: Real GDPR growth 2020e	Employment: Average annual change 2015 – 2019	Employment: Net change 2020e
PS	**Primary Sector**	**-3.1%**	**12.2%**	**413**	**-786**
	Agriculture, forestry & fishing	-3.1%	12.3%	413	-785
	Mining & quarrying	3.2%	-15.5%	0	-1
SS	**Secondary Sector**	**2.4%**	**-11.4%**	**214**	**-672**
	Manufacturing	2.2%	-8.9%	67	-199
	Electricity, gas & water	1.5%	-4.9%	8	-3
	Construction	3.0%	-19.1%	139	-470
TS	**Tertiary Sector**	**3.8%**	**-3.4%**	**1 459**	**-1 354**
	Wholesale & retail trade, catering & accommodation	2.9%	-9.0%	606	-648
	Transport, storage & communication	2.2%	-11.9%	60	-54
	Finance, insurance, real estate & business services	5.7%	-0.5%	314	-215
	General government	2.6%	2.6%	157	186
	Community, social & personal services	3.7%	-0.5%	323	-623
	Total Witzenberg	**2.2%**	**-2.9%**	**2 087**	**-2 812**

Figure 3-12: Witzenberg GDPR and employment performance per sector, 2020

The Witzenberg municipal area achieved an average growth rate of 2.2 per cent between 2015 and 2019. The tertiary sector had the highest average growth rate (3.8 per cent) during this period, followed by the secondary sector (2.4 per cent). The primary sector had a contraction of 3.1 per cent owing to the contraction in the agriculture sector. The contraction can be atributed to the drought experienced in the region, as well as low commodity prices. The finance sector and community services sector drove GDPR growth in the municipal area between 2015 and 2019, with average annual growth rates greater than the local average. Although the mining sector achieved a noteworthy growth rate of 3.2 per cent in 2019, this sector's contribution to the overall GDPR is very small and is unlikely to contribute substantially to the region's economy.

The estimates for the Witzenberg municipal area in 2020 show that the economy contracted by 2.9 per cent. The large contraction of 9.0 per cent for the municipal area's largest economic sector, trade, impacted the total economy significantly. The contraction in this sector can be related to the decline in the tourism industry owing to the travel restrictions and lockdowns imposed by COVID-19.

With limited movements and less use of transport facilities for both personal and business purposes, the transport sector was also negatively impacted by the lockdown restrictions and contracted by 11.9 per cent. The agriculture sector is estimated to have had a significant increase of 12.3 per cent in 2020. The agriculture sector's strong performance helped the total municipal area's economy not to contract as significantly as anticipated in 2020. The main commodities in the municipal area are wheat, apples and pears. The growth in this sector is related to the price increase in wheat owing to the high exchange rate in 2020.

Apples and pears are two of the top five most popular fruits in the country, and consumption is expected to increase by 25.0 per cent in the next decade. This will have a positive impact on purchasing power for local consumption, resulting in positive growth.

In terms of employment, the Witzenberg municipal area created an average of 2 087 jobs per annum between 2015 and 2019. Employment creation was mainly driven by employment opportunities in the tertiary sector, which experienced an average annual increase of 1 459 jobs during this period. Between 2015 and 2019, the primary and secondary sectors experienced an annual average increase of 413 and 214 jobs respectively. The largest growth experienced for individual sectors was in the trade sector (606 jobs), followed by the agriculture sector with 413 jobs.

The municipal area is estimated to have lost 2 812 jobs in 2020 owing to the significant impact of COVID-19 on the local economy. Most of the jobs lost were in the tertiary sector (1 354 jobs), with the trade sector shedding 648 jobs. The agriculture sector is estimated to have contracted by 785 jobs, the largest portion of the total number of jobs lost within the municipal area. The potential explanation for the decline in jobs despite the positive economic growth is that agriculture employment could be related to endogenous labour. Some agricultural operations have been affected by the COVID-19 regulations, for example the wine industry was not able to operate under level five regulations. The other possible explanation is that the increase of the minimum wage from R18.68 to R21.69 per hour might have driven job losses in the sector. Also, Witzenberg's importance as a functional region within the broader agricultural space economy and its role as a primary regional service center has been recognized through the identification of a possible Agri-park in Ceres. Through the Cape Winelands Rural Development Plan, opportunities for subsistence farmers to benefit and participate more actively in this sector are being unlocked.

3.1.3.2 Tourism sector

Witzenberg Municipality manages local tourism in the form of a service level agreement (SLA) with three local tourism organisations, which conduct marketing of the municipal area and local established businesses in order to draw investment and trade to the area.

Local businesses join as members of the local tourism authorities to participate in the marketing initiative. Membership holds businesses accountable to ethical norms and standards for the industry, and to a code of conduct. Tourism aims to market Witzenberg Municipality as an affordable holiday destination with activities for the entire family. Tourism liaises with district, provincial and national stakeholders to develop the Witzenberg brand through the atraction of tourists, awareness campaigns, roadshows, expos, events and festivals.

Tourism further aims to train and skill local entrepreneurs to meet tourism-related demands, and provide the requisite services and products necessary to promote local trade and economic development.

Their functions include:

- Marketing the area, events and activities.
- Creating opportunities for transformation, niching, diversification and support of new stakeholders.
- Ensuring that tourism development remains on trend.
- Promotion and development of Accessible Tourism.
- To enlist new members and plan for the growth of both operations and market.

As per the SLA with Witzenberg Tourism, which is an external entity to Witzenberg Municipality, they have the following strategic priorities:

- Promotion of our towns as travel destinations and as film and photoshoot locations (with attractive scenes in farm and desert areas,mountains, snow and skylines).
- Promotion and protection of the local towns, events and the municipal brand.
- Promotion of conservation and Green Tourism.
- Provision of statistical research and data outputs.
- Promotion of Agri-Tourism.
- The growth and expansion of tourism.

Witzenberg Tourism runs educational packages with schools, front of house staff, and local stores to promote clientele service. The entity also sources courses such as first aid training, communication, administration and hospitality to help local businesses improve their output and skill levels.

Part of the municipality's agreement with Witzenberg Tourism is to expand the broad demographic of tourism to encompass culture, heritage, diversity and transformation. We aim to develop two new travel routes within Witzenberg to promote social cohesion as well as introduce formal trade to township and rural areas.

Witzenberg Tourism has produced tear-off maps which are distributed to points of sale with high traffic, providing location and contact details of local tourist atractions. They have also produced a joint brochure called the Witzenberg Meander, covering activities throughout the municipality. Tourism bureaus for Wolseley, Ceres and Tulbagh also created their own brochures with niche marketing of their sectors in conjunction with social media promotion through Facebook and websites.

Witzenberg Tourism has been successful in marketing the destination to visitors within South Africa as an affordable and picturesque location for weddings, snow tourism, heritage tourism, agri-tourism, wine tourism, adventure tourism, cultural tourism, sports tourism and rural tourism.

3.1.3.3 Small, micro and medium enterprises

Most current economic research data indicate that SMMEs play major role in creation of jobs at a local level. The Witzenberg SMME sector has been organised into an active business forum that meets regularly to develop new projects and shares business challenges. The municipality has organised a number of training sessions with this sector around mentoring and coaching, business skills, business plan writing, budgeting and financial planning etc. These programmes were organised through the Red Door, IDT, Seda, Provincial Economic Unit, DTI etc. These programmes will be expanded and specific attention will be given to the promotion of this sector through the municipal procurement supply chain.

Local contractors were capacitated with contractor development training, as well as Western Cape Department Supply Chain workshops, where they could also access information on SARS and the Construction Industry Development Board (CIDB). Mentoring projects for contractors are planned for the new financial year.

Arts and crafts entrepreneurs were capacitated with tourism awareness training and creativity workshops. Entrepreneurs were also connected with organisations in Cape Town such as the Cape Craft Development Institute (CCDI), where they were assisted with business services and product enhancement. Access to markets were provided to entrepreneurs by means of an arts and crafts expo and craft market.

A Tulbagh arts and crafts programme were also launched for youth in Tulbagh where training in products such as recycling, painting and mosaic were conducted by a local entrepreneur, thereby also empowering local artists to impart their skill. The youth were also connected with festivals where they could sell their products to tourists.

Tourism projects planned for the new financial year include increased efforts for entrepreneurs to access markets and business capacity building.

3.1.3.4 Agricultural sector

Focus: Protect food security while supporting sustainable diversification of the agricultural sector.

Key Development Implications:

- Support private sector led institutional arrangements to enable joint planning and development of agriculture related activities.
- Avoid the subdivision of agricultural land or changes in land-use to minimise the loss of agricultural activities, while also avoiding the creation of uneconomical agricultural units.
- Enable the diversification of farmer income through enabling complimentary uses on farms in a manner which does not discourage more efficient methods and models and detract from the functionality and integrity of farming areas and landscapes.
- Develop incentives for smarter/ green agricultural practices and technologies.
- Make municipal commonages and land on the edges of settlements close to communities available for small/ emerging farmers and/or community gardens.
- Support alternative farming models, such as the possibility of transforming unused and uncontaminated industrial land into community gardens.
- Support private initiatives to provide in the housing needs of agri-workers and the provision and management of associated social services.

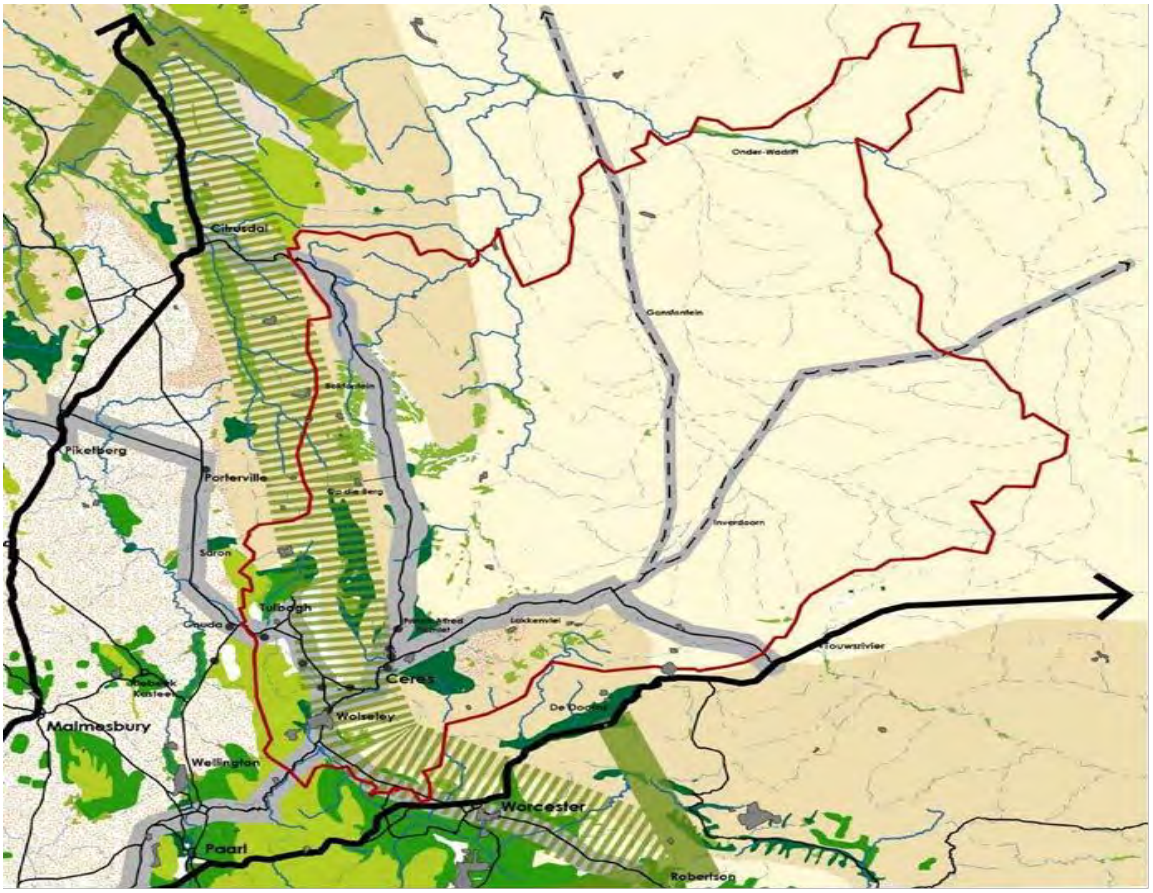

Figure 3-13: Agricultural concept for Witzenberg showing key farming areas and supporting infrastructure.

1. Primary Economic industries:
   - i. Deciduous: Apples, Pears, Nectarines, Peaches, Plums, Apricots
   - ii. Onions
   - iii. Potatoes
   - iv. Cattle and sheep
   - v. Butternuts
   - vi. Wheat
   - vii. Forestry
   - viii. Horses
2. Secondary Economic industries:
   - i. Cold storage
   - ii. Packing houses
   - iii. Concentrates and Puree
   - iv. Single Strength Products
   - v. Dried fruit products
   - vi. Logistics

vii. Agri Chemical

viii. Agri Mechanical

ix. Technical, admin and financial services

x. Plant material (nurseries)

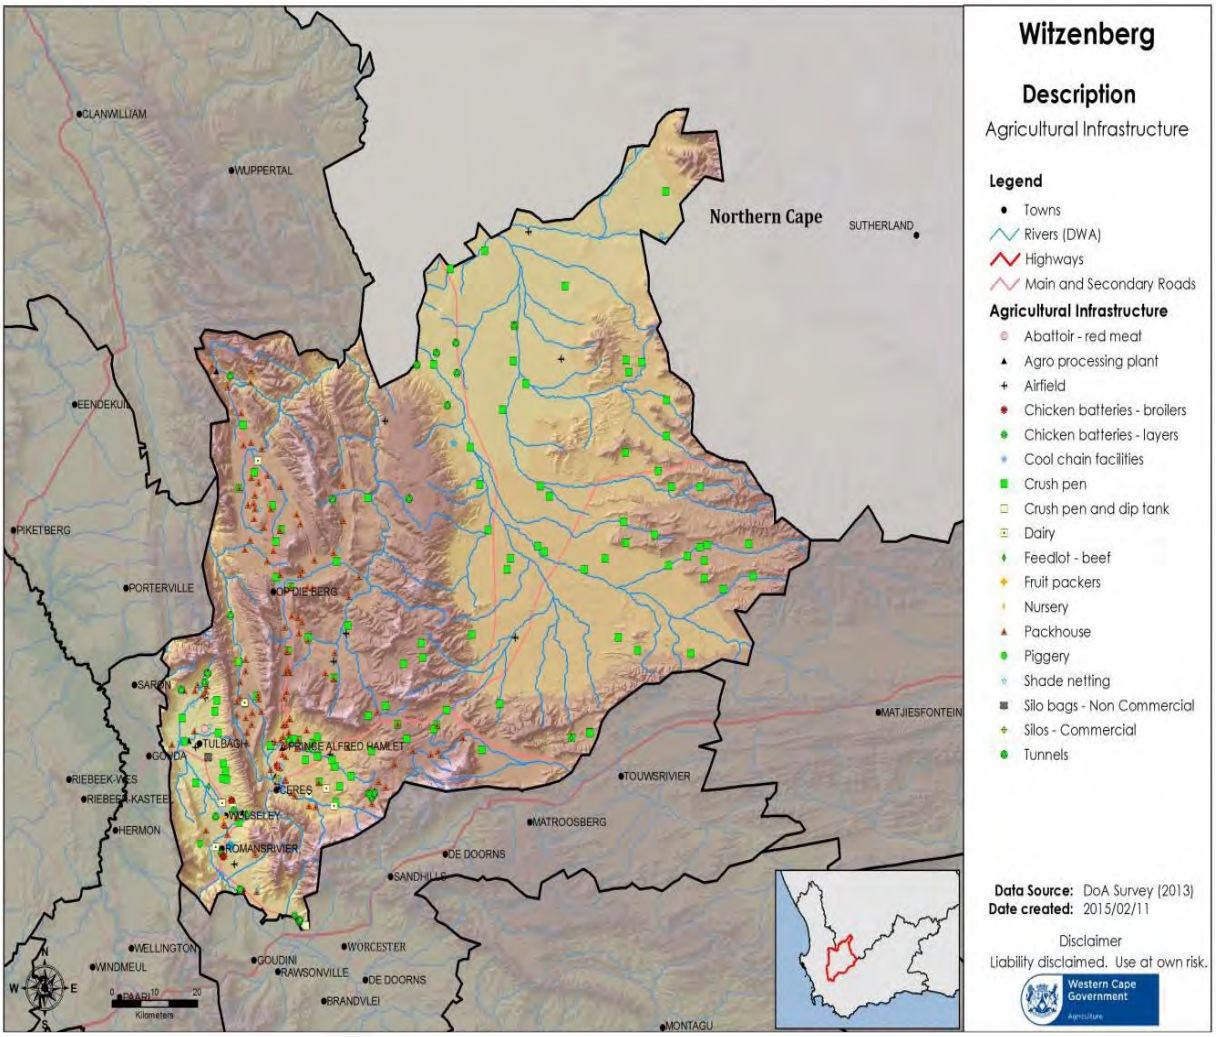

Figure 3-14: Agricultural infrastructure

In the IDP (March 2022) it is stated that agriculture in the Witzenberg Area anticipates a growth per year for next five years – Primary: 5% - 8% ±, Secondary and Processing: 10% ±. This has certainly got specific implications for the freight and ultimately road infrastructure provision in the Witzenberg Local Municipality as is detailed in the Table 3-1.

Table 3-1: Specific implication for freight and road infrasture provision in WItzenberg Local Municipality

Factors influencing anticipated 5% - 8% growth per year for next five years
1. *Water*
  i. *Permits*
2. *World Economy – exports*
  i. *Exchange rates*
  ii. *Economic growth, specially Africa*
  iii. *New markets*
  iv. *Market access*
  v. *Access to affordable finance*
3. *Climate change – expect more records!*
4. *Switching to higher income product lines*
  i. *Vineyards to pears and plums*
  ii. *Apples to cherries and berries*
5. *Mechanisation*
6. *Stable and effective government*
7. *Consolidation of Agri businesses*
8. *Research and Development*
  i. *New cultivars*
  ii. *Internet of things*
	Exciting new Agri opportunities may stimulate extra growth
	1. *Agriculture in Western Cape is high priority – and well positioned*
	  i. *Right products*
	  ii. *Good location*
	  iii. *Investor confidence*
	  iv. *Expect government support*
	2. *New technology*
	  i. *Faster breeding of better products*
	  ii. *New growing techniques*
	  iii. *Use of IT and Apps*
	  iv. *Internet of things*
	3. *Covered production*
	  i. *Security for investor and supply chain*
	  ii. *Sunburn and hail*
	4. *PALS initiative – a community in harmony*
	  i. *Strategic high importance*
	  ii. *Support from the state*
	  iii. *Transformation through growth*
	  iv. *Turnaround of under-performing schemes*
	  v. *Working together with the municipality: "a comprehensive rural development desk" – a shared vision*

Main factors that put anticipated growth at risk
1. *Electricity: Stability of network and access for new projects*
2. *Infrastructure*
  i. *Roads for sensitive high value products – plan for increase flow!*
  ii. *Maintenance of existing irrigation schemes*
  iii. *New irrigation schemes*
3. *Labour/civil unrest*
  i. *Services – Specially waste management and risk to health and contamination*
  ii. *Housing for agriculture workers - NB*
  iii. *Code of best practice*
4. *Training and development of labour*
  i. *Productivity levels*
  ii. *Minimum wage*
  iii. *Working smarter with new equipment and new products*
5. *Too much red tape and slow processes dealing with authorities*
6. *Thread to Land as security*
7. *Investor confidence*	

4 Chapter 4: Transport Improvement Proposals

4.1 Project Proposals from the IDP

A number of key capital projects have been funded for the financial years between 2021 and 2024. These projects are listed in Table 4-1 and are reflected in the IDP:

Table 4-1: IDP Projects

Infrastructure Investment			
Project Name	***Area***	***Budget***	***Year***
Upgrade Van Breda bridge	***Ceres***	***R50m***	***2021/2022, 2022/2023***
Pedestrian Sidewalks Rooikamp	***Ceres***	***R0.5m***	***2022/2023***
Nduli Infill Internal Roads	***Vredebes***	***R2.82m***	***2022/2023***
Nduli Infill Internal Storm water	***Vredebes***	***R2.82m***	***2022/2023***

4.2 Projects Identified through IDP Needs Assessment

The needs identified during the community needs assessment mainly focus on the upgrading of existing roads, improvement of NMT facilities and traffic calming as captured below:

Table 4-2: IDP Stakeholder Projects

Ward	Priority Description	Department
1&12	Provide street/security lights in unsafe areas.	Engineering Services
1&12	Safe "walk way" / bridge between Nduli and Vredebes	Community Services / Engineering Services
1&12	Mini CBD to be developed in Nduli	Engineering Services
1&12	Combat erosion on sidewalks and streets (rehabilitation)	Community Services / Engineering Services
1&12	Maintenance of roads	Engineering Services
1&12	Information signage along gravel roads in Tankwa	District Municipality
1&12	Rest areas on rural roads, maintenance, district to stop cutting down trees	District Municipality
1&12	District Municipality to rehabilitate rest areas along farming main routes	District Municipality
2&7	Drop-off and pick-up points at die Bossie, as you enter Wolseley	Engineering Services
2&7	Upgrading of the Wolseley entrance landscape/signage	Engineering Services
2&7	Taxi rank placements to be investigated	Community Services
3&5	Better/more speed calming efforts	Engineering Services
3&5	Street signage to be upgraded	Community Services
3&5	Mainmast light/ high-beam floodlights to be installed at parks and walk way areas	Engineering Services
3&5	Sidewalks to be tarred or paved	Engineering Services
3&5	Walkway bridge over railway line dilapidated and unsafe	Engineering Services

Ward	Priority Description	Department
3&5	Owen Street unsafe due to poor street lighting	Engineering Services
3&5	Owen Street walkway to be developed, as this has become a main taxi route, unsafe for pedestrians	Engineering Services
3&5	Walkway to be developed from the nature reserve, past the pine forest	Engineering Services
3&5	Walkway and lights from Egoli to Albert Crescent behind houses	Engineering Services
3&5	Weekends the Town Main Roads have too much traffic	Engineering Services
3&5	Beter lighting needed along walkway to the Hospital	Engineering Services
3&5	Bus shelters for scholars on the outside rural roads	Community Services
4&6	Business hub/ mini-CBD for Kliprug area	Planning Department
4&6	Ongoing speed control programmes	Community Services
4&6	Business hub/ mini-CBD for Bella Vista	Planning Department
4&6	Bus and taxi shelters for scholars	Community Services
4&6	Danger of heavy vrhicle transport in Panorama St	Community Services
4&6	Off-ramp lanes at Bella Vista entrances	Engineering Services
4&6	Need a walkway around Jakaranda, Vrede Street and Mooi Uitsig School	Engineering Services
4&6	Walkway needed from Mooi Uitsig School to Vrede Street	Engineering Services
8,9&10	Bus and taxi shelters along main routes	Community Services
8,9&10	Speed calming still a problem	Engineering Services
8,9&10	There are still streets that need tarring; Grond, Bokveld Street, etc.	Engineering Services
8,9&10	Upgrading of the R303 Gydo Pass	WC Province

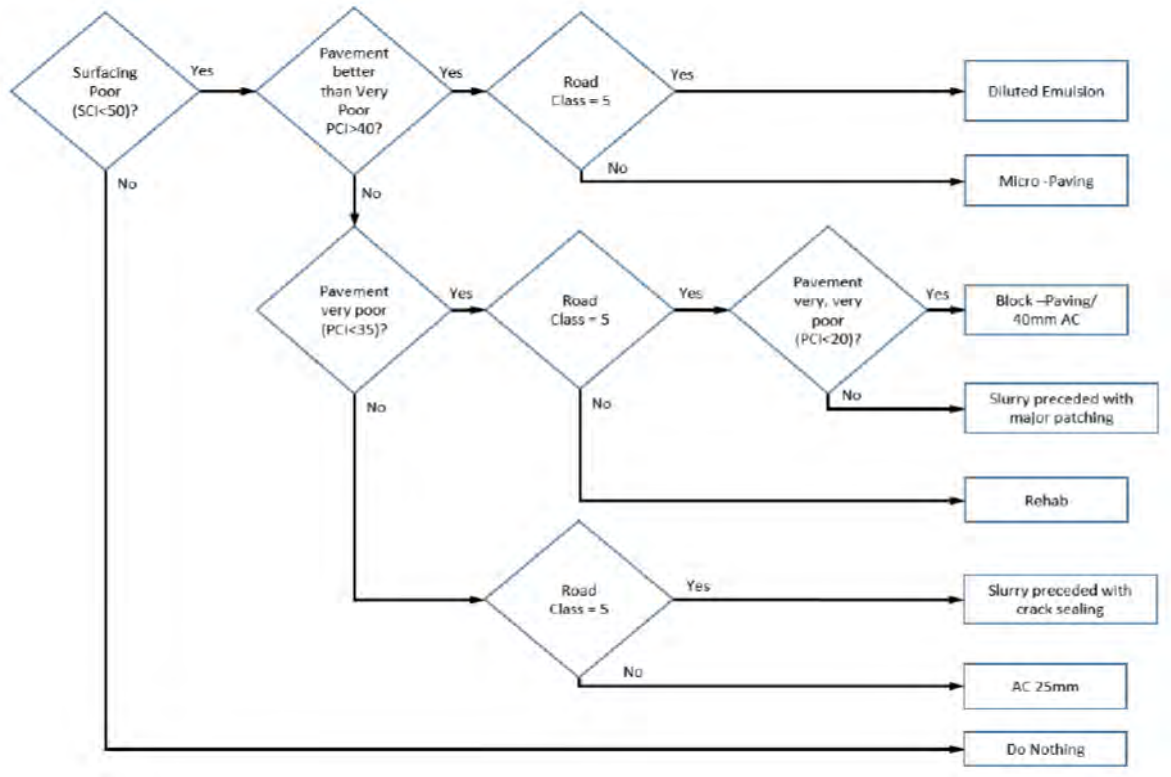
Ward	Priority Description	Department
8,9&10	No pavement curbs along main CBD routes	Engineering Services
8,9&10	Tarring of CBD open spaces and sidewalks	Engineering Services
8,9&10	Beter quality street/security lights	Engineering Services
8,9&10	Spotlights floodlights needed at walkway over the foot bridge	Engineering Services
7&11	Replacement and maintenance of roads	Engineering Services
7&11	Traffic Services for Tulbagh	Community Services
7&11	Upgrading of streetlights	Engineering Services
7&11	Storm water network in Tulbagh needs to be maintained regularly	Engineering Services
7&11	Speed calming needed along main street	Engineering Services
7&11	Walkway routes	Engineering Services
7&11	Scholar road safety to be looked at, school road/street crossings, traffic signage to be put up	Community Services

From the identified projects the following trends have been identified:

- All of the identified road maintenance and upgrading projects are to be addressed in terms of the Road Asset Management System.
- Traffic calming is a common problem in many wards and a comprehensive Traffic Calming Policy document is required for the whole of the municipality, including implementation specifications.
- NMT infrastructure is also a requirement in many wards and a comprehensive NMT Study and Policy Document needs to be compiled for the municipality.

4.3 Roads Master Plan Strategy and Plans

A treatment algorithm was prepared for the analysis of the road defects as detailed in the Roads Master Plan. This plan was devised as follows:



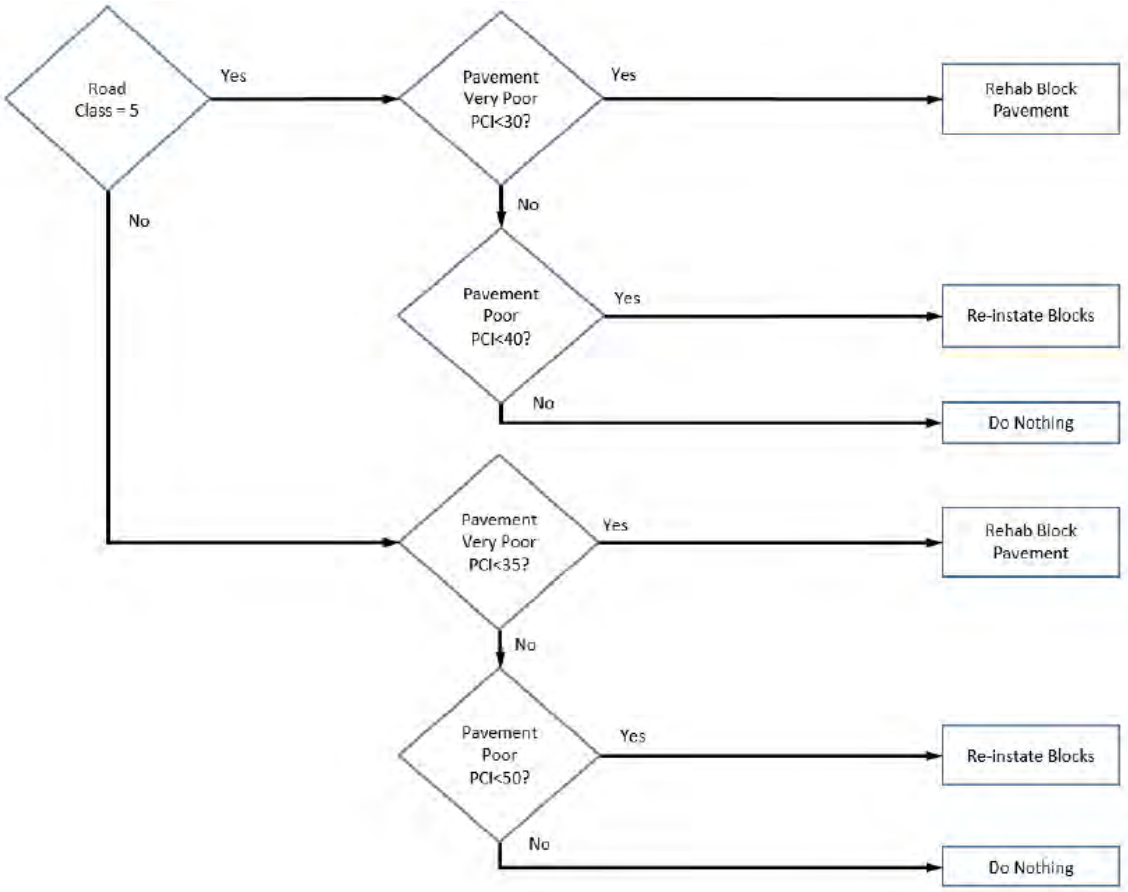


Figure 4-1 The Witzenberg Roads Master Plan projects and their costing

4.3.1 Witzenberg Precinct Plans

In the Witzenberg Roads Master Plan (2020) some very specific precinct proposals have been defined for Ceres and Tulbagh

4.3.1.1 Ceres Precinct Plan

Ceres, the biggest town in the Witzenberg Municipality. It is therefore regarded as the administrative and commercial node to the surrounding towns within Witzenberg. Ceres' spatial form is labelled as fragmented, because of its two dormitory suburbs which are located on its periphery. These suburbs are known as Bella Vista and Nduli, which are however referred to as towns within the Witzenberg Municipality context. During Apartheid, so called coloured and black people were placed in Bella Vista and Nduli respectively, resulting in the partially developed towns that they are today.

Ceres, Bella Vista and Nduli are separated by productive agriculture and high order mobility routes. The routes referred to are Vos Street (R304) and Voortrekker Street (R46). Significant through traffic (including freight traffic) is experienced through Ceres because of these higher order roads being an alternative route to the N1 from the West Coast.

Three key concepts have been identified in the Ceres CBD Transport Plan for the conceptual approach for future growth and expansion in the Greater Ceres area:

- Supporting connectivity and linkages;

Creating a sense of continuity and shared identity between Bella Vista, Nduli and Ceres. This can be achieved by continuity of the sidewalks with tree planting between the towns and all three towns having the same palette of materials for landscaping. This can be shown in the agri- processing node between Ceres and Nduli in the Figure 4-2.

Figure 4-2: Connectivity of nodes (Ceres to Nduli)

In line with the above-mentioned conceptual approach, three activity nodes are identified along Voortrekker Street, each with its own function and character. The nodes are identified as follows:

- Civic node;

Existing node situated on the intersection of Voortrekker Street and Owen Street. This mixed-use node is defined by the clustering of civic amenities and heritage buildings.

- CBD Node; and

This node currently has a wide range of retail and commercial land uses on the intersection of Voortrekker Street and Vos Street. It is envisaged that the primary transport interchange will also be situated within this node.

- Agri-processing Node

This is a proposed node on the intersection of Voortrekker Street and Retief Street. Retief Street being a direct link to the industrial area north of Ceres, a large component of agri-processing land uses is therefore proposed at this node.

The figure below shows this concept graphically:

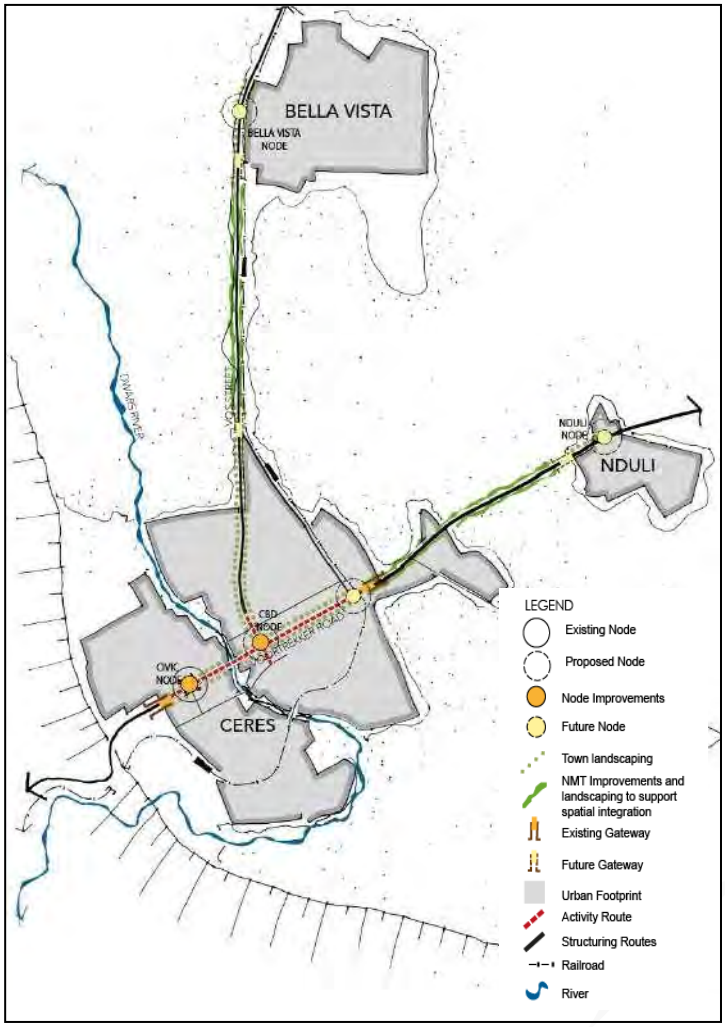

Figure 4.3: Ceres conceptual approach

Table 4-3 shows the transport plan project cost.

Table 4-3: Road Master Plan Costing

TRANSPORT PLAN FOR CERES CBD, WITZENBERG MUNICIPALITY			
High-level cost estimates of proposed projects (based on conceptual design only)			
	PROJECTS	**ESTIMATED PROJECT COSTS**	**ESTIMATED PRECINCT COSTS**
1	**Sidewalk (including cycling path) along Voortrekker Road (both sides) between Nduli and Ceres CBD, 2.5 km**		**R18 060 129,00**
1.1	Landscaping and sidewalk provision along Voortrekker Street		
1.1.1	Sidewalk (3m wide) on northern side	R5 464 800,00	
1.1.2	Sidewalk (3m wide) on southern side	R5 464 800,00	
1.1.3	Trees on Northern side	R1 805 764,50	
1.1.4	Trees on Southern side	R1 805 764,50	
1.2	Streetlighting	R345 000,00	
1.3	Signage and Road markings	R69 000,00	
2	**Intersection upgrade of Nduli access on Voortrekker Road**		**R4 374 600,00**
2.1	Assume lump sum amount	R4 140 000,00	
2.2	Landscaping	R69 000,00	
2.3	Accommodation of services	R138 000,00	
2.4	Road signs and markings	R27 600,00	
3	**Sidewalk widening along Voortrekker Road between Cilliers Street and Munnik Street, Including brick paving of Voortrekker and Vos intersection**		**R4 228 145,00**
3.1	Sidewalk widening with new kerbs and channels	R1 092 960,00	
3.2	Brick paving of Voortrekker/Vos intersection	R1 062 600,00	
3.3	Landscaping within the CBD node	R1 175 585,09	
3.4	Road signs and markings	R69 000,00	
3.5	Accommodation of services	R690 000,00	
3.6	Urban Furniture	R138 000,00	
4	**Sidewalk widening along Vos Street between Orange and Voortrekker Street**		**R869 400,00**
4.1	Sidewalk widening with new kerbs and channels	R455 400,00	
4.2	Landscaping	R69 000,00	
4.3	Road signs and markings	R27 600,00	
4.4	Accommodation of services	R276 000,00	
4.5	Urban Furniture	R41 400,00	

TRANSPORT PLAN FOR CERES CBD, WITZENBERG MUNICIPALITY			
High-level cost estimates of proposed projects (based on conceptual design only)			
	PROJECTS	**ESTIMATED PROJECT COSTS**	**ESTIMATED PRECINCT COSTS**
5	**Improvements along Vos Street between Orange and Voortrekker Street**		**R279 036,00**
5.1	Sidewalk widening with new kerbs and channels	R154 836,00	
5.2	Landscaping	R27 600,00	
5.3	Road signs and markings	R13 800,00	
5.4	Accommodation of services	R40 000,00	
5.5	Urban Furniture	R13 800,00	
5.6	New premix in parking areas	R29 000,00	
6	**Improvements along Pretorius Street between Muunik Street and Fabrick Street**		**R817 650,00**
6.1	New brick paving in limited sections	R334 650,00	
6.2	Raised pedestrian crossing	R96 600,00	
6.3	Raised intersection	R276 000,00	
6.4	Landscaping	R69 000,00	
6.5	Road signs and markings	R13 800,00	
6.6	Accommodation of services	R27 600,00	
7	**New taxi facility at the corner of Vos and Orange Street (excluding purchase price of property)**		**R4 776 180,00**
7.1	Sidewalks, including kerbs and channels	R182 160,00	
7.2	Sidewalks, including kerbs and channels	R910 800,00	
7.3	Paving in taxi area	R1 366 200,00	
7.4	New offices and ablution facilities	R207 000,00	
7.5	Landscaping (soft)	R69 000,00	
7.6	Urban furniture	R138 000,00	
7.7	Road signs and markings	R13 800,00	
7.8	Accommodation of services	R138 000,00	
7.9	Brick paving of taxi rank access	R53 130,00	
8	**Signalisation of Vos and Orange Street, including brick pavingof intersection**		**R169 800,00**
8.1	Signalisation of intersection	R966 000,00	
8.2	Brick paving of intersection	R690 690,00	
8.3	Landscaping	R0,00	

TRANSPORT PLAN FOR CERES CBD, WITZENBERG MUNICIPALITY

4.3.1.2 Tulbagh Precinct Plan

Tulbagh has a rich heritage culture and is a major tourist attraction.

A CBD is normally characterised by its balance between commercial, financial and transport elements, however Tulbagh lacks this, particularly the transportation element. The main accessibility corridor in Tulbagh is Van Der Stel Street, however, this street lacks on-street parking, sidewalks and access to business premises.

For Tulbagh to become a fully functional CBD, the Witzenberg Municipality will improve the pedestrian interface and provide additional parking along Van Der Stel Street. This will however be done in such a manner that it does not undermine the heritage resources within Tulbagh. A contextual analysis report previously conducted for the WLM has found the following primary concerns and issues within Tulbagh town:

- Excessive Street Width

The street proportions can be improved by including features such as medians and turning lanes in conjunction with sidewalks, dropped kerbs and pedestrian crossings.

- Pedestrian Safety and Access

Hard and soft landscaping can be used to improve the pedestrian interface

- Insufficient Parking

Additional parking bays can be provided once the roadway is narrowed. Surface treatment of the parking bays is also recommended.

- Cadastral Encroachments

The cadastral boundary needs to be formalised in order to avoid encroachments. A tree planting incentive is an achievable way of approaching this problem.

- Stormwater

Furrows and channels are not operating efficiently and prove a safety hazard for pedestrians and motorists. Diverting runoff and creating sub-surface and USDS drainage systems will dramatically improve safety and aesthetics.

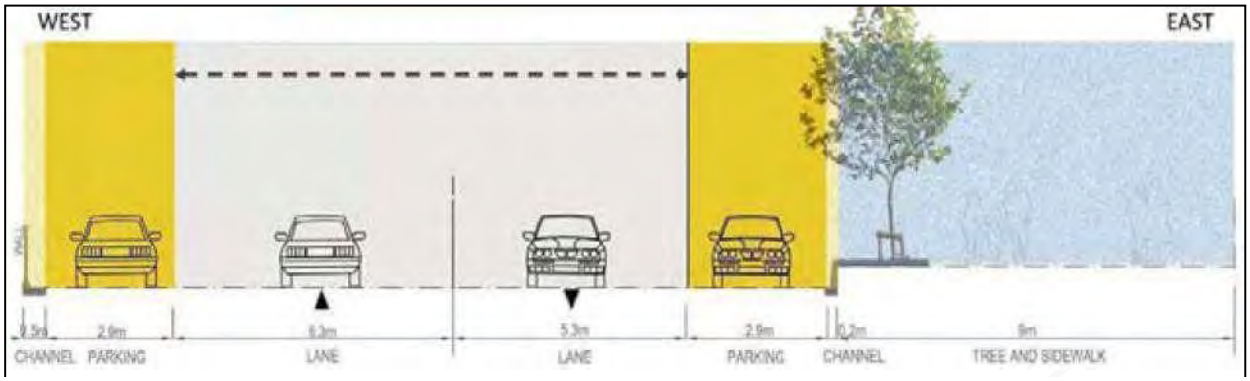

Figure 4-4: Current cross section of Van der Stel Street

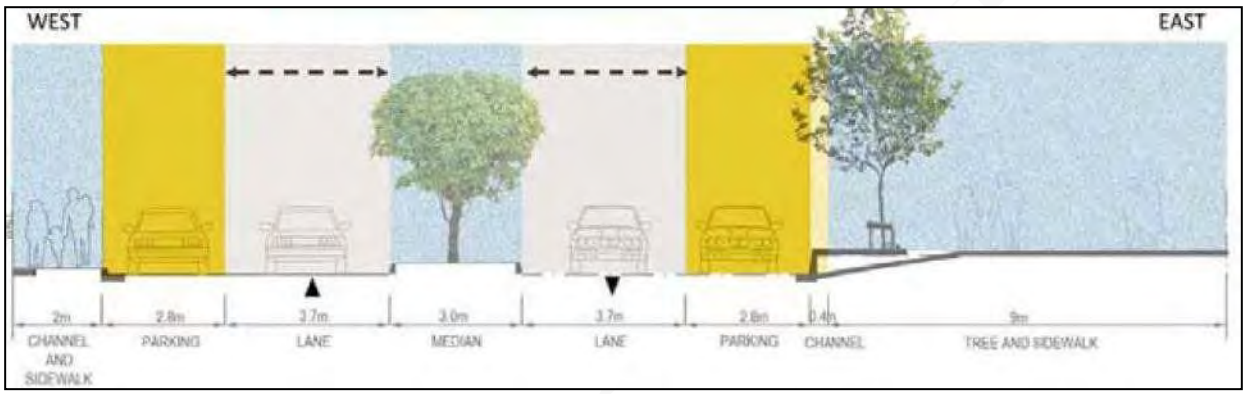

Figure 4-5: Proposed cross section of Van der Stel Street

A summary of the cost of the proposed project in Tulbagh is listed in the table below:

Table 4-4: Projects Costing

			GRAND TOTAL		**R7 191 122.01**

4.3.2 NMT Recommendations in the Roads Master Plan

Towns within the Witzenberg Municipal area have a large NMT presence, where more than half of the population rely on NMT transport for daily commute. This highlights the need for safe and adequate NMT facilities.

It is noted that due to budget constraints and lack of human resources, NMT projects are rarely implemented, as road rehabilitation and maintenance projects are regarded as higher priority projects (Cape Winelands ITP Update 2014).

The following recommendations should be considered in conjunction with the outstanding projects, which is discussed further on in the report.

Table 4-5: NMT Recommendations

Town	Recommendation
Bella Vista	Maintenance of the existing surfaced sidewalk along the R303 to Ceres -Overgrown vegetation.
	Construct sidewalks on at least one side of Jakaranda Street.
	Provide rest areas and shade along the surfaced sidewalk on the R303.
Ceres	Dropped kerbs to be installed at all the intersections along Voortrekker Street.
	Extending the bicycle route network.
	Widening of sidewalks along Voortrekker Street (trees and road signs takes upsome of the width).
	Apply to have the pedestrian crossing along Voortrekker Str at Charlie Hofmeyr H.S signalized.
Nduli	Continuation of the existing surfaced sidewalk along the R46 up to Onder-Swaarmoed Road.
	Provide rest areas and shade along the surfaced sidewalk on the R46.
	Construct surfaced sidewalks along Eluxolweni Avenue.
Op-die-Berg	Continue paved sidewalk along Kerk Street to where the school kids' walkway starts.
Prince Alfred Hamlet	Lighting of the surfaced sidewalk along the R303 to Bella Vista.
	Continuation of the existing surfaced sidewalk to the West along Waboom Avenue.
	Surface the portion of gravel sidewalk along Waboom Avenue from Voortrekker Street.
Tulbagh	Construct surfaced sidewalks in Steinthal Street.
	Construct surfaced sidewalks in Obiqua Street.
	Construct surfaced sidewalks in Olifant Street.
Wolseley	Construct surfaced sidewalks in Hope Street.
	Investigate possibility of a formal walkway with lighting across the open fields in the southern part of Wolseley, similar to the one at the cemetery.

4.4 Current Capacity of Roads

As part of the comprehensive Witzenberg Roads Master Plan (2020) a detailed analysis were executed of a 108 intersections in the Witzenberg Municipality. It was rightly deduced that it is the intersections that determine the capacities of roads in urban areas and that these should be optimised to increase road capacity in general.

4.4.1 Traffic counts

12-Hour weekday traffic counts were done at selected intersections within WLM boundary.

- Bella Vista – 16 intersections
- Ceres – 30 intersections
- Nduli – 5 intersections
- Op-die-Berg – 4 intersections
- Prince Alfred Hamlet – 10 intersections
- Tulbagh – 24 intersections
- Wolseley – 19 intersections

Traffic was split into light vehicles, heavy vehicles, buses and mini bus taxis. Morning (AM) and Afternoon (PM) peak hour traffic volumes were extracted from the 12-hour counting data.

4.4.2 SQ Operational Analysis

The operational analysis has been done with the "SIDRA INTERSECTION 8" computer software that is suited for traffic engineering capacity analysis. When elements of a road network such as intersections are analysed, their operating conditions are described in terms of Level of Service (LOS). The six letters from A to F are used to indicate the different LOS. LOS A indicates very low traffic flows with correspondingly low delays, LOS E reflects capacity conditions, with high delays and unstable flow. LOS F reflects conditions where traffic demand exceeds capacity and traffic experiences congestion and delays. Generally, LOS A to D are considered acceptable in accordance with international standards. LOS E and F on the other hand are unacceptable.

The Average Delay is the delay in seconds that a motorist is likely to experience on an approach to the junction, while waiting for the junction to clear or other vehicles to manoeuvre. A further measure of the operating conditions prevailing at any point in a road network is the volume to capacity ratio (v/c). As the name implies, it is the traffic demand volume divided by the available capacity of the road element. Generally, ratios of up to approximately 0.9 are internationally considered acceptable. Values exceeding 1.0 implies saturation of the facility.

4.4.3 Results of SQ Intersection Operations

The operational analysis for the existing AM and PM peak hours has been done for each of the intersections. The results provide an indication of the service levels at which these intersections are performing. A more in-depth look will be given to any approach exceeding a LOS > D or capacity > 1:

4.4.3.1 Bella Vista

Table 4-6: Intersections LOS

1. Panorama / Vos Intersection (AM & PM Peak Hour)

The 4-legged intersection has priority on the main road with stop control on the side streets. The longer than expected delay (up to 70 seconds) on the Panorama & Blouberg approaches result in the LOS > D on the right turn lanes. This is This is to be expected since Vos Road is a regional corridor carrying high traffic volumes. Good sight distance exists from the side street approaches onto the main road. This intersection was also flagged as a hazardous location. Action is required in the short term to make the intersection safe.

2. Vos/ Vreeland Intersection (AM Peak Hour)

The 3-legged intersection has priority on the main road with stop control on the side streets. The longer than expected delays (up to 43 seconds) on the Vreeland approach results in the LOS > D on the right turn lane. This is to be expected since Vos Road is a regional corridor carrying high traffic volumes. Good sight distance exists from the side street approaches onto the main road. This intersection was also flagged as a hazardous location under item 7.5 in this report. Action is required in the short term to make the intersection safe.

4.4.3.2 Ceres

1. Owen / Oak Intersection (AM & PM Peak Hour)

This intersection is currently 4-way stop controlled and is overall operating at LOS D in the AM peak hour. In the AM peak hours, the Owen approach from the North have higher flows than the rest of the approaches. This results in a longer than expected delays (up to 43 seconds) and an average queue length of 46m, resulting in LOS > D. The western Oak Street approach has been fitted with a yield sign in conjunction with the Stop-sign, to ease the peak hour queue formation on the approach. Since these low service levels are as a direct result of the type of control and the surrounding schools generating traffic, it is acceptable for the current situation. No action is proposed in the short term.

2. Vos / Retief Intersection (AM & PM Peak Hour)

This intersection is currently 4-way stop controlled and is overall operating at LOS F in both the AM & PM peak hours. The two Vos Street approaches are both exceeding LOS D in the peak hours. This is to be expected since Vos Road is a regional corridor carrying high traffic volumes. Retief Street is also the access to an industrial cluster generating heavy vehicles using the intersection. It is recommended that this intersection be further investigated to possibly upgrade the control to a signalised intersection with some turning lanes in the short term. The signals could rest in the green phase on Vos Street when the demand is lower from the side street outside the peak hour.

3. Voortrekker / Albert Intersection (AM & PM Peak Hour)

This intersection is currently 4-way stop controlled and is overall operating at LOS D in both peak hours. It gives access to the Shopping Centre to the North. Due to the traffic volumes, double lane configuration and the current control measure, most of the approaches are operating on LOS > D in the peak hours. It is recommended that the upgrade of this intersection be further investigated in the short term.

4.4.3.3 Nduli

Table 4-8: Intersections LOS

Intersection Number	Intersection of:		AM Peak				PM Peak			
	Road 1	Road 2	LOS	Capacity	Avg. Delay	LOS>D	LOS	Capacity	Avg. Delay	LOS>D
1	Voortrekker St	Unnamed	B	0.182	2.7	No	B	0.241	1.4	No
2	Voortrekker St	Chris Hani Dr	C	0.121	2.9	No	B	0.211	3.7	No
3	Chris Hani Dr	Langabuya Ave	C	0.247	17.2	No	C	0.292	17.4	No
4	1st St	3rd St	A	0.051	3.0	No	A	0.044	3.6	No
5	Voortrekker St	Onder-Swaarmoed Rd	A	0.104	4.8	No	A	0.108	3.7	No

None of the intersection analysed in Nduli had an approach exceeding LOS D in the peak hours.

4.4.3.4 Op-die-Berg

Table 4-9: Intersections LOS

Intersection Number	Intersection of:		AM Peak				PM Peak			
	Road 1	Road 2	LOS	Capacity	Avg. Delay	LOS>D	LOS	Capacity	Avg. Delay	LOS>D

10	Voortrekke	Sarel	B	0.21	1.5	No	B	0.21	0.7	No

1. Voortrekker / Mill Intersection (AM & PM Peak Hour)

This intersection is currently 4-way stop controlled and is operating at an overall LOS E in the PM peak hour. The southern Voortrekker approach is having an average delay of 55 seconds, resulting in an average queue length of 68m and hence the low service level. Since the 4-way stop is strategic in traffic calming and lowering the speeds on the corridor, the lower service levels within the PM peak is tolerable. No action is proposed in the short term.

4.4.3.6 Tulbagh

Table 4-11: Intersections LOS

None of the intersections analysed in Wolseley had an approach exceeding LOS D in the peak hours.

4.4.4 Hazardous Road Locations

4.4.4.1 Access from the R303

Multiple intersections along the R303 have been identified as hazardous locations based on accident statistics of the Witzenberg Municipality. Traffic counts were also done at these intersections and used as motivation for the proposed upgrades of the intersections.

(a) Proposed Upgrades to (Vos) R303 / Panorama Road

The upgrade to the (Vos) R303 / Panorama Road intersection in Bella Vista will aid in the relief of the LOS from Panorama road onto the (Vos) R303 toward Ceres by including a proposed second lane to allow traffic to safely build up speed before merging with traffic on the (Vos) R303. This will be aligned with a proposed turning lane which will allow traffic to safely decelerate before turning into Panorama Road. Action is required in the short term to make the intersection safe.

Figure 4.6: Proposed upgrades to (Vos) R303/Panorama Rd

(b) Proposed Upgrades to (Vos) R303 / Buiten Street

The upgrade to the (Vos) R303 / Buiten Street intersection in Bella Vista will aid in the relief of the LOS from Buiten Street onto the (Vos) R303 toward Ceres by including a proposed second lane to allow traffic to safely build up speed before merging with traffic on the (Vos) R303. This will be aligned with a proposed turning lane which will allow traffic to safely decelerate before turning into Buiten Street. A third proposed lane to the left of the (Vos) R303 will allow for traffic to safely pass cars waiting to turn onto Buiten Street from the (Vos) R303. Action is required in the short term to make the intersection safe.

Figure 4.7: Proposed Upgrades to (Vos) R303/Buiten Street

(c) Proposed (Vos) R303 / By-pass roads intersection

The upgrade to the (Vos) R303 / By-pass roads intersection in Ceres will replace the existing eastern gravel by-pass road with a paved road. The right side of the R46 where the eastern by-pass intersects the R46 will include additional lanes to allow for traffic to safely turn onto and off the R46. There is no existing western by-pass at the intersection, and it will be built from scratch. No action is required at this stage at this intersection as some taper islands were put in place to protect turning vehicles into the current T- junction.

Figure 4.8: Proposed Upgrades to (Vos) R303/ By-pass Road

There is currently a need to upgrade intersection along the Vos (R303) corridor. At posted speeds of 100km/h accidents will almost always be fatal. At some intersections part of the safety measures were already done, with mostly the widening of the road cross section still absent.

4.4.4.2 Access from the R46

Multiple intersections along the (Voortrekker) R46 (to Ezelfontein / Crispy Coolers, Du Toit Vrugte packaging facility and Southern and Northern access of Nduli), with unprotected turns, have been identified as hazardous locations based on accident statistics of the Witzenberg Municipality.

(a) Proposed Upgrades to (Voortrekker) R46 / Ezelfontein Road Intersection

The upgrade to the (Voortrekker) R46 / Ezelfontein road intersection will replace the existing north- eastern gravel by-pass road with a paved road. It will also have an additional left turning approach lane. The right side of the R46, where it intersects Ezelfontein, will remain mostly unchanged besides the addition of a shoulder.

Figure 4.9: Proposed Upgrades to (Voortrekker) R46/Ezelfontein Rd

(b) Proposed Upgrades to (Voortrekker) R46 / Chris Hani Drive Intersection

The upgrade to the (Voortrekker) R46 / Chris Hani Drive intersection will widen Chris Hani drive and add an additional approach lane for left turns. A by-pass road will be constructed opposite Chris Hani Drive. The by-pass will have the same specifications as Chris Hani Drive. The (Voortrekker) R46 will be widened to allow a right only lane and a passing/left turning lane to improve LOS and safety when turning off the R46.

Figure 4.10: Proposed Upgrades to (Voortrekker) R46/ Chris Hani Drive

(c) Proposed Upgrades to (Voortrekker) R46 / Onder Swaarmoed Road Intersection

The upgrade to the (Voortrekker) R46 / Onder Swaarmoed road intersection will widen the R46 on both sides to include shoulders and a left only lane and a passing lane (from Touwsriver) to improve LOS and safety when turning off the (Voortrekker) R46. The approach from Onder Swaarmoed onto the (Voortrekker) R46 will be widened to allow traffic to safely build up speed before merging with traffic on the (Voortrekker) R46.

Figure 4-11: Proposed Upgrades to (Voortrekker) R46/ Onder-Swaarmoed Road

4.5 Transport Planning Projects

The transport needs assessment processes have identified a number of planning projects, that can provide the scientific backing for other categories of projects that the Roads Master Plan has done for the whole field of road maintenance. These projects and their approximate costing are as follows:

4.5.1 Micro-simulation modelling of the Ceres CBD

Although the Ceres CBD area and the arterials feeding it are not yet prone to heavy peak hour traffic congestion, as was ascertained in the Witzenberg Roads Master Plan, it is certainly busy enough to warrant the commissioning of a modelling study to ensure maximum efficiency out of the existing road infrastructure and traffic signal set settings. By making use of software packages, such as PTV VISSIM, as much as 25% additional road capacity can be achieved by optimising traffic signal settings for the different peak hours of a normal work week. Projects, such as the proposed freight by-pass route, that have already been budgeted for, can also be tested as part of the road network and its potential down-stream effects quantified. The massive traffic impact of excessive heavy vehicle flows on certain streets will also be quantified.

Cost: R1 000 000.

4.5.2 Witzenberg Non- motorised Transport Plan

As part of the needs assessment exercise, pedestrian safety and comfort have been at the forefront of a large number of the ward projects identified. It is at present however a very haphazard process with hardly any scientific backing (apart from the ad- hoc proposals of the Roads Master plan, for either the locations of the projects nor for the extent thereof. What is required to start with, are counts to identify and quantify pedestrian streams, along all the major corridors in the municipality. Then infrastructure must be designed up to concept design level to accommodate the identified pedestrian streams including elements such as footbridges, pedestrian underpasses, walkways, pedestrian crossings (signalised and un-signalised), raised crossings, scholar patrols, etc.

Pedestrian accident information should also be acquired to identify "blackspots". Infrastructure that can minimise pedestrian safety concerns such as barrier kerbing and safety rails can then be designed to concept design level.

A proper traffic calming measures design plan can be part of the NMT Plan instead of the ad-hoc speedhumps that are being implemented currently.

A NMT Plan also needs to include cycling infrastructure identification for both the commuter mode as well as recreational movements. Especially around secondary schools, cycling movements can be very important.

Cost: R800 000

4.5.3 Witzenberg Information Signage Study

Numerous requests have been made during the needs assessment phase of the IDP for road name signs and other information signs in the CBD's of all the towns. A comprehensive information sign study will start with a hierarchy of national, provincial and local destinations that are identified in all the towns of the municipality. This can include specific local tourism destinations. The positions of these signs are also linked to the road hierarchy within the municipality, especially the numbered national and provincial routes. The study should include all the road sign faces and its costing of manufacture.

Cost: R750 000

4.5.4 Witzenberg Comprehensive Taxi Rank Surveys

The previous Transport Register that was completed for the Witzenberg Local Municipality did not include surveys for the Bella Vista informal taxi rank nor for the Prince Alfred Hamlet informal taxi rank or for the Tulbagh informal taxi rank as these informal ranks only recently started having operations. However, to get the correct taxi image for the present a comprehensive survey of all taxi operations in the municipality will have to be executed to finalise the TR and OLS.

Cost: R1 000 000

5 Chapter 5: Implementation budget and Programme

5.1 Budgets detailed in the Draft Budget Report 2022/2023-2024/2025

Although still in draft form this document does provide an indication of the planned expenditure of the Witzenberg Municipality and the projects that is provided for:

5.1.1 Budget Summary for 2022/ 2023

5.1.1.1 Capital Budget

The capital budget for the next financial year amounts to R77,4 million of which R 23 million is from own revenue. The rest of the capital budget is financed from Grants of R44,4 million and a proposed external loan of R10 million.

As can be seen from the aforementioned, the municipality is too reliant on Grants to fund its capital expenditure. That said we are thankful for the Grants allocated to Witzenberg Municipality.

The bulk of the proposed capital expenditure is in respect of service delivery and infrastructure.

5.1.1.2 Operating Budget

The operating revenue budget for next year amounts to R 811 million of which R 606 million is from own revenue. The rest of the operating budget is financed from Grants.

5.1.2 IDP Projects 2021/2022 to 2025/2026

The amended IDP (March 2022) has the following budgets for the planning period: (Only those with transportation projects are shown here.)

5.1.2.1 Strategic Objective: Sustainable provision and maintenance of basic infrastructure

5.2 Project Costing in the Witzenberg Roads Master Plan

In the Roads Master Plan a large number of projects have been costed and budgets have been proposed over short medium and long term. These are provide here as an implementation goal for this LITP.

5.2.1 Projects and Costing for Roads, Bridges & Intersections

ROADS, BRIDGES & INTERSECTIONS (Page 1 of 2)															
					Short Term (0 to 2 years)		Medium Term (3 to 5 years)			Long Term (6 to 10 years)				
			Reference Document	Project Cost (Escalated to 2019 @ 6% per annum)	2021/2022	2022/2023	2023/2024	2024/2025	2025/2026	2026/2027	2027/2028	2028/2029	2029/2030	2030/2031

	TOTAL FOR UPGRADES TO NON-MOTORISED TRANSPORT				R6 760 000	R50 572 620								

6 Chapter 6:Operating Licence Plan

An Operating Licence Plan Review has recently (July 2020) been completed for the Witzenberg Local Municipaliy. All of the information in this chapter has been sourced from this document.

6.1 Minibus Taxi Facilities

Formal taxi facilities have specific infrastructure such as shelters and ablutions that have been constructed. Informal facilities include areas that are used by public transport without any kind of "betterment" or surfaced parking areas that have been constructed but not specifically as a taxi rank.

The existing minibus taxi facilities in Witzenberg are summarised in the table below:.

Table 6-1: Public Transport Facilities in Witzenberg

Town	Facility Name	Facility Type	Comment
Ceres	Vos Street	Informal Taxi Rank	Private Property
Ceres	Vos Street	Informal Taxi Rank	On-street parking
Ceres	Voortrekker Street TaxiRank	Formal Taxi Rank	
Nduli	Nduli Taxi Rank	Formal Taxi Rank	
Wolseley	Wolseley Rank	Informal Taxi Rank	Existing Parking Lot
Tulbagh	Tulbagh Rank	Informal Taxi Rank	On-street parking
Op-die-Berg	Op-die-Berg Rank	Informal Taxi Rank	Existing Parking Lot
Prince Alfred's Hamlet	Prince Alfred's HamletTaxi Rank	Formal Taxi Rank	

6.1.1 Op-die Berg

Op-die-Berg does not have a formal taxi rank; the existing parking area across from Agri Mark is used as an informal taxi stop. The area is unsurfaced, there are no demarcated parking bays or any other facilities such as ablutions, shelter or lighting.

Op-die-Berg Taxi Stop	
Number of Bays	4
Access to the rank	Church Street
Shelter for passengers	None
Seating	None
Restrooms	None
Lighting	Good
Surfacing	Gravel
Comment	This is an informal, unmarked parking area across from Agri Mark. This area is adjacent to another parking area which is available toaccommodate the overflow.

Op-die-Berg Taxi Stop	
Gravel parking area used as informal taxistop	**Parking area adjacent to informal taxi stop**

6.1.2 Prince Alfred Hamlet

The town of Prince Alfred's Hamlet currently has one formal taxi rank located on the corner of Church Street and Voortrekker Road.

Prince Alfred's Hamlet Taxi Rank	
Number of Bays	5
Access to the rank	Off Church Street
Shelter for passengers	Yes - Limited
Seating	Yes
Restrooms	Yes
Lighting	Good
Surfacing	Paved
Comment	This rank is in a good condition and well maintained.
Prince Alfred's Hamlet Taxi Rank (1)	**Prince Alfred's Hamlet Taxi Rank (2)**

Prince Alfred's Hamlet Taxi Rank	
Facilities at Prince Alfred's Hamlet taxi rank	**View of the taxi rank from across the road**

6.1.3 Ceres

There are one formal and two informal taxi facilities in Ceres:

- Ceres Nduli formal taxi rank
- Vos Street informal taxi rank
- Vos Street on-street parking bays used as taxi stops

All of these facilities are shown below:

Ceres Nduli Formal Taxi Rank (Voortrekker Street)	
Number of Bays	32 (8 lanes, 4 vehicles per lane)
Destination Signage	None
Access to the rank/parking	Voortrekker Street
Shelter for passengers	Yes
Seating	Yes
Restrooms	Yes
Lighting	Good
Surfacing	Paved
Comment	The condition of this facility is good and appears well maintained.

Ceres Nduli Formal Taxi Rank (Voortrekker Street)	
Ceres Nduli Taxi Rank	**Ceres Nduli Taxi Rank**
Shelter provided at the Ceres Nduli Taxi Rank	**Ceres Nduli Taxi Rank view from Voortrekker Street**

Ceres Vos Street Informal Taxi Rank (Informal)	
Number of Bays	25 (estimated)
Destination Signage	None
Access to the rank/parking	Orange Street
Shelter for passengers	None
Seating	None
Restrooms	Yes
Lighting	Fair
Surfacing	Gravel
Comment	This facility is located on private property. Bays are not marked and taxis share the parking with private vehicles using the parking bays when visiting businesses in the vicinity.

Ceres Vos Street Informal Taxi Rank (Informal)	
Vos Street Taxi Rank	 **Vos Street Taxi Rank**
Vos Street Taxi Rank	**Facilities provided at the Vos Street Taxi Rank**

Vos Street on street parking bays used by Taxis (Informal)	
Number of Bays	3
Destination Signage	None
Access to the rank/parking	Vos Street
Shelter for passengers	None
Seating	None
Restrooms	None
Lighting	Good
Surfacing	Paved
Comment	These parking bays are parallel on-street parking bays along Vos Street. Bays aren't reserved forminibus taxis and the parking bays are shared with private vehicles visiting businesses in the vicinity.

Vos Street on street parking bays used by Taxis (Informal)	
Vos Street on-street parking bays usedby taxis	**Vos Street on-street parking bays usedby taxis**

6.1.4 Nduli

Nduli has one formal taxi rank on the corner of Chris Hani Drive, Ndzishe Avenue and Gill Avenue.

Nduli Taxi Rank	
Number of Bays	14
Destination Signage	None
Access to the rank/parking	Access off Ndzishe Avenue, exit onto Gill Avenue
Shelter for passengers	Limited
Seating	None
Restrooms	Yes
Lighting	Fair
Surfacing	Paved
Comment	Overall, the condition of the facility is good. It appears to be functioning well. Additional rubbish bins may be necessary as the area was littered withrubbish.

Nduli Taxi Rank	
Nduli Taxi Rank	**Nduli Taxi Rank**

6.1.5 Wolesley

Wolseley does not have a formal taxi rank. Although not demarcated as such, the existing municipal parking lot on the corner of Eeufees Street and Voortrekker Street is used as a rank facility.

Wolseley Taxi Rank	
Number of Bays	90 bays provided, assume 5 bays are used by taxis
Access to the rank/parking	Off Eeufees Street and Vincent Street
Shelter for passengers	None
Facilities Provided	None
Lighting	Good
Surfacing	Paved
Comment	Minibus taxis share this parking with visitors to the municipal buildings adjacent to the parking area. Although parking bays are marked, there are no road marking or signage reserving bays for minibus taxis.
Wolseley Taxi Rank	**Wolseley Taxi Rank**

It is vital that bays allocated to minibus-taxis are reserved for them, to prevent confusion and disagreements between visitors and taxis.

6.1.6 Tulbagh

Tulbagh does not have a formal taxi rank; the on-street parking along Van Der Stel Street in front of the Spar is reserved for minibus taxis.

Van Der Stel On- Street Parking	
Number of Bays	3
Access to the rank/parking	Van Der Stel Street
Shelter for passengers	None
Facilities Provided	Restrooms
Lighting	Good
Surfacing	Paved
Comment	These parking bays are parallel on-street parking baysalong Van Der Stel Street. The bays are reserved for minibus taxis.
Van Der Stel Street on-street parking bays reserved for taxis	**Van Der Stel Street on-street parking baysreserved for taxis**

6.2 Current Operating Licences

All legal routes with route descriptions were received from the PRE. According to the PRE's database there are 150 OLs issued within Witzenberg.

The information received relating to routes and the number of route authorities per route are shown in the table below:

Table 6-2: Numbers of route authorities per route:

No.	Description	Origin-Destination (PRE)	Route Authorities
1	822	Nduli - Ceres	34

67	Y9	Prince Alfred's Hamlet - Ceres	6

6.3 Regulatory Background

6.3.1 Western Cape Road Transportation Act Amendment Act (Act 7 of 2000)

It amends the Road Transportation Act, 1977, insofar as it applies in the WC, to provide for special measures in respect of minibus taxi and other road transportation services in certain areas; to amend the Minister's powers to make regulations regarding persons who may seize motor vehicles; and for matters connected therewith.

6.3.2 Western Cape Road Regulations on Operating Licences, 2002

The NLTTA of 2000 permitted the Minister of Transport: Public Works and Property Management of the Western Cape to publish certain regulations relating to OLs. These are contained within Provincial Gazette No. 5838 of 14 June 2002 and are known as the Western Cape Regulations on Operating Licences, 2002.

- These regulations cover the following matters:
- Application for conversion of permit to operating licence;
- Submission of Regulation 2 (1) Application to planning authority for recommendations;
- Application for the granting, amendment or transfer of an operating licence for contracted services;
- Application for the granting, renewal, amendment, or transfer of an operating licence for non-contracted services;
- Application for amendment of operating licence to replace a specified vehicle;
- Responsibilities of the Board regarding information and documents submitted with application forms;
- Publication of applications;
- Inter-provincial services;
- Representations regarding applications for operating licences;
- Convictions for offences to be considered by board in disposing of applications with regard to operating licences;
- Roadworthy certificates;
- Issuing of operating licences and distinguishing marks;

- Applications for duplicate original operating licences, permits, or distinguishing marks;
- Fees;
- Inspectors;
- Stopping of vehicles by authorised officer;
- Distinguishing marks;
- Information on vehicles to which operating licences relate;
- Information on vehicles used for courtesy services;
- Staff services; and
- Form of operating licences.

With regard to the submission of Operating Licence applications to the Planning Authority for comment, the regulation states that:

- An application must be submitted in writing to the Planning Authority within 30 days of receipt
- The PRE must dispose of the application within 90 days of receipt
- The Planning Authority must:
- Verify the route details claimed by the applicant;
- In the case of the conversion of a permit to an Operating Licence for a bigger vehicle; submit recommendations, amongst others, on the availability of ranks or terminals or other facilities or spaces for boarding and alighting from, or holding or parking the larger vehicle concerned;
- Submit any other recommendations or representations it may have in relation to the application
- If the Planning Authority fails to respond within 30 days, the PRE may consider the application without the input from the Planning Authority;
- In the process of the conversion of radius or area-based permits, the Board must adhere to the route descriptions, identifications and numbers shown in the ITP. The planning Authority or the PRE must provide Associations operating along the route or routes in question with adequate information to allow them to give input regarding route descriptions.

6.3.3 Western Cape Regulations on the registration of minibus-taxi associations, their members and non-members, 2007

These regulations prescribe the following:

- Manner of keeping of the provincial transport register;
- Information to be kept in the register concerning non-members and their vehicles;
- Fees for information from the register;
- Requirements for associations to qualify for provisional and full registration;
- Application fees for registration;
- Application forms;
- Manner of application for registration by a newly admitted member of a registered association;
- Information and documents submitted with application forms;
- Registration of non-member: certificate by Registrar;
- Registration certificates;
- Distinguishing marks;
- Standard minimum Constitution and Code of Conduct;
- Form of subpoena and manner of serving;
- Fine for failure to comply with notice;
- Return of documents upon cancellation or suspension of registration; and
- Offences and penalties.

6.3.4 Types of Operating Licences

Operating Licences may be issued for the following types of services:

- Contracted Services;
- Non-contracted Services;
- Special Events;
- Long distance services;
- Metered taxi services;
- Charter service;
- Staff service;
- Learner Transport; and
- Tourist transport services.

The OLS report investigates the supply and demand of the operating licences of non-contracted services only.

6.4 Operating Licence Plan

6.4.1 Introduction

The purpose of the Operating Licence Plan is to provide guidance to the Planning Authority as to which Operating Licence applications should be approved or rejected and if approved, what conditions should be attached. The OLP is supplemented by an Operating Licence Administration system (OLAS) which should be updated annually to ensure that the details of all active Operating Licences and routes are correct at the time of the consideration of new Operating Licence applications.

6.4.2 Evaluation Process

When a new application for an Operating Licence is received by the Planning Authority a process is followed to evaluate the application. The process, as proposed in the Cape Winelands District Integrated Transport Plan (2016 – 2020), is shown in the figure below and is described in more detail in the table below:

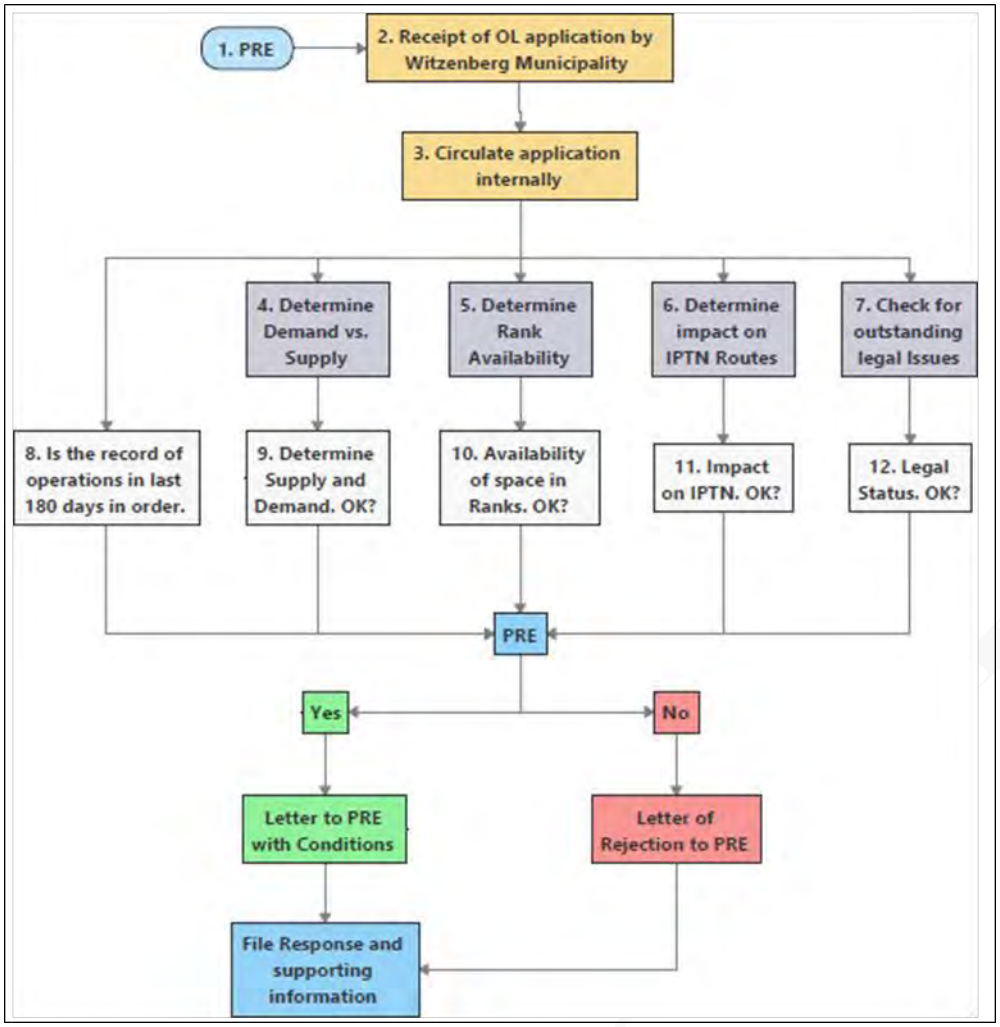

Figure 6-1: Operating Licence Evaluation Process

Table 6-3:Operating Licence Evaluation Process

Item	Title	Procedure	Responsible Department
1.	NPTR / PRE	Application for an OLS is submitted in the required format to the NPTRor PRE. The application is submitted to the Planning Authority (Municipality) (PA) within 30 days.	NPTR or PRE
2.	Receipt of OL application by PA	The OL application is received by the PA and is recorded in theappropriate manner for record purposes. The application is sent to the appropriate Department within the PA dealing with Transport Planning and Public Transport to be checked forcompleteness.	PA Department (Transport Planning and Public Transport)
3.	Circulate application internally	The OL is circulated to the appropriate persons / Departments internallywithin the PA for comment in respect of: Transport Planning and Public Transport Traffic Services	PA Department (Transport Planning and Public Transport)
4.	Demand andSupply	The OL application is checked against the available survey data or passenger demand on the applicable routes using procedure detailed inParagraph 5.4.	PA Operating Licence Recommendations Committee
5.	Determine Rank Availability	The OL application is checked against the available survey data of rank,terminal or stops capacity serving the applicable routes using the procedure detailed in Paragraph 5.4.	PA Operating Licence Recommendations Committee

Item	Title	Procedure	Responsible Department
6.	Determine impacton IPTN routes	The OL application is assessed as to its impact on the conceptual IPTNroutes that are identified in the ITP or that will operate in parallel to or inconflict with any commuter rail services or bus services.	PA Operating Licence Recommendations Committee
7.	Check for outstanding legalissues	The OL is checked against the record of outstanding warrants or convictions, previous convictions relating to the operation of public transport services and the ability of the applicant to operate the servicein a manner satisfactory to the public.	PA Traffic Services – in respectof Traffic Offences; Provincial Regulatory Entity – inrespect of criminal offences.
8.	Check record of operations in last180 days	In terms of Section 78 of the NLTA, if a licence has not been in use for more than 180 days, the licence can be cancelled. The licence holder must be asked to furnish, in writing, satisfactory reasons why the servicehas not been operated, after which the licence can be extended for a further 180 days or cancelled.	PA (Traffic Services)
9.	Letter of Approvalor Rejection	If all the responses to the evaluation support the approval of the application, a letter of approval is then issued to the NPTR or the PREwith any conditions attached. If the responses do not support the application, a letter of rejection isthen issued.	PA Department (Transport Planning and Public Transport)
10.	Letter of Approvalor rejection	A letter of approval or rejection is issued to the applicant and a copy issent to the PA.	Provincial Regulatory Entity

6.4.3 Data Collection

6.4.3.1 PRE Database

The PRE's database shows that there are 68 registered minibus taxi routes in the Witzenberg Municipal area:

- Nine (9) routes are inter-provincial routes (the routes originate in Witzenberg but travel to areas outside the Western Cape).
- Ten (10) routes are inter-municipal routes (originate within Witzenberg Municipal area but travel to areas outside the Witzenberg Municipality).
- 49 routes are intra-municipal routes (start and end within the Witzenberg Municipal area). As agreed with the Municipality, this report only considers inter and intra-municipal routes.

As agreed with the Municipality, the OLS Report only considered inter- and intra-municipal routes.

During one of the engagements with Codeta and Cedta, it was noted that some routes do not operate on a regular basis and are only operated as demand requires. This is especially true for routes servicing the farming communities of Agter-Witzenberg, Koue Bokkeveld, Wolseley and Tulbagh. In such cases, passengers make contact with minibus taxi owners/drivers to "pre-book" a ride and based on the demand, the route will be operated or not. The routes that operate on this basis are shown in the table below:

Table 6-4: Routes that require pre-booking.

Route	Route Name	Route	Route Name
G49	Wolseley – Wolseley Farms	H74	Ceres – Ezelfontein District Ceres
G50	Wolseley – Wolseley Farms	H75	Ceres – Laastedrif District Ceres
H72	Ceres – Rosendal District Ceres	N53	Tulbagh – Tulbagh Farms
H73	Ceres – Donkerbos District Ceres	R2	Op-Die-Berg – Kagga Kamma

Travel times on the inter-municipal routes were estimated using an assumed average vehicle operating speed. The inter municipal roues are shown in the table below:

Table 6-5: Inter-municipal routes

Route	Route Name	Route	Route Name
D46	Tulbagh - Wellington	M1	Chris Hani Tulbagh – Wellington Railway Station
G44	Tulbagh - Gouda/Onrus	M98	Nduli, Ceres - Sterkspruit
J86	Nduli – Sterkspruit	Q82	Wolseley - Elliot
J85	Ceres - Sterkspruit	R63	Ceres - Bellville
K1	Nduli - Sterkspruit	T77	Ceres - Sterkspruit
K99	Wolseley - Gouda	T87	Ceres - Sterkspruit
L1	Wolseley - Worcester	T93	Ceres - Zastron
L2	Wolseley - Wellington	U93	Ceres - Wellington
L96	Chris Hani Tulbagh - Gouda	W54	Nduli - Wellington
L99	Chris Hani Tulbagh - Worcester	X15	Nduli – Zastron

6.4.3.2 Route Descriptions and Routes Operated

The route descriptions (as recorded on the PRE's database) were compared to the route data recoded during on-board surveys. Although the majority of the routes in Witzenberg are active (with the exception of those requiring pre-booking), a number of routes did not rigidly follow the official route descriptions contained in the PRE database. Routes that were found to divert form the PRE route descriptions are D66, D67, G51, L2 and Q99.

6.4.3.3 Survey Data Summary

- 820 716 passengers were transported, and 151 910 vehicle trips undertaken (average occupancy of 5.4 passengers per vehicle trip).
- 1 078 unique registration numbers were recorded (the vehicle types included in this number is minibus taxis, midibuses, Toyota Condors and Toyota Avanzas). Of the 1 078, 971 vehicles are not registered on the PRE database while only 107, are registered on the PRE database.

Daily travel data summaries are provided in the tables below:

Table 6-6: Daily Travel Demand (legal and illegal vehicles)

Survey Day	Passengers Transported	Number of Vehicle trips	Passengers per trip
Thursday	18 263	4 268	4.3
Friday	30 181	5 920	5.1
Saturday	30 970	4 621	6.7

Table 6-7: Daily Travel Demand (legal vehicles only)

Survey Day	Passengers Transported	Number of Vehicle trips	Passengers pertrip
Thursday	8 762	1 719	5.1
Friday	16 382	2 532	6.5
Saturday	17 451	2 006	8.7

Table 6-8: Peak hour travel demand (legal and illegal vehicles)

Survey Day	Peak Hour (based on the number of passengers)	Number of peak hour Vehicle Trips	Number of Passengers	Passengers per trip
Thursday	06:30 – 07:30	748	3686	4.9

Saturday	07:45 – 08:45	882	5 488	6.2

6.5 Evaluation of Supply and Demand

6.5.1 Distinction between Operating Licences and Route Authorities

A distinction should be made between Operating Licences (OLs) and Route Authorities. A vehicle would be issued with a single OL, with a unique number assigned to the licence (and vehicle), but the OL may give the vehicle the authority to operate on multiple routes (route authorities).

The table below illustrates the difference between OLs and Route Authorities: operating licence number 506323 can only be registered to a single vehicle (registration number CT22318), but this vehicle has authority to operate on multiple routes: 898, H72, H76, J85 and R63.

Table 6-9:Operating Licences and Route Authorities

Operating Licence Number	Vehicle Registration Number	Route Authorities
506323	CT22318	898 - Ceres - Bella Vista
		H72 - Ceres - Rosendal Distr. Ceres
		H76 - Ceres - Wolseley
		J85 - Ceres - Sterkspruit
		R63 - Ceres - Bellville

Although this report focuses on operating licences and the number registered to each route, it should be noted that often the number of OLs is not the issue, but rather the number of route authorities attached to a particular route.

6.5.2 Legal and Illegal vehicles

Legal vehicles refer to vehicles that are registered on the PRE's database and have Operating Licences on the Witzenberg Routes. Illegal vehicles are vehicles that are not registered on the PRE's database and are therefore not allowed to operate on the minibus taxi routes in Witzenberg.

When investigating the routes and the number of legal vs. illegal vehicles on a particular route, the legality of the vehicle was determined using PRE's database and deemed legal if it had an OL assigned to it, regardless whether the particular vehicle has authority to operate on that particular route or whether its OL is for another route.

6.5.3 Supply and Demand on Public Transport Routes

Supply and demand information is used to evaluate the capacity of the current public transport services and the possible need for additional services. The table below provides a summary of the supply and demand per route.

From the information received from the PRE and the survey data collected the following were determined:

- The current service capacity: Number of vehicle trips from the number plate survey multiplied by the vehicle capacity (only legal vehicles considered).
- Percentage peak directional utilisation: peak hour passenger volume from surveys divided by the service capacity.
- Vehicles operating with Operating Licences: Comparison of the vehicle registration numbers form surveys with data from the PRE.

To simplify the calculations, routes serving common destinations have been clustered. The average route distance was used to calculate the return journey time. The required number of vehicles to serve the demand based on the return journey time and the peak hour demand from the surveys was then estimated.

Vehicles (with and without operating licences) were assigned to routes based on the cordon points they passed and the ranks they used. To determine the over or under supply of vehicles on each route, the required number of vehicles per route is compared with the actual number of vehicles (with and without OLs) operating on the route.

From the supply and demand analysis, shown in the table below, the following can be concluded:

- The number of vehicles seen on routes (during peak times) are 310 (93 registered on PRE's database while 217 are illegal). The number of registered vehicles operating during peak times compared to the rest of the survey period stays more or less the same. However, there is a significant reduction in the number of illegal vehicles operating during peak times, compared to the number of illegal vehicles operating throughout the survey period. Possible reasons for the reduction in the number of illegal vehicles during peak times could be:
- Due to the oversupply during peak times, illegal vehicles rather operate during off-peak times when competition is less;
- Illegal vehicles operate in other areas (outside the survey area) during peak times; or
- The operations of some vehicles are so random that they could not be assigned to a route.
- The survey data collected were used to analyse the supply and demand of minibus taxi trips on the intra-municipal and inter-municipal routes. Approximately 250 Operating Licences with appropriate route authorities are required. Compared to the number of assigned route authorities (449), there is an oversupply of 199 route authorities.
- The results indicate that the fleet size required to serve the passenger demand during peak times is 250. However, to account for vehicles being out of service, the required fleet size was increased by 10%, from 250 to 275. During the peak period, 310 vehicles (legal and illegal) were seen operating, there is thus an oversupply of 35 vehicles.

As previously noted, vehicles registered on the PRE's database were classified as legal whether or not it had the authority to operate on that particular route.

Table 6-10: Summary of Supply/ Demand per Route

Route Information				Service Capacity		Operating License Requirements		% Vehicles without OLs on route	Comment
Route Number	O-D	Total Number of Vehicles on this route (with and without OLs)	Number of Vehicles with OLS[1]	Required noof Vehicles with OLS (Required Route Authorities)	OLs issued (Route Authorities between O-D Pairs)	Over/Under Supply of Route Authorities (Basedon Actual OLs issued) [2]	Over/Under Supply of Vehicles (Based on Survey Data incl. vehicles without OLs) [3]		
822, 823, H16,W66	Nduli - Ceres	37	14	13	56	43 (56 – 13)	24 (37-13)	62%	Over supply of Route Authorities

6.6 Public Transport Facilities

Public transport facilities in Witzenberg were discussed in Paragraph 6.1. Using the capacity of each facility and the number of vehicles using these facilities, the utilisation of each facility could be calculated. The results are shown in the table below:

Table 6-11: Utilisation of Public Transport Facilities

Town	Facility Name	No. of Bays	Survey Day	Max. no. of Vehicles	Max. time of Utilization	Utilisation [%]
Ceres	Vos Street Informal TaxiRank	25	Thursday (06/02/2020)	21	14:35 – 15:35	84%
			Friday (07/02/2020)	19	08:45 – 09:45	76%
			Saturday (08/02/2020)	20	10:30 – 11:30	80%
Ceres	Nduli Taxi Rank	32	Thursday (06/02/2020)	10	09:55 – 10:55	31%
			Friday (07/02/2020)	18	12:10 – 13:10	56%
			Saturday (08/02/2020)	18	12:25 – 13:25	56%
Ceres	Vos Street On Street Parking	4	Thursday (06/02/2020)	3	12:20 – 13:20	75%
			Friday (07/02/2020)	4	10:20 – 11:20	100%
			Saturday (08/02/2020)	4	10:30 – 11:30	100%
Prince Alfred's Hamlet	Prince Alfred's Hamlet TaxiRank	5	Thursday (06/02/2020)	0	N/A	0%
			Friday (07/02/2020)	0	N/A	0%
			Saturday (08/02/2020)	0	N/A	0%
Nduli	Nduli taxi Rank	13	Thursday (06/02/2020)	10	07:20 – 08:20	77%
			Friday (07/02/2020)	5	15:20 – 16:20	38%
			Saturday (08/02/2020)	9	09:55 – 10:55	69%
Op-die-Berg	Op-die-Berg Taxi Stop	3	Thursday (06/02/2020)	4	11:00 – 12:00	133%
			Friday (07/02/2020)	5	07:30 – 08:30	167%
			Saturday (08/02/2020)	4	08:05 – 09:05	133%
Tulbagh	Van der Stel on Street Parking	4	Thursday (06/02/2020)	0	N/A	0%
			Friday (07/02/2020)	4	09:55 – 10:55	100%
			Saturday (08/02/2020)	7	12:15 – 13:15	175%
Wolseley	Wolseley Taxi Rank	5	Thursday (06/02/2020)	2	14:35 – 15:35	40%
			Friday (07/02/2020)	2	08:00 – 09;00	40%
			Saturday (08/02/2020)	0	0	0%

Although it appears that the Op-die-Berg facility is operating above its capacity, it should be kept in mind that there is a parking area adjacent to the taxi stops with ample parking bays which could be used as additional parking during peak times.

The condition of the Prince Alfred's Hamlet formal taxi rank is good, but it is completely underutilised. Minibus taxi vehicles prefer to stop along the main road of Prince Alfred's Hamlet to pick up and drop off passengers.

The number of on street taxi bays provided along Vos Street (Ceres) and Van der Stel Street (Tulbagh) are not sufficient.

During site visits it was established that there are many informal stops in the towns and that many vehicles stop anywhere along main roads. This could be due to the high number of vehicles not having OLs and therefore not being allowed to use rank facilities.

The utilisation of facilities should be read in conjunction with the number of vehicles in Witzenberg using these facilities. Although only vehicles with OLs are allowed to use facilities, the oversupply of OLs puts these facilities under additional pressure.

6.7 Future Routes

The Witzenberg Municipality's Town Planning Department provided information about planned developments, which may require the registration of new minibus taxi routes and additional OLs. Only two such developments were identified, namely: Vredebes and Waverenskroon:

6.7.1 Vredebes

Vredebes, a residential development situated approximately 1.5km north-east of Ceres, is bordered by TR02202 to the south and the Warm Bokkeveld Prison to the north-east. To date only a portion of Vredebes has been developed and some units occupied. Once completed the development will consist of the following:

- 2 151 Residential Subsidy Housing Units
- 334 Residential GAP Subsidy Housing Units;
- 325 General Residential Units;
- 1 Primary School;
- 6 Churches;
- 1 Creche;
- An old age home;
- Community facility;
- 19 000m2 land zoned for Business;
- 3 962m2 land earmarked for a clinic; and
- Sports Fields.

The Traffic Impact Assessment (TIA) (prepared by Deca, dated 3 July 2014), estimated that the development will generate approximately 842 vehicle trips (396 in, 446 out) in the morning peak hour and 872 vehicle trips (532 in, 340 out) in the afternoon peak hour. The TIA does not provide information indicating how these trips will be split between Private Vehicles and Public Transport (Minibus Taxis).

Investigating the provision of routes between Ceres and Nduli indicated that there is an oversupply of OLs operating on the routes between Ceres and Nduli (822, 823, H16 and W66). With route number W66 servicing the portion of Vredebes that is already developed. The existing routes and route authorities are therefore sufficient to serve Vredebes. Routes should be adjusted as portions of Vredebes are being developed and existing OLs' reassigned to these routes as necessary.

6.7.2 Waverenskroon

Waverenskroon is a planned development north of Tulbagh and east of Van Der Stel Street. The proposed development will be developed in seven precincts consisting of the following land uses:

- 1 350 Residential Units;
- 16 970m2 land for Business;
- 20 775m2 land zoned Institutional (community/training centre); and
- 24 400m2 land for recreational purposes (gym, pool, tennis courts, etc.).

Once fully developed the development has the potential to generate 1 936 vehicle trips in the morning peak hour (911 in, 1 110 out) and 2 818 afternoon peak hour vehicle tips (1 678 in, 1 139 out). Similar to the Vredebes TIA, the TIA prepared for Waverenskroon (prepared by iCE, dated June 2015) does not comment on the modal split of these trips and it is therefore unclear what portion of these trips will be via minibus taxi.

There are no existing minibus taxi routes serving this area as the development of Waverenskroon has not commenced and the status thereof is unknown. Furthermore, from the supply/demand analysis, it is clear that there is an oversupply of OLs on routes in Tulbagh (route numbers 878 and L95).

At this stage there is no need for additional route authorities to serve Waverenskroon. Should the development go ahead, some of the existing routes and OLs, can be diverted or reassigned to serve this area.

6.8 Conclusions

6.8.1 Purpose and Objective

- The Operating Licence function has been assigned to the Western Cape Government which has established a Provincial Regulatory Entity (PRE) as required by the National Land Transport Act (NLTA) No 5 of 2009 (the Act).
- Applications for Operating Licenses received by the PRE (or by the NPTR) must be referred to the relevant Planning Authority (Municipality) which must then indicate if there is a need for the service in terms of its Integrated Transport Plan. Planning Authorities may recommend that the application be accepted or rejected or may attach conditions to the approval.
- In an effort to reduce the violence in the public transport industry and also avoid the saturation of operating routes in the Witzenberg, the Witzenberg Municipality decided to undertake the review of the Operating Licence Plan (OLP) for Witzenberg.

6.8.2 Evaluation of Supply and Demand

- To accommodate the passenger demand during peak times, approximately 250 Operating Licences with appropriate route authorities are required. Compared to the number of assigned route authorities (449), there is an oversupply of 199 route authorities.
- Survey results indicated that the fleet size required to serve the passenger demand during peak times is 250. To account for vehicles being out of service, the required fleet size was increased by 10%, from 250 to 275. During the peak period, 310 vehicles (legal and illegal) were seen operating, there is thus an oversupply of 35 vehicles.
- The number of passengers per trip ranges from 4 to 9. Considering that a minibus taxi can accommodate 15 passengers, the low vehicle occupancy indicates an oversupply of vehicles.
- The routes identified as being oversupplied with Route Authorities: 822, 823, H16, W66, 898, Q99, C10, X10, H72, G47, H76, G42, G43, L97, U93, X12, X13, H74, H75, X14, 876, 877, N53, G45, L93, 878, L95, L92, 875, D46, M1, G44, L96, D65, D67, R1 and W54
- The following routes experience an undersupply of Route Authorities: F7, D66, Y9, G33, G48, K96, K97, G49, G50, G51, G52, K98, L98, L1, K99, L2, L99 and R2.
- The number of illegal operators operating in Witzenberg is of concern. Some routes appear to be taken over by illegal taxi operators as none of the vehicles operating on the route are registered on the PRE's database.

6.8.3 Public Transport Facilities

- The Vos Street Informal Taxi rank is located on private property and the overall condition of this facility is poor (no shelter, no seating, gravel surfacing, etc.). An alternative location should be considered.
- The Nduli Taxi Rank along Voortrekker street in Ceres is well utilised and in a good condition.
- Along Vos Street where on-street parking bays are used as minibus taxi the parking bays should be demarcated and reserved for this purpose.
- The number of bays provided along Vos Street (Ceres) and Van Der Stel Street (Tulbagh) is not sufficient.
- The condition of the Prince Alfred's Hamlet formal taxi rank is good; however, it is underutilised. Minibus taxi vehicles prefer to stop along the main road of Prince Alfred's Hamlet to pick up and drop off passengers.
- Although it appears that the Op-die-Berg facility is operating above its capacity, it should be kept in mind that there is a parking area adjacent to the taxi stop with ample parking bays which could be used as additional parking during peak times. However, the conditions of the informal stop should be improved by providing a surfaced parking area with demarcated parking bays, restrooms, shelter and seating.
- During site visits to it was established that there are many informal stops in the towns and that many vehicles stop anywhere along main roads. This could be due to the high number of vehicles not having OLs and therefore not being allowed to use rank facilities.

- The utilisation of facilities should be read in conjunction with the number of vehicles in Witzenberg, using these facilities. Although only vehicles with OLs are allowed to use facilities, the oversupply of OLs puts these facilities under additional pressure.

6.9 Recommendations for Implementation

- The Provincial Regulatory Entity maintains a database of all current Operating Licences. Municipalities do not currently have access to this database. Regular engagement between Municipalities and the PRE is necessary to discuss the outcome of Operating Licence applications. This will ensure that all parties are informed about the status of OLs applications.
- Regular surveys should be conducted to establish the current situation in terms of supply and demand, verify the vehicles currently in operation and identify vehicles operating without Operating Licences. NPR cameras at key point could be put up to collect data on an ongoing basis.
- Surveys should be conducted during the picking season, when minibus taxis experience peak demand, and also during the off season. To avoid an oversupply of OLs, OLs should be issued based on the demand during the off season. During the picking season additional temporary licences could be issued to supplement the existing operating licences and accommodate the increased demand.
- A strategy should be developed to rationalise all existing OLs and manage the approval of OLs.
- Before issuing new OLs, the OLs of routes which are over supplied with public transport trips should be reassigned to routes which are undersupplied in terms of public transport trips.
- Operating Licences not brought into use within 90 days of approval or Operating Licences not used for a period longer than 180 days should be cancelled.
- No new Operating Licences should be approved on routes where there is an oversupply of public transport trips.
- Businesses should be made aware of the Operating Licence system and be encouraged to only use licenced vehicles for staff transport.
- Vehicles without Operating Licences should be subject to law enforcement as a matter of course. Operators without OLs should be encouraged to apply for OLs on routes where a demand for additional trips has been identified. A regularly-updated database which provides easy access for enforcement of OLS information and route descriptions should be established.
- When considering the impact that a development will have on the transport network, Traffic Impact Assessments should investigate the number of public transport trips a development will generate and address the provision of public transport in the area. This will help the Planning Authority to identify new routes and possible OL requirements.

WITZENBERG

MUNISIPALITEIT UMASIPALA MUNICIPALITY

- MEMORANDUM -

AAN : Comitttee for Technical Services
Director Technical Services

VAN : Manager Water and Sewerage

DATUM: 8 May 2023

TRIM : 15/4/1/1/23

CONSTRUCTION OF THE WAVERENSKROON DAM, INLET PIPELINE AND INTAKE WORKS.

A. PURPOSE

The purpose of this memorandum is to inform Council regarding the successful completion of the Waverenskroon dam, inlet pipeline and intake works, as well as the progress with the second and final phase consisting of the rising main and booster pump station.

B. DISCUSSION

The employer's objective with this project was to increase the current insufficient storage capacity of raw water in Tulbagh through the construction of a new earth fill embankment dam.

The contract comprised of the civil engineering construction of an earth fill embankment dam, major earthworks, reinforced concrete structures, trenching, pipe laying an access road and general site works.

Phase 2 of the dam project is currently work in progress and a contractor has been appointed for the amount of R 10 627 454.28 incl VAT. This phase comprises the construction of a new booster pump station and rising water mains and the estimated completion time is July 2023.

C LOCATION OF THE WORKS

The Waverenskroon dam is situated in the Klein Berg River catchment on portion 34 of the farm Kruys Valley 187, in the Witzenberg LM district, approximately 2km northeast of Tulbagh. The portion on which the dam is situated will be transferred to the Witzenberg LM, and the process of registering a servitude for this portion in the name of Witzenberg LM is in process.

✉ 44 Ceres 6835 ☎ (023) 316 1854 (023) 316 1877 admin@witzenberg.gov.za

D CONTRACTUAL MATTERS

D.1 Waverenskroon Dam:

Time Component:

- Original Commencement date: 5 November 2021
- Original due completion date: 16 August 2022
- Actual practical completion date: 16 August 2022
- Actual completion date: 9 September 2022

No extension of time was required on this project.

Financial Component:

-Works Project Value: R 27 640 655.43

-Increased Works Project Value: R 30 000 000.00 (Due to CPA and pipe increase)

- Total Actual Value of Work Complete: R 29 119 894.36 incl VAT

The project was completed within the increased budget as indicated above and on time.

D.2 Rising Main and Pump Station:

Time Component:

- Original Commencement date: 15 December 2022
- Original due completion date: 20 July 2023
- Actual practical completion date: TBC
- Actual completion date: TBC

Currently no extension of time has been requested or granted.

Financial Component:

- Works Project Value: R 10 627 454.23
- Increased Project Value: R 10 695 454.23
- Total Actual Value of Work Complete: R 2 322 392.35

Currently the actual percentage of works completed on the project is at 32%. It should be noted that the bulk of the civil works has been completed and that the biggest portion of the contract is the mechanical component for the pump station.

C. RECOMMENDATION

That Council takes cognisance of the report submitted.

Thank you.

DATUM / DATE : 22 November 2022

DEPARTEMENT OMGEWING EN GERIEWE: ONDERSOEK NA STREEKSBEGRAAFPLAAS: Ceres

AGTERGROND EN BEREDENERING

Die huidige begraafplaas te Bella Vista wie inwoners van Bella Vista, Nduli en Ceres bedien het feitlik vol kapasiteit bereik en is daar slegs beperkte grafspasie beskikbaar.

Met bogemelde as agtergrond is daar op die begroting voorsiening gemaak vir die aanstel van n Konsultant om ondersoek na geskikte grond om n streeksbegraafplaas te vestig te doen.

Na n tenderproses gevolg is ; is 'n kontrak met CES Environmetal and Social Advisory Services gesluit om die nodige ondersoek na geskikte grond te onderneem, spesialis ondersoek soos vereis deur wetgewing te onderneem asook om die aansoek voor die Departement van Omgewingsake en Visserye vir goedkeuring te bring.

Die perseel wat vir ontwikkeling geidentifiseer is is gedeelte van erf 82/364 (sien lugfoto aangeheg). Die area is tans onontwikkel en is 'n gedeelte meentgrond aangrensend aan die nuwe herwinningsstasie(MRF) en naas die vorige stortingsterrein.

AANBEVELING

1. Vir kennisname
2. vir kennisname dat aansoek om befondsing vir die infrastruktuurontwikkeling van die beoogde begraafplaas reeds by MIG geregistreer is.

REPORT TO COMMITTEE FOR COMMUNITY DEVELOPMENT ON THE WITZENBERG DISASTER MANAGEMENT FRAMEWORK

1. PURPOSE

To provide the Committee for Community Development with an executive summary of the Disaster Management Framework for possible approval and furtherance to council for consideration.

2. EXECUTIVE SUMMARY

It is stipulated in Section 42(1) of the Disaster Management Act (No. 57 of 2002) as amended by Disaster Management Amendment Act (No. 16 of 2015) (DMA) that each municipality is to establish and implement a framework for disaster management in the municipality aimed at ensuring an integrated and uniform approach to disaster management in its area.

The policy framework provides those with statutory DRM responsibilities (in terms of the DMA, National Disaster Management Framework, the Western Cape Disaster Management Framework and other applicable legislation) within the Witzenberg Municipality with a written mandate which is coherent, transparent and inclusive. It provides the criteria for the systematic management of administrative decisions; stakeholder participation; operational skills; and capacities. It ensures uniformity is achieved in the development, implementation, maintenance, monitoring and assessing of all policies, plans, strategies, programmes, projects and practice which are aimed at achieving the vision and mission statement; goals; strategic objectives; and key performance indicators for disaster risk management in the municipality.

The Witzenberg Disaster Management Framework takes on the structure of the National, Provincial and District Frameworks, in that it includes four main Key Performance Areas and Three Enablers.

The four Key Performance Areas expanded upon the Framework include:

- Integrated Institutional Capacity
- Disaster Risk Assessment
- Disaster Risk Reduction
- Response and Recovery

The three Enablers include the following:

- Information and communication
- Education, training and public awareness
- Funding arrangements for DRM

3. FINANCIAL IMPLICATION

None

4. LEGAL IMPLICATION

Applicable legislation is as follows:

a) Disaster Management Act (No. 57 of 2002) as amended by Disaster Management Amendment Act (No. 16 of 2015).

5. RECOMMENDATIONS

It is recommended that the Committee for Community Development consider the Disaster Management Framework for furtherance to Council for approval.

Dear Municipal Manager

REPORT OF FIRE SAFETY AND PREVENTION CAPACITY ASSESSMENT CONDUCTED FOR WITZENBERG LOCAL MUNICIPALITY

As you know, firefighting services in terms of Schedule 4, Part B of the South African Constitution is the responsibility of local government with national and provincial oversight. The Fire Brigade Services Act, 1987 (Act No. 99 of 1987) (FBSA) is one of the pieces of legislation administered by the Department of Cooperative Governance (DCoG). The purpose of the FBSA is to provide for the establishment, maintenance, employment, co-ordination, and standardisation of fire brigade services and for matters connected therewith.

The National Disaster Management Centre (NDMC) has a project during the current Financial Year (FY) 2021/22 which seeks to support implementation of the National Fire Safety and Prevention Strategy (NFSPS) through fire safety and prevention capacity assessments in identified municipalities. In line with international good practice, the following are some of the objectives of the NFSPS:

i. Protection of state and national infrastructure (e.g. airports, hospitals) from loss/damage or disruption of vital economic activity (e.g. tourist industry) by fire;
ii. To get fire safety advice to target audiences; and
iii. To ensure that design of new buildings takes proper account of fire safety.

The Western Cape Provincial Disaster Management Centre (PDMC) identified Witzenberg Local Municipality (WLM) as one of the 10 municipalities across the country that required support as part of this project.

My team interacted virtually with Ms Annelize Lamprecht-Vertue, Chief Fire Officer in your Municipality on 21 October 2021 and assessed the municipality's capacity to implement fire safety and prevention programmes as contemplated in the NFSPS as well as in the FBSA and other applicable legislation. These officials took part in the remote assessment i.e. Mr Thibedi Jappie Lengoabala, Deputy Director: Fire Services, Mr Mpho Matshweu, Assistant Director ASD: Fire Services.

The assessment revealed several key issues that have been grouped thematically in line with the themes of the assessment template. The key assessment findings are as outlined below:

1. ASSESSMENT FINDINGS

1.1. Institutional Arrangements

The assessment revealed that the WLM has the authority to render firefighting services. This means that the WLM is accountable for the provision of fire services including fire safety and prevention within the municipality. With regard to the number of dedicated personnel for fire safety and prevention, the team has noted that, currently, the Chief Fire Officer and her team are executing these responsibilities. The assessment team appreciates the measures put in place to manually manage fire safety records. The team applauds the efforts that the municipality puts towards the improvement of Fire Services and wishes to encourage you to work towards having a dedicated budget for fire safety and prevention.

1.2 Regulatory Framework

The team noted that the WLM has a fire services bylaw, which is supplemented by use of directives, regulations and South African National Standards (SANS). It was noted with appreciation that Fire Service bylaws covers the risk dynamics of the municipality which include, built-up areas mostly in towns, veldfire and structural fires risks.

1.3 Fire Risk Profile

Within the South African context, risk assessment must consider provisions of the relevant South African National Standard, i.e. ***(SANS) 10090:2003 Community Protection against Fire***. This standard recognises the need for a risk-based approach by setting performance requirements that allows fire

service some flexibility to apply a risk-based approach. The fire-risk categories into which the area of jurisdiction could be divided is outlined in **Table 1** below:

Table 1: Fire risk categories

CATEGORY	DESCRIPTION
A – High Risk	Central business districts and extensive commercial and industrial areas normally found in cities and large towns.
B - Moderate Risk	Limited central business districts, smaller commercial or industrial areas normally associated with small towns and decentralized areas of cities and large towns.
C	Residential areas of conventional construction;
D	Rural risk areas of limited buildings and remote from urban areas.
E	Special Risks requiring an attendance over and above that of the predominant risk category above i.e. large shopping/entertainment centres, informal settlements, harbours, hospitals, prisons, large airport buildings, and petrochemical plants.

The assessment revealed that the WLM falls largely within the fire-risk categories B. In this regard, the fact that the municipality has one (1) hospital and one (1) old age home means that there are significant fire risks requiring robust fire safety systems to prevent the likelihood of fires in these critical facilities.

1.4 Fire Safety and Prevention Code Enforcement

With regard to fire safety and prevention code enforcement, the team learned that this is hindered by the lack of dedicated capacity within the Fire Safety and Prevention unit. The team noted that WLM has put measures in place to enforce fire safety and prevention codes through allocating Leading Firefighters to oversee fire safety. Furthermore, WLM participates in multi-disciplinary joint operations with traffic department to improve compliance with bylaws and other pieces of legislation quarterly.

1.5 Building and Township / Spatial Development

The team noted that the Chief Fire Officer participates in township/ spatial development planning structures. While the assessment revealed that there are adequate mechanisms to handle building plans and rational designs, the team noted concerns that there is a significant shortage of staff to cover all areas within WLM.

1.6 Dangerous Goods Management / Major Hazardous Installation (MHI)

The Municipality has mechanisms in place to handle issuing of fire permits to regulate storage and transportation of dangerous goods within the municipality.

In this regard, it was noted that, at this point, the municipality is not charging for processing these applications.

1.7 Community Based Fire Safety and Prevention Initiatives

The team noted that the municipality has put in place measures to ensure ongoing public education and awareness in schools and different community areas which is driven by operational personnel under the leadership of the Chief Fire Officer.

1.8 Fire Hydrant Maintenance

The assessment team noted that there are fire hydrants in all different areas within local municipalities. Maintenance of fire hydrants is done by the WLM through the expanded public works programme workers on a regular basis.

1.9 Fire Protection Association

The assessment revealed that, currently, there is one (1) registered Fire Protection Association (FPA) within the Municipality. The team further noted that the FPA in the area has a good working relationship with the municipality. In this regard, WLM also assists with control burning and burn permits.

1.10 Trauma Counselling

With regard to trauma counselling, the assessment revealed that the municipality have debriefing sessions that are done regularly to ensure that employees are debriefed post handling traumatic incidents.

2 RECOMMENDATIONS

The NDMC wishes to reiterate that ensuring a safe and healthy environment for communities is a core constitutional objective for local government. While I greatly appreciate and commend you for the work you are doing, I wish to encourage you to implement the following proposed recommendations (aligned to assessment findings) in order to improve fire safety and prevention in your Municipality thereby contributing to the reduction of fire losses and risks in our country:

2.1 Consider establishing a stand-alone Fire Safety and Prevention unit with dedicated staff and budget;

2.2 Adopt South African National Standard (SANS) 10090 as a service delivery standard;

2.3 Adopt South African National Standard (SANS) 1157: Transport of dangerous goods — Inspection requirements of road vehicles for the issue of municipal dangerous goods transport permits as a standard code of practice;

2.4 Develop a fire safety and prevention Standard Operating Procedures (SOP);

2.5 Develop and implement a fire safety code enforcement programme targeting high-risk facilities such as hospitals, clinics, specials schools, prisons, etc, in order to prevent fires that could result in multiple fatalities in buildings to which the public have access;

2.6 Strengthen community-based fire education and awareness;

2.7 Encourage collaboration with the District in advancing the cause of fire services to meet the needs of our communities;

2.8 Collaborate with relevant Departments to ensure that fire hydrants are installed in strategic areas as per the risk profile;

2.9 Work closely with the geographic information system team to ensure that existing fire hydrants are geographical mapped; and

2.10 Ensure continued closer working relations between the Fire Services and the FPA to manage veldfire risks in an integrated manner.

I wish to reiterate my appreciation for the robust fire safety and prevention systems that you have put in place within Witzenberg Local Municipality. The NDMC will continuously support you in your quest to improve fire safety and prevention capabilities.

You are welcome to contact either Dr Musiwalo Moses Khangale at jappiel@ndmc.gov.za , Mobile: 071 860 4596, Telephone: 012 848 4620 or Mr Ndivhuwo Ndaba at ndivhuwon@ndmc.gov.za, Mobile: 071 952 9451, Telephone: 012 848 4707 for clarity or any additional information on this matter.

Your support and assistance in advancing the cause of fire services to meet the needs of our communities is appreciated.

Kind regards

Mmaphaka Tau (PhD)

In conclusion

- In line with the Government Job creation strategy, SRSA is creating opportunities for people to start up new businesses and employ people.
- SRSA have has collaborated with various funding partners to make it easy for people to start their own Tyre Business
- SRSA have established meaningful partnerships with various Automotive partners that has brought competitive pricing to our customers
- This partnerships provides multiple income stream for all our customers in the automotive industry.
- SRSA will support and walk with SMME's throughout the Journey
- The main intention is to create an easy entry to the Tyre Industry for SMME's(Townships & Rural Areas) and to create much needed employment in their communities.

Thank You

Introduction

Communication is key and an integral part of any organization. It is also our municipal mandate.

Communities within Witzenberg should receive better communication from the municipality.

This revised strategy therefore endeavours to function as:

- A Municipal Communication Blueprint that identifies and defines the organisation's communication stakeholders and role-players, its functional communication structures and processes, the required resources and the allocated responsibilities so as to effect a proactive and responsive municipality;

- A support strategy aligned to the IDP that is easily understood and adhered to by all local government officials to ensure the integration of 2-way community feedback mechanisms as well as effecting the perception of 'one voice' consistently speaking to the community so as to increase municipal credibility, build public confidence in government, and enhance Public Participation.

Effective communication is about how municipalities promote democracy and encourage citizens to play a more active role in how they are governed. It is about promoting its role in the community and ensuring that citizens have a better understanding of local government. Most importantly, it is about ensuring that people form part of the process of creating a better life where they live.

Effective communication is vital in keeping the public informed and ensuring that the Municipality remains accountable. The Municipality needs to build upon its current communication practices and ensure that municipal communication is proficient at delivering a consistent set of messages which underpin and reinforce its vision and mission statements.

Strategic Objective		Implication	Link to Communication
1.	Ensuring that municipalities meet the basic service needs of communities	This implies that an environment is created, support provided and systems built to accelerate quality service delivery within the context of each municipality's conditions and needs	• Utilise awareness campaigns to ensure communities are aware of what municipal services are available to them and how to access them. • Ensure an effective complaints handling system and customer friendly service centre is available to citizens • Ensure feedback mechanisms
2.	Building clean, effective, efficient, responsive and accountable Local Government	Make sure that systems and structures and procedures are developed and enforced to deal with corruption, maladministration and ensure that municipalities communicate and account more to communities	• Ensure the effective flow of communication to and from the municipality and resident, particularly through the effective use of Ward Committees and their Councillors • Ensure an Accountability Model with defined roles and responsibilities is developed and adhered to by all role-players.
3.	Improving functionality, performance and professionalism in municipalities	Ensure that the core administrative and institutional systems are in place and are operational to improve performance	• Ensure communication, of all nature, flows in a structured and traceable process with measurable timelines indicated for feedback. • Ensure the appointment of skilled staff and/or regular training particularly with regards to front-line staff in areas such as Customer Care. • Ensure that communication is clear, simplified , and utilises "Plain Language Principle"

4.	Strengthening partnerships between Local Government, communities and civil society.	Ensure that communities and other development partners are mobilized to partner with municipalities in service delivery and development.	• Ensure Communication is a standing agenda point on all relevant meetings and forums and that the interaction and feedback routes are clearly mapped between all forums • Ensure informative, professional, and regular communication is directed and sustained with civic structures and organisations. • Develop a distinct Business2Business and Corporate communication strategy aimed at investors and local business in the area • Develop a Communication Strategy that is inclusive of the Rural population (i.e. farmworkers)
5.	Improving national and provincial policy, oversight and support		• Ensure active participation in Provincial structures such as the Provincial and District Public Participation and Communication Forums • Ensure participation and cooperation in communication activities between the three (3) spheres of government

In achieving these objectives, we will mobilise government and society to protect and enhance the Local Government system by addressing the forces undermining the system and addressing relevant areas for improvement.

Provincial Environment

Municipal Assessments

A provincial Municipal Assessment Project was undertaken from 8-10 September 2009 to establish root causes for poor performance, distress or dysfunction in municipalities.

Amongst others, the assessment revealed a tremendous communication gap between communities and their municipalities as community members were un-informed of service delivery progress in their areas.

At an additional Public Participation Dialogue session held on 18 March 2010, the commission identified:

- A lack of effective Communication Strategies and Action Plans in Municipalities;
- A lack of Communication Strategies that practically and strategically link into the mechanisms relating to accountability to the people as well as lack of feedback mechanisms;

Communication was additionally identified as the key driver in public participation as it should provide strategic and technical advice to campaigns, broaden community participation, and strengthen participatory democracy.

TYPICAL COMMUNICATION APATHY CHALLENGES
• Positioning the post of Communication Manager as a high level strategic post within the organogram and organization;
• Employing dedicated and skilled Communication staff;
• Sufficiently budgeting for communication projects;
• Integrating development Communication into municipal projects and public participation

Communication planning should therefore be fundamentally and inseparably integrated into any form of public participation planning and implementation as community participation will always use the basic model and modes of communication.

A provincial dipstick analysis of the state of Municipal Communication further revealed that the majority of municipalities in the province displayed a general apathy towards effecting Citizen Communication with particular reference to:

The absence of the above criteria obstructs a municipality from realizing effective Citizen Communication.

Provincial Communication Commitments

In order to ensure the revival and sustainable effectiveness of Citizen Communication at a Local level, the provincial Department of Local Government has undertaken a number of noteworthy actions so as to ensure its commitment and support to the development and success of communication in the province:

Municipal Communications Unit	Budget Speech	Annual Performance Plan
The provincial Department of Local Government has established a separate and distinct Municipal Communications Sub-directorate within the Directorate: Public Participation to provide focused and strategic communication assistance to Municipalities.	The MEC for Local Government pledges the Department's commitment to assist municipalities with the development and implementation of effective communication strategies in the Annual Budget Speech.	The Department undertakes to monitor and support active citizen participation in governance as well as effective citizen communication strategies in municipalities. This ensures consistent and regular support to municipalities.

Local Environment

Integrated Development Plan (IDP)

Communication is inherently central to the IDP process as citizens are defined by law to be part of the municipality and to actively participate in municipal planning, budgeting, drafting of by-laws and policies as well as monitoring the performance of the municipality – all of which entails extensive communication between all the stakeholders.

The IDP process therefore requires strong and clear channels of communication, with particular emphasis on quality feedback mechanisms from residents, in order to develop an IDP that is both credible in the both the drafting process and its content. As such, the municipality has a duty to facilitate public involvement by providing meaningful opportunities for the participation process and to take measures to ensure that people have the ability to take advantage of such opportunities.

As such, the Communication Strategy will address the communication needs of Public Participation and IDP processes so as to prioritise and organise its communication activities, to market it and make it available to the public with the aim of communicating the priorities and activities of the IDP process more widely – many of which are typically internally focused and therefore "invisible" to the public and the rest of the municipality.

The IDP is not only a strategic framework that guides performance but also a vehicle for communication and a yardstick for political accountability – the development and monitoring of the IDP serves as both a basis for engagement between state and citizen as well as an instrument against which citizens can hold the Council accountable.

The budgeted projects listed and detailed in the IDP should indicate tremendous opportunities for "good news" communication. Informing communities of the investments, restorations and developments made by municipality in their area assists in restoring the confidence of citizens in the municipality as "the primary delivery machine of the developmental state at a local level" – a key objective of the LGTAS.

Given that these projects are already budgeted for and planned for, proactive communication strategy can already be developed to be coupled and executed in conjunction with the relevant projects.

For example, smaller projects, such as the installation of a R 4000 reading mat into the library should translate into a media release, posters for the library detailing the investment from "A municipality that cares" (feed into identified theme), a small community handover and an article to be published in the newsletters and website.

For larger projects indicated in the IDP, for example the installation of a Electricity in Pine Valley, there would typically be a need for communication prior, during, and after the execution of the project so as to ensure that the community is continually informed of the activity ("a working government"), the extent of the investment ("value for money"), the related benefits ("A better life for all"), and general awareness with regards to the responsibilities of both the municipalities and residents in maintaining the investment. At the conclusion of the project, report backs to the community as well as positive media coverage on the investment should be take place.

Planning ahead of time for these communication activities ensure that the required information and resources are identified and sufficient time is allocated to sourcing the necessary information, developing the communication products, and coordinating any related logistics.

A detailed Communication sub-strategy should therefore be strategized to accompany the IDP process.

Municipal Local Government Turn Around Strategy

The LGTAS is underpinned by the important consideration that a "one size fits all" approach to municipalities is not useful or acceptable.

Each municipality faces different social and economic conditions and has different performance levels and support needs. Thus, a more segmented and differentiated approach is required to address the various challenges of municipalities.

There are a number of indications in the Municipal LGTAS that have a direct impact on communication. Below are indicators that have been extracted from a sample LGTAS that have a direct bearing on communication:

No	Priority Turn Around Focal Area	Link to Communication
1	Political Management and Oversight	
1.1	Training of Councillors	As key communicators and gatekeepers of information, all Councillors must receive Communication training as well as briefings with regards to their communication responsibilities.
1.2	Feedback to communities	Feedback mechanisms must be established, marketed, and managed. An accountability model/system must be developed and adopted to ensure a clear delineation of the role-players and their responsibilities to affect successful feedback.
1.3	Financial Management	Reports of a loss of revenue and growing debtors indicate the need for a "Good Citizenship" campaign detailing the need and responsibility of citizens to pay their municipal accounts.
2	Public Participation	
2.1	No communication between ward committees and communities	Improve communication
2.2	Communication Policy not implemented	Revise, adopt, and implement clear and relevant strategy
2.3	Limited dedicated communication officials	Budget and appoint dedicated communication staff
2.4	Public Communications System	Invest in necessary communication equipment
2.5	Complaints management systems	Develop and implement a Customer Care strategy and effective complaints management system.
2.6	Control Room Interface	Ensure front-line staff receive customer service training and clear administrative routes through which to channel and receive information.

2.7	Complaints of lack of Xhosa communication with reference to the Ward CDW's	Revise, adopt, and implement Language Policy. Forecast and budget for the expense of translation services.

IDP Public Meetings and Ward Committee Minutes

The minutes of the IDP Public and Ward Committee meetings are good research documents for identifying the communication requests and requirements identified by the communities, particularly if Communication is a standing item on the agenda of Ward Committee Meetings. The community feedback below links into and informs the strategic communication priorities that need to be implemented in the Municipality:

	Public Communication Requests	Communication Priority Area
1.	Communicate in all three languages (English, Afrikaans, Xhosa)	Development and implementation of Language Policy
2.	Implement Municipal Communication Strategy	Revise and adopt Communication Strategy
3.	Host a call-in show on the radio	Establish and manage feedback mechanisms
4.	Improve distribution of information	Establish and manage feedback mechanisms
5.	Establishment of a Toll-free Customer Complaints line	Establish Customer Care strategy and facilities

Legislative Framework

Municipal Systems Act, 2000	Promotion of Access to Information Act, 2000 (Act of 2000)
Sections 18 (2): When communicating information the municipality must take into	This Act operationalizes sections 8 and 32 of the Constitution. It aims to foster a culture of transparency and accountability and to promote effective access to

account (a) Language preferences and usage in the municipality, and; (b) the special needs of people who cannot read or write.	information to protect an individual's rights.
Section 4: A municipal council has, within its capacity, the right to: • Provide without favour and prejudice, democratic and accountable government • Encourage the involvement of the community • Consult the community on the level, quality and range of services and the delivery options • Provide members of the local community equitable access to the services to which they are entitled	The Act applies to the records of public and private bodies, regardless of when the record came into existence (Section 3): • A record held by an official is regarded as a record of the institution (Section 4) • A requester must be given access to records of a public body if he or she complies with procedures and if there is no ground for refusal in terms of Chapter 4 of the Act • Some information can be technical: if in doubt, the official must consult. • The information officer of a public body is responsible for the administration of the Act in a public body. • An information officer is defined in Section 1 as the Chief Executive Officer. Therefore, in a municipality it is the Municipal Manger. • A public body must designate such number of deputy information officers as may be necessary to ensure reasonable access. • Within six months, the information officer must compile a manual in at least three official languages, containing: – A description of the structure and its functions; – Addresses and telephone numbers; – Details to facilitate requests; – Services available to the public; – Other information required by the Act (Section 14)

	• The manual must be updated and published annually. • The manual must be available to the public (Section 14). • Requests for information must: – Be in prescribed form – Identify the record – State the language in which it is required – Specify addresses and telephone numbers – Identify capacity

Constitution	Bill of Rights	Intergovernmental Relations Framework Act, 2005 (Act 13 of 2005)
Section 152 (1)(e): In setting out of the objects of local government, it states that municipalities must "encourage the involvement of communities and community organisations in matters of local government".	The right to freedom of expression, the right to receive information and the right of access to information, which includes access to any information held by the State.	This Act establishes a framework for national, provincial and local governments to promote and facilitate intergovernmental relations (IGR) and provides for mechanisms and procedures to facilitate the settlement of intergovernmental disputes.
Section 160 (7): "A municipal council must conduct its business in an open manner, and may close its sittings, or those of its committees, only when it is reasonable to do so".		Through the work of IGR forums, implementation protocols can be developed to advance the work areas of government, especially in terms of assisting the various spheres of government in implementing policies but also to ensure that the various spheres can implement their constitutional obligations effectively.

Vision and Mission

At the IDP Strategic Session held on 07 February 2012, revision of our current vision and mission was proposed. The current vision for the Municipality is:

A municipality that cares for its community, creating growth and opportunity.

Mission:

The Witzenberg Municipality is committed to improve the quality of life of its community by:

- *Providing and maintaining affordable services.*
- *Promoting Social and Economic Development*
- *The effective and efficient use of available resources*
- *Effective Stakeholder and Community participation*

Key areas of focus for the vision and mission are alleviating the plight of the poor, local economic development, special focus on our natural environment and the resources available within Witzenberg.

Objectives of Communications Strategy

Effective communications is about how municipalities promote democracy and encourage citizens to play a more effective role in how they are governed. It's about promoting their role in the community and ensuring that citizens have a better understanding of local government. But most importantly, it is about ensuring that people form part of the process of creating a better life where they live.

The strategy therefore aims to ensure that the municipality always strives to make the community part and parcel of decisions that impact on their lives.

The objectives must support the Municipality's Vision and Mission. To do this, the objectives must be developed in such a way that they can be unpacked in the Communication Strategy and Action Plan. The best way to accomplish this is to ensure that the objectives set SMART:

- Specific
- Measureable
- Attainable
- Realistic
- Timely

For example:

Project Goal: Influence what the broad public thinks about flood control

Communication Goal: Attract more attention to flood risk in general

Action Plan Goal: By 2022, publish at least 30 relevant articles in newspapers and local media.

Sample Objectives (to be converted to goals in Action Plan):

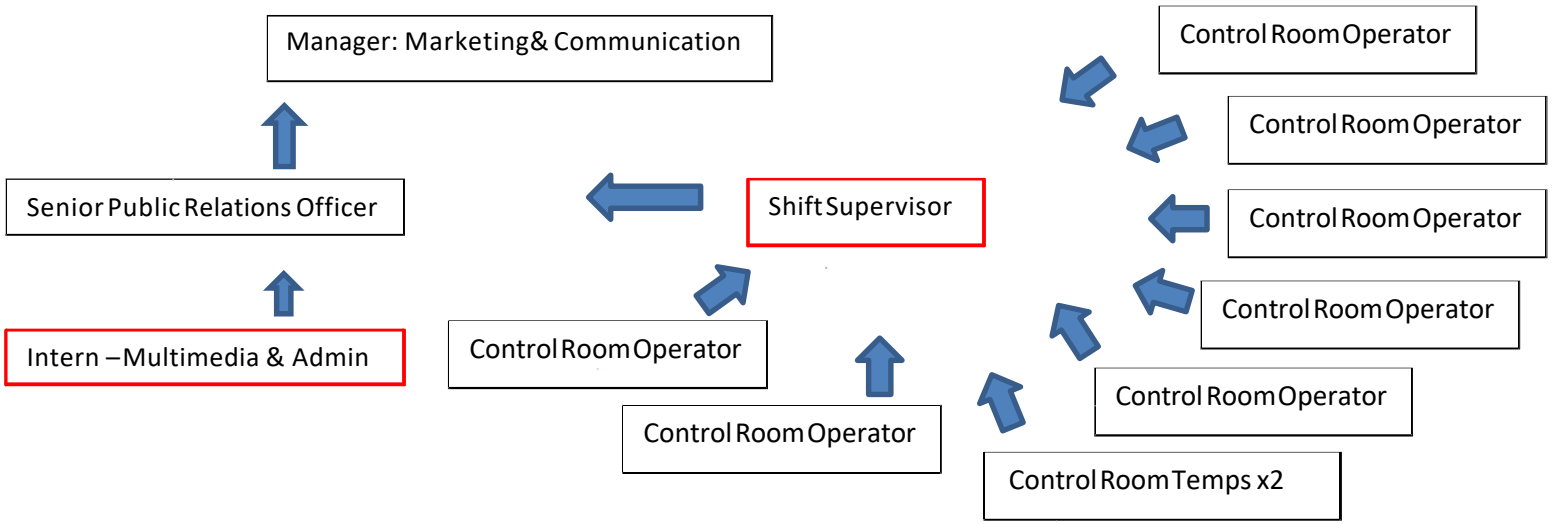
- To promote effective public participation within the IDP planning process by ensuring that all communities and stakeholders are aware of the IDP process, how they can access it, how they can give input to it and get output regarding issues.
- To ensure continuous, sustainable, responsive, two-way communication to communities through increased accountability and improved Customer Care and Communication.
- To allocate sufficient resources and support to implement and effect the Communication and Public Participation mandate.
- To make a commitment to establishing functional communication channels and structures and improve internal communication to ensure a shared purpose and clarity of message for officials to follow.
- To build a sense of community both internally and externally while fostering a responsive, proactive municipal identity via positive utilization of the media and improved community feedback.

Communication Structure

The Office of The Mayor is central to the process of effective communication between the municipality and the residents. It is therefore ideal that the communications unit be headed up by a person who reports directly to both the Mayor (politically) and Municipal Manager (administratively).

Every employee and political representative of the Municipality should be able to act as communicator for the municipality. The most basic message that everyone should be able to communicate is the vision and mission statement, as well as the annual strategic objectives of his or her department, and the key issues as identified in the IDP review process. Furthermore, employees should be subjected to a code of conduct that would ensure he or she does not bring the Municipality into disrepute. However, certain messages will need skilled and specific messages. Key messages will form the basis of the strategy. External communication should reinforce and consistently relay key messages

- Municipal Manager and Offices of the Mayor and Deputy Mayor - communication with media should be restricted to these offices, unless agreed upon that another messenger or spokesperson will speak on a specific topic. In that instance it is important to ensure that there is no ambiguity in the messages and that the spokespersons designated, Mayor's office, DM and MM speak with one voice and one message.
- Call centre/Control Room – a telephonic interface with the public which acts as a frontline information provider to the public. This interface usually addresses queries concerning municipal accounts, connection of electricity, water supply and other types of basic service delivery. In smaller municipalities, the control room provides a telephonic relay service to protection services, traffic service, emergency medical services, fire services and general queries after hours.



Municipal Challenges

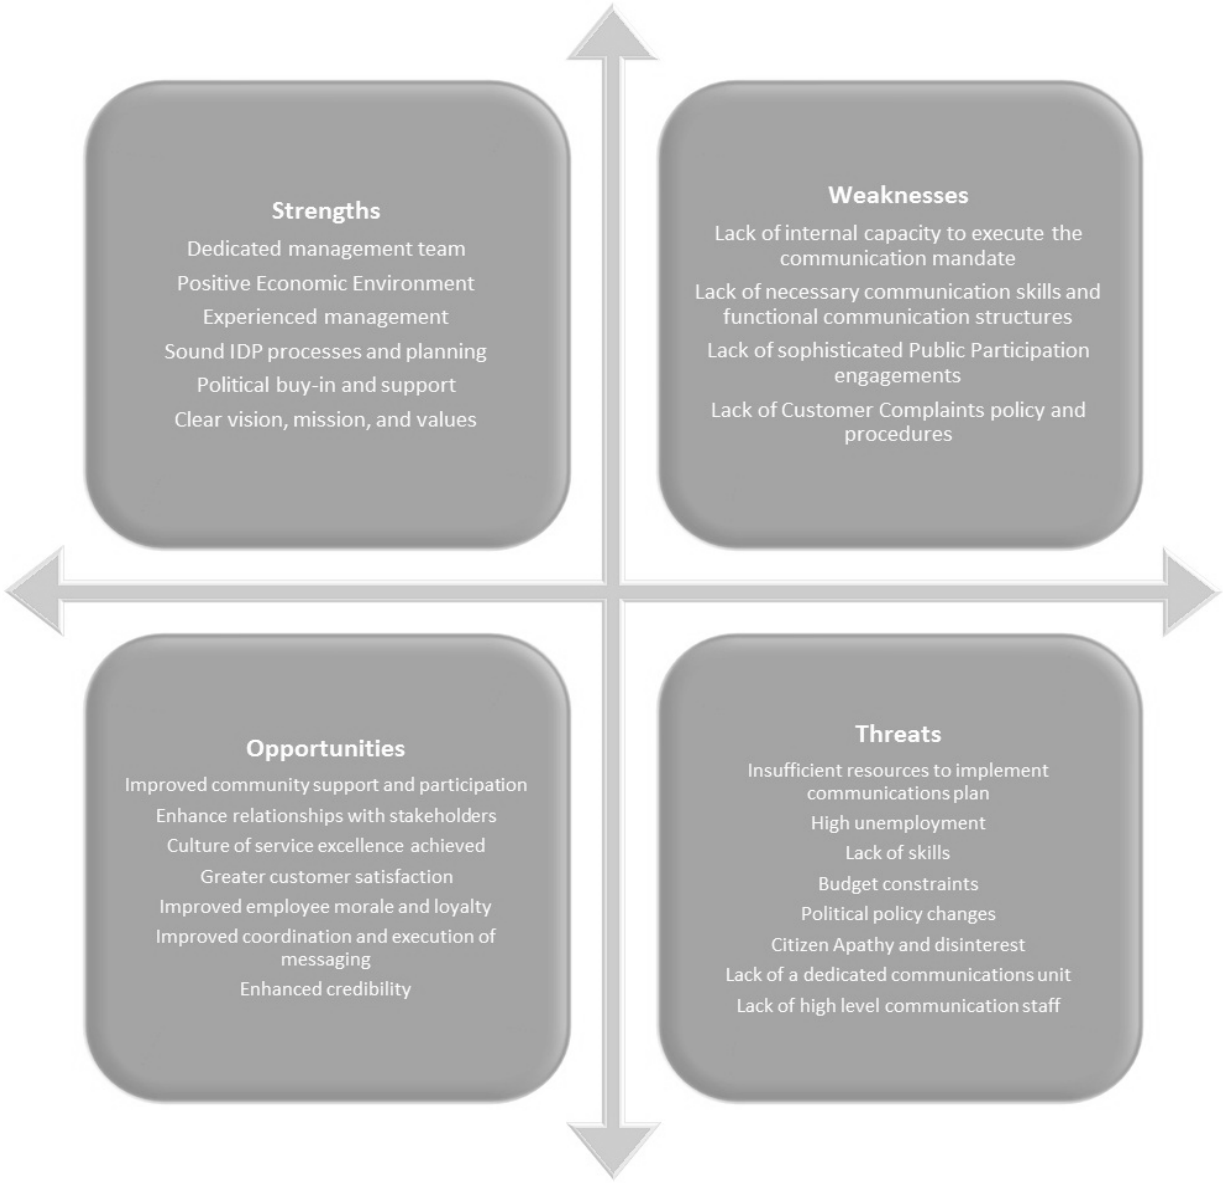
The challenges faced by the municipality are an important consideration when strategizing for communication as these will inform the focus areas of communication, the preparation of sensitized public responses, as well as how to best tailor the communication products to the mind-set of the people.

Municipalities face a number of challenges that affect public mood and sentiment, particularly regarding service delivery that should be considered prior to planning a communication project or engagement:

Challenge	Description	Communication Implications
Unemployment	Employment is a major problem in the municipal area, due to work being seasonal. The high levels of unemployment and low levels of self-employment can be attributed to the low skills base in the municipal area. A gender breakdown of unemployment reveals that unemployment among women is twice that of males. Unemployment also correlates strongly with race as it is largely correlated among Coloured and Black households.	There should be strong communication surrounding the empowerment and skills development programmes. Officials should also have sensitized prepared general responses regarding potential employment queries when prior to attending public engagements. There should be a large amount of publicity surrounding skills development, employment, and empowerment programmes so as to indicate to the community that the municipality is addressing their concerns.
Housing Backlog	The large backlog of houses in municipal area, which the Council has decided to address by one town fully at a time in an attempt to avoid conflict.	Given that this is basic need that is prevalent to many citizens, the Housing Strategy of the municipality needs to be clearly communicated and responses should be proactively prepared so that all Councillors and municipal officials now how best sensitively respond to public enquiries. There also needs to be a clear plan as to how to reduce this support to the public as the Municipality cannot be an agent to assist with housing provision indefinitely.
Education	Education levels are relatively low in the area	These recorded education and literacy levels should be taken into account

	with few residents pursuing studies beyond secondary school.	when developing communication products. Especially read language proficiency (correct level of English/Afrikaans/Xhosa) and comprehension levels.
Specialised groups	A significant sector of our population suffer from disability, specific communication mechanisms need to be employed to reach these minorities.	Relevance of information and mechanisms of relay need to be tailored to the needs of this target public. (communication reach to the rural, disabled, blind, hearing/speech impaired)
Access to communication-specific research	Statistics regarding the efficacy of communication in rural and farming communities require study.	Research areas include the correct level of business Xhosa and Afrikaans understood by this demographic as well as the penetration and success of the monthly newsletter with this demographic. Recommendations as to communication alternatives which will be more effective can be determined by gauging the psychographics of this demographic.
Complaint management	The lack of an effective and user-friendly complaints and feedback tool does not adequately address the needs of the public.	Social media can provide cost effective and relevant solutions to this issue. A social media strategy will then need to be devised but then the mind-set of the Municipality will need to change as the digital restrictions prevent employees from high level networking. Concurrently, employees will require training as to how to use their networks to enhance their functions.
Budgetary constraints	Communication and marketing received a small budget for actions.	Communication and marketing need a budget to address community, business and government needs. Perception that communication and marketing is not service delivery aspect will need to change in order to adequately address this need.
Limited social media usage	Online media presence is limited	Need to develop a social media strategy and increase our search engine optimisation to provide our website with a higher profile, this is especially important with our tourism sectors.
Population influx	Influx of population leading to growing informal settlements	Need to devise strategy to discourage the development of informal settlements .
Climate change	Changing weather patterns and decreasing availability of water are a prevalent concern to commercial farmers, businesses and residents.	There is a great need for environmental communication in the area so as to educate and inform citizens of how best to sustainably manage the available natural resources and to create awareness with regards to water shortages.
Limited Internal capacity within the communications unit	Limited capacity ito staff within the communications unit to execute communication tasks	Messages are not done timeously, and only on limited platforms due to lack of capacity to cover all aspects.

Communication SWOT Analysis



Role of Communication in Public Participation

Public participation through communication is the continuous, planned, structured and organised use of communication in the promotion of development, working towards changing the attitudes and/or behaviour of the general public, through the dissemination of reliable information and through encouraging the active and conscious participation of the broad public in the process.

There is an intricate interrelated relationship between communication and participation, whereby communication is both a prerequisite for effective participation and an on-going, parallel process.

Most often, public participation implies broad-based communication, the provision of accurate and reliable information to the general public. The effectiveness of any participation process is fundamentally linked to the institutional capacity of a municipality to maintain an effective communication system. Successful participation is absolutely dependent on good communication.

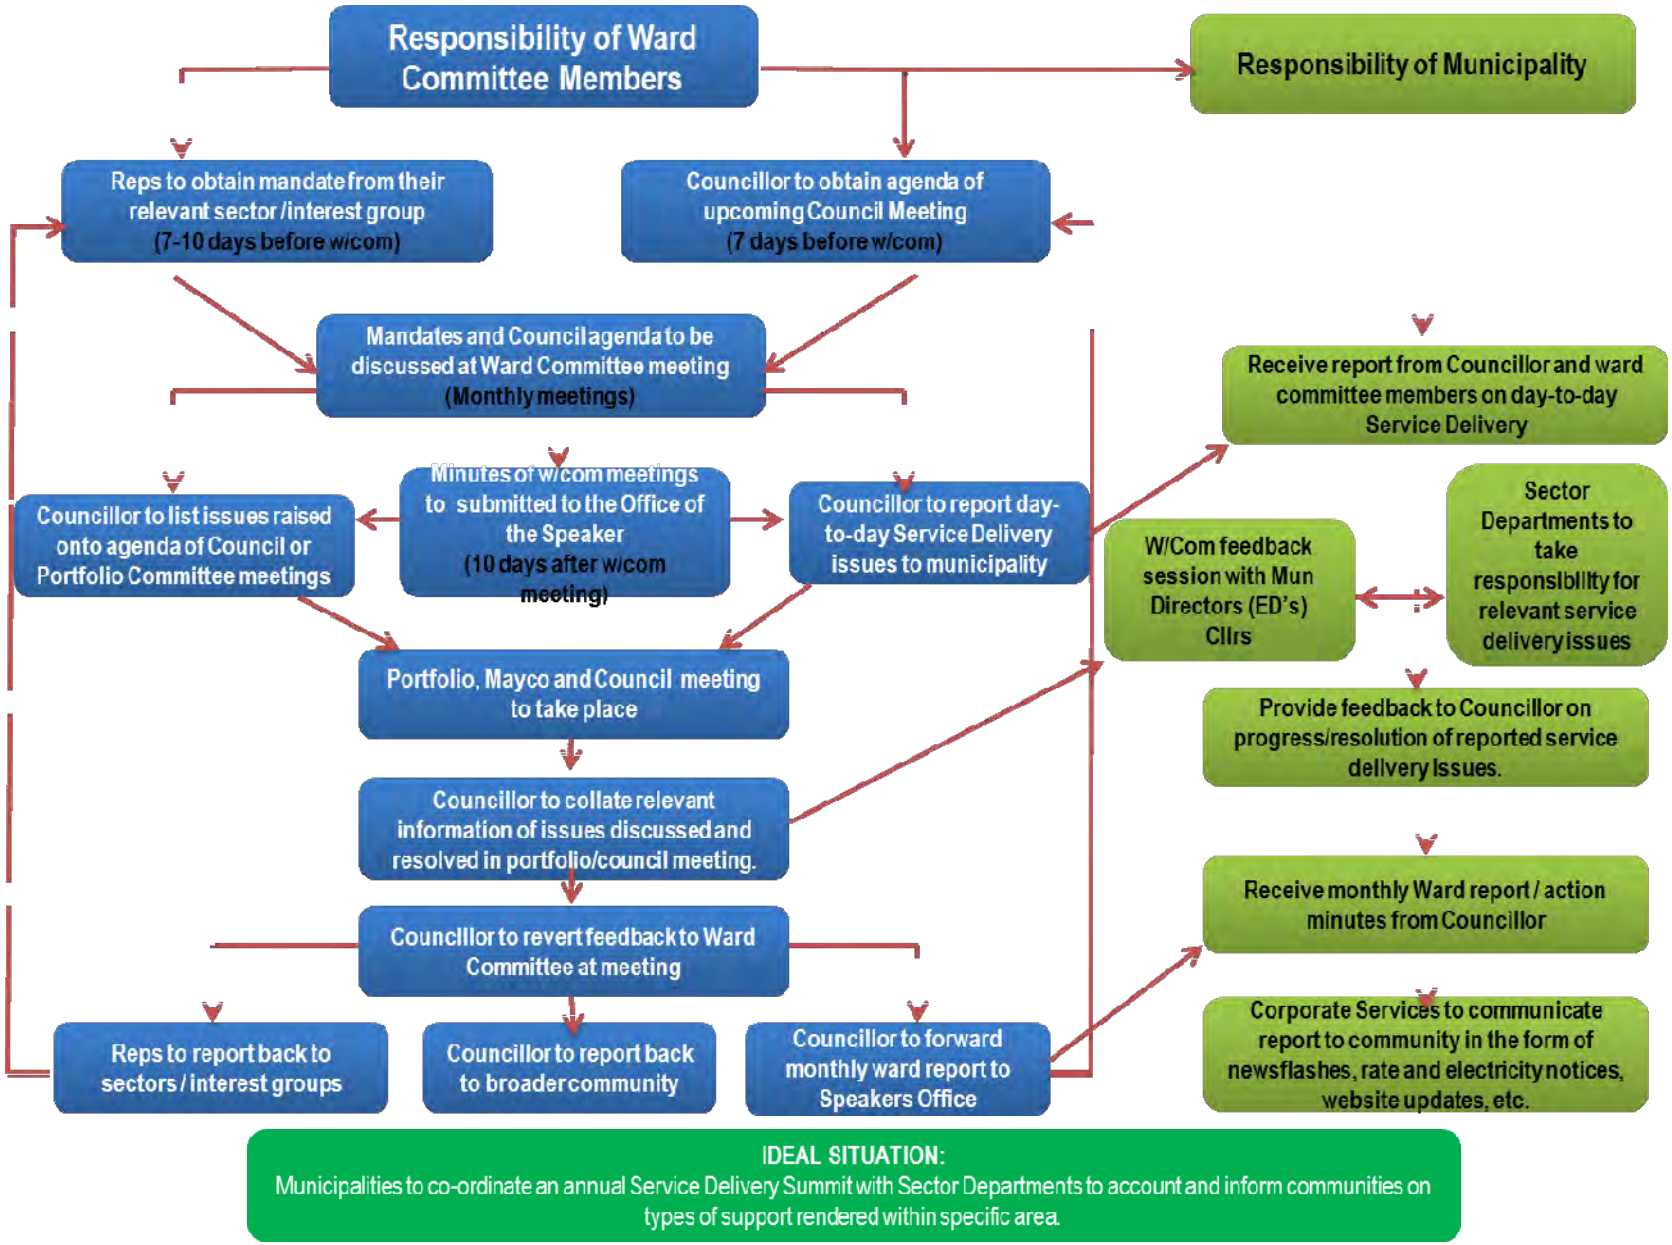
The high frequency of service delivery protests the country has experienced clearly demonstrates the extent to which channels of communication between government and communities have broken down. A primary contributor to this is the marked absence of communication between councillors and residents. The consequence of not providing communities with these essential and appropriate communication channels cause frustrations that lead communities to feel that communicating through violence is the only way that they will be heard.

The failure on the part of municipalities to adopt effective complaints-handling mechanisms and customer care strategies only further amplifies this communication and accountability problem. Community members are more likely to respond to a municipality which is accountable to them and which takes the time to explain why their needs and service delivery expectations are not being satisfied.

Key to this are Councillors, the "people's person" in communities who are essentially elected to be the voice of their wards. Councillors are predominantly responsible for the 2-way flow of information between communities and the municipality as they facilitate the receiving, relaying, and feedback of information. Councillors are therefore the Communication Gatekeepers of society's conversation between government and the people

As such, the Municipality has decided to adopt a Communication and Accountability Model to ensure the correct and fluid flow of information between communities and local government structures via Councillors and Ward Committees.

This model is detailed on the following page.



Responsibility of Ward Committee Members
Responsibility of Municipality
Reps to obtain mandate from their relevant sector /interest group (7-10 days before w/com)
Councillor to obtain agenda of upcoming Council Meeting (7 days before w/com)
Mandates and Council agenda to be discussed at Ward Committee meeting (Monthly meetings)
Minutes of w/com meetings to submitted to the Office of the Speaker (10 days after w/com meeting)
Councillor to list issues raised onto agenda of Council or Portfolio Committee meetings
Councillor to report day-to-day Service Delivery issues to municipality
Portfolio, Mayco and Council meeting to take place
Councillor to collate relevant information of issues discussed and resolved in portfolio/council meeting.
Councillor to revert feedback to Ward Committee at meeting
Reps to report back to sectors / interest groups
Councillor to report back to broader community
Councillor to forward monthly ward report to Speakers Office
Receive report from Councillor and ward committee members on day-to-day Service Delivery
W/Com feedback session with Mun Directors (ED's) Cllrs
Sector Departments to take responsibility for relevant service delivery issues
Provide feedback to Councillor on progress/resolution of reported service delivery issues.
Receive monthly Ward report / action minutes from Councillor
Corporate Services to communicate report to community in the form of newsflashes, rate and electricity notices, website updates, etc.
IDEAL SITUATION:
Municipalities to co-ordinate an annual Service Delivery Summit with Sector Departments to account and inform communities on types of support rendered within specific area.

Batho Pele Principles of Government

Batho Pele Principles

Witzenberg Municipality is dedicated in their actions, programs and operations to fulfil government's commitment to a better life for all citizens. Batho Pele 'People first' promotes service excellence in the public sector and encourages the public to expect excellent service from the Government.

Consultation

The public can inform us what they want from the municipality. The public will be asked for their views on existing municipal services and may also inform the municipality what new basic services are needed.

The Principle: The public should be consulted about the level and quality of the municipal services they receive and, wherever possible, should be given a choice about the services that are offered.

Service Standards

The public can insist that the municipality keep its promises. The municipality will strive to develop service standards for existing and new services. The services standards will be monitored and raised progressively as needed.

The Principle: The public should know what level and quality service they will receive.

Access

The municipality will have to set targets for extending access to municipal officials and services. The municipality should implement special programmes for improved service delivery to physically, social and culturally disadvantaged persons. One and all should get their fair share.

The Principle: All citizens should have equal access to the services to which they are entitled.

Courtesy

The municipality must set standards for the treatment of the public and incorporate these into their Code of Conduct, values and training programmes. Staff performance will be regularly monitored and discourtesy will not be tolerated.

The Principle: The public should be treated with courtesy and consideration.

Information

The public is entitled to full, accurate and up-to-date facts about municipal services they are entitled to. Information should be available at service points and in the local media. Contact names and numbers should appear in all municipal communications.

The Principle: The public should be given full, accurate information about the municipal services they are entitled to receive.

Openness and Transparency

Information pertaining to the administration and operational procedures of the municipality should be made available to the public on request. The public have the right to know, departmental staff numbers, particulars of senior officials, expenditure and performance against standards etc. Reports to citizens will be widely published and submitted to legislatures.

The Principle: The public will be informed on how the municipality is managed, the available budget and of the leadership in charge.

Redress

The municipality must implement mechanisms for recording any public dissatisfaction and staff must be trained to handle public complaints fast and efficiently. The public must receive feedback with regards to the progress and outcome of complaints and other matters raised.

The Principle: If the promised standard of service is not delivered, the public should be offered an apology, a full explanation and a speedy and effective remedy. When complaints are made the public should receive a sympathetic and positive response.

Value for money

The municipality must ensure efficient savings and improved service delivery, and to maximise existing proposed and new staff to meet communication unit needs.

The Principle: Municipal services should be provided economically and efficiently in order to give the public the best possible value for money.

Messages and Themes

Messages and themes should flow from the President's State of the National Address, the Premier's State of the Province Address and the reviewed Integrated Development Plan. The Mayor's State of the Municipality address (or at the adoption of the budget) should therefore localize the impact of these speeches and the IDP. The IDP, as the blueprint for service delivery, should be the guiding document for the development of tailor-made messages.

In other words, the IDP would give clear indication of the needs of residents in a specific ward. If that information becomes available, one would be able to develop messages and themes whenever unmediated communication takes place in a ward or specific town. The presence of clearly defined vision and mission statements would also form part of the key messages. The Witzenberg Municipality should also communicate more actively and directly with its citizens.

Research performed illustrates the priority information needs of the public as information concerning service delivery and information concerning economic development.

Proposed messages to support these needs can include:

- Transparent and effective service
- You have the right to service
- Sustainable and affordable services
- Your right to first class service
- In partnership against poverty
- Sustainable community development
- Consolidation for effective service delivery
- Good governance, first class delivery
- Consolidation of a social contract for a better life

However, messages should be developed in conjunction with the IDP and aligned to the mission and vision statements. Messages should therefore be relevant and flow from the latest IDP.

Themes should be planned in conjunction with various campaigns, events and activities.

Annual Campaigns

Central to the function of the Municipality is fundamentally ensuring that residents understand the services available to them and how to access them. As such, a number of annual campaigns should be scheduled and budgeted for to ensure that these needs of residents are met:

Campaign	Purpose
Me and My Municipality	To inform residents of the key officials at the municipalities, the services offered, and how to access them.
Me and My Complaint	To promote our complaint management procedure and consumer rights platforms.
Me and My Environment	To encourage the public to support our waste management strategy and to become involved in our recycling activities.
Me and My Municipal Account	To create awareness within the public about the importance of paying municipal accounts and to promote/incentivise good account status.
Me and My Councillor	To inform residents of their Councillor, the purpose of the Councillor, and how to contact and communicate with the Councillor.
Me and My Ward Committee	To inform residents of their Ward Committee, the purpose of the Ward Committee and its members, and how to contact the Ward Committee members and participate in the meetings.
Me and My CDW	To inform residents of their CDW, the purpose of the CDW, and how to contact and communicate with the CDW.
Me and My Town – Developing the IDP	An awareness campaign focused on educating residents about what the IDP is, why and how they should participation in developing the IDP.

IDP Support Campaigns

Support Campaigns identified in the IDP may include:

1. Municipal service Jamborees: .

2. Housing Backlog: This indicates the need for a positive publicity campaign and clear communication programme regarding the progress and motivations of the Housing and Ward Based Settlement Plan.
3. Spatial Development Plan: This plan for the optimal growth and sustainability of the municipality will need to be workshopped and relayed to the public in clear, defined terms to get buy-in and also create understanding around development/conservation decisions within Witzenberg.
4. Thusong Service Centre: Services offered to the community

Ultimately, this type of communication planning should form part of the project plan of the various internal municipal departments/line functions.

Who are we communicating to?

Stakeholder Analysis

Internal	External	
Managers/Directors	Community Members/Citizens/Residents	Faith Based Organisations
Councillors	Voters	Academic Institutions
Municipal Employees	Political Parties	Local, Regional, National International Media
Speaker's Office	Ratepayers/ Property Owners	and Media Organisations
Mayor	Community Organisations	Trade Media
Personnel	Local Business Owners	Senior Citizens
Ward Committees	Commercial Farmers	Women
Employee Organisations (Labour Unions)	Other organs of state	Children
Council	Media	Youth
Executive Mayoral Committee	Visitors/Tourists	Disabled
Portfolio Committees	Property Developers	Unemployed
Community Development Workers	Investors	FORUMS
EPWP	Provincial and National Government	IDP
Witzenberg Tourism	District Municipality	LED
	Local Law Enforcement Authorities	DCF
	SALGA	DCFTech
	Farm workers	Public Participation Forum
	Suppliers	Municipal Council
	Contractors	Ward Committee Meetings

	Labour Organisations Business-to-Business Structures Witzenberg IGR Forum	Communication Technical Forum Management Meetings TPF

Forums

Ward committees need to develop good relationships with public forums in the respective communities. This includes the local tourism committees, community based organisations, police forums, rate payers associations, aesthetic committees, organisational support structures for the disabled, aged and youth, NGOs, etc.

Quarterly meetings should be held with these identified groups to monitor and gauge the needs, actions and responsibilities that the Municipality needs to address. In times of crisis, these same forums can provide invaluable assistance in relaying communication to their communities and members that they serve.

Who is Communicating?

Everyone at the Municipality is a Communicator at all times; however, an element of hierarchy and authorization must be adhered to in order to correctly coordinate the release of messages.

As such, in the spirit of effecting a transparent organisation, the municipality should not prevent or discourage officials from speaking to the media and public but should give clear guidance on areas for comments. Council should appoint spokespeople who can give comment at varying levels, but also give clear guidance on who is authorized to speak and on what topic, such as:

Role player	Authorised messages
Mayor	All aspects of Council policy and programmes
	Matters of policy yet to be adopted/enacted
	Is key person for all public participation unless delegates otherwise
Speaker	All comment relating to Council rules of order must come from the Speaker
EXCO members	All aspects of Council policy and programmes in their portfolio
	May be delegated spokesperson on an issue by the Mayor
Councillors	Comment on all activity in their ward except for matters that are policy still to be adopted/enacted
Municipal Manager	Any area of the municipal administration
	Matters of policy yet to be adopted/enacted

	Information around any legal processes the municipality might be engaged in
	Any matter that relates to the running of municipality as a whole and is not specific to existing policy, programme or activity of a specific department
Directors and Area Managers	Any area of business in their cluster
	May be delegated spokespersons on an issue by the Municipal Manager
Heads	On all aspects of their service areas
	Queries from journalists will be referred to Heads for comment/clarification/information. Comment will then go out in the name of the Director or Area Manager unless otherwise.
Municipal Spokespersons	He/she will be responsible for the coordination of media communication, media conferences, media statements and handling media queries.

- Technical experts - this messenger will deal with a specific client that has a specific technical question and provide the above Offices with clear and concise messages on the status of any technical query.

Media Policy

The Municipality must ensure that a clear media policy is developed and communicators must ensure that all key stakeholders are trained and informed on adhering to the policy. The Media Policy should also address all principles relating advertising, media procurement, publicity principles, and ethical expenditure.

Role of Key Communicators Stakeholders

The roles, responsibilities, and nature of interaction of Internal Stakeholders and partners (GCIS, CDW's, DLG) should be clearly defined.

How, When and Where are we communicating?

The most appropriate communication channels are identified to transmit a key message to each audience. Through our external communication, we will seek for continued improvement in public perception and understanding of the Municipality.

The Municipality must use all appropriate communications channels to reach key audiences. These include, but are not limited to:

Category	Internal	External
Direct Communication	• One-on-one • Staff meetings • Council meetings • Telephone • Workshops • Training sessions • WhatsApp	• One-one-one appointments • Council meetings • Ward Committee meetings • Ward meetings • Imbizo's • Community Events • Loud Hailing • Workshops • Training sessions
Print Media	• Memo's • Letters • Informal Notes • Salary Advice Slip	• Letters • Newspapers • Pamphlets • Flyers

	• Pamphlets • Notice boards • Newsletter	• Municipal Accounts • News media • Advertisements and Newsletter
Electronic	• Intranet	• E-mail • Internet and social media • Television • Website • Radio
Outdoor	• Posters	• Information signs and boards • Law enforcement signs • Bill boards in wards
Forums	• Management Meetings	• IDP Forum • LED Forum • DCF • DCFTech • Public Participation Forum • Communication Forum • Municipal Council Meetings • Ward Committee Meetings • IDP CC
Social Media	• Facebook • WhatsApp	• Facebook • WhatsApp
Other		• Libraries • Thusong Service Centre • Municipal offices • Control Room and Switch board

Who are we communicating with?

The target market for communication consists of everyone who lives or works in Witzenberg, with secondary markets being fellow local municipalities, the greater Western Cape, other provinces within South Africa, government stakeholders (provincial and national) and international markets (tourists, embassies, international municipalities, development organisations, humanitarian aid organisations, etc). Therefore our approach can be tailored to key target 'audiences' which we will address during the life cycle of this strategy.

- All key audiences will be communicated to using the most appropriate strategy to meet identified needs and the same key messages will be reinforced.

The primary target audience for the Municipality is often seen as the total population of Witzenberg. However, while this is true, we cannot speak meaningfully to the full population with only one, generic message. As identified above different messages should be developed for different target audiences and other platforms. Similarly the people living in Op Die Berg will have different concerns from the people living in Wolseley or other parts of Witzenberg.

It will be very important to identify and align external target audiences with specific messages and communication methods.

For the purpose of this strategy the following are identified as key target audiences:

- Municipal staff
- All elected representatives
- Witzenberg residents
- Specialised groups – women, children, youth, unemployed, elderly and the people with disabilities.
- NGO's – Community based organisations such as sporting bodies, youth forums, debating societies, etc.
- Media (local, regional and international)
- International investment and support stakeholders
- IGR – Three spheres of Government

Marketing & Branding

Branding is an important element to the marketing mix. It helps people identify authority and frequently sets the tone of communication. Its success depends on:

- The development and consistent usage of key messages.
- Using only one logo to reflect Witzenberg's corporate identity.

Marketing and branding are essential elements of any strategic communications intervention and in the case of Witzenberg Municipality it is critical that the image projected through its communications is one of a vibrant, growing, culturally rich, naturally beautiful and economically attractive precinct of South Africa. This is essential because Witzenberg Municipality, as part of the economic, political and cultural life of Western Cape and South Africa, presents an exceptional opportunity to showcase its core assets which are its people, its location, its competitive edge as a magnet for local and international tourism and its potential as a premier investment destination for industry, property development and agribusiness. In this way Witzenberg Municipality will be able to make optimal use of its communications strategy as a central driver for stimulating economic growth, addressing critical issues of service delivery while also opening up opportunities for investors and unlocking the entrepreneurial potential of the region.

From an assessment of both the internal and external audits as well as an assessment of how the area is currently positioned (economically and politically), it is apparent that the Municipality does not use its branding, in particular its logo, very effectively. One would expect it to meet you at the entry or exit to each town, when entering a municipal building, on municipal vehicles, uniforms of employees, name tags, outdoor advertising boards where a high volume of target audiences are present, e.g. clinics or welfare and pension pay-points where there are captive audiences. Branding breeds familiarity and familiarly breeds trust. Coupled with a strategic marketing message and constant repetition, the image of the municipality could be improved significantly. Proper use of branding to improve the image of the municipality, could, however, be a long-term objective. The uniqueness of the area, not just in a regional or provincial context but in a global context should be exploited to give the municipality a provincial, national and international brand.

Brand Management and Corporate Identity

Municipal Logo

Registered logos are legislatively precluded from amendment without proper copyright in accordance with Brand South Africa (formerly known as the International Marketing Council - IMC). Thus, changing the logo without the proper authorisation can negatively impact the Municipality.

A policy to manage, control and protect the branding and marketing of the Municipality needs to be developed to curb staff from unauthorised logo amendment. We also need to keep the limitations of Cost Containment in mind when procuring branded material.

Logos on banners, posters and general corporate items needs to be controlled and regulated by the Corporate Services Department and request in writing permission and approval to use the municipal logo. Marketing materials are procured and designed according to the following criteria:

Quality & Design, which includes:

- Design of the item
- Functionality
- Ergonomics
- Quality of materials/fabric/etching/paper/board/print
- Aesthetic appeal
- Brand placement upon the item
- Unique and niche item

Clarity of the logo, which includes:

- Size of the logo in proportional to the size of the item
- Visibility of the logo on the item
- Appropriate colour contrast of logo to background on item
- Sharpness of print/etch/embroidery of logo
- Spacing in lettering of the logo

Colour use and format of the logo, which includes:

- Adherence to pantone colour palette
- Appropriate deviation in letter colouring on inverse backgrounds
- Additional design elements

Hence, all proofs for corporate wear bearing the logo will require the approval of Marketing & Communication, before the task is commissioned to a supplier.

Official Logo Specification and Pantone Colours

	pantone uncoated	pantone coated	CMYK	RGB
	pantone warm red U	pantone warm red C	uncoated C-0 M-90% Y-100% K-0 coated C-0 M-80% Y-100% K-0	R-222 G-26 B-30
	pantone 390 U	pantone 390 C	uncoated C-50% M-5% Y-100% K-0 coated C-50% M-10% Y-90% K-0	R-142 G-165 B-30
	pantone 5265 U	pantone 5275 C	uncoated C-90% M-90% Y-50% K-5 coated C-80% M-70% Y-20% K-20%	R-88 G-81 B-108

We will need to contract a graphic designer to create more graphic options of the logo as presently it is only available in JPG format. We will need to develop higher resolution options for use in lithography and website i.e. GIF, Bitmap, PNG and metafile formats. Currently, the logo presents some challenges as it contains 2 sets of custom fonts, a clip art cherry graphic and a dappled brush stroke depicting our mountains. This makes it a difficult print icon that requires rectangular surfaces. We will require a graphic designer to create associative icons to our logo for square and circular surfaces as well as provide single colour (white, black, red and green) logo options for inverse colour prints.

Branded goods

Branded goods are expensive to procure but they are invaluable to a marketing plan. Banners, gazebos, T-shirt, overalls all are excellent mechanisms of brand positioning. The aim of positioning a brand is to promote the organisation, to associate the brand with the service and human capital and to create opportunities for the brand to be recorded by the media in photographs.

Internally, branded materials need to be used by staff in the following ways:

- Branded stationery (pens, emails, memo pads, compliment slips, calendars, etc.)
- Uniforms (overalls, T-shirts, nameplates, shirts, etc.)
- Office space (signage on buildings and offices, boardrooms, Council Chambers', computer screen savers and wallpaper, waiting areas, notice boards)
- Public spaces (signage on cashiers offices, libraries, traffic office, workshops, depots, Thusong centres etc.)
- Municipal vehicles (signage on fleet with contact numbers for misuse reports, department that manages vehicle and branding)
- Municipal equipment (signage on equipment, branding and video on plasma TV's in waiting areas and cashiers offices)

Externally, branded materials need to be used by management in the following ways:

- Corporate video and advertising (promotional/induction DVDs, billboards, etc.)
- Temporary structures (gazebos, tents, mobile shelter, etc.)
- Corporate gifts (key rings, caps, T-shirts, business card holders, etc.)
- Temporary signage (banners and flags)

Branding of events is a requirement on the SDBIP and is documented through photographic evidence. Sufficient infrastructure is necessary to ensure adequate branding of a space. The more unique your branding, the higher the instance of your brand being photographed by the media.

Tourism and our Municipal Brand

Witzenberg Municipality has a relationship with three established Tourism Bureaus; Ceres Tourism, Wolseley Tourism and Tulbagh Tourism. As Tourism is one the greatest potential income drivers, Witzenberg Municipality strives to promote entrepreneurship, local economic development and international positioning through this forum.

Each bureau makes use of the Witzenberg Municipality logo on their brochures and websites. The logo is also illustrated on their amalgamated maps of the area. These brochures and maps are distributed at tourism expos, roadshows and conventions to international tour companies, overseas investors and national government.

In turn, events and festivals are promoted by the Municipality on our website, social networks and newsletters. Witzenberg Municipality is also promoted as a vacation destination for its outdoor activities (Ceres Zipslide, horseback riding, quad biking, mountain biking, sporting events, winter snowfall, etc.) and exclusive wine routes. Witzenberg Municipality is in the process of branding itself as a safe, clean and green municipality and targets investors, governments and environmental organisations that are looking to align themselves with this niche market (organic, free range, sustainable, bio-degradable and environmentally friendly).

An important strategy to be implemented as a part of our support towards Tourism is the development of a social media strategy. Social media is becoming the biggest form of communication to the public as it is available to people from all backgrounds, demographics and psychographics. The main reason for the boom in the market is cellular technology with WAP capability. Cellular technology is no longer a tool available to a select group and has infiltrated lower income groups with increasing frequency. This type of medium cannot be ignored in a tourism context.

Social media for tourism will involve system integration, search engine optimization, regular public communication, audio visual uploads and links to our core website, thereby increasing out brand visibility.

Travellers plan vacations long before booking tickets and accommodation. This means that internet visibility is a key facet towards drawing tourists to our area. Twitter, Facebook, YouTube, Zoopy TV, Pinterest, TripAdvisor, Google +, Flickr and tourism blogs are the best mechanisms to reach the local and international markets. Currently, social networks are being created with no link to other electronic interfaces but is aimed at increased revenue. These two ideas will need to be integrated and planned in order to generate interest, discussion and then revenue.

Development and Adoption of Policies

The Municipality does not currently have the following relevant policies:

Policy	Description
Brand Management Policy (including a Marketing Master Plan for Witzenberg Municipality)	Rules governing the Municipality's brand and controlling the use of the logo (colours, shape, use, etc.)
Social Networking & Media Policy	How, when, where, and why the municipality communicates with the media as well as who is the correct person for the role with respect to the incident.
Complaint Management & Resolution Policy	Standard operating procedure for the Control Room with methods of complaint resolution including systems, timelines, reports and escalation.

A comprehensive and defined Language Policy is currently in place and have been revised.

Action Plan: External Audit

The aim of the strategy is to narrow any gaps between the Municipality and the residents by improving the image of the Municipality. The strategy employed should lift the profile of the Municipality. It should provide a channel for two-way communication, in other words, while the municipality gets an opportunity to speak to the residents, residents in turn should be able to voice their concerns to the municipality. And, as mentioned earlier, the strategy should be linked to that of both national and provincial government's communication programmes. The strategy will thus entail:

- Newsletter – published bi-monthly and distributed to all households in Witzenberg. It is one of the most important tools for the Municipality in communicating with residents.
- Publicity and information leaflets - These include promotional material, strategy documents and statutory information to inform the public and our partners about our activities.
- Agendas, reports and minutes - Papers are issued for meetings of the Authority which can be attended by the public.
- Media Relations - Media releases and feature material - Produced or originated corporately or in conjunction with the Political leadership.
- Advertising - Produced for information, promotional and recruitment purposes and to meet statutory requirements. But, also to promote and market the Municipality or decisions taken.

- E-Communication - Using the Municipality's Website to communicate and market the area. Dedicate one or two pages to the social and economic development of the youth. Highlight strategic messages on the home page.

- Face-to-face - Consultation exercises, Imbizo, road shows, focus groups, regular meetings, questionnaires etc. These gather information and views from various groups and sections of the community. And, are also used for communicating and discussing local issues, performance management and scrutiny and for directing and informing service development and delivery. However, it keeps the Municipality in direct contact with the residents.

- Social media – Utilising Facebook and WhatsApp optimally to reach the target audience and rely messages immediately to a wide spread audience.

Capacity & Infrastructure

At present the municipality has dedicated communications capacity, both internally and externally. The lack of infrastructure is hampering internal communication to a wide extent and external communication to a lesser degree. Infrastructure required for the implementation of the activities of the external action plan. The infrastructure, in this instance if communication capacity is created, would be a desk top computer with some design software programmes such as Adobe Premium and Dreamweaver CS5. The cost for this infrastructure will be about R50 000.00. Offices and storage is also required and would cost about R 100 000.00 to build at the Traffic Offices in Ceres, with closer proximately to all staffing under Marketing and Communication. We have also identified training needs for Marketing & Communication as Photography, Adobe Photoshop, Adobe In Design, Adobe CS5.5 Dreamweaver, Adobe Illustrator, Adobe Flash Professional, Adobe Fireworks, basic desktop publishing/graphic design and Joomla. The Control Room requires training in telephone etiquette and soft skills as well as on-job coaching with the District. We also want to check on the SETA accreditation as they have vast experience in this field but no formal recognition. Staffing within Marketing and Communication to operate optimally would need to be revised:

Unmediated Communication/Direct Communication/Public Participation/Developmental Communication

Most of these activities can be executed at minimum cost. The Municipality should decide what are the most feasible. Selected activity should however be continuous in order to close the gap between Municipality and residents. Social media and loud hailing is minimal and cheapest.

Activity	Timeframe	Costs	Remarks
Municipal Imbizos and Thusong Centre Outreaches	National and Provincial Government have two sessions per year in April and October. Municipalities forms part of these but it is encouraged that they have it more often	1) Rental of Halls 2) Transport 3) Pamphlet, posters 4) Sound hire (internal) 5) Newsletter 6) Radio/Newspaper advertising	This form of communication has proven, from presidential level to the levels of local government, to be the most popular with the electorate. The format is to provide a platform where residents can raise their concerns directly to the politicians and officials. CDW's can be used to mobilize communities. This activity should be complimented with media liaison. Consider GCIS as a partner.
Municipal road shows and public meetings	On-going	1) Exhibition material 2) Transport 3) Pamphlet, posters 4) Transport 5) Radio/Newspaper 6) Social Media	The aim of this activity is to have a format whereby municipal departments (housing, social development, ect.) go around to communities and inform residents about how they function and how communities can access them.
Ward Committee Meetings	On-going	1) Radio/Newspaper Advertising 2) Pamphlets, posters	Heads of departments, along with ward councillor, should engage the committee in developments at the council. The challenge should be to explain to residents the importance of ward committees.
Taking council to the people	Quarterly	1) Community Hall 2) Sound hire 3) Catering (if necessary) 4) Pamphlet, posters 5) Transport 6) Newsletter 7) Radio/Newspaper advertising	This will involve a major PR exercise. The council should consider holding one meeting within the community. Members of the public should attend and observe. The effect of this activity would bring the council and the municipality very close to the people and should bridge the gap between residents and the municipality. Every three months the council should consider holding a meeting in a different town. Consider GCIS as a partner.
Open Days at Municipality/ Jamborees	Quarterly	1) Community Hall 2) Sound hire 3) Catering (if	The Open Days can be expanded by inviting government departments to exhibit at the municipality as well as District Municipality.

		necessary) 4) Pamphlet, posters 5) Transport 6) Newsletter 7) Radio/Newspaper advertising	Allows for direct interaction.
Radio Talk shows	Monthly schedule	Approach radio station for slot. May carry cost.	Aim is to have Mayor, DM and MM going live on radio and deal with topical issues e.g. Project Consolidate and gains made. Consider contract
National Holidays and National Events	As per National Government Calendar	1) Community Hall 2) Sound hire 3) Catering (if necessary) 4) Pamphlet, posters 5) Transport 6) Newsletter 7) Radio/Newspaper advertising	Aim is to have a public event where municipality can interact with residents on all national days. Also targets specific audiences

Product Development, Marketing and Advertising

Activity	Timeframe	Cost	Remarks
External newsletter	Monthly/bi-monthly	1) Printing 2) Design 3) Translation into 3 languages 4) Collecting copy and writing stories 5) Distribution door-to-door	The external newsletter on a monthly basis has been the second most popular request by residents interviewed. In developed democracies a newsletter is an integral part of governance.
Online media	On-going		

Marketing material for captive audiences	As necessary	1) 10-minute visual/audio clips 2) Posters for clinics and pay-out points, churches. 3) Services Booklet to highlight and simplify services of the municipality /	Prices need to be confirmed. But the aim is to have some marketing material for captive audiences at clinics, pay-points where there will be people queuing. They do not have an option but to listen or read it.
Suggestion Box	On-going	Cost of putting up a box at the various municipal offices, front office, libraries or community centres.	Idea is to constantly monitor the suggestions of residents and reply or react to them.
24-hour call centre	24/7	Telephone bill / airtime	Aim is for residents to contact municipality with their concerns. (Officials can field calls).
Community Radio (if available)	Weekly	Part of tender	Radio advertising is going to be the most cost effective because radio is the most preferred media. Radio advertisement is also much cheaper than print and a wider target audience will be reached. Municipality decides what messages it needs to send out, put it into a 45 second radio advert and decide on advert schedule.
Advertising (newspaper)	Monthly	The Municipality produces its own monthly newsletter which is distributed to all residents, business and government departments.	Own newsletter can reduce this cost significantly.
Website	On-going		Can promote the municipality, provincially, nationally and internationally
Lobbying and presentations to government and parliamentary structures	On-going	Cost of presentation material. Cost of information packages to portfolio committee members.	Aim is to have a professional and convincing image whenever briefing politicians or other constitutional bodies.

Many of these issues can be addressed through the development of a staff intranet. At this point in time, a staff newsletter is sent to staff electronically and copied for all depots. The intranet comprises of staff news, human resource information and updates, training, retirements and long service.

Implementation

The following implementation plan might be considered:

Communication Cycle

Month	Activity
January	Opening of Council Focus on Education Adjustment Budget of Council Message from the Mayor on Matric Results
February	State of the Nation Address: President State of the Province Address: Premier Budget Vote Opening of Council
March	Campaign – Revenue Collection Human Rights Day Draft IDP and municipal budget SDBIP
April	Ward Committee and Public Participation Employee Wellness Day Freedom Day IDP Public consultation

Month	Activity
May	Workers Day IDP and Budget approval & Mayors speech on the State of the Municipality.
June	Campaign – Environmental Awareness & Recycling Youth Month/Day Campaign promoting IDP Contract with the People: Service Delivery Budget Implementation Plan Performance agreement of Municipal Manager and Senior Managers
August	Women's Month Preparing IDP/Budget Process Plan
September	Campaign – Tourism Month Heritage Day Environmental Projects – Arbor Day
October	Michell's Pass Half Marathon IDP Review starts – Public Participation Environmental Projects
November	IDP Review continues – Public Participation Anti-Fraud & Corruption Month 16 Days of Activism
December	16 Days of Activism continues Municipal Aged Day International Aids Day Festive Season Message from Mayor

Strategic plan & budget (2020-2025)

Good Governance: Witzenberg Communication		
Service Delivery Area		
Actions	Measurement	Relevant Agencies
Communications Implementation Plan approved	Communication Implementation Plan receiving an approved budget from Council	WM, CWDM, GCIS, LG & H
A Communications Implementation Structure in place	Approved communications responsibilities reflected on staff Job Description	WM, CWDM, GCIS, LG & H
Implement a training program for Communications Implementation Plan structure	Councillors and staff demonstrate ability to manage effectively implementation of Communications Implementation Plan	WM, CWDM, GCIS, LG & H
Training of CDW's and Ward Committees to interface effectively with community on municipal matters	CDW's and Ward Committee members demonstrate their ability to effectively convey key municipal messages to community	WM, CWDM, GCIS, LG & H
Establish Communications Unit	Communications Unit reflected on approved Municipal Organogram	Municipality

** Budget not yet available and is subject to change if subsequent applications for adjustment budget are approved.

NOTE: According to the National Government's Communication Policy provision must be made of 1% to 5% of the institutional budget to fund the communication mandate – must be allocated to the communication function, based on the communication's strategic plan and the size of the institution. This budget must be ring-fenced.

Incident and Disaster Management Communication

The Control Room perform a significant function as they relay calls and queries from the public to the relevant officials to offer assistance. They offer the Municipality a 24 hour presence to the public. They require extensive knowledge of managing complaint, clientele service, query resolution and customer empathy. Their role becomes especially essential during incidents and disasters.

Standard incidents are usually resolved easily by local resources and line functions (traffic, police, fire services, emergency medical services) and seldom require publicity at municipal level, unless there are casualties. However, if an incident is declared a major incident, a contingency plan is put into effect and District Disaster Management is informed by the Municipality.

An incident is defined as an element of risk which exposes a hazard that poses direct harm to members of the public, environment or property. The Control Room reports all incidents to the Municipality by calling the administrative grapevine in addition to line functions. This grapevine consists of the Mayor, Municipal Manager, Directors and the dedicated communications official for the Municipality. Other managers and officials may be contacted depending on the nature of the incident, i.e. the Manager: Human Resources will be contacted in the event of a bomb scare at the municipal buildings to manage evacuation of employees.

An incident will escalate into a major incident if the local municipality cannot use their own resources to cope with the resolution of the problem. District Disaster Management will be called for assistance and once they have been informed of the magnitude of the major incident, they have the power to then declare it a disaster.

In the event of disaster, two communications hubs are formed, i.e. the Incident Command Post (ICP) and the Joint Operations Centre (JOC). The ICP monitor the incident from a close vantage point and relay/receive information from the line functions and persons involved with addressing the disaster. This consists of senior supervisors, directors, managers and chief officers relevant to addressing the disaster. The JOC consists of the Chiefs of Staff, Commanders and Heads of all senior functions i.e. Police Commissioner, Municipal Manager, Heads of Provincial Departments, etc.

A major incident involving joint work of the responding line functions will inevitably attract significant and sustained interest from the media. Once a disaster has been declared, all line functions and key stakeholders will be under pressure to provide an immediate statement. At the earliest opportunity a “holding” statement will be agreed upon and disseminated by the JOC through the appointment of the JOC media liaison officer. The JOC media liaison officer is chosen by virtue of his/her experience and skills (military service, qualifications, knowledge of the situation, etc.)

JOINT INFORMATION CENTER (JIC) ROLES AND RESPONSIBILTIES

Lead PIO:
• responsible for managing the JIC;
• serves as advisor to IC/UC;
• provides overall communication policy direction;
• recommends and develops strategy for messages, briefings, and news releases;
• obtains approval from those in authority before releases are made; and
• conducts JIS/JIC briefings (live or virtual) to update staff regarding Incident Command activities.

Information Gathering:
• Response Partners – Coordination with supporting response agencies and their PIOs at EOCs, incident command posts, and other locations to gather information on the incident.
• Media Monitoring Analysis/Rapid Response – Entails reviewing media reports for accuracy, content, and possible response.
• Research and Writing:
- Products – Writing materials such as media releases, fact sheets, flyers, etc.
- Graphics Support – Entails designing layouts, developing PowerPoint presentations, and creating graphics for a range of materials (e.g., newsletters, flyers, etc.).
• Audio-Visual:
- Broadcast Operations – Entails developing video documentation, special productions, remote live interview feeds, and logistical support of public meetings and presentations.
- Photo Video – Entails providing still photography documentation to support print and internet media needs, and video documentation to support broadcast media needs. Also includes collecting materials for agency archives.

Information Dissemination:
• Briefing/Special Events – Entails handling events such as news conferences, media briefings, VIP visits, and tours for senior officials of affected areas.
• Media Relations:
- News Desk – Serves as the primary point of contact for the media.
- Spokesperson – Prepares and conducts regular news briefings and conferences.
• Web Support – Entails creating and maintaining web pages and blogs containing information about the incident for use by the public and the media.
• Public Inquiries – Entails responding to questions from citizens, making referrals, and developing a log of telephone calls, e-mails, etc., containing names, addresses, the type of calls, and any necessary follow up actions.

Operations Support:
• Special Needs/Multilingual – Entails providing language translation and other services to ensure appropriate and timely information reaches those in the affected areas with special needs.
• Facility Support – Coordinates with the JIC Facility Liaison to maintain and support the JIC operations concerning the facility and resources.

Liaison:
Provides a coordinated two-way communication link with key program areas and other entities involved in the response and recovery operation (e.g., elected officials, community leaders, VIPs, and other governmental and NGO support agencies).

DEMOBILIZING THE JOINT INFORMATION CENTER (JIC)
• prepare a comprehensive deactivation news release for lead-agency approval and distribution;
• notify community, media, agency communications managers and local officials about closing and provide regional contact information;
• provide casebooks to communication managers whose organizations will assume responsibility for ongoing information;
• complete an after-action report and participate in evaluation discussions;
• return borrowed equipment and supplies;
• inventory equipment and supplies; and
• replenish “Go Kits” as necessary.

COMMUNICATION STRATEGY

SITUATION / SOCIO-POLITICAL CONCERNS

AUDIENCE

-
- Local communities / businesses
- Visitors / recreationists
- Media
- Elected officials

- Agency Personnel
- Incident Personnel
- Partner Agencies
- Nearby Incidents

OBJECTIVES

- Keep internal and external audiences informed with accurate, timely information.
- Be the first and best source of information about the fire; Update information frequently.
- Address rumors to prevent confusion.
- Accommodate media requests quickly and safely.
- Communicate consistent messages about the benefits and risks associated with wildland fire.
- Collaborate with interagency and community partners for maximum efficiency and effect.

STAFFING

Current

Target

KEY MESSAGES

- Safety always comes first in fire management.
- Fire management decisions are based on many factors.
- In general, fire seasons are becoming longer and many fires are more difficult to suppress.
- In fire, we all work together.
- Firefighters count on you.

EVALUATION

Accurate media coverage? Web chatter? Community feedback? Host unit feedback?

Possible monitoring tools include:

-
  - http://news.google.com
- http://www.google.com/reader
- http://www.google.com/alerts
- http://www.icerocket.com/
- http://technorati.com/
- http://addictomatic.com/
- http://www.monitter.com/
- http://trendsmap.com/

In this instance, the dedicated communications official for the Municipality becomes the media liaison to the Municipal Manager and assists with the drafting of media releases, provision of photographs, preparation of the media spokesperson/s, gathering information from the ICP and relaying it to the JOC media liaison officer on behalf of the Municipality only, unless the JOC instructs otherwise.

The JOC Media Liaison Officer will arrange joint media conferences with appointed spokespeople and the media. The media becomes a vital vehicle of communication in a disaster situation, especially if humanitarian aid is required. As a standard operating procedure, no politicians are allowed to be a part of the ICP or the JOC. They are also not allowed to be media liaisons, unless through the express instruction of the JOC.

Disasters, managed or not, have negative impact on the corporate identity and so are only called in the event of no other viable option in the protection of life, property or the environment. The aim of resolution in the contingency plan is to place the Municipality in a better position than before the disaster and this can only be achieved through addressing issues openly and strategically.

Principles for Handling Incident Related Media Enquiries

Subject to any incident details being declared as sensitive in terms of Protection of Personal Information Act (often called the POPI Act or POPIA) of 2013, it is the objective to deal with the media by employing the following principles:

1. We will be factual and careful
   - We will not guess.
   - We will deal strictly with the facts.
   - We will not speculate or offer any personal opinions on policy. If we are in a position to do so, we may explain approved policy.
   - If we cannot answer a question, we will try to get the information as soon as possible.

2. We will follow through as promised
   - If we know that a spokesperson has been assigned or that a better source is available for more detailed information on an incident, issue or policy, we may provide the minimum facts and refer the journalist to that source or alternatively, we will make further enquiries and will look for the spokesperson that is better able to assist. Thus, the spokesperson can call the journalist directly after he/she has been briefed.

3. We will be open, honest and straight forward
   - We will not evade questions or deny a fact.
   - If we are unable to provide an answer, we will say so.
   - If we do not understand a question, we will ask to have it repeated or clarified.
   - We will not answer hypothetical questions (i.e. what if…), as answers to hypothetical questions are too vague and easily open to interpretation.

4. We will try to be clear
   - We will try to avoid technical jargon and acronyms.

5. We will be impartial
   - We will not blame anyone or make any judgements about liability or cause during an incident.
   - We will not speak about the actions or involvement of another line function or organisational branch of government except to acknowledge their involvement.

6. We will state when we are unable to answer a question. Never say “no comment”.

7. We will be co-operative
   - It is our intention to develop good relationships with journalists and media representatives and we will not advantage/disadvantage any of them.

8. Be forthcoming with public information
   - We will clarify inaccurate rumours as soon as possible and attempt to report new developments immediately.

9. We will keep a record of conversations or interviews with journalists
   - In the event that our comments are taken out of context, we shall reserve the right to request an immediate retraction whilst reserving any legal right to pursue the matter further should it be deemed necessary.

10. Turnaround time for Media enquires and responses / comment
    - Media enquires received by Manager: Marketing and Communication will be sent to the Manager of the relevant department for comment, which is to be provided within 48 hours in order to meet deadlines. Acceptations may be made as per the directive of the Accounting Officer, who is the official spokesperson for the Municipality unless the directive is given stating otherwise.

Adhering to these principles will ensure that crisis communication is managed and controlled.

Monitoring, Evaluation & Review

The development of this strategy and action plan is only the beginning. Regular monitoring and review will need to be undertaken to ensure that the Authority is meeting the strategic aims set out in the strategy.

The monitoring, evaluating and reviewing of the communications strategy should be done every 5 year cycle after the implementation. Generally monitoring, evaluation and reviews consist of testing how successful the implementation of the strategy has been. An independent external service provider should ideally be used to ensure independence if resources allow.

To curb costs though, it is recommended that Witzenberg employs a communications officer who will have to develop a monitoring and evaluation mechanism, or identify a person to undergo training to conduct such elementary monitoring and evaluation, who will then train internal staff members to build up the Municipality's capacity in this regard.

The evaluation should pick up on the recommendations in the strategy to ensure changes have been made and to see how successful implementation is. It will show any additional changes that should be made and will highlight the successes that came out of the strategy.

A door-to-door survey, possibly undertaken with the assistance of the Community Development Workers and GCIS, as well as media monitoring will determine the impact of the successfully implemented strategy. The results of the survey should be measured against the first survey undertaken when the communications strategy was being developed.

A confidential internal survey should also be undertaken to determine changes within staff attitude and moral annually.

Conclusion

Witzenberg Municipality faces many challenges and can be fully addressed through effective communication and a positive corporate image. The commissioning of a study to determine the internal as well as the external communications environment will mark the start of the Municipality's endeavours to put strategic communications at its rightful place in the political and administrative structure of the municipality. Continued monitoring and public engagement will contribute greatly towards establishing Witzenberg Municipality as a municipality for the community, providing assistance and support to its residents.

No matters arising.

NOTED

1.5 ADOPTION OF THE AGENDA

The Agenda was adopted with the following amendment:
Item 3.4 - Updating of mutual aid agreement among Western Cape municipalities to deal with disaster risk, major incidents, and disasters [Councillor Bresler from City of Cape Town].

ADOPTED and APPROVED

2. PRESENTATIONS:

2.1 DISASTER REHABILITATION AND RECONSTRUCTION 'BUILD BACK BETTER'

Ms L Joubert from the Disaster Management Centre of Bitou Municipality presented on this item.

The Garden Route District Municipality has a fully functional Disaster Management Centre [DMC]. The centre is equipped with a joint operational command and tactical decision area. To stay abreast with regional emergency related activities, a 24/7 call centre has been established adjacent to the DMC. The 24/7 call centre is operated in conjunction with the Provincial Emergency Medical Services [EMS] and renders an emergency call taking and dispatch platform servicing the district. The Garden Route DMC believes in the 'added value' and complementarity of working together to achieve shared objectives and goals by undertaking joint actions and mutual support. The interaction between district role-players is guided by shared values of trust, mutual accountability; gender equity; a respect for diverse identities, perspectives, and beliefs; a commitment to inclusion and participation; and openness to sharing and learning to build consensus and mutual understanding.

The Garden Route District Municipality's Disaster Management Centre has a holistic approach to Disaster Management. The disaster management traditional model in the illustration below makes provision for planning before a disaster also known as pre-disaster phase, during a disaster and post-disaster phase.

Disaster response is a sum of actions taken by residents and institutions in the time of disaster. These actions commerce with the warning of an oncoming threatening event or the event itself if occurs without warning. Disaster response includes the implementation of disaster preparedness plans and procedures, thus overlapping with disaster preparedness. The end of disaster response comes with the completion of disaster recovery and rehabilitation programmes.

Disasters have vast effects on the community, economy, and property. However, not all disasters should be seen in a negative light. Rehabilitation focuses on enabling the affected communities to return to normal pattern of life. It is also considered to be the transitional phase between immediate relief and more major, long-term reconstruction and the pursuit of ongoing development. Disasters allow for the affected area to rebuild what they lost previously, however, in order to ensure that hazards do not have the same effect in future years, it is

beneficial and recommended that while in the recovery stage every effort is made to ensure that the community builds back better.

The normalization process after an event will take a short period of time but is most important. This includes any cleaning up, repairs or related work to area. This will be coordinated by the MACC/JOC and Garden Route Rebuild Initiative [GRRI]. This concept was born following the Knysna/Plett fires in 2017.

The GRRI sought to optimise efforts to “Build Back Better”. The initiative aimed to create a multi-disciplinary, inter-governmental and multi-sectoral platform to align and maximise recovery and rehabilitation efforts. It brought together national, provincial, and local government, state-owned enterprises, community members, civil society organisations and the private sector in sector-based working groups to design and implement recovery projects.

The rehabilitation and recovery program should include strategies that will aid in the achievement of a desired outcome which includes:

- permanent construction or replacement of severely damaged infrastructures,
- the full restoration of services, and
- the revitalisation of social and economic structures.

The strategies should be consistent with the guiding principles for the rehabilitation efforts. Specific sector and sub-sector strategies should also be provided to help achieve short- and medium-term program objectives. Reconstruction must be fully integrated into ongoing and sustainable development plans, considering future disaster risk and the reduction of future vulnerability.

Disaster risk reduction is an integral part of development. The importance of a risk-informed and risk-resilient environment is recognized by three global policy frameworks and international agreements. Reducing future disaster risks in disaster-affected areas can be achieved through the implementation of an integrated approach to DRRM and climate change adaptation. The entire process for the preparation of a post-disaster rehabilitation and recovery program can be simultaneous with response activities. The exact duration of the preparation process depends on the magnitude and extent of the disaster.

It is imperative that remedial actions for disasters must be consistent with long-term objectives of the development within the area affected by the disaster. All development programmes should be evaluated on vulnerabilities as the main goal is sustainable development which requires the reduction of vulnerabilities that lead to disasters.

A Garden Route DM Disaster Risk Assessment was done in terms of the following Disasters/Risks:

- Natural
- Environment
- Technological
- Climate Change

The Challenges and Lessons Learnt were as follows:

- Rapid Disaster Funding allocation and distribution: Unresponsive funding mechanisms represent a core blockage in the recovery process, preventing time-critical activities that will speed recovery and reduce risk. Lengthy procurement procedures also frustrate efforts to rehabilitate infrastructure. For instance, during the recovery and rehabilitation phase after the 2017 fire disaster the environmental workstream and the asbestos removal project highlighted the urgent need for more responsive, quick-release funding mechanisms (i.e.,

within days or weeks) that do not require the funds to be spent within a given financial year. This also highlights the importance of transparency and buy-in.

- Formal and comprehensive record keeping of externally managed projects: we have learned that due to inadequate communication between stakeholders and the public during and after a project has caused some unanticipated tension. In addition, we have missed out on an excellent opportunity to learn from what works, what didn't work, and what to improve on in the future.
- Supporting the "Missing Middle": A group of people of middle-income households and businesses fall through the gaps in the existing social safety nets which leads to the people, the economy and recovery efforts happening slowly. The 2017 fire disaster has highlighted this challenge. The insurance industry could play a role by exploring insurance options that are more affordable and tailored to the needs of pensioners and others in this group.
- Communication: we have learned the importance of effective communication during disasters. It is critical that the authorities communicate with members of the public effectively, as consistently and as early as possible. This is not only essential to keep them informed and safer, but also to ensure that the public is aware of their needs and requirements, and how they can best help.

Councillor Bresler [City of Cape Town] questioned the disaster management, mutual aid agreements amongst Municipalities in the Western Cape and if that might not be a starting point. This will enable Municipalities to find out the resources of neighbouring Municipalities. Disasters are not linked to Municipalities and often goes over boundaries to various Municipalities.

Mr Wilfred Solomons-Johannes [Theewaterskloof Municipality] commented in saying that it will be very difficult for a Municipality to review Disaster Risk every year as it will be a very costly exercise with a lot of scientific evidence, research, and data. It was mentioned that sometimes it is quicker to look at historical events that impact the vulnerability, the scalability and the magnitude that would determine your risk profile. That can then be altered and be move it up and down.

It was also emphasized that politicians need to play a key role in the case of a disaster or a major emergency, Municipalities need their political leadership to be at the forefront. A dedicated media spokespersons also plays a critical role.

Ms Nomhle Arosi [Cape Winelands District Municipality] informed the meeting that Cape Winelands District Municipality entered a partnership with SANTAM where they received funding which ensured our risk reduction measures, procurement of equipment, especially fire equipment, smoke alarm projects through the SANTAM. Cape Winelands District Municipality also have partnership with the NSRI going to Local Municipalities and especially schools to do awareness programmes.

Ms Joubert [Garden Route DM] informed the meeting that she is aware that Province is busy with developing a template on mutual aid agreements for Municipalities to use in future.

Councillor Donovan Gultig [George Municipality] referred to the fire that happened a few years ago due to the invasive alien species. It was noticed that they are cutting down the invasive alien species, but they are just piling it up which is a huge fire risk. The other concern raised was the bars that is used to prevent the fire from spreading in the mountain have been flooded with huge holes, which make it impossible to drive there in case of an fire. It was suggested that the District Municipality and George Municipality work together to work on these challenges/risks.

Ms Joubert [Garden Route DM] responded in saying that the removal of the alien invasive species takes a lot of manpower and is extremely expensive. Mr Clive Africa emphasized that it is a costly exercise, but the District Municipality is busy trying to source funding and some private landowners were approached for assistance. They were not aware of the bars that were flooded but will raise it with Mr Otto from the District Municipality.

Mr Clive Africa [Garden Route DM] requested SALGA's assistance in drafting generic evacuation plans for the province.

NOTED

2.2 A REFLECTION ON THE STATE OF FIRE SERVCIES AND THE PROPOSED DRAFT BILL ON FIRE SERVICES

Mr Tshepo Mothale from SALGA explained that the purpose of the presentation is to provide information to the WC Provincial Working Group [Emergency Services and Disaster Management] on the state of municipal fire services function and the proposed draft bill on fire services.

According to the Legislative Mandate:

RSA Constitution, 1996

- Firefighting is listed as a local government function in Schedule 4 Part B.
- Section 156 (1) (a) in the Constitution does not differentiate between district and local municipalities with the division being indicated in S84 of the Municipal Structures Act.
- By not providing a service such as firefighting, municipalities would be failing in their constitutional obligations.

Fire Brigade Services Act, 1987 [FBSA]

- The purpose of the FBSA is to provide for the establishment, maintenance, employment, co-ordination, and standardisation of fire brigade services; and for matters connected therewith.

FBSA - Local authorities are allowed to establish and maintain a fire brigade service for the following different purposes:

(a) Preventing the outbreak or spread of a fire;
(b) Fighting or extinguishing a fire;
(c) The protection of life or property against a fire or other threatening danger;
(d) The rescue of life or property from a fire or other danger;
(e) Subject to the provisions of the Health Act, 1977 (Act No. 63 of 1977), the rendering of an ambulance service as an integral part of the fire brigade service; or
(f) The performance of any other function connected with any of the matters referred to in paragraphs (a) to (e).

Municipal Structures Act, 1998 (Act 117 of 1998)

In terms of Section 84, a district municipality has the following functions and powers in relation to firefighting services:

(a) Planning, coordination and regulation of fire services;
(b) Specialised firefighting services such as mountain, veld and chemical fire services;
(c) Coordination of the standardisation of infrastructure, vehicles, equipment, and procedures; and training of fire officers.

The MSTA in sections 84 – 89 empowers the MEC's to adjust the division of powers and functions between local and district municipalities, resolve disputes that may arise, allows for temporary allocation of powers and ensure the cooperation between local and district municipalities.

Government Gazette No. R 153, 1994 assigned the administration of the whole FBSA, to the Provinces except Section 2 (Fire Brigade Board) and Section 15 (Regulations).
Local Government: Municipal Systems Act, 2000 (Act No 32 of 2000) Section 77 requires municipalities to conduct a review on the appropriate mechanism for rendering a service.

National Veld and Forest Fire Act, 1998 (Act No. 101 of 1998) , it's purpose is to prevent and combat veldfires using a variety of institutions, methods and practices.

Disaster Management Act, 2002 (Act No. 57 of 2002). Fire Services plays a key role in all these phases of disaster management particularly because fires (all types) are a major hazard faced by the country.

The fire problems in South Africa were highlighted – Currently too many fire services especially from resource poor municipalities are struggling to provide sustainable and cost-effective fire services. The number of lives lost, and injuries sustained because of fires is alarming. Statistics South Africa in its analysis of the cause of death in South Africa based on Death Certificates records attributes 2 241 deaths to smoke, fire and flames in 2009. Figure 1 provides leading types of injury mortality in South Africa with fire accounting for 7% while Figure 2 provides a breakdown of the costs of fires in 2011.

Typical fire services function – Most fire services across the country are rendering the following services:
- Fire Fighting
- Rescue Services
- Hazardous Materials
- Fire Prevention and Safety
- Emergency planning
- Fire and Life Safety Education
- Auxiliary Services [logistics, support services, HR e.g.]
- Operation of Training Academy
- Emergency Medical Services [where applicable]

National Norms and Standards:
- The South African National Standard [SANS] 10090: Community Protection Against Fire is the primary barometer utilised by most municipalities to measure the performance of fire services.
- The purpose of this standard is to provide advice on the measures that should be taken to ensure that fire services are efficient.
- It is important to note that this standard only becomes applicable once a municipality adopts it as its service delivery standard.
- Circular 88 Indicators: Response times/ 1 Firefighter:1000 Population

Inclusion of Fire Services in IDPs
- Most Municipal IDPs reflects Firefighting services as one of the core deliverables but prioritised on budgets.
- The IDP also identified the following fire services challenges:
  - Lack of staff, fire stations and finance.
- In dealing with these challenges, it is critical to note that national government is moving towards a risk-based approach to the provision of fire services.
- This means that capacity must be established to deal with fire risks in municipalities.

The following key challenges in Fire Services were raised:
- Vastness of areas that must be serviced.
- Inadequate resource allocation to the function

- Number of hours per day as opposed to 24 hours due to lack of staff, shift allowances, etc.
- Leadership & capacity constraints in some Fire Services.
- Lack of Financial Delegations to Chief Fire Officers.
- Lack of maintenance plans result in critical shortage of equipment.
- Increasing fire safety challenges due to increase in informal settlements.
- Insufficient emphasis on community fire safety education.
- General poor maintenance of hydrants.
- Unresolved accountability and financial responsibility for function between District and Local municipalities- results in duplication and inefficiency.
- Most services [few exceptions] lack formal capital replacement policies results in excessive downtime and consequent unavailability of vehicles.
- Shortage of technical training such as Urban Search & Rescue, Advanced level Hazmat response capabilities, Incident Management etc.
- Inadequate technical competency on fire safety especially in building plan evaluation & rational designs.
- Some services appoint personnel without due regard to normative technical & physical competencies.

The distribution of Powers and Functions across Districts:

- Section 156 of the Constitution deals with the powers and functions of municipalities and Section 229 deals with the fiscal powers.
- In Section 156 one finds that “a municipality has executive authority in respect of, and has the right to, administer the local government matters listed in Part B of Schedule 4 and Part B of Schedule 5; and any other matter assigned to it by national or provincial legislation.”
- These two processes through which a municipality obtains its powers and functions – Schedules 4B/5B versus assignment of 4A/5A powers and function require different processes and will be dealt with separately.

Division of powers and functions between various categories of municipalities

Division of powers between the various categories of municipalities is underpinned by the following principles –

(a) clear definition of roles and responsibilities is necessary to avoid duplication of efforts and resources which is costly and wasteful;
(b) recognition that District municipalities have an inherent responsibility to support local municipalities in its area of jurisdiction;
(c) recognising the importance of a differentiated approach as opposed to a one-size-fits-all approach that fails to appreciate the specific contextual variables of each municipality;
d) appreciating that the function can be delivered as a shared service as long as roles and responsibilities are clearly defined;
(e) approach to division of powers must be underpinned by the principles of a risk-based approach to the provision of fire services;
(f) The allocation of powers especially for local municipalities must recognise the role played by fire services in building plan approvals, land and township development initiatives amongst others;

Moving towards the Future:

Enhancing the Fire Services regulatory and policy frameworks

- The process of reviewing the Fire Services legislation has gained momentum following approval of the White Paper on Fire Services by Cabinet on 27 May 2020.
- The White Paper was subsequently gazetted on 13 August 2021.
- DCOG (NDMC) has lead a process of drafting (inclusive of consultation) the Fire Services Bill in the ensuing 2021/2022 Financial Year.
- SALGA is confident that the finalisation of the White Paper on Fire Services will provide a strong policy basis for the sector to address some of its challenges.

The following Fire inclusions on the Fire Services Bill was mentioned:

Fire Service master plan:

(1) Each municipality must develop and adopt a master plan outlining how the municipality intends to provide fire services in its jurisdiction.
(2) Each municipality must ensure that its master plan is aligned to that of its province to ensure an integrated approach to the provision of fire services.
(3) A Fire Service Master Plan must be part of the Integrated Development Plan of a municipality.

Powers and duties of a municipal fire service

A municipal fire service must:

(a) Ensure integrated development planning towards uniform fire services;
(b) Coordinate local authority fire services;
(c) Develop specialised fire services capacity to deal with specialised fire risks prevalent in the area such as veldfires, chemical, informal settlements fires;
(d) Develop specialised dangerous goods incident response capacity to perform incident stabilization and perform oversight of cleaning operations;
(e) Develop specialised rescue services capacity focussing on the rescue disciplines prevalent in the area of jurisdiction as a priority;
(f) Coordinate the standardization of infrastructure, vehicles, equipment and operational procedures;
(g) Facilitate and coordinate the training and development of practitioners;
(h) Develop and facilitate implementation of standardised municipal by-laws;
(i) Coordinate planning for the provision of fire safety and prevention;
(j) Develop, implement and maintain mutual aid agreements amongst the local fire services, designated fire authorities, and Fire Protection Associations;
(k) Develop, support and implement community based fire safety and prevention programmes;
(l) Establish and maintain a District Fire Service Coordination Forum;
(m) Prevent the outbreak and or spread of a fire, by making arrangements
(o) Control and stabilise dangerous goods incidents;
(p) Protect life and or property against fire or other related danger;
(q) Rescue life and or property from fire or another form of entrapment;
(r) Render an emergency medical care in support of o-q above;
s) Ensure that it creates the necessary capacity to (SASREA),
(t) Provide fire resilience training to fire practitioners and civil society;
(u) Maintain fire service equipment, infrastructure and or materials;
(v) Conduct fire risk assessments;
(w) Provide training and to fire services practitioners;
(x) Procure equipment, materials and other supplies required to perform the functions optimally;
(y) Provide support in the implementation of Disaster Management Act, 2002 (Act No. 57 of 2002), and
(z) Establish partnerships with governmental and private agencies as well as communities they serve especially for purposes of enhancing community fire safety.

Mr Tshepo Mothale informed the meeting of SALGA's perspective:

- The review of the Fire Brigade Services Act (Act 99 of 1987), as pointed out in the White Paper on Fire Services, is indispensable.
- This is due to the growing need of the society for fire services that can respond to the changing needs, as well as to enable a meaningful contribution to the strategic objectives of the National Development Plan.
- This need for a better legislation is also emphasised when considering the current lack of implementation as found in both the literature study and interviews of the study conducted by SALGA.

- All legislation related to the fire fighting and all its special functions need to be revised urgently to have clear mandates for fire and emergency services.
- Fire and Emergency services need to receive a high priority in local government in so ensuring a better level of service delivery to the communities, prioritisation should be considered on matters relating to:
  - Establishment of a National Fire Services Advisory Council
  - Clarification of the Roles of National and Provincial Government in Fire and Emergency Services
  - Placement of Fire and Emergency Services
  - Standardisation
  - National Fire Code
  - Training
  - Communication and Incident Command

Mr Tshepo Mothale concluded the presentation by informing the meeting that in terms of the MBD 2018 Study Recommendations, identification of capacity requirements to exercise powers and functions is vital. The study has indicated that many municipalities are unaware of how different powers and functions are exercised in each municipality. Given that there are clear variations across provinces both in terms of the location of Powers and Functions (District/Local/Both) and how each function is exercised, working in consultation with municipalities, Provincial COGTAs could define more clearly what it means to exercise each Power and Function so as to be better prepared to engage with provincial and national treasuries around the formulae used for the equitable share and other grants/transfers.

In summary the Way Forward was highlighted:
- Inclusion and prioritisation of fire services deliverables must be outlined in the IDPs;
- Adoption of the SANS 10090 as a standard for delivery of fire services;
- Establishment of fire services capacity across all local municipalities;
- Ensuring fire services is part of decision making structures;
- Continued and sustained support must be provided to fire services in municipalities across all categories;
- Adequate resource allocation to the function;
- Development of MOUs with neighbouring municipalities to maximise resource utilisation and to ensure a coordinated approach in the provision of services especially in cross-border areas; and
- Providing the Chief Fire Officer with appropriate delegations necessary to support the delivery of fire services within the municipality.

Mr Wildred Johannes-Solomons [Theewaterskloof Municipality] highlighted that in the previous legislation that was in place the Municipality may, but in the new reform it compels the Municipality to form part of the National Veldfire Forestry Act provisions.

The challenge of underfunded and unfunded mandates was mentioned. In the Act it states that Municipalities should make separate allocation for this function. It was suggested that when Municipalities consider this allocation, it must be ensured that in the Dora allocation that it is contained within a separate allocation so that we know that we can make use of the funding. It was mentioned that Municipalities don't work on a basis of discretionary funding. If started allocating funds for something that you think might happen and you're going to use your discretion over how to allocate those funds, you have a problem justifying that with Provincial Treasury, as well as National Treasury. When these funds are allocated, Municipalities must know exactly what the program is and what the funds are going to be allocated to.

Councillor Clarke [George Municipality] mentioned the high cost of PPE’s for volunteers and the stipend which Municipalities don’t budget for.

Mr Mzwakhe Nqavashe [City of Cape Town] highlighted that on the Draft Bill that the Fire Brigade activities are Municipality's legislative constitutional rights as local municipalities.

It was requested that SALGA assist Municipalities to pursue the National Department that volunteers about the devolution that funding especially B-Municipalities.

Mr Bertus Senekal [West Coast DM] mentioned that the Bill is not clear on the Division of the Powers and Functions with no clear guidance which of these functions resides with the Local Municipalities and the District Municipalities. The Constitution indicates that a Municipality must have a fire services, but if there is no funding it is not possible. Mr Senekal mentioned that the hope to see that if the Bill becomes an Act that the Standard is now a Regulation and not a standard anymore. This will force Municipalities to comply with the Standards.

Mr Senekal also mentioned that Municipalities get audited by the Auditor-General on financial statements and financial viability, but maybe Municipalities should also be audited if services were rendered/service delivery.

Mr Senekal suggested that maybe SALGA should arrange a meeting with Department Trade and Industry on procurement [local content] as Municipalities procure technical equipment that is not readily available in South Africa as we don't have the industry, but then Municipalities get hampered by local content.

Mr Tshepo Mothale concluded in saying that he captured all the points raised and additional inputs received.
NOTED

3.1 AGENDA ITEMS:

NATIONAL DRAFT REPORT ON THE INCLUSION OF DISASTER MANAGEMENT AND FIRE EMERGENCY SERVICES IN THE IDPs AND SDBIPS

Mr Trevor Lombard [SALGA] informed the meeting that the National Working Group Meeting took place on 12 December 2022.

The following was highlighted from the report:

4.2 Currently, the FBSA provides for local authorities to establish and maintain a fire brigade service for the following different purpose:

a. Preventing the outbreak or spread of a fire;
b. Fighting or extinguishing a fire;
c. The protection of life or property against a fire or other threatening danger;
d. The rescue of life or property from a fire or other danger;
e. Subject to the provisions of the Health Act, 1977 (Act No. 63 of 1977), the rendering of an ambulance service as an integral part of the fire brigade service; or
f. The performance of any other function connected with any of the matters referred to in paragraphs (a) to (e).

4.4 Building closer working relations – It is important to note that while fire service is a line function and disaster management a coordinating function, there must be closer working relations and cooperation between these two critical services. Furthermore, in discharging the duties alluded to above, especially those related to emergency response and other life-saving activities, a fire service is essential service which must prioritised in IPDs, SDBIP and budget reviews.

5. ENVISAGED IMPACT TO MUNICIPALITIES

- Measures for humanitarian relief, stabilization, and recovery as well as rehabilitation and reconstruction of damaged to critical infrastructure and basic services such as health and education facilities implemented in municipalities.
- Coordinated, quick response and recovery during disasters
- Promote Disaster Risk Reduction in Municipalities

NOTED.

3.2 NATIONAL UPDATE REPORT ON THE FLOOD RESPONSE INTERVENTIONS

Mr Trevor Lombard [SALGA] highlighted the following from the report.

The nine operational task teams set up by National Disaster Management Centre [NDMC] are still active to deal with the effects of the floods as follows:

a. Health and Medical Services [Lead: Department of Health];
b. Humanitarian Relief and Donor Coordination [Lead: Department of Social Development];
c. Integrated Flood Risk and Early Warnings [Lead: DCOG-NDMC];
d. National Food and Nutrition Security [Lead: DALRRD];
e. Communication and Community mobilization [Lead: GCIS];
f. Security and Emergency Search and Rescue [Lead: South African Police Service (SAPS)];
g. Infrastructure Interventions [Lead: Public Works and Infrastructure and DCOGMISA]; and
h. Finance and International Contributions Coordination [Lead departments: National Treasury and International Relations and Cooperation]
i. Economic Recovery and Reconstruction [Lead: Trade and Industry and Competition].

Envisaged impact to municipalities

- Measures for humanitarian relief, stabilization, and recovery as well as rehabilitation and reconstruction of damaged to critical infrastructure and basic services such as health and education facilities implemented in municipalities.
- Coordinated, quick response and recovery during disasters
- Promote Disaster Risk Reduction in Municipalities

NOTED

3.3 NATIONAL DRAFT REPORT ON THE STATUS OF THE POWERS AND FUNCTIONS ON THE DRM AND FIRE SERVICES

This item was dealt with under Item 202 of the Agenda.
The Report was NOTED.

3.4 UPDATING OF MUTUAL AID AGREEMENT AMONG WESTERN CAPE MUNICIPALITIES TO DEAL WITH DISASTER RISK, MAJOR INCIDENTS AND DISASTERS

Councillor Rhynhardt Bresler [City of Cape Town] reported on this item that the mutual agreement between Municipalities should be revised to entitle the mutual effectiveness and reducing the disasters risk and dealing with the impacts of major incidents and disasters for example the nuclear emergency evacuation Cape Town [north to western coast], major aircraft accidents in the mountains of the Cape Winelands, major oil spill in the Western Cape coastline, blackouts etc. The mutual agreements should include how to request or offer assistance, notification and activation deployment, command and control, disaster incidents and financial aspects such as user changes, insurance and discounts. In the agreements it can also deal with early warning systems as well as communication between Municipalities on the early warning systems.

A concern was raised now that the Electricity was declared as a disaster by the President and the question was posed to SALGA to what extent are we proactive as SALGA and this working

group regarding the announcement? There are no regulations promulgated yet and the question is to what extent can we as SALGA and all the municipalities participate in compiling such regulations? How will we engage with National to formulate these regulations?

Mr Trevor Lombard [SALGA] responded in saying that he will escalate the request to SALGA National for discussion and consideration.

NOTED

4. SALGA ON-LINE EVALUATION FORM

The Chairperson reminded all Working Group members to complete the SALGA On-Line Evaluation Form shared via WhatsApp.

5. DATE OF THE NEXT MEETING

The date of the next Provincial Working Group meeting will be communicated.

6. CLOSURE AND ACKNOWLEDGEMENTS

The Chairperson thanked everyone for their attendance, their inputs and participation during the meeting.

The meeting adjourned at 12:39.

The Minutes of the Emergency Services and Disaster Management Working Group meeting held on 16 February 2023 were adopted on _____ 2023.

1.3 EVACUATION PROCEDURE

Mr Anwin Los from King George Hotel explained the evacuation procedure to the meeting.

NOTED

1.3 APPROVAL OF THE HEALTH WORKING GROUP OF 10 OCTOBER 2022

The Minutes of the Health Working Group Meeting held on 10 October 2022 was moved by Councillor Eventhia Vaughan [Saldanha Bay Municipality] for adoption and seconded by Councillor Xoliswa Mdemka [Cape Wineland District Municipality].

NOTED

1.4 MATTERS ARISING FROM THE MINUTES OF THE HEALTH WORKING GROUP OF 10 OCTOBER 2022

No matters arising.

NOTED

1.5 ADOPTION OF THE AGENDA

The adoption of the Health Working Group was proposed by Cllr Anel Berry [Oudtshoorn Municipality] and seconded by Cllr Kariena Maré [City of Cape Town].

ADOPTED and APPROVED

2. PRESENTATIONS:

2.1 MUNICIPAL HEALTH INFORMATION, PERFORMANCE AND EARLY WARNING SYSTEM

Mr Francois Koelman presented on the Municipal Health Inspection Application informing the meeting that in 2012 Garden Route District Municipality [then Eden District Municipality], in partnership with Business Engineering, decided to develop a paperless inspection system. Apart from the issuing of the certificates as well the issuing of notices, all other administrative functions would be done electronically.

In general, the average inspections per year was about 7961 inspections and 6000 samples, which included food and water samples, done by 40 qualified Environmental Health Practitioners [EHPs].

As the District Municipality faced financial challenge, they could not afford to do the inspection of State-Owned facilities, which became compulsory in 2012, because of the additional financial burden, and shortage of staff.

A meeting was held with Business Engineering to further extend the paperless exercise, using mobile devices, such as a cell phone. A presentation was done to Senior Management to present to them this cost saving initiative as well as other quality control and audit advantages, and they supported the project.

The Rationale behind the application was to make optimal use of resources [phone, camera, laptop] and inspection books all in/on one device, to reduce paper usage and work more cost effective.

The benefits to the Employee:

- All relevant information will be immediately available to do more detailed inspections on the premises
- Less time is spent on administrative tasks as there will be no need to write it down and then process later at the office.
- More inspections can be done per day as travelling time to and from the office to complete tasks or obtain relevant information can be eliminated
- Report writing will improve by giving more detailed information by also attaching pictures to the report.
- The improvement of daily and weekly planning.
- The potential expansion applications and programs specific to the needs of Garden Route District Municipality.
- The training of employees with regards to computer literacy will help them become more of an effective asset for Garden Route District Municipality.

Benefits to Employers:

- The improvement of monitoring and verification of EHPs outputs.
- Duration of inspections can be monitored.
- The exact time of when inspections are conducted can be monitored.
- Corrective measures, that also require assistance, can be applied faster.
- Better informed decisions can be made timelier for situations that would require immediate action, to avoid the escalation of the situation.

Benefits to Clients:

- Quick feedback on inspection reports.
- Faster response or feedback can be given to clients regarding their queries.
- Quicker completion of tasks, for example the issuing of compliance certificates for premises.

- Improved technical decision-making can be made to the benefits of businesses. They will be able to get feedback quicker rather than waiting for an EHPs to come back later with feedback.
- In general this means a much more improved and professional service is delivered to clients.

Garden Route District Municipality did not invent the concept, but they extended their own paperless inspection through the cell phone device.

Furthermore, this Municipal Health Application is being seen as a best practice for rendering Municipal Health Services ([MHS] in the country.

In addition to the above mentioned it is important to note that this system will also be used as a performance management tool for MHS with specific references to the implementation and measuring of individual's performance for EHPs.

The cost implications were explained:
- Garden Route District Municipality has a long term contract with the service provider, Business Engineering.
- The original development cost was R200 000
- Cell phone contracts costs:
  - R570 X 40 EHP'S = 273600 p/y
  - DATA, talk minutes, free calls to colleagues and the office
- Indirect cost savings
  - Saving ± 20% time
  - 3.6 million in time value

Mr Francois Koelman concluded the presentation by informing the meeting that the Environmental Health challenges of the 21st century must surely also be addressed through technological advances and innovation.

The greatest asset of any organization must be its valuable human capital. Effective and efficient service delivery, in a global environment, under huge financial strain, can be made possible by *"smart people, smart officials".* We need to do more with what we have available.

The available time saved by this innovation also creates the opportunity for EHPs to focus more on the science of Environmental Health as well as more focus on new emerging diseases like the Zika virus, and old diseases like Bubonic plaque antibodies in rats. HIV/AIDS continuous education should also not be forgotten.

Ms Jessica Erasmus did a live demonstration of how the application work and the benefits.

The meeting was very impressed with the application and was a best practice within the Western Cape. Ms Jessica Erasmus also mentioned that the application can also work while there is loadshedding and also work offline.

It was mentioned that it is expensive to start the application, but in long term it will be a money saving to the Municipality.
NOTED

2.2 SALGA POSITION PAPER ON LOCAL GOVERNMENT RESPONSE TO HIV, STI AND TB

Dr Thabo Sepuru from SALGA National updated members on the development of position paper on strengthening local government response on HIV, TB and STI and the progress

thereof, the position of SALGA was presented to solicit further inputs on strengthening local government's position on HIV, TB and STI.

Dr Sepuru shared the following background and rationale:

- South Africa's HIV prevalence remain the highest in the world with 8.45 million of the country's population leaving with HIV in 2022 while TB remained the leading cause of death in the three years from 2016 – 2018.
- In January 2000, The South African National AIDS Council [SANAC] was formed, replacing the Inter-Ministerial Committee on AIDS [IMC], which was at the time the first high-level political body tasked with providing guidance, leadership and political oversight on HIV and AIDS.
- SANAC brings together government, civil society and the private sector to create a collective response to HIV, TB and STIs in South Africa. SANAC is doing this through the development of a 5-year term National Strategic Plans on HIV, TB and STIs and the country is now in the process of finalising the fifth generation of the strategic plans [NSP 2023-2028].
- The first [2000-2005] strategic plan proposed that AIDS Councils be established at provincial and district levels to guide the implementation of the strategic plan.
- Municipalities have been coordinating the HIV and AIDS response at local level through Municipal HIV and AIDS response programmes and AIDS councils, however the local government response hasn't progressed well due to lack of resources and overlapping mandates, roles, and responsibilities amongst different role players.
- The challenges extend beyond the issues of roles and responsibilities and include poor leadership, lack of funding and high staff turnover in the offices supporting public office bearers which are the staff usually coordinating the HIV/AIDS programmes.
- The frameworks and guidelines developed to guide local government response has so far not assisted in addressing the challenges impeding local government response.
- The situation undermines the objective of local government to promote social and economic development within the communities they serve through the delivery of many services.
- The costs of HIV/AIDS to municipal areas extend beyond the loss of life and increased suffering. There are currently many child-headed households and many people laid off as a result of the epidemic.
- HIV and AIDS has led to the high demand of burial spaces and free basic services from municipalities. Increasing health service demands are coupled with a decreasing ability to pay for municipal services.
- Loss of skills, and tax revenue also impede the ability of a municipality to pursue goals of development and threaten its ability to provide its core services.
- A policy position which clarifies the role and resourcing of local government will go a long way in addressing the challenges encountered by local government and other stakeholders in terms of knowing how best to direct their efforts.
- Consensus amongst all role players will be key in realising the purpose of this exercise and therefore consultation with relevant stakeholders is critical.

A consultation session was held, and the following Stakeholders were consulted:

- Municipalities through clustered provincial consultations sessions.
- Councillors during portfolio-based councillor inductions.
- SALGA Working Group Members responsible for Health.
- Gauteng AIDS Council.
- Further consultation will be done with other Provincial Aids, Key governance structures and stakeholders.
- Continuous engagements with SANAC to provide the required support.

The following key aspects were raised from the Consultation Session:

- Consensus that local government has a key role to play in the response to HIV, TB and STI.
- Varying understanding of the role that local government should play in the HIV response.
- Varying institutional arrangements to support the responses [Some municipalities do not have dedicated support staff, secretariat located within the health departments depending on the institutional arrangements, to ensure continuity and institutional memory].
- Challenge pertaining to resources or funding the local government response.
- Governance on HIV, STIs and TB in municipalities, e.g. establishment and functionality of AIDS councils [Councils not constituted, councils not sitting, not chaired by mayors as expected]
- Varying capacity on mainstreaming of HIV, STI and TB response. For instance, inclusion in the IDPs of municipalities and other programmes

Recommended Policy Position:

Governance and leadership

- AIDS Councils at Districts and Local level councils be chaired by executive mayors and mayors to ensure alignment with provincial and national structures which are chaired by the premiers and the presidency respectively. This will promote leadership and accountability at local level and encourage sector leaders to take part.
- "Any other councilor designated by the municipality" MMC/Head of Portfolios for Health/Social or Community Development forms part of the AIDS Council. This will strengthen the political support to the local response.
- SALGA to represent local government at SANAC plenary. This will ensure Local Government representation and accountability at national level.
- The HIV, TB and STI agenda should be integrated into the programme of SALGA Council of Mayors. This will enable better coordination of HAST in municipalities and promote leadership, governance and accountability on HIV and AIDs.

The role of SALGA was stipulated as follows:

- Support, advocate and represent the interest of local government in respect of HIV, TB and STI at relevant structures and platforms.
- Build the capacity of councillors and municipal officials.
- Support and advise municipalities on range of issues pertaining to HIV, TB and STI response.
- Profile the work of local government in response to HIV, TB and STI.
- Provide knowledge and information sharing platforms.

The role of the Municipalities – the following functions align with the core mandate of local government and are recommended to be the following:

- Champion the implementation of the NSP at municipal level.
- Drive the implementation of Multi-Sectoral District Implementation Plans [MDIPs] and local plans.
- Coordinating engagement between relevant stakeholders within their area of jurisdiction.
- Identifying the HIV prevalence and incidence within the municipalities and the implications this will have for service delivery and governance capacity.
- Ensures municipal plans, programmes and projects mainstream HIV and AIDS.
- Developing and implementing indigent policies which includes those infected and affected with HIV and AIDS.
- Upscale the provision of basic services to vulnerable groups.
- Ensure that municipal by-laws and procedures consider the impact of HIV and AIDS

Funding of local government response

- HIV is an issue of National interest and therefore it is recommended that:
- Municipalities must from own financial capacity strive to make funding available to respond towards HIV, TB and STI
- SANAC must mobilise funds to funds AIDS Councils Operations
- The National Treasury must make funding available to supplement funding made from municipal budgets.

Institutional arrangements for HIV, TB and STI response

- Municipalities must as part of building their capacity towards HIV, TB and STI response appoint competent people to manage and or coordinate HIV, TB and STI municipal response programmes. Municipalities as part of the multi-sector stakeholders must initiate and implement response programmes.
- HIV coordinators must be appointment on a permanent basis rather than the political term of office.
- SANAC must appoint competent secretariat staff to coordinate the work of the AIDS councils. The coordination of the AIDS Councils work should not be seen as part-time or but a full-time responsibility.

The following recommendations were approved by the Working Group:

1. The Report was noted.
2. That Municipalities input on the proposed local government position.

NOTED

2.3 PROPOSED 2023/2024 APP ACTIVITIES

Dr Thabo Sepuru from SALGA shared the Municipal Health 2023/2024 APP Activities with the meeting.

One of the APP Activities were that 24 municipalities were supported to improve the local government response on HIV, TB and STIs by 31 March 2024.

The following Municipalities from the Western Cape were selected to form part of the support:

- HIV – Overberg DM and West Coast DM
- MHS – Garden Route DM and Cape Winelands DM

The report was NOTED.

3.1 AGENDA ITEMS:

SALGA PRESENTATION AT THE EXTENDED SANAC PLENARY

Mr Trevor Lombard informed the meeting that the Extended SANAC Plenary Meeting held 15 July 2022 in Northwest expressed concern about the lack of attendance by the leadership at national and provincial level and resolved that a special meeting be convened by the office of the Deputy President with Premiers and Sector Leaders, to discuss the issue of active participation in upcoming Plenary meetings. The plenary also resolved that an engagement should take place with the Premier of the Western Cape to discuss the provincial response to HIV and TB, including the composition and functionality of the provincial Council.

It was also reported that AIDS Councils at local level are not meeting, and Mayors are not accountable and that SALGA should play a more active role in the HIV and TB response. SALGA was therefore invited to make a presentation on the role of SALGA in strengthening the AIDS response at extended the SANAC plenary meeting held on 24 November 2020 at the Cape Town International Convention Centre, Western Cape.

Cllr Jacoline Visser made a presentation on behalf of the Chairperson of the Working Group Cllr Dr Annelie Rabie. The presentation covered SALGA and its mandate, Capacity building programmes, SALGA Position Paper on Local Government Response to HIV, TB and STI, Key Issues affecting Local government Response, Progress on the development of the position paper and the recommendations for strengthening local government response to HIV, TB and STI.

The following recommendations were tabled to the Extended SANAC Plenary as part of the presentation.

- That the SANAC Extended Plenary note the capacity building programme conducted by SALGA on roles and responsibilities of councillors on HIV and AIDS response.
- Note that SALGA is in the process of developing a Position Paper on the Local Government's response to HIV, STIs and TB.
- That the Extended Plenary inputs into the processes undertaken by SALGA to strengthen the HIV/AIDS response at local level
- SALGA become a permanent member of the SANAC Plenary.

The Extended SANAC Plenary welcomed the recommendation for SALGA to become a permanent member of the SANAC Plenary with an applause.

NOTED

4. SALGA ON-LINE EVALUATION FORM

The Chairperson reminded all Working Group members to complete the SALGA On-Line Evaluation Form shared via Whatsapp.

NOTED

5. DATE OF THE NEXT MEETING

The date of the next Provincial Working Group meeting will be communicated.

6. CLOSURE AND ACKNOWLEDGEMENTS

The Chairperson thanked everyone for their attendance, their inputs and participation during the meeting.

The meeting adjourned at 10:27.

The Minutes of the Health Working Group held on 15 February 2023 were adopted on _____ 2023.

COUNCILLOR JACOLINE VISSER
CHAIRPERSON: HEALTH WORKING GROUP

WITZENBERG

MUNISIPALITEIT UMASIPALA MUNICIPALITY

- MEMORANDUM -

AAN / TO: Municipal Manager

VAN / FROM: Manager Legal Services

DATUM / DATE: 13 September 2022

VERW. / REF.: 7/1/4/1

IN RE: REQUEST TO SWOP ERF 85 OP DIE BERG FOR A PORTION OF ERF 417 OP DIE BERG

PURPOSE

To consider recommending to Council swopping erf 85 Op die Berg for a Portion of Erf 417 Op die Berg.

DELIBERATION

Erf 85 Op Die Berg – See attached Map

- Erf 85 are still registered in the name of the NG Church of Op Die Berg, but in terms of Town Establishment this erf vests within the Municipality.
- Registration of Erf 85 never took place;
- The Erf is zoned Open Space I.
- Size: 3,2 ha
- This erf was maintained over the years by the Church;
- The erf is not of value for the municipality as it is uneven rocky piece of land

Erf 417/0 Op Die Berg – See attached Map

- NG Church is the property owners of Erf 417/0
- Zoning: Agricultural I
- Size: 210ha, of which ± 4,6ha are to be swopped as it is basically the only portion that can be utilised.

The church does not make use of the portion of Erf 417/0 that we enquired about. There is a serious need for socio, economic develeopment in Op Die Berg, but we do not own land for this purpose. The Church shares the sentiment for a socio economic project whereby the community can benefit.

LEGAL IMPLICATION

It is trite law that Council can only sell property through a competitive process unless the sale is important for local economic development and further where the participation of other members of public in the process is

impractical. Council needs to resolve in terms of the Municipal Finance Management Act that the land is not required for basic minimum services and that it be sold at a market related price.

The the swop of land is subject to successful rezoning and subdivision.

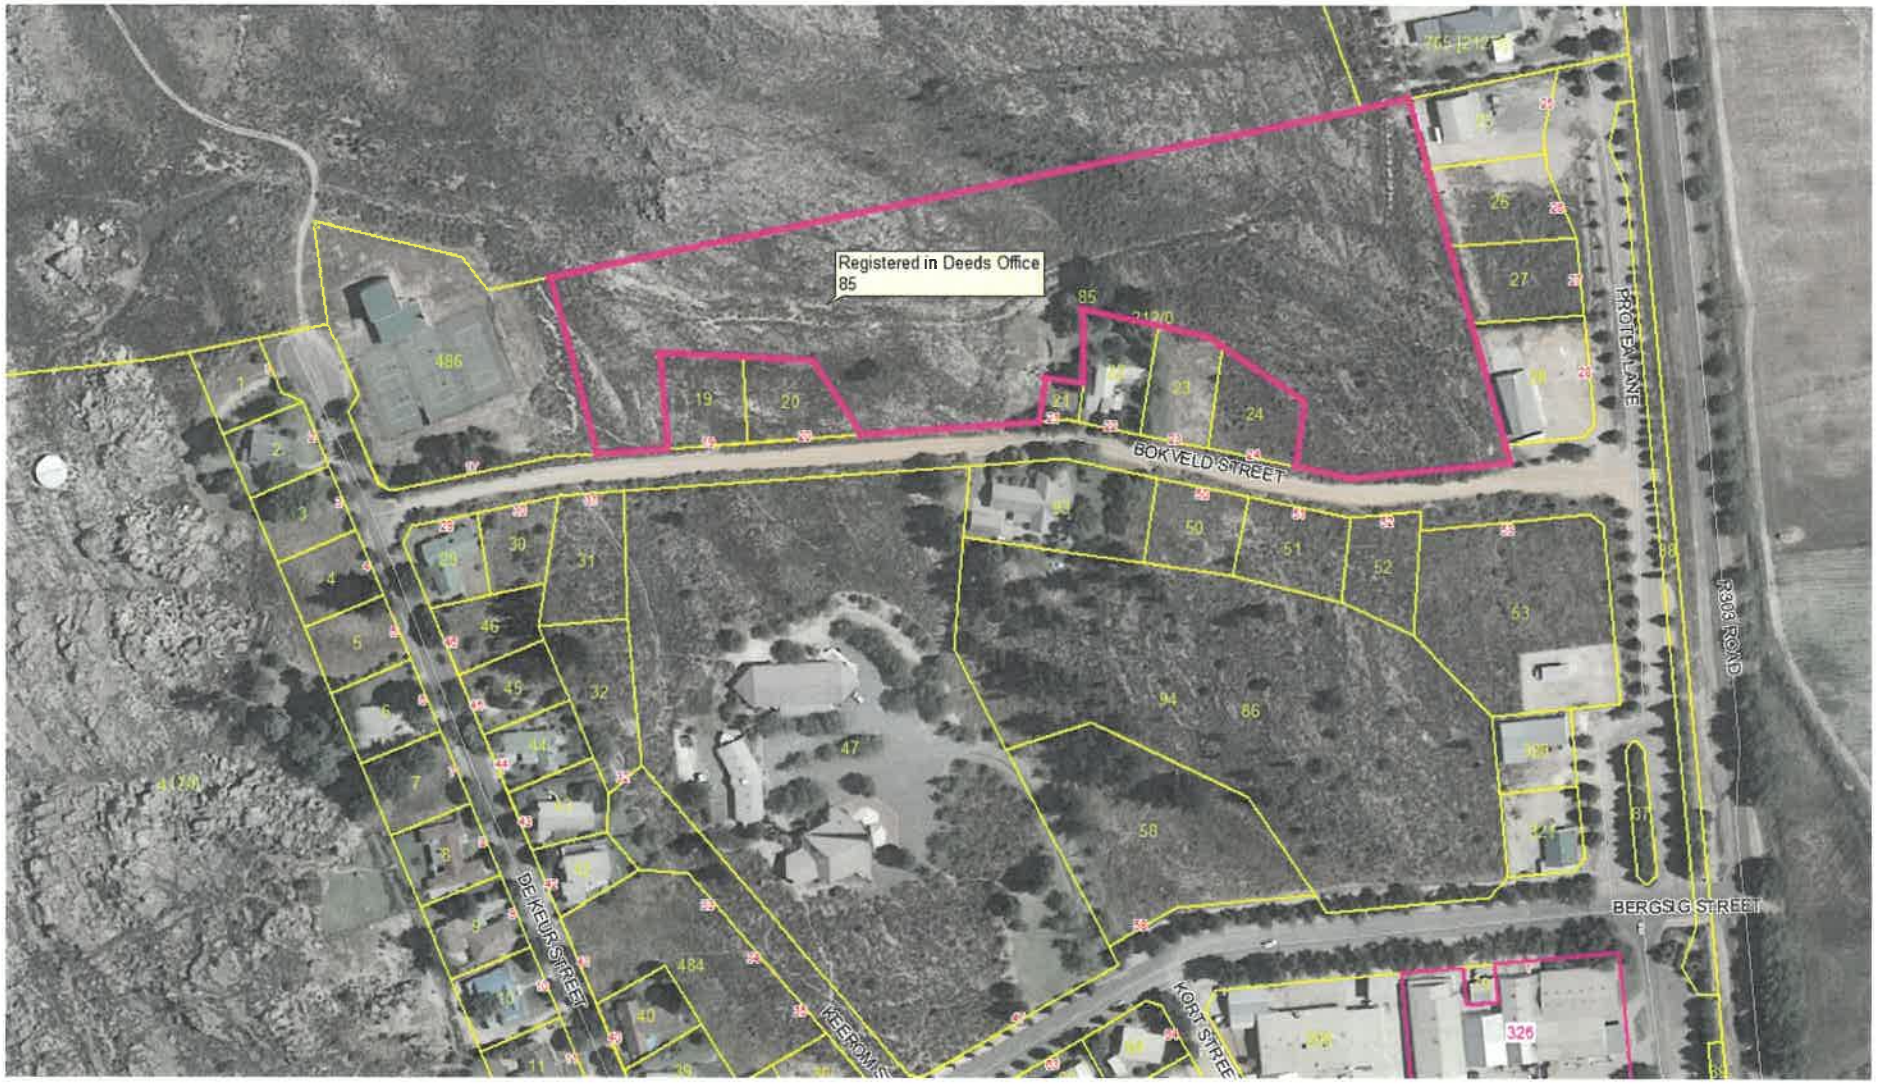
FINANCIAL IMPLICATION

The Subdivision and Rezoning of Erf 417/0 will be for the account of the Muncipality as well as the transfer thereof.
The transfer of Erf 85 to the Church will be for the account of the Church.

TO RECOMMEND TO CORPORATE COMITEE

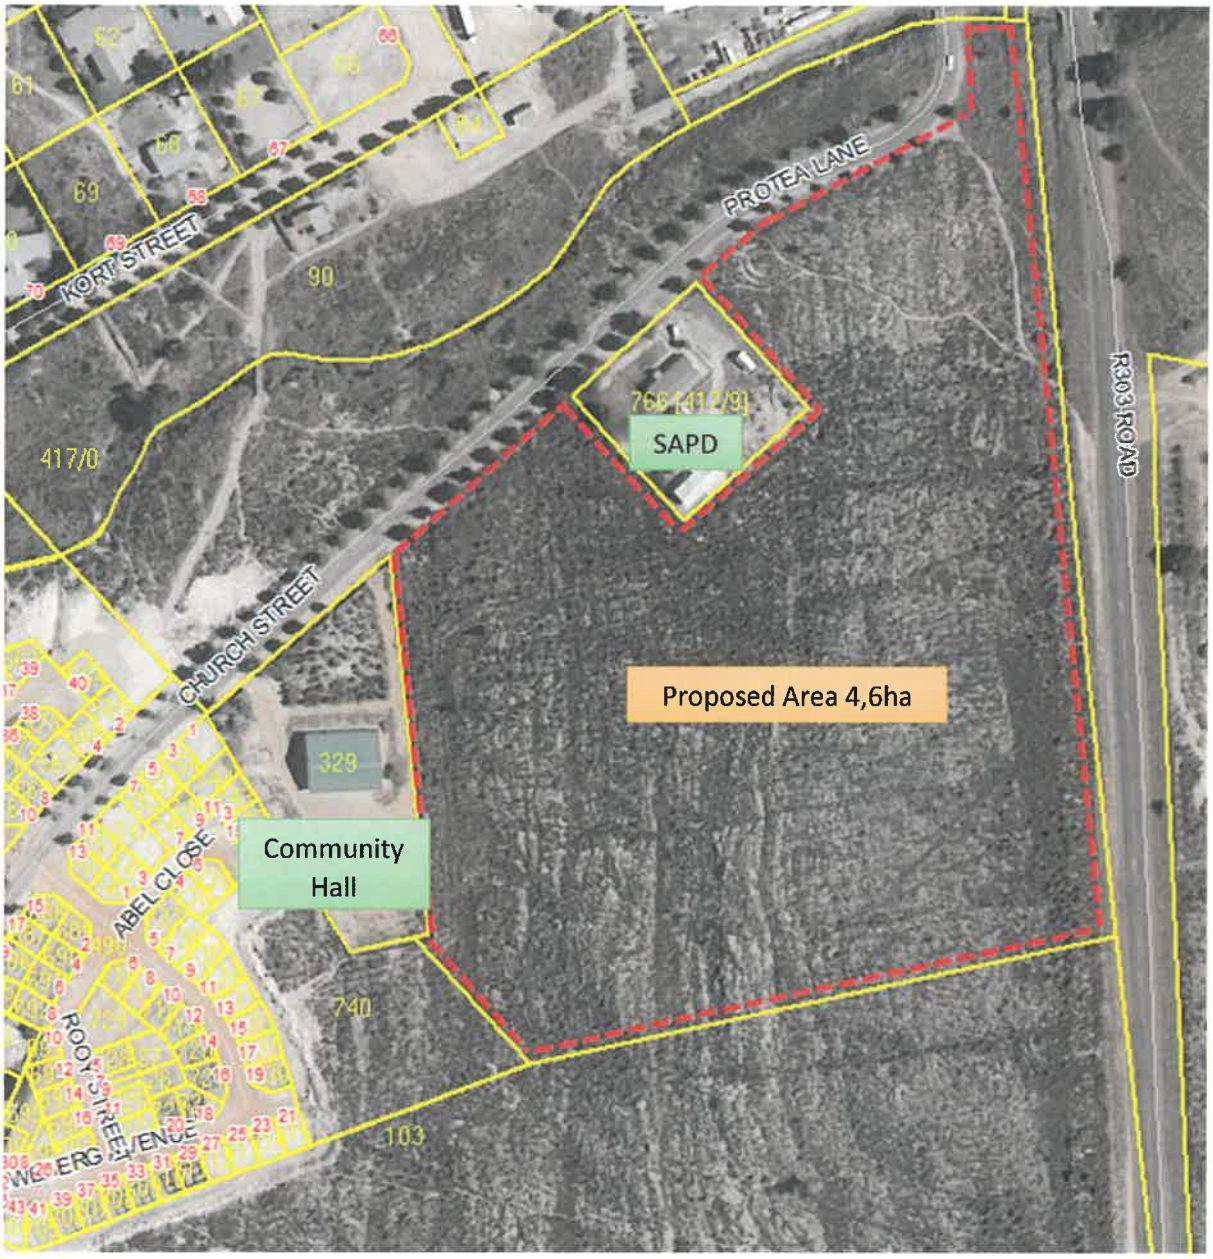
For Consideration

ERF 85 OP DIE BERG



Portion of Erf 417, Op-Die-Berg

Proposed Area: 4,6ha (estimate) ---



WITZENBERG

MUNISIPALITEIT UMASIPALA MUNICIPALITY

- MEMORANDUM -

AAN / TO: Municipal Manager

VAN / FROM: Manager Legal Services

DATUM / DATE: 13 April 2023

VERW. / REF.: 7/1/4/1

IN RE: REQUEST TO PURCHASE ERF 2459, CERES

PURPOSE

To consider recommending to Council the selling of erf 2459, Ceres (extent 121 m2) to ajacent owner of Erf 1777, Johan Mostert Trust (Talisman Hire Ceres).

DELIBERATION

Council is the owner of erf 2459, Ceres, situated at the back of Erf 1777, Ceres (Talisman Hire Ceres). Please see map below.

One of the Municipality's electrical substations was stationed on Erf 2549, but was moved to the corner of Voortrekker street and Malherbe Street. The is no access road to Erf 2549, Ceres other than over Erf 1777. Johan Mostert Trust, owner of Erf 1777 requested from the Municipality to buy this small piece of land from the Municipality because they intend to expand their building (Talisman Hire) and the Municipality does not intend to utilise the property any longer as it is only 121sqm.

INPUT FOR TECHNICAL MANAGERS:

MANAGER ELECTRICAL SERVICES

The Municipality has no intentions of using the old Voortrekker substation again. However, it should be noted that there is a low voltage supply cable that runs on the erf 2549 boundary, supplying quite a number of houses in Orange street. It is therefore critical that my team is notified well in advance to help show the prospective owner the existing cable route and also be noted that he will continuously need to provide us access should there be a cable fault on that cable.

Also, inside the brick built substation, there is still a transformer, an LV panel together with cables which will need to removed and this will require the structure to be demolished to allow a Crane truck to lift and pull out the more than 2meters high transformer and the LV panel in the substation.

MANAGER STREETS AND STORM WATER
No objection.

It should be noted that the Land Surveyor informed us that their might be fibre cables running across Erf 2549, Ceres.

SENIOR MANAGER TOWN PLANNING

If Council approves the sale, it should be subject to the following conditions:

1. Aansoek moet gedoen word vir hersonering van Erf 2549 vanaf "Authority zone" na "Business I"
2. Aansoek moet gedoen word vir konsolidasie van Erf 2549 met Erf 1777.
3. Professionele persoon moet aangestel word om bg aansoek te hanteer.

WATER AND SEWERAGE

No Objection.

LEGAL REQUIREMENTS

It is trite law that Council can only sell property through a competitive process unless the sale is important for local economic development and further where the participation of other members of public in the process is impractical. Council needs to resolve in terms of the Municipal Finance Management Act that the land is not required for basic minimum services and that it be sold at a market related price.

FINANCIAL IMPLICATION

There is no negative financial implication attached to the transaction. If Council considers the sale it will enhance and improve the value of the properties if consolidated. This will effectively mean that Council will generate more income through services and rates.
The applicant to carry all costs relating the sale transaction and removal of old substation.

TO RECOMMEND TO CORPORATE COMITEE

i. that the Corporate Committee considers recommending to Council the alienation of the municipal property in favour of Johan Mostert Trust.

ii. that erf 2549, Ceres is not required for minimum basic services.

iii. that erf 2549, Ceres be sold at a market related price.
